PROPERTIES

All-new Ford BlueOval City in Stanton, TN

BlueOval City will be among the largest auto manufacturing campuses in U.S. history. Like the iconic Rouge complex in Michigan did a century earlier, BlueOval City will usher in a new era for American manufacturing.

The 3,600-acre campus covering nearly 6 square miles will encompass vehicle assembly, battery production and a supplier park in a vertically integrated system that delivers cost efficiency while minimizing the carbon footprint of the manufacturing process. The assembly plant will use always-on cloud-connected technologies to drive vast improvements in quality and productivity. The mega campus is designed to add more sustainability solutions, including the potential to use local renewable energy sources such as geothermal, solar and wind power.

“West Tennessee is primed to deliver the workforce and quality of life needed to create the next great American success story with Ford Motor Company and SK Innovation,” said Tennessee Gov. Bill Lee. “This is a watershed moment for Tennesseans as we lead the future of the automotive industry and advanced manufacturing.”

Creating approximately 6,000 jobs, BlueOval City will be a hive of technical innovation to build next-generation electric F-Series trucks. This growth opportunity will allow Ford to reach new customers with an expanded electric truck lineup.

“BlueOval City’s assembly plant will harness Ford’s global manufacturing expertise and cutting-edge technologies to deliver cost efficiencies and the quality that our customers expect,” said Kumar Galhotra, Ford president, Americas & International Markets Group. “This will enable Ford to lead in the race to bring dependable, affordable and advanced electric vehicles to even more Americans.”
