PLAZA HISTORY

Country Club Plaza is known to most as “The Plaza.” Started in 1922 by J.C. Nichols, the plaza’s wonderful architecture is inspired by Nichols’ travels across Spain and the rest of Europe. Though it is centered in the heart of Kansas City, these European roots are apparent. Ornate fountains and green space are spread out across The Plaza and walking through its corridors shows Nichols fine attention to detail in the design. The many other sculptures, columns and murals present here truly makes this area a Kansas City gem.

PREMIUM LOCATION

With over 150 retail shops and restaurants, The Plaza prides itself on being Kansas City’s premiere destination for high-end shopping, dining and office centers. The Plaza Market is home to many high profile corporations which include Lockton Insurance, Midwest Research Institute, Polsinelli PC, Husch Blackwell Sanders LLP. and many more.

BENEFITS

The Plaza is easily walkable and Kansas City is currently planning a \$227 million Streetcar expansion that will connect this market to downtown. West Plaza Tower is located in perfect walking distance of the Plaza’s greatest attractions. The building also provides pristine views of the area which only get better during the holidays, when the Plaza is elegantly decorated with lights and ornaments. The added benefit of being located in the prime Plaza Market is offered with no extra cost. West Plaza Tower’s leasing rates still remain below market and Tenant Improvement is offered to make each space perfect for the tenant.
