Real Property ▾

Map interface showing aerial imagery with parcel boundaries overlaid in yellow. A central pop-up window displays a warning about unmapped parcels.

Unmapped Parcels

The following 1 parcels are not mapped, so their boundaries were approximated using the available information in the database:

- **0000-13-010-003-0-033-00:** Parcel boundary could not be approximated, but the parcel should be within this section.

WARNING: All approximated boundaries are generated solely as a point of reference and may be very inaccurate. In many cases, the property will actually be within the approximated boundary but not the same as the approximated boundary. Always compare to the legal description and acreage.
