Project No. 2001-4051

Family Lodging Investment Properties LLC
c/o Mission Bank
1500 Palma Drive, Suite 211
Ventura, California 93003

Attention: Mr. Payton Olverd

Subject: Phase I Environmental Site Assessment - 4209 Carpinteria Avenue, Carpinteria,
Santa Barbara County, California. Assessor's Parcel Number 003-212-025

Dear Mr. Olverd:

Padre Associates, Inc. is pleased to submit the attached Phase I Environmental Site Assessment report for the subject property. The report presents our findings, conclusions, and recommendations regarding the current environmental conditions at the site.

It has been a pleasure to be of service to you and Family Lodging Investment Properties LLC. If you have any questions or require additional support, please contact me at 805-644-2220, ext. 17 or jsummerlin@padreinc.com.

Sincerely,

PADRE ASSOCIATES, INC.

A handwritten signature in blue ink, appearing to read "J.K. Summerlin".

APPENDICES

- APPENDIX A: SITE PHOTOGRAPHS
- APPENDIX B: HISTORICAL INFORMATION
- APPENDIX C: ENVIRONMENTAL DATABASE REPORT
- APPENDIX D: QUALIFICATIONS

1.0 INTRODUCTION

At the request of Family Lodging Investment Properties LLC (FLIP), Padre Associates Inc. (Padre) conducted a Phase I environmental site assessment (ESA) of the approximately 0.26-acre light-industrial property located at 4209 Carpinteria Avenue, Carpinteria, Santa Barbara County, California (Project Site). The Project Site is comprised of one, relatively flat, parcel of land identified as County of Santa Barbara Assessor's Parcel Number (APN) 003-212-025 (0.26-acre). The Project Site is currently owned by Joseph M. and Alice M. Vasquez Trustees. Three plates are included with this report. Plate 1 is a Site Location Map, Plate 2 is a Site Plan, and Plate 3 is an Assessor's Parcel Map.

The Project Site is located at 4209 Carpinteria Avenue at the southeast intersection of Carpinteria Avenue and Estero Street at the western portion of the City of Carpinteria. The Project Site is currently utilized as two separate storage yards historically utilized for the storage of equipment and materials associated with landscaping and tree trimming businesses. At the time of Padre's site visit on March 11, 2020 the northern half of the Project Site was vacant and the southern half of the Project Site was occupied. Each portion of the Project Site generally consist of undeveloped land that is improved with small office trailer areas and a storage building. The Project Site is bounded to the north by Carpinteria Avenue, beyond which is multi-family residential development; to the east by single family residential development; to the south by an unlined drainage ditch and railroad track right-of way, beyond which is the Carpinteria Slough / Salt Marsh; and to the west by Estero Street, beyond which is light-industrial / commercial development.

This Phase I ESA was performed at the request of FLIP, and was completed utilizing methods and procedures consistent with good commercial or customary practice designed to conform to acceptable industry standards. This report is exclusively for the use and benefit of FLIP and Mission Bank, and is not for the use or benefit of any other person or entity, nor may any other person or entity rely upon it without the advance written consent of Padre. The independent conclusions represent Padre's best professional judgment based on information and data available to us during the course of this assignment. Information regarding operations, conditions, and test data provided by FLIP, or their representatives and/or agents, has been assumed correct and complete. Additionally, the conclusions presented are based on the conditions that existed and the information available at the time of the assessment.

The ESA was completed in accordance with the guidelines outlined in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments (E-1527-13) and the U.S. Environmental Protection Agency's All Appropriate Inquiry (AAI) standard. The objective of the ESA was to evaluate whether current or previous land use at or adjacent to the Project Site may have involved, or resulted in the use, storage, disposal, treatment, and/or release of hazardous substances to the environment, resulting in the determination of a Recognized Environmental Condition (REC) at the Project Site. This ESA did not include a survey of asbestos-containing materials (ACM) or lead-based paint (LBP), nor did it include sampling of any environmental media at the Project Site.

To achieve the objective of the ESA, the following tasks were completed:

- A review of readily available geologic and hydrogeologic literature;
- Historical research including a review of available historical aerial photographs; Sanborn Fire Insurance Maps, historical city directories, and historical topographic maps relating to the Project Site;
- A site reconnaissance of the Project Site and adjacent properties;
- Interviews with knowledgeable persons of the Project Site;
- Public agency records review;
- An environmental database search; and
- The preparation of this report presenting the results of the ESA.

Definitions:

- *Recognized Environmental Conditions (RECs)* - the presence or likely presence of any hazardous substances or petroleum products in, on, or at the property: (a) due to any release to the environment; (b) under conditions indicative of a release to the environment; or (c) under conditions that pose a material threat of future release to the environment. De minimis conditions are not recognized environmental conditions.
- *Historical Recognized Environmental Conditions (HRECs)* - a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (i.e., property use restrictions, activity and use limitations, institutional controls and engineering controls).
- *Controlled Recognized Environmental Conditions (CRECs)* - a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidence by the issuance of a “No Further Action” letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (i.e., property use restrictions, activity and use limitations, institutional controls and engineering controls).
- *Activity Use Limitations (AULs)* - legal or physical restrictions or limitations on the use of, or access to, a site or facility: (a) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and / or surface water on the property, or (b) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

- *Migrate / Migration* - refers to the movement of hazardous substances or petroleum products in any form, including solid and liquid at the surface and subsurface, and vapor in the subsurface.

Four appendices are included with this report: Appendix A presents photographs of the Project Site at the time of Padre's site visit; Appendix B presents historical information obtained for the Project Site; Appendix C presents the environmental database report; and Appendix D presents the qualifications of the environmental professionals that conducted and supervised the ESA preparation.

2.0 ENVIRONMENTAL SETTING

The following discussion summarizes the geologic, hydrogeologic, and other relevant data pertaining to the physical setting of the Project Site.

2.1 SITE LOCATION AND DESCRIPTION

The Project Site is located at 4209 Carpinteria Avenue between U.S. Highway 101 to the north and the Pacific Ocean to the south, at the western portion of the City of Carpinteria. The Project Site and is identified as County of Santa Barbara APN 003-212-025, and is comprised of approximately 0.26-acres. The Project Site is currently owned by Joseph M. and Alice M. Vasquez Trustees. The location of the Project Site is illustrated on Plate 1 - Site Location Map and Plate 2 - Site Plan.

The Project Site is located at the western portion of the City of Carpinteria, which is developed with a combination of light industrial, commercial, and residential properties. The Project Site is currently utilized as two separate storage yards historically utilized for the storage of equipment and materials associated with landscaping and tree trimming businesses. At the time of Padre's site visit on March 11, 2020 the northern half of the Project Site was vacant and the southern half of the Project Site was occupied. Photographs of the Project Site are included as Appendix A - Site Photographs.

The Project Site is bounded to the north by Carpinteria Avenue, beyond which is multi-family residential development; to the east by single family residential development; to the south by an unlined drainage ditch and railroad track right-of way, beyond which is the Carpinteria Slough / Salt Marsh; and to the west by Estero Street, beyond which is light-industrial / commercial development.

The earliest development of the Project Site was unable to be determined. However, review of available Sanborn Fire Insurance Maps for the year 1929 indicates that the Project Site was developed with several small residential dwellings and at that time the current street known as Estero Street was known as Apple Street. Additionally, available aerial photographs from 1938, 1943, 1947, 1954, and 1967 also show the Project Site to be developed with several small residential dwellings. From 1975 through 1994 the Project Site appears to exist as undeveloped

land. From approximately 2005 through 2016 the Project Site was developed into its current configuration.

According to the environmental database report obtained from Environmental Data Resources, Inc. of Shelton, Connecticut (EDR), the approximate latitude and longitude coordinates for the central area of the Project Site are:

- Latitude (North) 34.403213
- Longitude (West) -119.532855

2.2 TOPOGRAPHY AND DRAINAGE

Based on a review of the United States Geological Survey (USGS) 7.5-minute topographic quadrangle for Carpinteria, California (2012), the Project Site is located at an elevation of approximately 33 feet above mean sea level (AMSL). Slope in the area of the Project Site is to the south, southwest toward the El Estero and Pacific Ocean. The topographic map is shaded to represent an area of urban developed land.

Surface water run-off at the Project Site is controlled by surface grading to direct flow overland towards the city of Carpinteria curb and gutter storm water collection system located along the eastern side of Estero Street.

The regional drainage in the area of the Project Site is towards the south and southwest, away from the Project Site towards the El Estero and Pacific Ocean. The Project Site is not identified on the National Wetland Inventory.

2.3 GEOLOGY AND HYDROGEOLOGY

The Project Site is located along the southern margin of the Transverse Ranges Geomorphic Province. These mountains represent a large east-west-trending anticline that has been complexly faulted. The Santa Ynez Mountains and adjacent coastal lowlands, on which the Project Site is situated, are composed of sedimentary rocks ranging in age from Eocene to Holocene (Geotechnical Consultants, 1976).

Quaternary marine terrace deposits that consist primarily of silty and sandy clays to coarse-grained sands underlie the Project Site. These marine terrace deposits overlie the Miocene Monterey Formation, which consists of marine shales and siltstones. The regional structure of the Monterey Formation in this area is complex with a series of northwest-trending flexures. The Monterey Formation has been upthrown along the east-west-trending Carpinteria Fault, which is a south-dipping reverse fault. This fault forms the southeastern boundary of the Carpinteria Basin, a faulted syncline containing Eocene through Miocene sediments and up to 4,000 feet of Plio-Pleistocene and younger sediments (Patry, 1983). The Carpinteria Basin has been divided into two distinct areas by the southerly-dipping Rincon Creek thrust fault, which is located immediately north of the Project Site (Maltby, 1984).

Based on a review of the Geologic Map of the Southern White Ledge Peak and Matilija Quadrangles the Project Site is directly underlain by weakly consolidated gravel and lesser

amounts of sand and silt alluvium derived from dissected stream and river strath terrace deposits of late Pleistocene age (Minor, 2015).

According to the California Department of Water Resources (DWR) the Project Site is located within the Carpinteria Groundwater Basin (Basin), which is bounded on the north by consolidated rocks of the Santa Ynez Mountains, on the south and southwest by the Pacific Ocean, on the west by a contact with consolidated rocks of Toro Canyon and on the east by faulted rocks underlying Rincon Creek. Groundwater within the Basin occurs in alluvium and the Carpinteria, Casitas, and Santa Barbara Formations.

Groundwater within Storage Unit 2 of the Basin in the area of the Project Site is typically poor for domestic and irrigation purposes and must be treated. Total dissolved solids (TDS) concentrations are generally greater than 1,000 milligrams per liter (mg/L). Elevated iron and manganese concentrations, and hydrogen sulfide also locally affect groundwater quality within the Basin. Additionally, portions of the Carpinteria Formation are impregnated with heavy oil and tar (Geotechnical Consultants, Inc., 1976).

Regional groundwater flow in the eastern portion of the Carpinteria Basin, north of the Rincon Creek Fault, is reportedly towards the west-southwest. Groundwater measurements in the southern portion of the basin indicate that groundwater flows in a generally west-northwest direction (Maltby, 1984; Geotechnical Consultants, 1976).

Review of available groundwater resources data available for the general area of the Project Site from 2006 indicates that groundwater in the general area of the Project Site occurs at depths of approximately 5- to 6-feet below ground surface. The direction of groundwater flow at the area of the Project Site is anticipated to be toward the south / southwest.

Information regarding nearby groundwater production wells was obtained from Environmental Data Resources, Inc., of Shelton, Connecticut (EDR). According to the March 2020 EDR Radius Report prepared for the Project Site, three water supply wells were identified to exist within 1/4-mile of the Project Site. A total of 43 groundwater supply wells listed on the state database are located within an approximate one-mile radius of the Project Site.

2.4 SURFICIAL SOIL

According to information based on Soil Conservation Service SSURGO data provided by EDR, the Project Site is primarily underlain by Camarillo Variant fine, sandy loam. The identified soil types are characterized as Class C soils, which are comprised of poorly drained soils with moderately fine to fine textures and slow infiltration rates impeding downward movement of groundwater (EDR, 2020).

2.5 FLOODPLAIN

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map 06083C1420G, the Project Site is not located within the 100-year or 500-year flood zones (EDR, 2020).

2.6 RADON

Radon is a colorless, odorless, tasteless, and radioactive gas that is produced as a natural decay product of uranium. Because of its radioactivity, studies have shown that at elevated levels there is a link between radon and lung cancer. Persons living in a building with elevated radon concentrations may have an increased risk of contracting lung cancer over a period of years. According to the State of California Department of Health Services, California Statewide Radon Survey, Interim Results, the Project Site is located within Zone 1 of the U.S. EPA's Map of Radon Zones. Zone 1 identifies counties with a predicted average radon screening level of greater than 4.0 picocuries per liter (pCi/L) (U.S. EPA, 1993). The western Transverse Ranges are underlain principally by Cretaceous to Pliocene marine sedimentary rocks.

According to the U.S. Department of Conservation, Division of Mines and Geology document titled *Radon Mapping, Santa Barbara and Ventura Counties*, dated November / December 1997, the Project Site is located within an area considered to have a low potential for indoor radon levels above 4.0 pCi/L.

Additionally, review of the State of California Department of Health Services document titled *Radon Databases for California*, dated May 2010, a total of 55 radon tests were conducted in zip code 93013, and only 0 of the 55 radon tests (0.0%), resulted in radon concentrations greater than 4 pCi/L. Therefore, the radon potential at the Project Site is considered low.

2.7 OIL AND GAS WELLS

Padre reviewed the available State of California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) maps of oil and gas wells located within the area of the city of Carpinteria. Based on our review of the available DOGGR map data, Padre concludes that there are no records of historical oil and/or gas wells located at or adjacent to the Project Site.

Padre also reviewed the DOGGR online mapping system and the EDR database report to determine whether any oil and/or gas wells are located at or adjacent to the Project Site. According to the available DOGGR records, five oil and/or gas wells were drilled and/or produced within an approximate one mile radius of the Project Site, predominantly south and southeast of the Project Site. Based on the distances of these wells from the Project Site, none of these oil / gas wells are considered RECs for the Project Site.

3.0 HISTORICAL SITE CONDITIONS

Padre's review of available historical documentation pertaining to the historical land uses at the Project Site identified the following information. Although the earliest development of the Project Site was unable to be determined, review of available Sanborn Fire Insurance Maps and aerial photographs indicates that the area of the Project Site was developed with several residential dwellings prior to 1929, which existed at the Project Site until at least 1967. The Project

Site existed as undeveloped land from approximately 1975 through 1994, and the Project Site was developed into its current configuration from approximately 2005 through 2016.

Summaries of the historical documentation reviewed by Padre are summarized in the following sections.

3.1 HISTORICAL AERIAL PHOTOGRAPHS

Padre obtained aerial photographs for the area of the Project Site from EDR. Photographs for the years 1938, 1943, 1947, 1954, 1967, 1975, 1984, 1986, 1994, 2005, 2009, 2012, and 2016 were reviewed. A summary of the information provided by the aerial photographs are provided below. Copies of the aerial photographs presenting the area of the Project Site are included as Appendix B - Project Documentation, as Plates B-1 through B-9.

- **1938 Aerial Photograph** - Review of the 1938 aerial photograph indicates that the Project Site is developed with several residential dwellings. However, the quality of the photograph is poor.
- **1943 Aerial Photograph** - Review of the 1943 aerial photograph indicates that the Project Site is developed similar as in the 1938 photograph.
- **1947 Aerial Photograph** - Review of the 1947 aerial photograph indicates that the Project Site is developed similar as in the 1938 and 1943 photographs. An oil well drilling pad and associated access road have been constructed southwest of the Project Site with El Estero.
- **1954 Aerial Photograph** - Review of the 1954 aerial photograph indicates that the Project Site and surrounding areas are developed similarly as shown in the 1947 aerial photograph.
- **1967 Aerial Photograph** - Review of the 1967 aerial photograph indicates that the Project Site and surrounding areas are developed similarly as shown in the 1954 aerial photograph.
- **1975 Aerial Photograph** - Review of the 1975 aerial photograph indicates that the Project Site exists as undeveloped land. All structures have been removed at the Project Site.
- **1984 Aerial Photograph** - Review of the 1984 aerial photograph indicates that the Project Site and surrounding areas are developed similar as shown in the 1975 aerial photograph.
- **1986 Aerial Photograph** - Review of the 1986 aerial photograph indicates that the northwestern portion Project Site is being utilized for the storage of equipment / vehicles.
- **1994 Aerial Photograph** - Review of the 1994 aerial photograph indicates that the Project Site and surrounding areas are developed similar to how they currently exist.

- **2005 Aerial Photograph** - Review of the 2005 aerial photograph indicates that the Project Site and surrounding areas are developed similar to how they currently exist.
- **2009 Aerial Photograph** - Review of the 2009 aerial photograph indicates that the Project Site and surrounding areas are developed similar to how they currently exist.
- **2012 Aerial Photograph** - Review of the 2012 aerial photograph indicates that the Project Site and surrounding areas are developed similar to how they currently exist.
- **2016 Aerial Photograph** - Review of the 2016 aerial photograph indicates that the Project Site and surrounding areas are developed similar to how they currently exist.

Padre's review of the historical aerial photographs acquired from EDR did not indicate evidence or conditions that would pose a REC to the Project Site.

3.2 HISTORICAL SANBORN FIRE INSURANCE MAPS

Padre contracted with EDR to provide a search of available historical Sanborn Fire Insurance Maps, which are maintained exclusively by EDR. These maps, which have been periodically updated since the late 19th Century, often provide valuable insight into historical site uses, which can be used to assist the Phase I ESA preparer with assessing potential environmental conditions on or near a specific property. According to EDR, Sanborn Fire Insurance Map coverage was identified for the area of the Project Site only for 1929. Based on the 1929 Sanborn Fire Insurance Map, the area of the Project Site was developed with several small residential dwellings in 1929.

3.3 UNITED STATES GEOLOGICAL SURVEY TOPOGRAPHIC MAPS

Padre obtained historical topographic maps from EDR for the area of the Project Site. Historical topographic maps dated 1903, 1944, 1947, 1952, 1967, 1977, 1988, 1995, and 2012 were available for review. The Project Site is located west from the downtown area of the city of Carpinteria, and as a result, individual property details are not provided on the 1903, 1944, and 1947 topographic maps. The 1952, 1967, 1977, and 1988 maps show the Project Site to be located in an area of urban development improved with several structures. The 1995 and 2012 maps show the Project Site to exist in an area of urban developed land.

Padre's review of the historical topographic maps acquired from EDR did not indicate evidence or conditions that would pose a REC to the Project Site.

3.4 HISTORICAL CITY DIRECTORIES

Padre reviewed the City Directory-*Abstract* provided by EDR for the historical and current address of the Project Site, 4209 Carpinteria Avenue, Carpinteria, California 93013. Business directories including city, cross-reference, and telephone directories were reviewed, if available, at approximate five-year intervals for the years spanning 1920 through 2014. The sources reviewed included Haines, Polk City Directories, R.L. Polk & Company, and the General Telephone Company of California Directory.

The results of the city directory search indicated that the address of the Project Site was listed during the period from 1973 through 2014. The following uses were identified at the Project Site's address:

- 2014 - Coastal Landscape & Tree Service
- 2010 - Coastal Landscape & Tree Service; Jay's Landscape & Maintenance
- 2005 - Coastal Landscape & Tree Service
- 2000 - Unknown
- 1995 - Frank Vasquez
- 1992 - No Listing
- 1986 - No Listing
- 1981 - No Listing
- 1977 - No Listing
- 1973 - No Listing

Padre's review of the historical city directories abstract provided by EDR for the addresses of the Project Site did not indicate evidence or conditions that would pose a REC to the Project Site.

3.5 CITY OF CARPINTERIA BUILDING AND SAFETY

Padre reviewed available historical building permit records and other available documents for the Project Site at the office of the City of Carpinteria Building and Safety, as well as the EDR Building Permit Report prepared for the addresses of the Project Site.

Padre's review of the available historical building permits did not indicate evidence or conditions that would pose a REC to the Project Site.

4.0 CURRENT SITE CONDITIONS

This section summarizes current site conditions and Project Site uses as well as any hazardous substances use, handling, and storage, if any.

4.1 SITE RECONNAISSANCE

Mr. Jerome K. Summerlin of Padre visited the Project Site on March 11, 2020. The weather conditions at the time of the site visit were partly cloudy and warm with a temperature of approximately 70° Fahrenheit. Selected photographs taken during the course of the site visit are included as Appendix A as Plates A-1 through A-6.

The Project Site is located at 4209 Carpinteria Avenue at the southeast intersection of Carpinteria Avenue and Estero Street at the western portion of the City of Carpinteria. The Project Site currently utilized as two separate storage yards historically utilized for the storage of equipment and materials associated with landscaping and tree trimming businesses. At the time of Padre's site visit on March 11, 2020 the northern half of the Project Site was vacant and the

southern half of the Project Site was occupied. Each portion of the Project Site generally consist of undeveloped land that is improved with small office trailer areas and a storage building.

The Project Site is bounded to the north by Carpinteria Avenue, beyond which is multi-family residential development; to the east by single family residential development; to the south by an unlined drainage ditch and railroad track right-of-way, beyond which is the Carpinteria Slough / Salt Marsh; and to the west by Estero Street, beyond which is light-industrial / commercial development.

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed at the Project Site, and areas adjacent to the Project Site. Storage of hazardous materials as defined by Code of Federal Regulations (CFR) Title 40 Part 302 is not conducted at the Project Site, or within areas located immediately adjacent to the Project Site.

There was no evidence of underground piping or chemical use, in the form of stains or odors, noticed at the Project Site. No other evidence of underground storage tanks or aboveground storage tanks (ASTs) was observed at the Project Site.

No evidence of dumping of waste or evidence of disposal pits were observed at the Project Site. No evidence of debris or petroleum products was observed at the Project Site, and no evidence of spills or leaks of chemicals in the form of stained soil or stressed vegetation was observed at the Project Site.

No evidence of potential environmental conditions was observed on any of the immediately adjacent properties.

4.2 UTILITIES

Electrical services (Southern California Edison Company) are provided via underground and overhead lines from off-site transformers. All other utilities are provided via underground means to the Project Site, which include: Southern California Gas Company, Carpinteria Valley Water District, and Carpinteria Sanitary District. No other utilities were observed at the Project Site during the site reconnaissance.

4.3 ASBESTOS-CONTAINING MATERIALS

The use of asbestos in common building materials has been mostly discontinued since the late 1970s. No permanent structures are constructed at the Project Site. It should be noted that Padre did not complete an asbestos survey of the Project Site as part of the subject scope of services.

4.4 LEAD-BASED PAINT

The use of lead-based paints was common practice in building construction prior to 1978. However, no permanent structures are constructed at the Project Site. Padre did not complete a lead-based paint survey of the Project Site as part of the subject scope of services.

4.5 POLYCHLORINATED BIPHENYLS

The federal Toxic Substances Control Act (TSCA) generally prohibited the domestic manufacturing of polychlorinated biphenyls (PCBs) after 1979. However, hydraulic fluids or dielectric insulating fluids typically found in electrical transformers, hydraulic equipment, capacitors, and similar equipment may contain PCBs if such materials have been present prior to the late 1970s. No pole-mounted and/or pad-mounted electrical transformer were observed at the Project Site during the course of Padre's site reconnaissance.

Based on these observations, the potential for the presence of PCBs at the Project Site is not considered a REC to the Project Site.

5.0 ENVIRONMENTAL RECORDS REVIEW

Padre researched various publicly-accessed databases or files available at regulatory agencies in the region to evaluate whether soil and groundwater contamination is known or suspected at or immediately adjacent to the Project Site. Regulatory agency databases were obtained from EDR for the Project Site and properties within the ASTM-prescribed radii.

5.1 PUBLIC RECORDS REVIEW AND AGENCY CONTACTS

5.1.1 State Water Resources Control Board

The California State Water Resources Control Board (SWRCB) maintains public information pertaining to Leaking Underground Storage Tank (LUST) sites through the online database identified as GeoTracker. Padre reviewed the SWRCB's GeoTracker database, which identifies sites that have experienced releases of petroleum hydrocarbons from underground storage tanks (USTs) throughout the state of California. Neither the Project Site nor properties located adjacent to the Project Site are identified on the GeoTracker database.

A total of five LUST sites are located within a 1/2-mile radius of the Project Site. However, all five LUFT sites are currently characterized as "closed" cases, and therefore do not represent RECs for the Project Site.

Padre also reviewed GeoTracker for any Site Cleanup Program (SCP), formerly Spills, Leaks, Investigation and Cleanup (SLIC) sites that could pose an environmental threat to the Project Site. The Project Site was not listed on the GeoTracker SLIC database. One SLIC site was identified to be located within 1/2-mile of the Project Site. This identified site has been granted "site closure" status by the California Regional Water Quality Control Board - Central Coast Region (RWQCB-CCR).

5.1.2 County of Santa Barbara Public Health Services

The County of Santa Barbara Public Health Services (SBCPHS) serves as the Certified Unified Program Agency (CUPA) overseeing hazardous materials use, storage, and disposal and underground storage tank (UST) regulation within the city of Carpinteria. Padre submitted an

inquiry to CUPA regarding the Project Site. No information was identified indicating current hazardous materials use, storage, and disposal and/or USTs and ASTs at the Project Site.

5.1.3 California Department of Toxic Substances Control

The California Department of Toxic Substances Control (DTSC) maintains the EnviroStor database for known or suspected hazardous waste sites in California. According to the EnviroStor database, the Project Site is not a listed site on the EnviroStor database. No properties located within a one-mile radius of the Project Site were identified in the EnviroStor database.

5.1.4 Environmental Liens or Activity and Use Limitations

EDR performed an environmental lien search for the Project Site using the APN associated with Project Site. According to the report dated March 12, 2020 no environmental liens or activity and use limitations (AULs) were identified to be associated with the Project Site. The Project Site is currently owned by Joseph M. and Alice M. Vasquez Trustees who have owned the Project Site since April 26, 2019 and was granted ownership from Joseph M. and Alice M. Vasquez via Grant Deed.

5.2 ENVIRONMENTAL DATABASE INFORMATION

Padre obtained environmental agency listings database information for the Project Site and for properties located within the ASTM-prescribed radii of the Project Site from EDR. The EDR report is included as Appendix C. The purpose of the environmental agency listings database review is to identify whether the Project Site or adjacent sites have been listed on local, state, or federal government database listings or retain historical documentation regarding current and / or past usage that could potentially pertain to RECs.

Sites within the ASTM prescribed radii were also reviewed to identify outlying sites that might potentially impact the subsurface soil and/or groundwater conditions beneath the Project Site. The following sections summarize our findings for the required ASTM databases beginning with Federal listings and ending with local listings. Sites listed on additional or supplementary databases not required by the ASTM, but reported by EDR were reviewed by Padre, but are not summarized below unless such sites are located within close proximity of the Project Site or could pose an unacceptable environmental impact to the Project Site.

Padre's review of the available regulatory agency data identified that the Project Site (4209 Carpinteria Avenue) is not identified on any of the environmental agency listings databases.

5.2.1 National Priorities List - Federal Superfund

The National Priorities List (NPL) is a U.S. Environmental Protection Agency (U.S. EPA) listing of private, state, and federally owned sites, which have been included on the federal Superfund list for remediation.

- Neither the Project Site nor properties located within a one-mile radius of the Project Site are listed on the National Priorities List.

5.2.2 U.S. EPA Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) - Superfund Enterprise Management System (SEMS)

The U.S. EPA's CERCLIS / SEMS Listings are a compilation of sites that have been brought to the attention of the U.S. EPA, through various means, as being possible sites of hazardous waste activity. The CERCLIS / SEMS Listings are an information database and not necessarily an action list.

- Neither the Project Site nor properties located within a one-mile radius of the Project Site are listed on the CERCLIS / SEMS List.

5.2.3 RCRA - TSD Facilities Listing

The U.S. EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA-TSD database is a compilation by the U.S. EPA of reporting facilities that transport, treat, store or dispose of hazardous waste.

- Neither the Project Site nor properties located within a 1/2-mile radius of the Project Site are listed on the RCRA-TSD List.

5.2.4 RCRA - CORRACTS Facilities Listing

The RCRA Corrective Action (CORRACTS) Sites Listing contains information pertaining to hazardous waste treatment, storage, and disposal facilities (RCRA TSD) which have conducted, or are currently conducting, a corrective action(s) as regulated under RCRA.

- Neither the Project Site nor sites located within a one-mile radius of the Project Site are listed on the CORRACTS List.

5.2.5 RCRA - LQG's List

The U.S. EPA's RCRA Program identifies and tracks large quantity generators (LQG's). LQG's generate over 1,000 kilograms (kg) of hazardous waste, or 1 kg acutely hazardous waste per month.

- The Project Site is not listed on the RCRA-LQG List.
- One site located within a 1/4-mile radius of the Project Site is listed on the RCRA-LQG List. This site, 7-Eleven No. 23855, is located at 4410 Via Real, which is 1,074 feet northeast of the Project Site. Based on the distance of this site from the Project Site the identified site does not present a REC for the Project Site.

5.2.6 RCRA - SQG's List

The U.S. EPA's RCRA Program identifies and tracks small quantity generators (SQG's). SQG's generate over 100 kg and 1,000 kg of hazardous waste per month.

- The Project Site was not listed on the RCRA-SQG List.
- Four sites located within a 1/4-mile radius of the Project Site are listed on the RCRA-SQG List. Based on the distances of these sites from the Project Site and the fact that these sites are not identified with current violations, the identified sites do not present RECs for the Project Site.

5.2.7 Federal Institutional Controls / Engineering Controls Registries

The Federal institutional controls / engineering controls registries include: records of land use control information systems (LUCIS) pertaining to former Navy Base Realignment and Closure properties; sites with federal engineering controls (US ENG CONTROLS) in place including various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health; and sites with institutional controls (US INST CONTROL) in place including administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

- Neither the Project Site nor properties located within a 1/2-mile radius of the Project Site is listed on the Federal Institutional Controls / Engineering Controls Registries.

5.2.8 Facility and Manifest Data (HAZNET)

Facility and management data is extracted from the copies of the hazardous waste manifests received each year by the DTSC.

- The Project Site is not currently listed on the Federal Institutional Controls / Engineering Controls Registries.

5.2.9 Emergency Response Notification System

The Emergency Response Notification System (ERNS) contains records on releases of oil and hazardous substances reported to the U.S. EPA and National Response Center of the U.S. Coast Guard.

- The Project Site is not identified on the ERNS List.

5.2.10 State Equivalent CERCLIS (formerly Cal-Sites List)

The State DTSC and Site Mitigation and Brownfields Reuse Program (SMBRP) have combined databases now identified as EnviroStor. This database includes the formerly known Cal-Sites List, which in turn included the former State of California Abandoned Sites Program Information System (ASPIS) and the California Bond Expenditure Plan (BEP) databases. The EnviroStor database is a compilation of sites that have been brought to the attention of the California Environmental Protection Agency (Cal EPA), through various means, as being possible sites of hazardous waste activity or contamination. It should be noted that the EnviroStor database is an informational database and not necessarily an action list.

- The Project Site is not identified in the State Equivalent CERCLIS' EnviroStor database.
- According to the EDR report, no properties located within a one-mile radius of the Project Site are listed in the State Equivalent CERCLIS' EnviroStor database.

5.2.11 Underground Storage Tank Database

The underground storage tank (UST) databases maintain an inventory of active and inactive UST facilities gathered from local regulatory agencies. The Facility Inventory Database (CA FID UST) contains a historical listing of active and inactive UST locations from the State Water Resources Control Board (SWRCB). The Hazardous Substance Storage Container Database (Hist UST) is a historical listing of UST sites. The leaking Underground Storage Tank Information System (LUST) records contain an inventory of reported leaking underground storage tanks incidents. The Statewide Environmental Evaluation and Planning System (SWEEPS) is a UST database maintained by the SWRCB during the 1980s; the system is no longer updated or maintained.

- The Project Site is not identified on the LUST list.
- A total of five LUST sites are located within a 1/2-mile radius of the Project Site. However, all five LUFT sites are currently characterized as "closed" cases.

5.2.12 Spills, Leaks, and Investigations (SLIC) List

The RWQCB is the agency with jurisdiction over groundwater protection in the region of the Project Site. The RWQCB maintains a SLIC list regarding active investigations at non-LUST sites with the potential to affect groundwater quality.

- The Project Site is not identified on the SLIC List.
- One SLIC site was identified to be located within 1/2-mile of the Project Site. However, the identified site has been granted "site closure" status by the RWQCB-CCR.

5.2.13 Hazardous Waste and Substance Site List - Cortese and Historical Cortese List

The Hazardous Waste and Substances List is a compilation by the State of California Office of Planning and Research of potential and confirmed hazardous waste and substance sites throughout California. The Cortese list includes tank leaks compiled by the SWRCB, abandoned hazardous waste sites by the DTSC, BEP and solid waste disposal sites with known migration of hazardous waste.

- The Project Site is not listed on the Cortese or Historical Cortese List.
- One property located within a within a 1/2-mile radius of the Project Site was listed on the Cortese and Historical Cortese List because of a LUST designation (refer to Section 5.2.10). This LUST site has been “closed” by the RWQCB-CCR.

5.2.14 Solid Waste / Landfill Sites

The Solid Waste Assessment Test Program (SWAT) is a database maintained by the SWRCB for information on the groundwater monitoring of sanitary landfills. The California Integrated Waste Management Board (CIWMB) maintains the Solid Waste Information System (SWIS) pursuant to the Solid Waste Information System (SWIS) pursuant to the Solid Waste Management and Resource Recovery Act of 1972. The SWIS list contains an inventory of active, inactive, and closed solid waste disposal and transfer facilities. The Waste Management Unit Database (WMUDS) is an inventory of waste management units developed by SWRCB and RWQCB staff.

- Neither the Project Site nor sites located within a 1/2-mile radius of the Project Site are identified on the SWAT/SWIS/WMUDS Lists.

5.2.15 Proposition 65 Notification Records

Proposition 65 Notification Records (Notify 65) database contains facility notification about any releases, which could impact drinking water and thereby expose the public to a potential health risk.

- The Project Site is not identified in the Notify 65 database.

5.2.16 Historical Dry Cleaners

EDR performed a database search of potential dry cleaner sites. The categories reviewed included, but were not limited to, dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash and dry, etc.

- The Project Site is not listed on the Historical Dry Cleaners List.
- No sites located within a 1/8-mile radius of the Project Site are identified on the Historical Dry Cleaners List.

5.3 USER PROVIDED INFORMATION

Padre was not provided with any documents or information pertaining to the Project Site.

6.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the results of the scope of services performed for this ESA, Padre makes the following conclusions regarding the Project Site.

6.1 CURRENT CONDITIONS AND HISTORICAL SITE BACKGROUND

The Project Site is located at 4209 Carpinteria Avenue between U.S. Highway 101 to the north and the Pacific Ocean to the south, at the western portion of the City of Carpinteria. The Project Site is identified as County of Santa Barbara APN 003-212-025, and is comprised of approximately 0.26-acres. The Project Site is currently owned by Joseph M. and Alice M. Vasquez Trustees.

The Project Site is located at the western portion of the City of Carpinteria, which is developed with a combination of light industrial, commercial, and residential properties. The Project Site currently utilized as two separate storage yards historically utilized for the storage of equipment and materials associated with landscaping and tree trimming businesses. At the time of Padre's site visit on March 11, 2020 the northern half of the Project Site was vacant and the southern half of the Project Site was occupied. Photographs of the Project Site are included as Appendix A - Site Photographs.

The Project Site is bounded to the north by Carpinteria Avenue, beyond which is multi-family residential development; to the east by single family residential development; to the south by an unlined drainage ditch and railroad track right-of way, beyond which is the Carpinteria Slough / Salt Marsh; and to the west by Estero Street, beyond which is light-industrial / commercial development.

The earliest development of the Project Site was unable to be determined. However, review of available Sanborn Fire Insurance Maps for the year 1929 indicates that the Project Site was developed with several small residential dwellings and at that time the current street known as Estero Street was known as Apple Street. Additionally, available aerial photographs from 1938, 1943, 1947, 1954, and 1967 also show the Project Site to be developed with several small residential dwellings. From 1975 through 1994 the Project Site appears to exist as undeveloped land. From approximately 2005 through 2016 the Project Site was developed into its current configuration.

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed at the Project Site, and areas adjacent to the Project Site. Storage of hazardous materials as defined by Code of Federal Regulations (CFR) Title 40 Part 302 is not conducted at the Project Site, or within areas located immediately adjacent to the Project Site.

There was no evidence of underground piping or chemical use, in the form of stains or odors, noticed at the Project Site. No other evidence of underground storage tanks or aboveground storage tanks were observed at the Project Site.

No evidence of dumping or pits was observed at the Project Site. No evidence of debris or petroleum products was observed at the Project Site, and no evidence of spills or leaks of chemicals in the form of stained soil or stressed vegetation was observed at the Project Site.

No evidence of potential environmental conditions was observed on any of the immediately adjacent properties.

6.2 ENVIRONMENTAL CONDITIONS

Based on the information collected and reviewed during the preparation of this Phase I ESA, Padre has not identified any recognized environmental conditions (RECs) associated with the Project Site or adjacent properties that require further assessment at this time.

6.3 RECOMMENDATIONS

Padre makes no recommendations for additional assessment or remedial actions regarding the Project Site at this time based on the findings of the Phase I ESA.

7.0 LIMITATIONS

This report has been prepared for the sole benefit of Family Lodging Investment Properties LLC. No other persons may rely on the findings of this report without the expressed written consent of Family Lodging Investment Properties LLC and Padre Associates, Inc. In performing our professional services, we have attempted to apply present engineering and scientific judgment and use a level of effort consistent with the standard of practice measured on the date of work and in locale of the Project Site for similar type studies. Padre Associates, Inc. makes no warranty, express or implied.

The analyses and interpretations presented in this report have been developed based on the results from the review of existing information pertaining to the Project Site.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 9 CUPA Listings sites within approximately 0.25 miles of the target property.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002906348

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 06-11-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 09/11/2019. The 87, 91, and diesel spill containers did not have a minimum capacity of 5 gallons.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110006472165
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110006472165

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Latitude: 34.408543
 Longitude: -119.538397
 Case Type: Cleanup Program Site
 Case Worker: CSS
 Local Agency: SANTA BARBARA COUNTY
 RB Case Number: Not reported
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affected: Soil
 Potential Contaminants of Concern: Chlordane, DDD / DDE / DDT, Other Insecticides / Pesticide / Fumigants / Herbicides, Lead, Total Petroleum Hydrocarbons (TPH)
 Site History: Following initial assessment of former agricultural property in 2007, responsible party performed no additional work and site became inactive. Assessment indicated site soils were contaminated with organochlorine pesticides, lead and motor-oil range petroleum hydrocarbons. May 2007 Site Assessment Report by Dudek recommended additional assessment. On May 9, 2011 the Santa Barbara County Fire Department's Site Mitigation Unit issued an interim closure letter due to extended inactivity. Work required for change from agricultural to residential land use not completed. On June 2, 2014 RP contacted Santa Barbara County Environmental Health Services Division, Site Mitigation Unit (transferred from County Fire in July 2013) to request re-enrollment in the Voluntary Remedial Oversight Program. Additional work to follow execution of a Remedial Action Agreement between RP and EHS. In May 2017, the RP submitted a Remedial Action Agreement to EHS. EHS executed and re-activated the

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

State and tribal voluntary cleanup sites

INDIAN VCP R1: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 07/27/2015	Source: EPA, Region 1
Date Data Arrived at EDR: 09/29/2015	Telephone: 617-918-1102
Date Made Active in Reports: 02/18/2016	Last EDR Contact: 12/17/2019
Number of Days to Update: 142	Next Scheduled EDR Contact: 04/06/2020
	Data Release Frequency: Varies

VCP: Voluntary Cleanup Program Properties

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 10/28/2019	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 10/29/2019	Telephone: 916-323-3400
Date Made Active in Reports: 01/07/2020	Last EDR Contact: 01/28/2020
Number of Days to Update: 70	Next Scheduled EDR Contact: 05/11/2020
	Data Release Frequency: Quarterly

INDIAN VCP R7: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008	Source: EPA, Region 7
Date Data Arrived at EDR: 04/22/2008	Telephone: 913-551-7365
Date Made Active in Reports: 05/19/2008	Last EDR Contact: 04/20/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 07/20/2009
	Data Release Frequency: Varies

State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfields Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 12/18/2019	Source: State Water Resources Control Board
Date Data Arrived at EDR: 12/19/2019	Telephone: 916-323-7905
Date Made Active in Reports: 02/19/2020	Last EDR Contact: 12/19/2019
Number of Days to Update: 62	Next Scheduled EDR Contact: 04/06/2020
	Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/02/2019	Source: Environmental Protection Agency

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019
Date Data Arrived at EDR: 06/13/2019

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/03/2019	Source: DTSC and SWRCB

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2017	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 05/29/2019	Telephone: 916-255-1136

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

4209 CARPINTERIA AVENUE
4209 CARPINTERIA AVENUE
CARPINTERIA, CA 93013

TARGET PROPERTY COORDINATES

Latitude (North):	34.403213 - 34° 24' 11.57"
Longitude (West):	119.532855 - 119° 31' 58.28"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	267174.3
UTM Y (Meters):	3809578.0
Elevation:	33 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5639126 CARPINTERIA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06083C1420G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
Not Reported	

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
CARPINTERIA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
25	1/2 - 1 Mile ESE	Not Reported
52	1/2 - 1 Mile SE	WNW
1G	1/2 - 1 Mile ESE	Not Reported
2G	1/2 - 1 Mile SE	WNW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Miocene
Code:	Tm (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Camarillo variant

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 30 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	7 inches	35 inches	stratified loamy sand to clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
3	35 inches	72 inches	clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Aquepts
 Soil Surface Texture: variable
 Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
 Soil Drainage Class: Very poorly drained
 Hydric Status: Partially hydric
 Corrosion Potential - Uncoated Steel: Not Reported
 Depth to Bedrock Min: > 0 inches
 Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

APPENDIX D QUALIFICATIONS

QUALIFICATIONS

The environmental professional responsible for conducting or reviewing this Phase I ESA and preparing the report was Mr. Jerome K. Summerlin. Mr. Summerlin's qualifications are summarized below.

Jerome K. Summerlin, P.G., C.E.G., C.Hg., is a Principal Geologist and President of Padre Associates, Inc.. He holds a Bachelor of Science degree in Geology from California State University, Chico. Mr. Summerlin obtained a Professional Certificate in Hazardous Materials Management from the University of California at Santa Barbara in 1991, as well as a Professional Certificate in Site Assessment and Remediation from the University of California at Davis in 1993. Mr. Summerlin is a State of California Professional Geologist, Certified Engineering Geologist, and Certified Hydrogeologist. Mr. Summerlin is responsible for the firm's Geoenvironmental assessment and remediation practices. Mr. Summerlin has been responsible for and participated in a variety of geotechnical, geologic, hydrogeologic, and geoenvironmental projects throughout California, Nevada, Utah, Alaska, Wyoming, Texas, Arizona, and Hawaii. He has managed environmental assessment and remediation projects, which have included preliminary site assessment (Phase I), site assessment (Phase II), remedial action design and planning / permitting, implementation of remedial action programs (Phase III), and verification monitoring upon completion of remedial actions (Phase IV). His training and experience includes a firm understanding of environmental laws and regulations, sample collection, analytical procedures and protocols, site safety procedures, quality assurance/quality control requirements, remedial action feasibility analyses, and design and implementation of remedial systems.

DECLARATION

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional*, as defined in §312.10 of 40 CFR §312. I have specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Additionally, the subject Phase I ESA has been performed in conformance with the scope and limitations of ASTM Practice E1527-13.
