Encompassing part of Celina's trade area, the Far North Dallas market (between US 75 and I-35, north of US 380) is expected to nearly quadruple in population and nearly triple in employment over the next 22 years. Celina's physical position is in the direct path of growth, and Celina must be deliberate and mindful of allowing certain levels and types of growth for its biggest return on investment and most effective capture of the development that is best long term. According to the Dallas Business Journal (pictured at right), Celina was the fastest growing city in the Metroplex from 2014 to

Among the 32 cities that comprised Collin County in 2019, Celina had the lowest density as measured by population per square mile which is approximately 470 in Celina compared to 6,500 in Dallas. Growth in suburban communities in the Metroplex, including those in Collin County, are largely attributed (74%) to migration from other areas, including other parts of Texas and other states in the country, as opposed to natural increases associated with existing residents having more children. Comparatively, 31% of Dallas County's and 52% of Tarrant County's growth is attributable to migration.

## **FUTURE LAND USE PLAN**

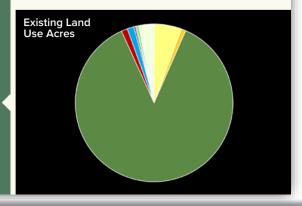

## MOST DEVELOPMENT IN CELINA IS SINGLE FAMILY RESIDENTIAL

Single Family Residential has the highest parcel count in Celina, however it does not make up the most land area.

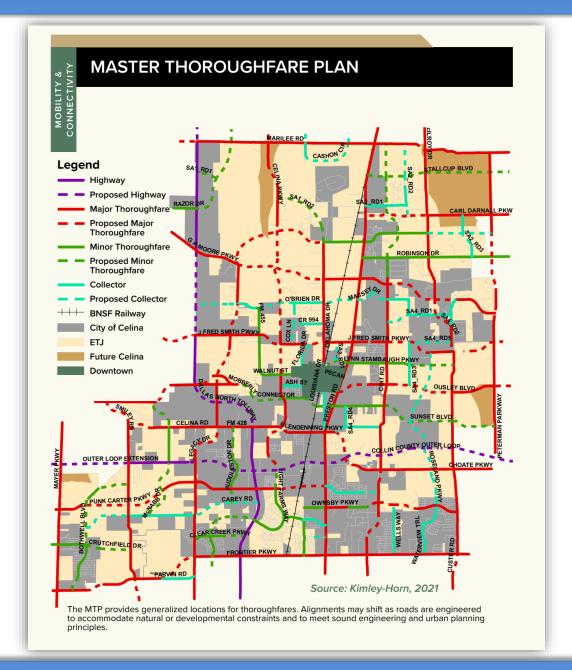

#### CELINA IS MOSTLY RURAL-AGRICULTURAL

The land area of Celina is primarily rural-agricultural, despite the majority of developed parcels being single family residential. Existing land use data is taken from the Appraisal District and is based on tax classification. There are times when the Appraisal District data does not match the use on the ground, but this analysis is for general illustrative purposes only.
