CAMA LAND USE PLAN (UPDATED 2023)

The CAMA Land Use Plan’s purpose is to encourage town leaders to preserve the natural resources and small town waterfront lifestyle that has prevailed for more than a century. The goal is to maintain and expand historic access to the waterfront by merging environmentally sound practices with resilient community, recreational, and commercial interests. Oriental supports growth and development that is diverse, environmentally sensitive, economically sustainable, and consistent with the natural, historical and cultural character of Oriental.

BUILDING 1

This building is a seafood processing facility located along the waterfront consisting of a single-pole frame and block masonry fish house containing a gross area of 6,843 SF. Approx. 2,654 SF of this building is constructed on pilings within the riparian and littoral rights of Raccoon Creek. Construction consists of a combination of frame and concrete block masonry exterior walls, a metal roof and minimal finish. The primary use of the building with the concrete loading docks and ramps is designed for seafood processing. This is on the original seafood processing buildings located along the waterfront.

BUILDING 2

This is a pole-frame shelter and concrete block masonry crab processing facility located on the waterfront and contains approximately 11,271 SF of gross building area. Construction consists of a concrete slab floor with a gable-designed roof constructed of wood trusses and plywood deck covered with tin. Light is provided by suspended fluorescent strip lights. A major portion of the building consists primarily of an open loading dock area. The balance of the building is enclosed and utilized for a crab picking facility. This portion of the building is equipped with a break room, two restrooms, and a small office area.

BUILDING 3

This is a 2-story frame dwelling renovated with additions for laborer quarters. The gross building area is calculated to be 9,624 SF. The interior consists of 16 bedrooms, 14 bathrooms, a large kitchen/dining area, and a living room area. Construction consists of concrete block piers with frame construction covered with a mixture of wood siding and vinyl. The interior finish consists of vinyl and carpet over wood floors and paneled walls. The building is equipped with central heat and air conditioning provided by through-wall heat pumps. The roof is constructed of wood rafters, covered with a wood deck and tin. This former dwelling was originally constructed around 1940, with renovations and additions made over the past several years. The facility has been remodeled and renovated for housing of migrant laborers in the crab processing facility.

BUILDING 4

This is a single-story frame dwelling measuring 30' x 49', containing 1,470 SF and was originally designed and utilized as an office and

has been remodeled and renovated for living quarters. Construction consists of frame construction on concrete block piers. The roof is a gable design constructed of wood rafters and covered with tin. The interior floor plan consists of 3 bedrooms, 3 bathrooms, a living room, and a kitchen/dining combination. The interior finish consists of panel-covered walls with vinyl and carpet floor coverings. The building is equipped with central heat and air conditioning.

BUILDING 5

This is a single-story pre-engineered metal building originally designed and constructed for a grocery store. Currently, the building is used primarily as a discount and retail store. The building contains a gross area of 4,543 SF. The major portion of the building is utilized as a retail sales area, with the rear storage area equipped with two two-fixture restrooms. Construction consists of a pre-engineered metal building constructed on a reinforced concrete slab floor system. The exterior walls and roof are metal, with the interior finish consisting of a combination of drywall, pegboard, and acoustical tile ceilings. The building is equipped with 200-amp electrical service and surface-mounted fluorescent strip lights. The retail area is equipped with central heat and air conditioning. Tax records reveal this was constructed around 1986.

BUILDING 6

This two-story, pre-engineered metal building is 7,904 SF (measures 52' x 76' containing 3,952 SF on each floor). The ground floor consists of a small office area and 3 built-in freezers. The 2nd floor area has approx. 2,652 SF of finished office space. The balance of the 2nd floor contains approx. 1,300 SF of unfinished office space utilized for storage only. The exterior walls and roof are covered with metal. The interior office finish consists of drywall over stud frame partitions. The office area is equipped with central heat and air conditioning provided by a heat pump. The major portion of the 1st floor has been equipped with freezers, a small office area and one 2-fixture toilet room. Constructed in 1994 and appears to be in good condition.

SITE IMPROVEMENTS

Related site improvements include an asphalt-paved parking area, bulkhead, a combination of wood and concrete floor docks, a pier and dock measuring 213 linear feet, and miscellaneous landscaping. (The above-ground fuel tanks are considered personal property.)

PAMLICO COUNTY

Pamlico County, NC, is a quiet, rural coastal county known for its natural beauty, water access (Pamlico Sound, Neuse River), small towns (Bayboro county seat, Oriental), fishing, farming, and tourism, attracting retirees and boaters with its historic charm and outdoor recreation, despite facing challenges like poverty and hurricane vulnerability. Formed in 1872 from Beaufort and Craven counties, it's characterized by forests, marshes, and a rich history tied to the Pamlico Indians, offering a slower pace of life on the coastal plain.

ORIENTAL

Oriental, NC, is a charming waterfront town on the Neuse River known as the **"Sailing Capital of North Carolina,"** offering deep-rooted maritime culture, scenic harbors, and a relaxed coastal lifestyle. With a walkable downtown, marinas, local shops, and dining, Oriental attracts boaters, retirees, and visitors seeking small-town character with strong water access. Founded in the late 1800s and shaped by fishing, boating, and trade, the town blends historic coastal charm with outdoor recreation, community events, and a steady appeal as a niche destination along the Inner Banks.
