

UTILITY ATLAS NOTE:
 The atlas is a schematic of city owned utilities. The exact location, size and type of material will need to be field verified by a licensed surveyor or underground contractor in the presence of a city Inspector. The atlas is provided for planning purposes only and shall not be used for design. The atlas information in the attached pdf files shall not be inserted into a design drawing for depicting the actual location of the city's utilities. The City is not responsible for reliance of unverified atlas information.
