

A TOPCON GTS-2B TOTAL STATION was used to obtain the linear and angular measurements used in the preparation of this plot.

The field data upon which this plot is based has a closure precision of one foot in 22,000 feet and an angular error of 2" per angle point and was adjusted using the compass rule.

This survey has been calculated for closure and is found to be accurate within one foot in >135,000 feet.
