# CLAIM HISTORY WITH THIS RARE, ±234 ACRE MIXED-USE **OPPORTUNITY**

Kidder Mathews is pleased to present this rare mixed-use development opportunity located less than 30 miles southwest of Las Vegas.

This property consists of 15 parcels of land, protected under the 1872 Patented Mining Claims, totaling ±234 acres. It's located in Mount Potosi Canyon near the historic Old Spanish Trail, which is part of the Spring Mountains National Recreation Area and the Humboldt-Toiyabe National Forest.

Access is currently provided by a county-maintained dirt road suitable for trucks or 4x4 vehicles. The property is zoned for rural open - residential land and is pending approval for a 32' wide paved road and a maximum of 104 residential lots. A use permit for a 112-room health spa retreat and recreational facilities has been considered for the 25-acre Mill Sites. It also has municipal water rights and surface water rights to Potosi Spring, amounting to approximately 145 acre feet. The existing A-Frame Cabin is  $\pm 1,089$  square foot built in 1998. There are many considerations for the mine and additional acreage.

## THE OFFERING

#### LAND DEVELOPMENT

The property, situated in Clark County, Nevada, From Las Vegas take Highway 160 SW toward spans ±234 acres and features Patented Lode mining claims, mill sites, the Potosi Mine, and water rights designated forguasi-municipal use. The zoning as of 2024 is RS80: Residential Single-Family, with past an all weather paved 32' wide road with shoulder contemplation of a commercial water, lodging, and health spa establishment on the base ±25 acre mill 104 lots. The nearest sub-station is Valley Electric site. An extension was recently granted with a NOFA dated August 28, 2023, moving the development ±2.45 miles. Professional environmental permitting start date to July 17,2027.

#### WATER TECHNOLOGY

Nevada underground well permits 88245 and 88246 designated each at. 11 CFM flow rate and 72.5 AFA equals a total of 145 AFA. Surface rights to the Potosi Artesian Spring. Studies available demonstrating flow rate and monitoring history. Well permits are subject to PBU and limited POC as further defined by Nevada Div. of Water Resources. The existing ±1,089 SF Cabin is serviced by well, septic and Valley Electric.

#### ACCESS TENTATIVE MAP

Pahrump, then South on Mt. Potosi Canyon Road (USF 45582) to USF - 45583 & 45584. Environmental and drainage studies are well underway to provide ±7.83 miles to access the tentative map area for Sandy Valley ±5.46 miles with major transmission lines team anticipates clarity by June 2024.

#### **TOPOGRAPHY FEATURES**

The Potosi Spring located at the Base Mill site area has an elevation of  $\pm 5,685$  ft. The highest elevation at the Upper Lode sites is  $\pm 6,840$  ft. The area has an average annual precipitation of 10.7", with an average high temperature of 66.5 degrees and a low of 44.5 degrees. The vegetation includes pinyon pine, juniper, cactus, flowers, and sagebrush, petroglyphs, rock shelters, and mescal pits are found in the area.

#### 1872 PATENTED MINING CLAIMS

Originally located in April 1856 when a Paiute Indian showed Mormon miners where "heavy rock" could be found. The Potosi Mine is the oldest in Southern Nevada." (Queho Posse Chapter 1919 E Clampus Vitus) The desire of local Mormon settlers for economic self-sufficiency led to mining by missionaries for lead at Potosí.

In 1857, Nathaniel V. Jones was sent to recover ore from the "mountain of lead" 30 miles southwest of the mission at Las Vegas Springs. About 9,000 lbs. were recovered before smelting difficulties forced the remote mine to be abandoned in 1858. Potosi became the first abandoned mine in Nevada.

In 1861, California mining interests reopened the mine, and a smelter and rock cabins for 100 miners made up the camp of Potosi. Even more extensive operations resulted after the transcontinental Salt Lake and San Pedro R.R.(now the Union Pacific) was built through the county in 1905.

In October 1868, following Nevada's admission to the Union as the 36th state during the Civil War, the Potosi mine was already established. It was the first lode mine and abandoned town in Nevada. Although, it was considered a ghost-town, the mine was later reopened and operated by multiple parties.

During WWI, Potosi was an important source of zinc. Potosi Mine (from Bulletin 62) Commodities: Zn, Pb, Ag, Cu, Au second largest zinc production in county, intermittently active since 1857. Produced more than 44Klbszinc, 3Mlbslead, 40Kozsilver, 27K lbs copper, 24 oz gold. The 200K ton mine dump to the right is listed in Washington as a Critical Mineral (Zinc) which may have value consideration by (GAO) Government Accountbility of Natural Resources in recovery and supply chain efforts.

In 1968 Potosi Mine was also classified as a national fallout shelter for naval facilities Engineering Command. Air quality and safety reports are available from the Division of Mine Safety and Health qualifying the Potosi Mine for museum and mine tours.

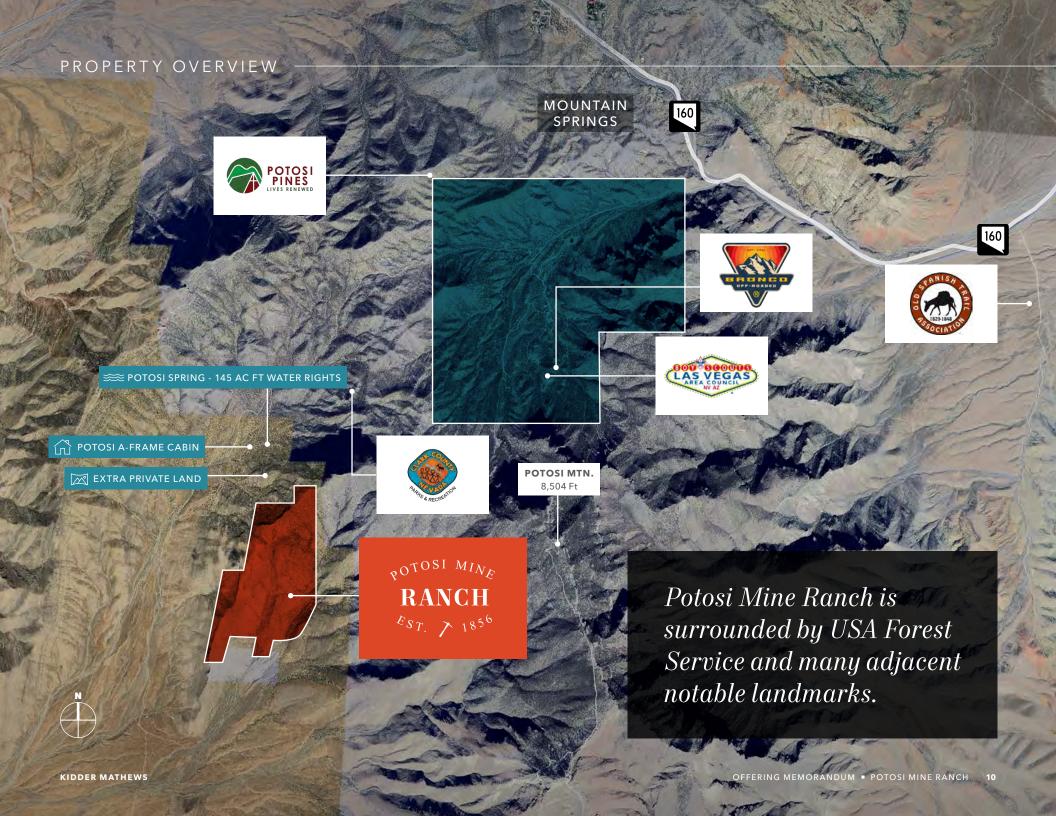

Potosi Mine was admitted to the National Register of Historic Places with reference to commerce and mining colonization in the 19th and 20th century.

### SOUTHERN NEVADA

Located in the Spring Mountains of Southern Nevada, Mount Springs Summit is a pass that is traversed by State Route 160 and connects the Pahrump Valley with Las Vegas.

The Humboldt-Toiyabe National Forest and Red Rock Canyon National Conservation Area border the pass. Public buildings include a fire house and The World Famous Mountain Springs Saloon.

In the Spring of 1844, the expedition of John C. Fremont discovered the shortcut route of the Fremont Cutoff, between Resting Springs and the Virgin River. Mountain Springs Summit was the mountain pass taken by this route over the Spring Mountains between the Pahrump Valley and the Las Vegas Springs in the Las Vegas Valley on the Old Spanish Trail. After 1848 it was followed by wagon trains on the Mormon Road, traveling between Southern California and Salt Lake City, Utah. The summit was named for the nearby Mountain Springs a watering place and camping location at the top of the pass at the spring.

#### POTOSI MOUNTAIN

Potosi Mountain, which has an elevation of 8,517 ft, has a large cave with a unique history dating back to the 19th century. The location also houses over seven FM transmitters and NOAA All Hazards Radio station WNG634. KXTE was the first tenant to broadcast from the top of the mountain and the first station in the United States to transmit in HD Signal.

The untimely death of Carole Lombard in a plane crash On January 16, 1942, Carole Lombard, a celebrated actress who was married to Clark Gable, tragically passed away at the age of 33 in a plane crash. She was aboard TWA Flight 3 on a Silver DC-3 Sky Club airliner, returning from a successful war bond tour during which she had raised \$2 million for the WWII efforts. Unfortunately, the plane crashed on Potosi Mountain, killing 21 veterans and service members in addition to Lombard.

### PIONEER SALOON & NEARBY TOWN OF GOODSPRINGS

Pioneer Saloon, located nearby in Goodsprings, boasts an impressive history that dates back to the early 1900s. This saloon is a unique piece of Americana, with walls that are stamped tin, manufactured by Sears and Roebuck, which are believed to be one of the last of their kind in the US. The bar, which is a solid wood Brunswick, was made in Maine in the 1860s and moved to Goodsprings in 1913. The original US Army Cannon Heater - stove, which still heats the building today, and dining tables have been around since the saloon's opening day.

However, one area, in particular, has put Pioneer Saloon on the map. When Lombard's husband, the renowned actor Clark Gable, lost his wife in a plane crash, he immediately rushed to the Pioneer Saloon, where the search party was headquartered. Gable spent three agonizing days at the saloon, waiting for news of any survivors. Tragically, all 22 passengers aboard the flight, including Lombard, perished. Gable's cigar burns still mark the bar counter, serving as a poignant reminder of the saloon's rich history.
