Subject: Tank and Contaminated Soil Removal
Corner of Ford and Plymouth Roads

Dear Mr. Hamilton:

As we discussed on the telephone, I have reviewed activity reports submitted by staff of the Washtenaw County Health Department and analytical results submitted by your contractor in reference to the tank and soil removal done at this site. It was observed by staff of WCHD that upon completion of the removal that no odor or other evidence of gasoline contamination exists in the excavation. The soil samples tested by your consultant also showed no evidence of gasoline contamination. Based upon this information, it appears that you have completed the soil removal needed at this site. Thank you for your cooperation in this matter.

Sincerely,

A handwritten signature in cursive script, appearing to read "Leonard Lipinski".

Re: Fuel Tanks and Contaminated Soil removal at 5860 Ford Rd..

Dear Mr. Hamilton,

Having witnessed the removal of the fuel tanks and reviewing the analytic results of the remaining soil and the Michigan D.N.R. letter of acceptance this department is confident that all conditions have been satisfactorily met. The backfilling of the excavations has been completed as agreed.

If this department can be of any further assistance, please make contact at this office. The Superior Township Fire Department - (313) 482-6308

Sincerely,
Larry K. Martin
