#### 5.2.2. Developments with Multiple Principal Uses

- A. When all principal uses of a development fall within one use category (see Section 5.1, Use Interpretation) the entire development shall be assigned to that use category.
- B. When the principal uses of a development fall within different group of uses or no group of uses, each principal use shall be classified in the applicable group of uses or treated as an individual use and each use shall be subject to all applicable regulations for that group of uses or individual use.
- C. A development comprised of uses regulated by separate rows on the Permitted Use Table shall be reviewed using the most restrictive process from among the proposed uses.

*Commentary: If a proposed development includes a gas station, library and a restaurant, including outparcels, and one of those uses is only permitted with a special use permit in the district, then the entire development requires special use permit review.*

- D. Where a use requiring approval as a limited use or a special use lies on a separate legal parcel, only the building containing the use and its separate parcel shall be subject to review, not the entire project. However, where the separate legal parcel is an outparcel, the application shall describe the relationship of the outparcel to the remaining site.

*Commentary: For example, where a vehicle repair shop in a C-LD District (subject to special use review) is an outparcel within a larger retail development, the special use permit shall review the outparcel only – not the entire development. However, where a special use is proposed in a building that contains a variety of other uses, the entire building and its associated parcel(s) of land shall require special use review.*

- E. Multiple dwellings as principal uses on a single parcel shall be subject to Section 5.4.3.
