

## Business Model

- Nation Wide Canning Limited cans fruit, vegetables, jams and jellies and has the capacity to prepare other canned foods including processing fresh tomatoes.
- Nation Wide Canning Limited works on an established and loyal client list, filling open ended contracts at Nation Wide's convenience. Production is to order, upon receiving a deposit followed by immediate payment on delivery.
- The feedstock is sourced from around the world and not dependent on a particular region or season. Import costs are known prior to accepting an order.
- There is no long-term warehousing of raw materials and no storage of finished products pending sale.
- Theoretically, Nation Wide Canning could be operated 24/7, 365 days a year.
- The owners are satisfied running the operation at a reduced rate, leaving significant upside potential for new owners to dramatically increase sales.
