Cecil	2-6%	55-72	>55-72	55	26-38	A

BGS = Below Ground Surface

CODE DESCRIPTION
 A These soils are suitable for installation of on-site systems with proper system design, installation, and maintenance. Position of the site or other soil and landscape considerations may require the drainfield area to be greater than the minimum and/or the drainfield design to require equal distribution or level field installation.

SOIL SURVEY AREA: 6.9 ACRES

 Husein Hamirani (678-267-0587)

- Notes:**
- Boring locations mapped with Trimble 7x GPS. This is NOT a survey. Boundary information is approximate. Boundaries were digitized from a plat completed by McWhorter & Anderson. Mill Creek Environmental, LLC makes no guarantees of boundary information. This map is intended to show soil test locations and soil boundaries.
 - This soil report is in accordance with the standards and regulations set forth in the Georgia Department of Public Health Manual for On-Site Sewage Management Systems, June 2019. Mill Creek Environmental, LLC does not issue permits for, install, maintain or guarantee the performance of any on-site sewage management system. The County Health Department has the authority to permit on-site sewage management systems on this property and may have a different view of the soil conditions. The County Health Department has final jurisdiction over permitting and regulating on-site sewage management systems.
 - Any alteration to this report will render this report null and void. Any alteration to the site after the date on which the fieldwork was performed may change the nature and suitability of the site.
