Sec. 2.03.01.A General Provisions on Special Uses

- A. A Special Use shall be approved by the Planning and Zoning Agency only upon determination that the application and evidence presented establish that:
1. The Special Use can be granted without substantial detriment to the public good and will not substantially impair the intent and purpose of the St. Johns County Comprehensive Plan or this Code;
 2. The Use is compatible with the contiguous and surrounding area and will not impose an excessive burden or have a substantial negative impact on surrounding or adjacent Uses or on community facilities or services; and
 3. If access is provided by a Street maintained by the Florida Department of Transportation (FDOT) a copy of the results of a pre-application meeting with FDOT is required unless otherwise deemed not necessary by the County Administrator; and
 4. The Use, which is listed as a Special Use in the district in which it is proposed to be located, complies with all required regulations and standards of this Article II, unless greater or more stringent regulations are contained or provided in the Comprehensive Plan or elsewhere in this Code for the Special Use.
- B. It shall be the responsibility of the Applicant to present evidence in the form of testimony, exhibits, documents, models, plans, and the like to support the application for approval of a Special Use. The burden of demonstrating compliance with the requirements of this Article shall rest with the Applicant.
- C. A detailed site plan and detailed statement of all Uses proposed shall be submitted with each application for a Special Use approval. The plan and statement, if approved, shall become a condition upon which the Use and Structures shown thereon are permitted; and any change or addition shall constitute a violation of the Special Use approval unless such change is submitted to and approved by the Planning and Zoning Agency. The detailed site plan, drawn to scale, no larger than eleven (11) inches x seventeen (17) inches, shall show the location and dimensions of all existing and proposed Structures and other improvements and setbacks of same, signs, and provisions for off-street parking.
- D. The Special Use must be compatible with the adjacent and surrounding land uses. Land uses, as defined in Chapter 163, Part II, Florida Statutes (“Growth Management Act”) include, but are not limited to, permitted Uses, Structures, and activities allowed within the land use category or implementing zoning district. Compatibility means a condition in which land uses or conditions can co-exist in relative proximity to each other in a stable fashion over time such that no Use or condition is unduly negatively impacted directly or indirectly by another Use or condition. The compatibility of land uses is dependent on numerous characteristics which may impact adjacent or surrounding Uses. These include: type of Use, density, intensity, height, general appearance and aesthetics, odors, noise, smoke, dust, vibration, traffic generation, sanitation, litter, drainage, risk of fire, air quality, protection of Listed Species or Essential Habitat, maintenance of public infrastructure, availability of potable water and other necessary public services, and nuisances.

- E. In addition to the foregoing criteria for measuring compatibility, the following requirements shall be adhered to by the Planning and Zoning Agency in determining whether to grant or deny a requested Special Use:
1. A Special Use shall not be approved where the Special Use or a related Use or activity will be incompatible with adjoining or surrounding land uses.
 2. A Special Use shall not be approved if the Special Use or a related Use or activity will have a substantial detrimental impact on adjacent or surrounding land uses in respect to odors, noise, smoke, vibration, pollution, traffic generation, or the other listed compatibility characteristics.
 3. Traffic generated and its access and flow to the proposed Use shall not adversely impact ingress and egress to adjoining properties, adversely effect the projected wear and tear of any public road designed to carry lighter traffic than projected for the proposed Special Use, or pose a potential danger to the safety of traffic, pedestrians, or bicyclists.
 4. A Special Use shall be approved only in an area where adequate public facilities and services already exist, will be provided prior to occupancy, or are scheduled to be available within an approved time frame.
 5. A Special Use shall not be approved if the Special Use or a related Use or activity will cause a nuisance.
 6. Without limitation of the foregoing, the following factors shall be considered in determining compatibility:
 - a. permitted Uses, Structures and activities allowed with the land use category;
 - b. building location, dimension, height, and floor area ratio;
 - c. location and extent of parking, access drives, and service areas;
 - d. traffic generation, hours of operation, noise levels, and outdoor lighting;
 - e. alteration of light and air;
 - f. setbacks and buffers – fences, walls, landscaping, open space treatment, and other buffers designed to harmonize and make the Special Use and any related Uses compatible with the surrounding land uses; and
 - g. whether the Special Use will comply with the concurrency requirements under Article XI of this Code. To the extent any provision of this Article II conflicts with Article XI, the provisions of Article XI shall prevail to the extent of such conflict.
- F. The Planning and Zoning Agency may prescribe appropriate conditions to ensure proper compliance with the general spirit, purpose, and intent of this Code and the

Comprehensive Plan in addition to any conditions or restrictions specifically authorized to be imposed under this Article. Without limitation of the foregoing, conditions may be imposed by the Planning and Zoning Agency to ensure compatibility of the Special Use and related Uses with adjacent or surrounding land uses, and to avoid potentially negative effects on adjacent and surrounding land uses, provided that such conditions are reasonable and appropriate in the particular circumstances of the case, including screening or buffering, landscaping, control of manner or hours of operation, alteration of proposed design or construction of buildings, relocation of proposed open space or alteration or use of such space, or such other measures as are reasonably necessary to assure that such potential adverse or negative effects will be avoided so as to render the Special Use compatible and harmonious with other Uses and development in the area. Any such conditions shall be stated in the final order of the Planning and Zoning Agency granting the Special Use.

- G. Unless otherwise provided by the Planning and Zoning Agency, Special Uses shall only be granted to the Applicant or the Applicant's authorized designee and shall be non-transferable. All Special Uses, unless otherwise provided by the Planning and Zoning Agency, shall commence within one (1) year from the effective date of the final order of the Planning and Zoning Agency granting the Special Use.
- H. Failure to exercise the Special Use by commencement of the Use or action approved thereby within one (1) year or such longer time as approved by the Planning and Zoning Agency shall render the Special Use approval invalid, and all rights granted thereunder shall terminate. Transfer of the property by the Applicant, unless the Special Use runs with the land, shall terminate the Special Use approval.
- I. The Planning and Zoning Agency may provide that a Special Use will be granted transferable and run with the land when the Special Use authorizes permanent construction or land development, or when the Applicant has proven that transferability is reasonably necessary based on the facts stated in the Special Use application.
- J. The Planning and Zoning Agency may approve a Special Use with an extended time period in which to commence, when the Applicant has proven that additional time is reasonably necessary based on the facts stated in the Special Use application.
- K. The violation of any conditions or time periods when made a part of the terms under which a Special Use is granted shall be deemed a violation of this Code. A violation of any adopted conditions or time periods shall render the Special Use invalid, unless the violation is corrected within a reasonable time period after receipt of written notice of violation from the County Administrator requiring the correction of the violation by a specified date.
- L. Whenever the Planning and Zoning Agency has granted or denied a Special Use, it shall not consider any future application for the same property for a period of one (1) year from the effective date of the final order of the Planning and Zoning Agency acting upon the Special Use, unless otherwise provided by the Planning and Zoning Agency. The Planning and Zoning Agency may grant that a property may be reconsidered prior to one (1) year with good cause, as established by the Planning and Zoning Agency. Such action shall be stated in the final order of the Planning and Zoning Agency.

In the case of a Church, this distance shall be measured from property line to property line, without regard to route of travel, and in the case of a school, to the nearest point of the school grounds in use as part of the school facilities as measured from the property line of the place of business, without regard to route of travel.

The property line to property line measurement adopted (August 2, 2011), shall not be cause for the discontinuance of any otherwise lawfully operating business which maintains an existing license/permit for the sale of alcohol under this Code as of August 2, 2011 and has been in continuous operation since that date, nor shall such business be considered nonconforming as defined in Part 10.03.00 of this Code, if the effect of the new measurement establishes a vendor, church or school within one thousand (1,000) feet. Further, the provisions relating to distance requirements shall not apply to a vendor location if such business is sold or transferred after August 2, 2011, as long as that business has been in continuous operation since the new measurement method was adopted in August 2, 2011 (subject to the all of the requirements for such transfer under federal, state and local regulations).

A license Applicant and holder who is engaged in conducting a bona fide restaurant establishment which has tables capable of seating no less than thirty (30) persons simultaneously for the purpose of serving meals, but who is otherwise prohibited from the sale of beer and wine due to the location of such business within a certain distance from a school or a church, may apply for a Variance to permit the sale of beer and/or wine. The consideration of such application for a Variance will be administered and considered in accordance with Part 9.03.00 of this Code. Any Variance granted a vendor to permit the sale of beer and/or wine to be consumed on the premises is subject to the following circumstances and conditions.
