# Workday Drive

This is the  
**#1**  
dominant segment  
for this area

In this area  
**24.2%**  
of households fall  
into this segment

In the United States  
**3.1%**  
of households fall  
into this segment

### An overview of who makes up this segment across the United States

#### Who We Are

Workday Drive is an affluent, family-oriented market with a country flavor. Residents are partial to new housing away from the bustle of the city but close enough to commute to professional job centers. Life in this suburban wilderness offsets the hectic pace of two working parents with growing children. They favor time-saving devices, like banking online or housekeeping services, and family-oriented pursuits.

#### Our Neighborhood

- Workday Drive residents prefer the suburban periphery of metropolitan areas. Predominantly single family, homes are in newer neighborhoods, 34% built in the 1990s, 31% built since 2000. Owner-occupied homes have high rate of mortgages at 68%, and low rate vacancy at 4%. Median home value is \$257,400. Most households are married couples with children; average household size is 2.97. Most households have 2 or 3 vehicles; long travel time to work including a disproportionate number commuting from a different county

#### Market Profile

- Most households own at least 2 vehicles; the most popular types are minivans and SUVs. Family-oriented purchases and activities dominate, like 4+ televisions, movie purchases or rentals, children's apparel and toys, and visits to theme parks or zoos. Outdoor activities and sports are characteristic of life in the suburban periphery. They attend sporting events, as well as participate in them like bicycling, jogging, golfing, and boating. Home maintenance services are frequently contracted, but these families also like their gardens and own the tools for minor upkeep, like lawn mowers, trimmers, and blowers.

#### Socioeconomic Traits

- Education: 40.5% college graduates; more than 72% with some college education. High labor force participation rate at 71%; 2 out of 3 households include 2+ workers. Connected, with a host of wireless devices, anything that enables convenience, like banking, paying bills, or even shopping online. Well insured and invested in a range of funds, from savings accounts or bonds to stocks. Carry a higher level of debt, including first and second mortgages and auto loans.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. Data provider Esri classifies U.S. residential neighborhoods into 67 unique market segments based on socioeconomic and demographic characteristics. Data Source: Esri 2023. dominant segment for this area

In this area

# 18.9%

of households fall into this segment

In the United States

# 1.9%

of households fall into this segment

## An overview of who makes up this segment across the United States

### Who We Are

This is the new growth market, with a profile similar to the original: young professionals with families that have opted to trade up to the newest housing in the suburbs. The original Boomburbs neighborhoods began growing in the 1990s and continued through the peak of the housing boom. Most of those neighborhoods are fully developed now. This is an affluent market but with a higher proportion of mortgages. Rapid growth still distinguishes the Boomburbs neighborhoods, although the boom is more subdued now than it was 10 years ago. So is the housing market. Residents are well-educated professionals with a running start on prosperity.

### Our Neighborhood

- Growth markets are in the suburban periphery of large metropolitan areas. Young families are married with children; average household size is 3.25. Homeownership is 84% (Index 134), with the highest rate of mortgages, 71.5%. Primarily single-family homes in new neighborhoods, 66% built since 2000. Median home value is \$350,000. Lower housing vacancy rate at 3.7%. The cost of affordable new housing comes at the expense of one of the longest commutes to work, over 30 minutes average, including a disproportionate number (33.6%) commuting across county lines.

### Socioeconomic Traits

- Well-educated young professionals, 55% are college graduates. High labor force participation at 71.3%; most households have more than two workers. Longer commute times from the suburban growth corridors have created more home workers. Well connected, own the latest devices and understand how to use them efficiently; biggest complaints—too many devices and too many intrusions on personal time. Financial planning is well under way for these professionals.

### Market Profile

- Boomburbs residents prefer late model imports, primarily SUVs, and also luxury cars and minivans. This is one of the top markets for the latest in technology, from smartphones to tablets to internet connectable televisions. Style matters in the Boomburbs, from personal appearance to their homes. These consumers are still furnishing their new homes and already remodeling. Enjoy gardening but more often contract for home services. Physical fitness is a priority, including club memberships and home equipment. Leisure includes a range of activities from sports (hiking, bicycling, swimming, golf) to visits to theme parks or water parks. Residents are generous supporters of charitable organizations.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. Data provider Esri classifies U.S. residential neighborhoods into 67 unique market segments based on socioeconomic and demographic characteristics. Data Source: Esri 2023. Update Frequency: Annually.

# Middleburg

This is the

# #3

dominant segment for this area

In this area

# 13.0%

of households fall into this segment

In the United States

# 3.1%

of households fall into this segment

## An overview of who makes up this segment across the United States

### Who We Are

Middleburg neighborhoods transformed from the easy pace of country living to semirural subdivisions in the last decade, as the housing boom spread beyond large metropolitan cities. Residents are traditional, family-oriented consumers. Still more country than rock and roll, they are thrifty but willing to carry some debt and are already investing in their futures. They rely on their smartphones and mobile devices to stay in touch and pride themselves on their expertise. They prefer to buy American and travel in the US. This market is younger but growing in size and assets.

### Our Neighborhood

- Semirural locales within metropolitan areas. Neighborhoods changed rapidly in the previous decade with the addition of new single-family homes. Include a number of mobile homes. Affordable housing, median value of \$175,000 with a low vacancy rate. Young couples, many with children; average household size is 2.75.

### Socioeconomic Traits

- Education: 65% with a high school diploma or some college. Labor force participation typical of a younger population at 66.7%. Traditional values are the norm here, faith, country, and family. Prefer to buy American and for a good price. Comfortable with the latest in technology, for convenience (online banking or saving money on landlines) and entertainment.

### Market Profile

- Residents are partial to domestic vehicles; they like to drive trucks, SUVs, or motorcycles. Entertainment is primarily family-oriented, TV and movie rentals or theme parks and family restaurants. Spending priorities also focus on family (children's toys and apparel) or home DIY projects. Sports include hunting, fishing, bowling, and baseball. TV and magazines provide entertainment and information. Media preferences include country and Christian channels.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. About this segment

# Up and Coming Families

This is the

## #4

dominant segment for this area

In this area

## 10.7%

of households fall into this segment

In the United States

## 2.8%

of households fall into this segment

## An overview of who makes up this segment across the United States

### Who We Are

Up and Coming Families is a market in transition. Residents are younger and more mobile than the previous generation. They are ambitious, working hard to get ahead, and willing to take some risks to achieve their goals. The recession has impacted their financial well-being, but they are optimistic. Their homes are new; their families are young. And this is one of the fastest-growing markets in the country.

### Our Neighborhood

- New suburban periphery: new families in new housing subdivisions. Building began in the housing boom of the 2000s and continues in this fast-growing market. Single-family homes with a median value of \$194,400 and a lower vacancy rate. The price of affordable housing: longer commute times

### Socioeconomic Traits

- Education: 67% have some college education or degree(s). Hard-working labor force with a participation rate of 71%. Most households (61%) have 2 or more workers. Careful shoppers, aware of prices, willing to shop around for the best deals and open to influence by others' opinions. Seek the latest and best in technology. Young families still feathering the nest and establishing their style.

### Market Profile

- Rely on the Internet for entertainment, information, shopping, and banking. Prefer imported SUVs or compact cars, late models. Carry debt from credit card balances to student loans and mortgages, but also maintain retirement plans and make charitable contributions. Busy with work and family; use home and landscaping services to save time. Find leisure in family activities, movies at home, trips to theme parks or the zoo, and sports; from golfing, weight lifting, to taking a jog or run.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. About this segment

# Professional Pride

This is the

## #5

dominant segment for this area

In this area

## 9.5%

of households fall into this segment

In the United States

## 1.6%

of households fall into this segment

## An overview of who makes up this segment across the United States

### Who We Are

Professional Pride consumers are well-educated career professionals that have prospered through the Great Recession. To maintain their upscale suburban lifestyles, these goal-oriented couples work, often commuting far and working long hours. However, their schedules are fine-tuned to meet the needs of their school-age children. They are financially savvy; they invest wisely and benefit from interest and dividend income. So far, these established families have accumulated an average of \$1.6 million dollars in net worth, and their annual household income runs at more than twice the US level. They take pride in their newer homes and spend valuable time and energy upgrading. Their homes are furnished with the latest in home trends, including finished basements equipped with home gyms and in-home theaters.

### Our Neighborhood

- Typically owner-occupied, single-family homes are in newer neighbor hoods: 67% of units were built in the last 20 years. Neighborhoods are primarily located in the suburban periphery of large metropolitan areas. Most households own three or more vehicles; long commutes are the norm. Homes are valued at more than twice the US median home value, although three out of four homeowners have mortgages to pay off. Families are mostly married couples (almost 80% of households), and nearly half of these families have kids. Their average household size, 3.13, reflects the presence of children.

### Socioeconomic Traits

- Professional Pride consumers are highly qualified in the science, technology, law, or finance fields; they've worked hard to build their professional reputation or their start-up businesses. These consumers are willing to risk their accumulated wealth in the stock market. Most have a preferred financial institution, regularly read financial news, and use the internet for banking transactions. Residents are goal oriented and strive for lifelong earning and learning. Life here is well organized; routine is a key ingredient to daily life.

### Market Profile

- These frequent travelers take several domestic trips a year, preferring to book their plane tickets, accommodations, and rental cars via the internet. Residents take pride in their picture-perfect homes, which they continually upgrade. They shop at Home Depot and Bed Bath & Beyond to tackle the smaller home improvement and remodeling tasks but contract out the larger projects. Hire housekeepers or professional cleaners. Residents are prepared for the ups and downs in life; they maintain life insurance; homeowners and auto insurance; as well as medical, vision, dental, and rescription insurance through work. They are actively investing for the future; they hold 401(k) and IRA retirement plans, plus securities. Consumers spend on credit but have the disposable income to avoid a balance on their credit cards. They spend heavily on internet shopping; Amazon.com is a favorite website. Consumers find time in their busy schedules for themselves. They work out in their home gyms, owning at least a treadmill, an elliptical, or weightlifting equipment. They also visit the salon and spa regularly. All family members are avid readers; they read on their smartphones, tablets, and e-readers but also read hard copies of epicurean, home service, and sports magazines. Residents, both young and old, are tech savvy; they not only own the latest and greatest in tablets, smartphones, and laptops but actually use the eatures each has to offer.

## About RPR (Realtors Property Resource)

- Realtors Property Resource® is a wholly owned subsidiary of the National Association REALTORS®.
- RPR offers comprehensive data – including a nationwide database of 164 million properties – as well as powerful analytics and dynamic reports exclusively for members of the NAR.
- RPR's focus is giving residential and commercial real estate practitioners, brokers, and MLS and Association staff the tools they need to serve their clients.
- This report has been provided to you by a member of the NAR.

## About RPR's Data

RPR generates and compiles real estate and other data from a vast array of sources. The data contained in your report includes some or all of the following:

- **Listing data** from our partner MLSs and CIEs, and related calculations, like estimated value for a property or median sales price for a local market.
- **Public records data** including tax, assessment, and deed information. Foreclosure and distressed data from public records.
- **Market conditions and forecasts** based on listing and public records data.
- **Census and employment data** from the U.S. Census and the U.S. Bureau of Labor Statistics.
- **Demographics and trends data** from Esri. The data in commercial and economic reports includes Tapestry Segmentation, which classifies U.S. residential neighborhoods into unique market segments based on socioeconomic and demographic characteristics.
- **Business data** including consumer expenditures, commercial market potential, retail marketplace, SIC and NAICS business information, and banking potential data from Esri.
- **School data and reviews** from Niche.
- **Specialty data sets** such as walkability scores, traffic counts and flood zones.

## Update Frequency

- Listings and public records data are updated on a continuous basis.
- Charts and statistics calculated from listing and public records data are refreshed monthly.
- Other data sets range from daily to annual updates.
