## Sec. 656.322. Light Industrial Category.

This category includes industrial uses which have fewer objectionable impacts such as noise, odor, toxic chemical and wastes. Types of primary uses include light assembly and manufacturing, packaging, processing including scrap processing, manufacturing of paints, enamels and allied products but not the manufacturing of the resins and other components from which such products are made, concrete batching plants, storage/warehousing including bulk storage of liquids, research and development activities, transportation terminals including freight terminals, radio/T.V. studios, transmission and relay towers, yard waste composting, recycling facilities, business/professional offices, medical clinics, veterinarians, vocational/trade schools and building trade contractors. Secondary uses include railroad yards, truck terminals, bus and rail stations, solid waste management facilities including composting and recycling operations, institutional uses, and public facilities such as trade and technical schools, health clinics, fire stations, utility plants, churches and day care centers; commercial, retail and service establishments, broadcasting studios including transmitters, telephone and cellular phone towers, business as well as professional offices including veterinarians, filling stations, restaurants and similar other supporting commercial uses. The location, type, scale and density/intensity of the supporting and secondary uses shall be compatible with the overall character of the existing, as well as the proposed future development of the area. Residential uses allowed within this category may include single and multi-family residences which were originally designed and legally built as single and multi-family residences prior to adoption of the Comprehensive Plan, but shall not permit new residential units except as otherwise provided for in the Land Development Regulations as accessory uses.

Light industrial uses shall be located in areas designated for such use on the FLUMs. The standards in the Land Development Regulations and the criteria herein only designate locations that may be considered for light industrial uses. Consideration does not guarantee the approval of a particular light industrial use in any given location. Site access to roads classified as collectors or higher on the adopted highway functional classification system map, which is part of the 2010 Comprehensive Plan, is preferred except for sites located within the Jacksonville DIA's jurisdictional boundaries.

Light industrial uses serving as complementary or supporting uses serving other primary land use categories may be permitted in mixed use planned unit developments (PUDs) outside the areas depicted for such use on the FLUMs.

The following primary and secondary zoning districts may be considered in the Light Industry Category depicted on the Future Land Use Maps of the Comprehensive Plan.

A. *Primary zoning districts.* The primary zoning districts shall include the following:

- (1) Industrial Business Park (IBP); Section 656.321.
- (2) Industrial Light (IL); Section 656.322.
