Houston is known internationally as the home of one of the best medical communities in the world. That's not surprising since the Texas Medical Center (TMC), the LARGEST medical center in the world, is just 10 minutes from Downtown Houston. TMC is housed on 675 acres, and is home to 42 non-profit and government institutions, including 13 teaching hospitals, two medical schools, four colleges of nursing, a dental college, a college of pharmacy and a college of optometry. Altogether 4.8 million patients visit them each year. In fact, there are more than 85 hospitals in the Houston area with more than 19,300 beds including those in TMC. These facilities employ more than 100,000 health care professionals, almost seven percent of the Houston workforce. The growth opportunity for any medical industry related companies is enormous in our fair City and now is a successful time to be operating in Texas.

We are pleased to confirm that our Campus is home to several medical industry related businesses. These notable companies range from consulting, clinics, private practices, lab testing and corporate offices.

We have compiled a list of these companies with a short bio on each as an introduction to some of the many professional companies we are proud to call our Valued Tenants.

Over the next few months, Ownership/Management will create special edition newsletters to introduce our esteemed Tenants to the many services available in our Complex. This will include Legal, Financial and Accounting services, Designers, Architects and Marketing, Oil & Gas, Personal Fitness, Real Estate, Mortgage, Insurance, Staffing, Builders, Audio and Security, Foundations and other miscellaneous services available in the Complex. We look forward to providing you with this valuable information and welcome any suggestions or comments.

Before medical advances in laser technology, treatment solutions for people suffering from nerve damage, neuropathy, and muscle, ligament or tendon issues were surgically invasive, painful and ineffective.

Dr. Bao Thai

The Truth is that not all laser treatments are created equally. Some laser treatments options continue to be painful and invasive turning away, but at Advanced Nerve & Health we know there is a better way.

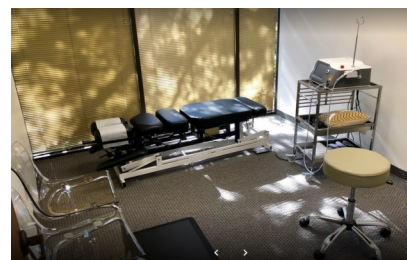

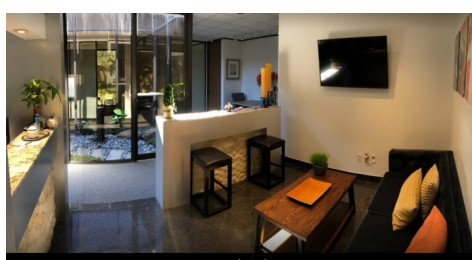

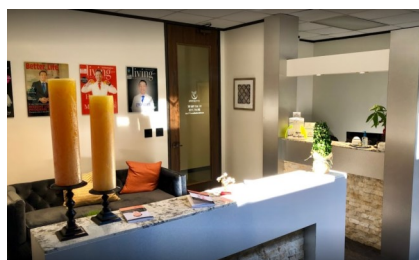

The secret to why the Advanced Nerve and Health Center has been able to get truly sustainable results and reverse nerve damage when no one else has is due to its comprehensive process of multiple technologies and therapies that combine synergistically to allow the healing process to unfold naturally.

Our doctors are trained in a distinct cutting edge method of helping reverse nerve damage that has helped thousands of patients regain their lives. Our method is based on the most advanced science and technologies available today, customized home care and nutrition program and involves no medications or surgery. Our specialized process of care was developed by world-renowned nerve expert Dr. Bao Thai.

Dr. Bao Thai is a renowned nerve specialist who has developed a unique treatment method that uses a combination of laser technologies coupled with complementary nutritional protocols to reverse nerve damage by gently coaxing damaged nerves and their diseased environment to naturally heal themselves. Dr. Bao's treatment method uses no invasive procedures, surgery or chemical drug medications and is completely painless. His proprietary process was created using techniques that produce specific proteins which are combined in a unique environment resulting in nerve regeneration and tissue repair. The entire process is designed to give damaged nerves and their environment all the energy and nutrients they need to revive themselves. Dr. Thai's treatment method uses no invasive procedures, surgery or chemical drug medications and is completely painless.

Treatment Results: Reduction or Elimination of Nerve Pain, Reduction or Elimination of Numbness and Tingling, Regained Feeling in Hands or Feet, Increased Balance and Strength, Reduction or Elimination of Pain Medications, Increased Stamina, Increased Vigor and Vitality, Improved Quality of Life. Visit our website for more information and to schedule a consultation.

According to a national survey from the Morris Animal Foundation, the number one concern of the American pet owner today is cancer. Based on North Carolina State University estimates and the number of dog owners in the U.S., an average of 19 families lose their dog family member per minute to cancer.

But as many of us know personally, the current options can have physically devastating consequences and often don't yield the desired results. Less than 20% of dogs diagnosed with Stage IV B-cell Lymphoma will live 2 years post diagnosis with chemotherapy, surgery, and rescue therapies.

CAVU's Solution

Our vision is a world in which the immense power of the cellular immune system can be harnessed to control cancer to improve quality of life. Our belief is that our furry family members should have access to personalized immuno-services. CAVU wants to offer our veterinarians the latest, pro-active, immune-guided services to help improve treatment decision making.

It's Personal

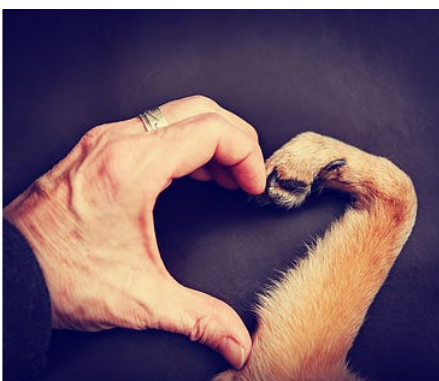

Our Founder and CEO, Dr. Colleen O'Connor, lost two dogs to cancer. She watched helplessly as her wonderful Bichon Frise and loyal Toy Poodle lost their quality of life due to progressing tumors and lack of successful treatments. These losses motivated her. She has combined her knowledge and experience of oncology, immunology, and cellular therapies with her unbridled passion to provide our pets with a chance at a longer, more meaningful life. Cutting edge research at CAVU Biotherapies is integral to finding cures and novel treatments for cancer and autoimmune diseases. We are going to focus immunotherapy research on dogs, cats, horses, and eventually, humans.

Our goal is to become the premier personalized immunotherapy company for our pets and ourselves. To accomplish our goal, we are going to think "outside the crate" by developing new clinical trials, protocols, tests, immunological counseling, and therapies.

CAVU MEANS "CEILING AND VISIBILITY UNLIMITED"

Come join us, so all species can work together to create a world that's full joy and possibilities.

That is our view on the impact and future of cancer immunotherapy. Our ambition is to change the world by keeping pet families intact longer while becoming the global leader in immune-guided personalized medicine. Our focus is not only on ending canine cancer, but translating the personalized immunotherapies to treat horses, cats, humans and autoimmune diseases.

Dr. Colleen O'Connor

8588 Katy Freeway, Suite 440A
888-589-2159
www.discoverymood.com

Our teen mental health treatment program provides multiple levels of care, including residential treatment, intensive outpatient treatment, and partial hospitalization or day treatment for teens and adolescents dealing with depression, anxiety disorders, bipolar disorder, self-harm behaviors, oppositional defiant disorder, attachment disorders, and other similar diagnoses. Our goal is to strategically address mental health disorder and the surrounding issues while providing effective interventions to support long-term recovery. If your teen is suffering

from a mental health disorder, our Discovery programs can help. We are experts in helping teens and adolescents with mental health disorders. We are experienced in helping our clients identify the emotional issues surrounding their mental health disorder and helping them learn to deal with them. If your teen or adolescent needs help, or if you would like to talk with someone about mental health disorders or Center For Discovery, we are here to help.

What are the different types of mental health disorders that we treat?

Trauma– Traumatic lifetime experiences like death, illness, loss, abandonment or perception of abandonment, bullying and forms of abuse significantly impact the psyche and physiological state of the individual.

Depression– Depression can be crippling and can turn an adolescent or teen who is usually a bright, happy person into a recluse who has a hard time getting out of bed or off the couch.

Anxiety– Anxiety can occur by itself or alongside depression.

Reactive Attachment Disorder and Adoption– Attachment refers to the physical, psychological and even biological bond that occurs between a child and their primary caretakers such as the mother and father.

Self-Harm or Self-Injury– Teens may deliberately injure or harm themselves by cutting, scratching, head-banging, hitting, picking at skin, pulling hair, biting, burning, or branding. .

Bipolar Disorder– Bipolar disorder, also known as manic-depressive illness, is a disorder that causes unusual mood shifts, energy shifts, changes in activity level and the ability to carry out daily tasks.

HOUSTON OUTPATIENT EATING DISORDER PROGRAM

8588 Katy Freeway, Suite 440
855-592-7147
www.centerfordiscovery.com

Since 2015, Center for Discovery Houston is an outpatient center that treats boys, girls, men and women of all ages who are struggling with eating disorders. Outpatient eating disorder treatment includes partial hospitalization and intensive outpatient treatments, which are day treatments designed to teach clients coping skills, help them build a healthy relationship with food, and help them establish a strong support system with their family and friends. Outpatient eating disorder treatment also focuses on providing therapy to the family in order to help them fully understand the underlying triggers and social stigmas associated with eating disorder so they can develop the skills to help their loved one through recovery. Center for Discovery Houston has trained staff that provide Dialectical Behavior Therapy (DBT), Eye Movement Desensitization and Reprocessing (EMDR), and art therapy with an individualized approach that focuses on the client as a whole.

Conditions we Treat:

- Anorexia Nervosa
- Bulimia Nervosa
- Bing Eating Disorder
- Avoidant/Restrictive Food Intake Disorder
- Orthorexia Nervosa
- Other Specified Feeding or Eating Disorders
- Co-Occurring Disorders with Eating Disorders

MEDEXTM SURGICAL

Medex Surgical is an exclusive distributor of Acumed, Lima Corporate, and Microaire products. Medex Surgical mission is to deliver innovative medical devices and exceptional service to orthopedic surgeons and other healthcare professionals throughout Texas.

Every day, their team of knowledgeable sales professionals successfully meets the challenges of the orthopedic industry with integrity, expertise and reliability.

Founded by Ed Kraus in 1988 in Dallas, Texas, the aim of Medex Surgical has always been to deliver innovative medical technologies that improve patient care and surgical outcomes to healthcare professionals throughout the State of Texas. Medex Surgical is one of the original US distributors of Acumed® brand orthopedic implants. We have enjoyed over two decades of success with Acumed. In 2006, Acumed officially recognized the value of our partnership by selecting Medex Surgical to become its first official Premier Sales Agency. Medex Surgical has grown to become a trusted partner of the surgical community. Today Medex Surgical enjoys a widely recognized reputation for expertise, service, and integrity. Medex Surgical prides itself on the longstanding relationships it enjoys with the best orthopedic surgeons throughout Texas. These demanding professionals have come to rely on Medex Surgical for superior surgical products coupled with outstanding service. We work closely with surgeons and other healthcare professional to consistently deliver the products they need to achieve superior patient outcomes. In 2005, the business was split by brothers Ed Kraus and Bob Kraus into two separate yet affiliated operating companies. Medex North based in Dallas, TX and Medex South based in Houston, TX.

- Blue & White Eye Shields
- Loops & Resticks
- LASIK & Cataract Surgical Supplies
- Solos Shields
- Duo Shields
- Duo Shades

8566 Katy Freeway, Suite 126
www.eyeshieldtechnology.com

At Eye Shield Technology, we take pride in our ability to provide nationwide shipping on all of our products. Because we know how important it is to expedite the shipping process, we offer exceptionally fast response times on all orders and process all online orders through PayPal. In addition to the products listed above, we also routinely feature specials on a number of our most popular products. Our friendly and accommodating staff would be happy to answer any questions you have and provide you with the knowledge and expertise you deserve. Whether you are an optometrist needing supplies for your office, a LASIK surgeon in need of surgical supplies, or just someone looking for a new set of goggles, we would be happy to assist you. To get started, please reach out to our offices by calling (800) 800-1722!

JOEL H. GOFFMAN, M.D., P.A.

Born and raised in Baltimore, Maryland Dr. Joel H. Goffman graduated Summa Cum Laude and received his M.D. degree from the University of Maryland in 1967. After he completed his internship at the University of Miami, Dr. Goffman served in the U. S. Coast Guard in Vietnam. He completed his residency in Ophthalmology at Baylor College of Medicine after he returned from Vietnam.

Dr. Goffman enjoys photography, playing tennis, and gardening in his off-hours. He and his family enjoy the theater, art exhibits, reading and traveling.

A successful inventor (awarded two patents), Dr. Goffman has designed several of the devices that are used during Laser Vision Correction all over the world. For more information: go to www.eyeshieldtechnology.com.

Dr. Goffman began his Laser Vision education after traveling to Canada in 1992 where the Excimer Laser was used before its approval in the United States, and participated in a 2-year (1994-1996) FDA study of the Excimer Laser for PRK and LASIK. Since its approval in 1995, he has successfully treated hundreds of patients with a wide range of refractive errors with both LASIK and PRK.

The most common complaint that patients express today is “the doctor was not the person doing the examination and no one listened to their problems”. In our office, Dr. Goffman performs all aspects of the examination, and takes all the measurements necessary to perform LASIK or PRK. He learned a long time ago that if you want something done right, you do it yourself. Dr. Goffman’s office does not rely on associate Optometrists or technicians to determine the ocular health of his patients. Dr. Goffman sees his patients from start to finish.

Laser Vision Correction: With many years of experience Dr. Goffman provides his patients with the latest technology available in Laser Vision Correction: the VISX Star S4 ActiveTrak Excimer Laser System for performing LASIK and PRK. Both LASIK and PRK reshape the cornea to eliminate the need for contact lenses or glasses. Dr. Goffman has performed hundreds of LASIK and PRK procedures on his patients for a wide range of refractive errors, including myopia (nearsightedness), astigmatism, and hyperopia (farsightedness).

The VISX laser is the most widely used Excimer laser for Laser Vision Correction in the world. It was the first laser approved by the FDA to treat high degrees of myopia and hyperopia with or without astigmatism.

For more information about LASIK or PRK call Lizbeth Villareal at **713-467-0990** or **(713) 461-8056** or you may email Lizbeth Villareal at eyemdhouston@gmail.com.

Cataract Surgery: Dr. Goffman performs “No-Stitch” Cataract Surgery. Patients can now enjoy the ease of outpatient surgery, and return home within a few hours. A multifocal implant that has been approved for many years. For more information about cataract surgery call Denise Irons at **713-467-0990** or **(713) 461-8056** or you may email Denise Irons at eyemdhouston@gmail.com.

Glasses and Contact Lenses: Adjacent to the office is South West Optical managed by Yolanda Cachola and Lisa Harmon. Together they have over thirty years experience in all facets of the optical business. Most single vision glasses can be made in 1-2 hours. Most patients interested in wearing contact lenses can be fitted by Dr. Goffman the same day as their appointment. After the fitting the patients will then be instructed in the care and handling of their new contact lenses by our Contact Lens Specialist. Additional replacement lenses are available from this office or a prescription can be obtained. For more information about contact lenses call us during business hours at **713-467-0990** or **(713) 461-8056**.

FIRST PRIMARY CARE

8582 Katy Freeway, Suite 110
713-280-7991
www.firstprimarycare.com

Despite all the medical advances of the last 50 years, somehow the timeless value of dedicated primary care and a trusted doctor-patient experience has all but gone by the wayside. Modern healthcare is inconvenient, expensive, and feels more engaged with the insurance company's bottom line than the patient's well being. Medicine is a relationship – Not a transaction or billing code. First Primary Care is changing health care by putting the focus back where it belongs: On you. First Primary Care is a members only practice dedicated to providing personalized, cost-effective, modern, everyday care to every member of the family. We help our members reclaim control of their personal healthcare from the big insurance companies by giving them unrestricted access their personal physician, directly – any time of the day or night, whenever they need, for one low monthly membership fee. First Primary Care delivers healthcare “the way it used to be” back when people had an ongoing relationship with their doctor. We’re bringing back the quality of care that comes when a doctor knows every one of their patients, as a person – not just a chart or a billing code. By cutting the big insurance middleman out of the doctor-patient relationship, our members get access to the right care, be it cutting edge procedures, or routine wellness, at a price they can afford. In fact, most people spend an average of 46% less out of pocket after

Convenient Easy Access

First Primary Care gives you direct, personal access to your physician

24/7 access via text, Skype, or phone

- Appointments whenever you need (without the wait)
- Real time with your doctor – no rush, no insurance time limits
- Video consults, so you can skip the office visit all together

Engaged and Health Centered

Convenient and attentive; personalized healthcare – the way it should be

- Individualized treatment plans by a personal physician, who knows you
- Continuity of care – from a bad flu to a scary ER visit, your physician is there to guide you, every step of the way
- Healthcare focused on your optimal health – so you can live life to its fullest, whatever that means for you

Affordable, Transparent Pricing

No more inflated “network” insurance rates, or shocking medical bills. Just affordable, transparent pricing, direct from your doctor

- Office or Skype visits, text anytime and routine labs, all included –
- Wholesale pricing for specialty labs, imaging, diagnostics, and generic drugs
- Free from inflated network pricing and free to choose when to use insurance
- The absolute lowest out-of-pocket expenses

GeriMedical Inc.
*Biomechanical Solutions
 for Biomechanical Problems*

Why GeriMedical?

Orthopedic products are what we do and ALL we have done for the past 18 years and our expert clinical and billing staff is amazing: proficient, knowledgeable and compassionate.

We accept Medicare and most commercial insurances and we confirm eligibility up front. This way choices can be made taking into considering insurance benefits and there no surprise bills because of outstanding deductibles, the insurance does not cover products, or a required authorization was not in place. Products are selected to meet individual needs taking into account physical limitations, co-existing medical conditions, desired clinical outcomes and of course lifestyle and personal preferences. Above all, the ideal product is provided because GeriMedical is manufacturer-neutral, stocking products from leading domestic and many international manufacturers (Townsend, Donjoy, Breg, Ossur, Thuasne, Top Shelf, Lifestyle Bracing, Aspen, Hely Weber, Bird & Cronin, Cybertech, Ovation, Corflex, MedSpec, Trulife, Comfy, DeRoyal, OCSI, RCI, Independence Brace).

Treating others as we hope to be treated in our time of need, the GeriMedical Team is 100% committed to ensuring a high level of service tailored to individual needs. We personally look forward to helping you with your orthotic needs.

Injury & Post-Surgical Support/Stabilization: When you're suffering from an injury and need post-surgical support or stabilization, you should consider bracing. When used in conjunction with other treatments, bracing can be extremely helpful in the overall recovery process. GeriMedical wants to make sure that all patients get the care they need, which is why we carry a number of bracing options to help with your injury and post-surgical support. What's more, we can help provide and bill your insurance for the brace. Depending on your specific injury or post-surgical needs, we offer a variety of braces.

Types of Braces: We offer several knee braces and each type serves a different purpose. Some knee braces are meant to immobilize, some are designed for support, and others provide compression. Bracing can be a great form of treatment for a torn ACL. If you have suffered an ankle injury or had surgery, there are braces available for that as well. In addition to knee braces, we also carry back braces. There are many types of back injuries that might require various types of back braces. One of the most common causes of back pain is straining or spraining the muscles or connective tissues in the lower back. There are some braces that offer support to prevent these injuries through the promotion of using proper form when lifting. Other types of back braces are designed to help with posture issues, back problems due to pregnancy, and any other back issues caused by carrying excess weight. GeriMedical also carries braces that are meant for post-operative use. These braces are built to immobilize or restrict movement after a major surgery. There are also braces available for the different parts of the arm including the shoulder, elbow, wrist, hand, and so on. Some of the reasons to use a brace for the upper extremities include shoulder dislocation, carpal tunnel, wrist fractures, and more. Please keep in mind that all braces are not created equal, meaning that they are not all designed for the same purposes. It is imperative that you work with a healthcare professional to determine what type of brace is best for your needs. GeriMedical in Houston, TX is here to assist with all your bracing needs.

Houston based physician practice revenue and operational support experts serving the Greater Houston, TX. Area from Huntsville, to Victoria and Beaumont to Columbus

Medical Staffing Network (MSN) by Cross Country Healthcare is one of the largest and most recognized healthcare staffing companies in the country. MSN is both a Best of Staffing® Client Award winner and a Best of Staffing® Talent Award winner. Healthcare facilities and providers alike have trusted MSN's industry expertise for more than three decades.

- 350,000+ professionals in our proprietary database
- 50+ local offices and a national footprint with local accountability
- 30+ years of healthcare staffing expertise
- Full-service solutions: per diem, local contract, travel and permanent placement
- Joint Commission Health Care Staffing Services Certification since 2005
- 24/7/365 in-house, operational support
- Founded and built by healthcare professionals

MSN is both a Best of Staffing® Client Award winner and a Best of Staffing® Talent Award winner. Healthcare facilities and providers alike have trusted MSN's industry expertise for more than four decades. MSN fills nursing, allied healthcare and pharmacy vacancies through a network of 350,000 professionals and 50+ local branch locations nationwide. Part of the Cross Country Healthcare family since 2014, MSN has built solid relationships with many of the nation's top hospitals and healthcare facilities and places highly qualified clinicians in both per diem assignments and local contracts.

Cross Country Healthcare was co-founded in 1986 by CEO Kevin Clark. At the time, Kevin and his partners transformed the industry by introducing innovative marketing initiatives, cutting-edge technology and a laser-focus on delivering clinical excellence for healthcare professionals. With an entrepreneurial spirit leading the way and innovation driving the solutions delivered, Cross Country changed the industry and what healthcare professionals came to expect. This drive and commitment are what, for more than 30 years now, have made Cross Country the trusted partner to thousands of nurses, allied health professionals and advanced practice and physician professionals as well as leading acute and post care health systems and hospitals across the nation.

As the industry pioneer, Cross Country Healthcare and MSN continue to take the lead and break the conventional staffing mold to proactively develop and deliver innovative technologies and intuitive solutions. Cross Country also continues to take the lead in total talent management and workforce solutions, enhancing the candidate experience and enabling healthcare professionals and providers to achieve their professional and business goals while always maintaining the patients they serve at the forefront of what they do.

The essence of the PDS business model is simple: enabling clinicians to focus more on the patient; and worry less about the business.

Starting a company from scratch isn't as difficult as it sounds. It's actually a lot harder. Before Pacific Dental Services® officially started in 1994, so much work and effort went into learning how dental practices operate – from payroll and taxes, to implementing new

technology and dealing with insurance companies. So really, the story starts before PDS even opened as a company.

- PDS started in 1994, supporting its first office in Costa Mesa, CA.
- By 1997, PDS grew to more than 20 supported offices.
- Today, PDS has over 700 supported offices in 20 states.
- PDS plans to add more than 80 supported offices each year.

PDS has been on the Inc. 5000 list of the fastest growing private companies in America for the past 10 years in a row. We plan to continue our rapid growth, adding about 80 supported offices every year. Our vision to become The Greatest Dental Company in America is quickly becoming a reality.

8588 Katy Freeway, Suite 350

Our Center provides an integrative treatment experience for those with mental illness. This approach provides our patients with a more comprehensive analysis of the potential factors that may influence an individual's health and mental health. It also provides a more customized plan of treatment that incorporates the interplay of body, mind and spirit and therefore can be much more effective than traditional medicine which takes a narrower view. We look at both medication and non-medication alternatives in creating the most effective treatment plan available

PSYCHIATRY SERVICES:

- Mental Health Assessment:

- ADHD Testing and Treatment: .
- Medication Management Services
- Mental Wellness Group

Stress-Less
stress management for corporate life

CONSULTATION FOR STRESS MANAGEMENT FOR CORPORATIONS

We help manage stress through our Stress-Less program focusing on lifestyle changes in nutrition, movement, sleep and emotional intelligence.

OUR INTEGRATIVE THERAPEUTIC APPROACH

We offer a comprehensive array of services that we call "Integrative treatment." We believe that treatment is most effective when the assessment and intervention is more comprehensive. We offer lifestyle coaching through our Stress/Less program which is focused on weight management making changes in nutrition exercise level, creating accountability, changes in sleep hygiene. Integrative Treatment involves taking a varied approach to treatment, looking at the root causes of distress by examining both physical and emotional causes to mental health issues and creating a treatment plan that incorporates alternative and adjunctive treatment methods.

Dr. Daniela White, MD

TMS THERAPY SERVICES:

We use NeuroStar TMS Therapy. NeuroStar TMS Therapy is a proven non-drug treatment for depression. It is a safe and effective, FDA-cleared, non-drug treatment for depression recommended for people that have failed several treatments of antidepressants or did not tolerate the side effects induced by antidepressants. NeuroStar TMS Therapy achieves results without the side effects associated with antidepressant medications. Treatment involves a highly targeted, pulsed magnetic field to stimulate function in brain regions known to affect mood.

To learn more about TMS Treatment or to set up an appointment to see if TMS treatment is right for you-,call Psychiatrist Daniela White, M.D. at 713-426-3100

Meet Dr. Canada of Smiles by Canada in Houston, Texas

Dr. Shelley L. Canada has practiced **family and cosmetic dentistry** since 1989 when she graduated from the University of Oklahoma College of Dentistry with awards in operative and pediatric dentistry and was number one in her class in crown and bridge dentistry. She has been licensed in Texas, Oklahoma and Louisiana and she is oral sedation certified in Texas. Dr. Canada completed a one-year general practice residency at the University of Texas Health Sciences Center at Hermann Hospital, The University of Texas School of Dentistry,

Texas Institute of Research and Rehabilitation and Ben Taub Hospital in 1990 where she learned how to treat the medically compromised patient. She then completed a one-year cosmetic dentistry fellowship with Realty Publishing and Esthetic Dental Professionals in 1991. She has been in private solo practice since 1995. In 1995, she was named Young Dentist of the Year and in 2009, Dentist of the Year by the Ninth District Dental Society where she was the past president. Dr. Canada is a fellow of the American and International College of Dentists as well as the Delta Sigma Delta International Dental Fraternity where she is a national officer. She also teaches Ethics and Professionalism to sophomore dental students the University of Texas School of Dentistry. In her free time, she is also very involved with the Seattle Study Club in **Houston**, the West Side Study Club, the Ninth District Dental Society, the Greater Houston Dental Society, the Texas Dental Association, and Delta Sigma Delta Dental Fraternity. She is a mentor to many past, present and future dental students as well. Dr. Canada is currently on Faculty at the **University of Texas School of Dentistry in Clinical Practice** and she also serves as a consultant for the **Texas State Board of Dental Examiners**. She is repeatedly voted each year as a **Texas Super Dentist** and a **Houston Best Dentist**.

Over the past 15 years our team of experts at Texas AED® has placed thousands of life saving AED Defibrillators in the hands of our valued customers with the purpose to saving lives from Sudden Cardiac Arrest. We also support Police, Fire and EMS services with life saving AED Defibrillators to respond to emergency 911 calls.

Our Mission at Texas AED® is to increase public awareness of Sudden Cardiac Arrest and place AEDs in public places, workplaces, churches, schools, dentist offices, nursing homes and in the home for personal use. Our Goal is to provide you our valued customer with the highest quality in AED Defibrillators at the most affordable price. Ready to order or have a question? Give us a call today at (888) 865-0333 or stop by our office located at Sterlington Medical, 8556 Katy Freeway, Suite 101, Houston TX 77024.

Getting the AED is the first step. Proper training in CPR and AED is the second step in the success of your AED Defibrillator Program. People buy AEDs for many different purposes and place them in a variety of locations such as Business Workplaces, Schools, Churches, or Gyms.

Texas AED® understands proper training of volunteer responders is crucial to anyone who responds to a Sudden Cardiac Arrest and uses an AED Defibrillator to save a life. We can coordinate onsite CPR and AED training at your location with manikins and certified instructors in all 50 US states for any size and type of organization. **Call us Today at (888) 865-0333 for pricing and to coordinate your training dates.**

Our mission is to protect your business against risk while protecting the environment

We are a group obsessed with compliance and regulations and dedicated to medical waste professionals. We're all about protecting clients, patients, employees, and the environment. We are committed to delivering environmental services in a clinical manner with budget-protected pricing.

Top Healthcare Professionals Choose Trilogy - Experience drives innovation

Our experience, our products, and our services are what truly sets us apart from other medical waste removal and treatment companies. We offer top-of-the-line solutions that meet the needs of every practice, big and small. From waste management and sharps disposal to compliance training and document destruction, Trilogy MedWaste is here to help move your facility forward as efficiently as possible. We provide localized friendly service backed by the strength of a nationwide company with the resources to deliver uncompromisingly excellent service.

Medical Waste

Servicing small, medium and large generators

Our products, services, and programs keep your facility safe, in compliance, and operating profitably. As America's newest choice for medical waste solutions, we offer a full range of services including regulated medical waste, sharps management, and compliance training for all size facilities.

When you select Trilogy Med-Waste as your medical waste solution partner, you receive a complete suite of services, environmentally friendly processing, and a partner you can trust

Document Destruction

Let Trilogy manage your document destruction

Paper shedding and document destruction is an effective solution for sensitive documents while ensuring security and peace of mind. Recycling paper is an important part of sustainability, but leaving confidential information exposed this way dramatically increases the risk of data breach.

Call us now for more information about document destruction

Sharps Disposal

Sharps management that makes sense

Our sharps tracking and retrieval service is a custom sharps management solution designed for your busy operation. Certified representatives work with your staff and conduct a comprehensive audit of your sharps usage patterns and waste streams. We provide engineer-designed sharps containers with horizontal loading slots that provide safe, secure disposal for greater patient and staff safety. In addition to comprehensive sharps management plans, we offer mail back services for your sharps and unused pharmaceuticals

TODAY'S VISION

**Corporate Office: 8554
Katy Frwy, Suite 120
www.todayvision.com**

Established in 1993, U.S. Medical Management, LLC (USMM) is a family of companies all dedicated to providing high-quality, coordinated health care in the home. This includes Visiting Physicians Association (VPA).

USMM provides comprehensive management, administrative and support services and has specific expertise in physician house call medicine.

USMM also has developed and owns several allied health properties which assist in the provision of home based primary care and furthers the value and efficiency of house call medicine. These include certified Home Health Agencies, Hospices and Durable Medical Equipment companies. These separate entities are all offered as stand-alone services. In 2014, USMM became a subsidiary of Centene Corporation.

- Established in 1993
- Over 200 full time Primary Care Providers (Physicians, Nurse Practitioners and Physician Assistants)
- Physician-led model with 70 % Physician Providers
- Serves over 50,000 unique patients annually
- Largest physician house call practice in the U.S.
- Leader in government shared savings programs
- Experience with clinically integrated networks, population health management, and value-based initiatives
- Fully implemented compliance, quality management and infection control programs
- Patient specific proprietary clinical protocol software for chronic care

Primary Care

Our Primary Care Providers treat elderly and other adults who have complex health issues. Our services are provided in the safety, privacy and comfort of the patient's home. We are able to ease the burden of those having difficulty getting out to the doctor, as well as helping their families and caregivers.

- VPA's physician led model establishes close relationships with patients and a deep understanding of their social and clinical needs.
- Our services deliver solutions to meet individual patient goals. We provide comprehensive and compassionate evidence-based care incorporating best in class processes, standards, and technology for the patients and care partners that we serve. Care management- high risk patients and Care coordination for other medically needed services
- Preventive care including; health assessments, immunizations, and functional assessments
- Medication management and adherence strategies
- 24/7 after hours clinical support
- Reduction of emergency department use and hospitalizations
- Post hospitalization discharge follow-up

Short-Term Care (Episodic Care)

- Hospital admission avoidance program
- Readmission reduction program
- Transitional care program - from facility to home
- Reduction of risk of secondary re-hospitalization for medication-related issues, co-morbidities or other ambulatory sensitive conditions
- Enhanced patient access to reduce need for emergency department care
- Coordination with patient's Primary Care Provider
- Patient Stabilization- enhanced path to recovery and health status improvement
