PROPERTY DESCRIPTION

INDUSTRIAL PROPERTY FOR SALE

104 EAST WHITE LANE, BAKERSFIELD, CA 93307

PROPERTY DESCRIPTION

The offering at 104 E White Lane, Bakersfield, CA 93307 represents a rare opportunity to acquire a fully improved industrial truck terminal / industrial outdoor storage (IOS) facility situated on an expansive 4.77-acre parcel within one of Kern County's most active logistics corridors. The property includes approximately 6,300 square feet of industrial improvements, originally constructed in 1990, and is purpose-built to support transportation, fleet, contractor, and yard-intensive industrial operations.

The facility features a highly functional cross-dock configuration with two (2) loading docks, enabling efficient inbound and outbound freight movement. A key differentiator of the asset is the on-site two-bay mechanic shop, offering approximately 22-foot clear height and 18-foot roll-up doors, allowing for in-house fleet maintenance, equipment servicing, and operational support for large trucks and trailers.

In addition to the industrial improvements, the property includes nine (9) private office suites, each approximately 150 square feet and equipped with individual bathrooms. This flexible office configuration allows the space to be utilized as administrative headquarters, dispatch and management offices, or potentially leased to third parties, providing optional ancillary income and operational versatility.

The entire 4.77-acre site is fully paved, providing exceptional functionality for truck circulation, trailer parking, equipment storage, and outdoor operations. The yard is improved with perimeter gutter infrastructure and includes a functioning sump system located at the rear of the parcel, supporting effective drainage and long-term site durability. The property offers approximately eighty (80) oversized 80' parking spaces, creating substantial capacity for fleet staging, trailer storage, and employee parking.

Currently operated as an owner-user facility, the property provides immediate operational usability and a rare opportunity to acquire a highly functional industrial asset with extensive yard coverage in a supply-constrained IOS market.
