Going Green at Calverton Corporate Center

- Enhanced building envelope utilizing superior insulation and low-E glass, as well as energy-efficient packaged rooftop units and high performance lighting decreases energy consumption by 17%.
- More than 80% in construction waste recycled, diverting construction debris from landfill disposal.
- Water-efficient restroom fixtures such as dual-flush toilets, water-free urinals and self-metering faucets, lessen the burden on municipal water supply by 35%.
- Water bottle filling stations help reduce disposable plastic bottle waste in the environment.
- Preferred parking spaces for hybrid vehicles promote the use of fuel-efficient vehicles to reduce pollution by automobiles.
- 50kW photovoltaic system reduces energy use and promotes use of alternative energy sources to ensure economical and reliable operation.
- Carbon dioxide monitoring system & increased ventilation enhance indoor air quality, directly impacting worker health and productivity.
- Green housekeeping ensures that cleaning products and chemicals are used properly and reduces indoor air contaminants produced by cleaning chemicals.
- Smart metering equipment enables energy usage to be remotely monitored as well as provides the ability to sub-meter tenants individually.
- Landscaping with reduced turf areas & drought-tolerant plants reduces irrigation water use by 54%.
