Re: Phase I and Limited Phase II
Environmental Site Assessment
Report
Former Hospital Property
330 Carolina Drive
Tryon, North Carolina
EnviroSouth Job No. 2720

Dear Mr. Brylowe and Ms. Easley:

Please find attached our Phase I and Limited Phase II Environmental Site Assessment report for the above-referenced property.

If you have any questions concerning this report or need additional information, please do not hesitate to contact us.

Sincerely,

EnviroSouth, Inc.

Thomas F. Donn, P.G.
Principal Hydrogeologist

Environmental Professional Statement:

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental professional* as defined in Section 312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

This executive summary is intended as a brief synopsis of our findings and should not be relied upon as a substitute for the user reading and understanding the entire report.

At the request of Tom Brylowe and Dorothy Easley, EnviroSouth, Inc. completed a Phase I and Limited Phase II Environmental Site Assessment (ESA) of the parcel of land located at 330 Carolina Drive, Tryon, North Carolina. The subject property is located on the west and north sides of Carolina Drive immediately east of the intersection with the south end of Glenwalden Lane.

- The subject property occupies approximately 4.92 acres of land. The property is developed with a 39,204+/- square feet wood-frame and masonry former hospital building, an approximately 2,000 square feet wood-frame and masonry former classroom building, and associated driveways and parking lot. Landcover on the remaining portion of the property is cleared scrubland and woodland.
- Based on a review of historical information and interviews, the subject property appears to have been first developed in 1926 as a hospital. The original hospital building was subsequently added to with wings to the north and south from 1953 to 1956. The property was used as a hospital until 1974. Beginning in the mid-1970s, the building housed a county social services agency. At various times between then and 2011, the building also housed a senior center, a mental health office, and a morgue. The building was vacated in 2011 and sold in 2013. Since then, the building has undergone partial interior demolition in the upper level and boiler room, but has remained primarily unused.
- The subject property does not appear on any of the regulatory agency lists specified by ASTM Standard E1527-13.
- Eight (8) facilities within a one (1) mile radius of the subject property were identified on regulatory agency lists within the search radii specified by ASTM Standard E1527-13. None of the identified facilities are considered to present a likely environmental threat to the subject

property based on each facility's regulatory status, location, and/or topographic setting relative to the subject property.

- As a Limited Phase II Environmental Assessment of the subject property, soil samples from the known or estimated area of three (3) current or former petroleum underground storage tanks (USTs) were collected, screened, and laboratory analyzed. No indications of subsurface soil impact from petroleum products was found.
- Based on the results of this Phase I and Limited Phase II ESA, no *recognized environmental conditions* were discovered in connection with the subject property.
- We recommend that the two (2) identified existing USTs be excavated and removed from the subject property or closed in place by filling with an inert solid. The heating oil UST adjacent to the classroom building has been confirmed to contain no liquid or sludge, so it can be removed or filled in place as is. The diesel fuel UST identified under the asphalt in the driveway adjacent to the electrical generator should be excavated to determine its contents. If liquid or sludge is found in that tank, the contents should be removed from the tank and properly containerized before the tank is removed or filled in place. The contents of the tank (if any) should then be disposed in accordance with applicable regulations.
- Although not included in the scope of a Phase I ESA, users of this report should be aware of non-scope items of environmental significance during future building renovations and waste disposal. These items primarily include the consideration of worker safety, permitting, inspection, and disposal of asbestos and lead-based paint on and in building materials and debris piles on the subject property.

1 INTRODUCTION

1.1 PURPOSE

EnviroSouth performed this Phase I Environmental Site Assessment (ESA) in general accordance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard Practice for Phase I Environmental Site Assessment Process E1527-13. The purpose of this assessment is to identify, to the extent feasible pursuant to the process prescribed in ASTM Practice E1527-13, *recognized environmental conditions* in connection with the subject property.

In addition, a Limited Phase II Environmental Assessment of soils in the known or estimated locations of three (3) current or former petroleum underground storage tanks (USTs) was performed in accordance with applicable procedures and regulations.

A “*recognized environmental condition*” is defined by the ASTM standard as the presence or likely presence of hazardous substances or petroleum products in, on, or at a property (i.e., in the soil, soil vapor, groundwater and/or surface water): (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis conditions* are not recognized environmental conditions. ASTM Standard E1527-13 does not include any testing of materials (for example, soil, water, air, building materials).

ASTM Standard E1527-13 also includes definitions for other forms of environmental conditions as described below.

- *Historical recognized environmental condition* - a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- *Controlled recognized environmental condition* – a *recognized environmental condition* resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.
- *De minimis condition* – a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not *recognized environmental conditions* nor *controlled recognized environmental conditions*.

This assessment has been performed for use by the prospective purchaser of the subject property to allow an evaluation of environmental conditions prior to the date of purchase.

The land area that is the subject of this assessment is hereafter referred to in this report as the “site,” “property,” or “subject property”.

1.2 SCOPE OF WORK

The following sections describe EnviroSouth’s scope of work and the contents of this report:

- Section 2, **Site Setting**, is a compilation of information concerning the subject property’s location and physical setting.
- Section 3, **Records Review**, is a compilation of EnviroSouth’s review of databases available from Federal, State and where applicable local regulatory agencies regarding hazardous substance use, storage or disposal at the subject property; and for off-site facilities up to a mile radius from the property.

- Section 4, **Site History**, summarizes the history of the subject property and adjoining parcels based on various sources which may include a review of aerial photographs, city or suburban directories, historical maps and information appropriate to meet the U.S. Environmental Protection Agency requirements of *All Appropriate Inquiry* to satisfy one of the requirements to qualify for the “innocent landowner” or “bona fide prospective purchaser” limitations on CERCLA liability.
- Section 5, **Site Reconnaissance**, describes EnviroSouth’s observations during the on-site reconnaissance of the subject property. Conditions on adjoining parcels and the surrounding area are documented based on visual observations from the subject property and public rights-of-way.
- Section 6, **Limited Phase II Environmental Assessment**, summarizes the procedures and findings of soil assessment services completed around the location of three (3) current or former petroleum underground storage tanks (USTs) on the subject property.
- Section 7, **Findings**, identifies known or suspect *recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental conditions, and de minimis conditions.*
- Section 8, **Opinion and Conclusions**, includes the environmental professional’s opinion(s) of the impact on the property of conditions identified in the findings section. In addition, this section summarizes the details of all *recognized environmental conditions* (including *controlled recognized environmental conditions*) connected with the subject property.
- Section 9, **Limitations**, identifies any data gaps encountered during the assessment process.

Pertinent documentation regarding the subject property is included in Appendices A through F of this report.

2 SITE SETTING

The site setting is presented to assess the significance of potential on- and off-site contaminant migration, if present. Figures showing uses of the site and surrounding areas are included in Appendix A. The site vicinity is shown on a topographic map as Figure 1. Site features and surrounding land use are shown on an aerial photo as Figure 2. Photographs of the subject property and adjoining parcels are included in Appendix B.

The information presented in Table 1 describes the physical location of the subject property. This information was obtained from client-supplied information, maps and public records.

**TABLE 1
SITE SETTING**

ADDRESS	330 Carolina Drive, Tryon, North Carolina
LOCATION	West and north sides of Carolina Drive immediately east of the intersection with the south end of Glendwalden Lane
PARCEL ACREAGE	Approximately 4.92 acres
TAX MAP NUMBERS	Polk County Tax Map No. T12-E20
CURRENT USE	Vacant former hospital building

Table 2 presents information about the physical setting of the subject property. This information was obtained from on-site observations and published maps.

**TABLE 2
PHYSICAL SETTING**

USGS TOPOGRAPHIC QUADRANGLE	Source: 7.5-minute series Quadrangle, Landrum, South Carolina, dated 2014	The property is located at an approximate surface elevation of 1,107 feet above mean sea level. The terrain on the property slopes moderately to steeply to the south, north, and east. The terrain in the surrounding area slopes in all directions.
NEAREST SURFACE WATER	Source: 7.5-minute series Quadrangle, Landrum, South Carolina, dated 2014	Little Creek is located approximately 400 feet south and east of the subject property.

3 RECORDS REVIEW

3.1 REGULATORY AGENCY REVIEW

The purpose of the records review is to obtain and review publicly available records that could be used to help identify recognized environmental conditions in connection with the subject property.

Federal, State and local regulatory agencies publish databases or “lists” of businesses and properties that handle hazardous materials or hazardous waste or are the known location of a release of hazardous substances to soil and/or groundwater. These databases are available for review and/or purchase at the regulatory agencies, or the information may be obtained through a commercial database service. EnviroSouth contracted with a commercial database service, Environmental Data Resources (EDR), to review the regulatory agency lists for references to the site and any listings within the appropriate ASTM minimum search distances to the property. The EDR database search results for the property and for other nearby facilities are contained in the Regulatory Agency Summary Report included in Appendix C. The federal and state databases reviewed along with their standard ASTM search distances are summarized on Tables 3A and 3B. An explanation of the content of these databases is contained in the EDR report.

**TABLE 3A
FEDERAL RECORDS REVIEWED**

ENVIRONMENTAL RECORD SOURCE	SEARCH DISTANCE
NPL	1-mile
Delisted NPL	½-mile
CERCLIS	½-mile
CERCLIS NFRAP	½-mile
RCRA CORRACTS	1-mile
RCRA non-CORRACTS TSD	½-mile
RCRA generators	Property and Adjoining
Institutional control / Engineering controls registries	Property only
ERNS	Property only

**TABLE 3B
STATE RECORDS REVIEWED**

ENVIRONMENTAL RECORD SOURCE	SEARCH DISTANCE
Equivalent NPL	1-mile
Equivalent CERCLIS	½-mile
Landfill and/or solid waste disposal site	½-mile
Leaking storage tank	½-mile
Registered storage tank	Property and Adjoining
Institutional control / Engineering controls registries	Property only
Voluntary cleanup sites	½-mile
Brownfield sites	½-mile

3.1.1 Subject Property

The subject property does not appear on any of the regulatory agency lists specified by ASTM Standard E1527-13.

The following table details the past and/or current petroleum underground storage tanks (USTs) on the subject property.

**TABLE 4
UNDERGROUND STORAGE TANK (UST) INFORMATION**

ESTIMATED VOLUME (gallons)	PETROLEUM TYPE	UST STATUS	IF ABANDONED, YEAR/METHOD
500	Diesel Fuel	Out-of-use	N/A
300	Heating Oil	Out-of-use	N/A
Unknown	Heating Oil	Likely abandoned by removal	Likely removed between 2012 and 2019

3.1.2 Off-Site Facilities

Eight (8) facilities within a one (1) mile radius of the subject site were identified on the regulatory agency lists specified by ASTM Standard E1527-13. None of the identified facilities are considered to present a likely environmental threat to the subject property based on each facility's regulatory status, location, and/or topographic setting relative to the subject property.

3.1.3 Regulatory Agency File and Records Review

ASTM Standard E1527-13 indicates that if the subject property or any of the adjoining parcels are identified on any of the sources listed in Tables 3A and 3B, regulatory files associated with the listing(s) should be reviewed to assist in determining if any type of *recognized environmental condition* or *de minimis condition* exists at the property in connection with the listing. If it is the environmental professional's opinion that such a file review is not warranted, an explanation justifying the opinion must be provided in this report.

Because neither the subject property nor any adjoining parcels were included on the ASTM-specified lists, no detailed review of regulatory listings was conducted.

3.1.4 Unmapped Sites

Because of poor or inadequate address information, some facilities may not be mapped by EDR and would be listed in the "orphan summary" section of the EDR report. There were no orphan sites identified in the EDR report.

4 SITE HISTORY

The history of the subject property was researched to identify obvious past uses of the property from readily available resources. Table 5 summarizes the available resources and historical information reviewed during this assessment.

**TABLE 5
HISTORICAL INFORMATION REVIEWED**

	YEARS REVIEWED	AVAILABLE SOURCE
TOPOGRAPHIC MAPS	1889, 1907, 1961, 1983, 2014	EDR Historical Topo Map Library
AERIAL PHOTOGRAPHS	1938, 1943, 1951, 1955, 1961, 1964, 1976, 1978, 1985, 1989, 1993, 1994, 2000, 2008, 2011, 2014, 2017	EDR Aerial Photo Search
SANBORN FIRE INSURANCE MAPS	No coverage	EDR Sanborn Map Collection
CITY DIRECTORIES	Not reviewed	Polk County Public Library

The history of the subject property was partially established by utilizing public records, historical maps, and aerial photographs.

4.1 HISTORICAL TOPOGRAPHIC MAPS AND AERIAL PHOTOGRAPHS

Topographic maps and aerial photographs were reviewed to evaluate past land use at the subject property and in the surrounding area. Maps or photographs dating back to 1889 were reviewed as part of this report. The summary of this review is presented in Tables 6 and 7.

**TABLE 6
HISTORICAL TOPOGRAPHIC MAP OBSERVATIONS**

YEAR(S)	SUBJECT PROPERTY	NOTABLE ADJOINING PARCELS
1889, 1907	Undeveloped	---
1961	Two (2) small structures	---
1983	Both current buildings	---
2014	No structures appear on the 2014 map series	---

**TABLE 7
HISTORICAL AERIAL PHOTOGRAPH OBSERVATIONS**

YEAR(S)	SUBJECT PROPERTY	ADJOINING PARCELS
1938 – 1951	Original “T-shaped” hospital building	Woodland and scattered residences
1955	Original building plus north wing	Woodland and scattered residences
1961 – 2017	Similar to current conditions (date of first appearance of the classroom building is difficult to determine based on dense woodland in the area)	Woodland and scattered residences

4.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps provide historical land use information for some metropolitan and small-established towns. Sanborn map coverage was not available for the subject property.

4.3 CITY DIRECTORIES

Based on the absence of historical city directory coverage in the subject property area and known recent history of the subject property, city directories were not reviewed.

4.4 INTERVIEWS

EnviroSouth contacted Chief James Waters of the Tryon Fire Department to determine if the subject property had any known or recorded history of hazardous materials or fire incidents. He indicated that the Department has records dating back to 2015, and no such response records for the subject property were included in their database.

EnviroSouth interviewed a user of this Phase I and Limited Phase II ESA Report, Mr. Tom Brylowe, at an on-site visit at the subject property. Mr. Brylowe indicated that he is unaware of any environmental concerns associated with the subject property other than the petroleum USTs identified in the 2012 ESA Report referred to in Section 4.7 of this report.

4.5 ENVIRONMENTAL LIEN / ACTIVITY USE LIMITATION SEARCH

ASTM E1527-13 requires that a search be conducted for environmental liens against the subject property that have been filed or recorded under federal, state, tribal, or local laws. The purpose of the search is to identify liens placed on the subject property that indicates an environmental response action was taken to address past releases at, on, or near the subject property and to identify any recorded activity or use limitations (AULs). No environmental lien search or title history information was provided for our review during completion of this assessment. Typically, title history and lien searches are conducted by an attorney associated with the sale of a property.

4.6 FAIR MARKET VALUE

According to Mr. Tom Brylowe, the subject property is being negotiated for sale at a price that represents a fair market value for similar properties in the area with no known adjustments of sale price related to environmental factors.

4.7 PREVIOUS INVESTIGATIONS

EnviroSouth reviewed a Phase I Environmental Site Assessment Report regarding the subject property prepared by Altamont Environmental, Inc., dated October 1, 2012. The pertinent results of that report include:

- No *recognized environmental conditions* were identified.
- Two (2) suspected petroleum underground storage tanks (USTs) were identified as potential environmental concerns. The report recommended “further evaluation of the tanks and potentially removing the tanks”.

4.8 SUMMARY OF SITE HISTORY

Based on a review of historical information and interviews, the subject property appears to have been first developed in 1926 as a hospital. The original hospital building was

subsequently added to with wings to the north and south from 1953 to 1956. The property was used as a hospital until 1974. Beginning in the mid-1970s, the building housed a county social services agency. At various times between then and 2011, the building also housed a senior center, a mental health office, and a morgue. The building was vacated in 2011 and sold in 2013. Since then, the building has undergone partial interior demolition in the upper level and boiler room, but has remained primarily unused.

5 SITE RECONNAISSANCE

A representative from EnviroSouth (Thomas F. Donn, P.G.) conducted a site reconnaissance of the subject property on December 21, 2019 to assess and photograph present conditions, including observation of the use and condition of adjoining parcels. The approximate boundaries and pertinent features are shown on Figure 2, "Site Map", located in Appendix A. Photographs of the site are presented in Appendix B. Site conditions observed during the reconnaissance are further described in Table 8 and are limited to the conditions observed at the time.

**TABLE 8
SITE OBSERVATIONS**

GENERAL OBSERVATIONS	REMARKS	OBSERVED	NOT OBSERVED
Current Use	Vacant (with nominal storage of personal items)	X	
Past Use	Hospital and community health and social services related offices		X
Structures	A 39,204+/- square feet wood-frame and masonry former hospital building and a 2,000+/- square feet wood-frame and masonry former classroom building	X	
Terrain	Moderate to steep slope to the north, east, and south	X	
Hazardous chemical and petroleum products in connection with known use			X
Fill dirt from an unknown source			X
Aboveground storage tanks (ASTs)			X
Underground storage tanks (USTs)	One estimated 300-gallon heating oil UST at classroom building; one estimated 500-gallon diesel fuel UST at emergency generator area	X	
Odors			X
Pools of liquid			X
Drums/ totes			X
Hazardous chemical and petroleum products in connection with unknown use			X
Chemical storage or agricultural chemical mixing areas			X

GENERAL OBSERVATIONS	REMARKS	OBSERVED	NOT OBSERVED
Unidentified substance containers			X
Pits, ponds, or lagoons			X
Stained soil or pavement			X
Stressed vegetation			X
Hazardous waste storage			X
Solid waste	Two (2) piles of building material debris in parking lot that may contain asbestos and/or lead-based paint	X	
Waste water			X
PCBs			X
Water-supply wells			X
Dry wells or monitoring wells			X
Surface water			X
Storm basins/catch basins			X
Storm drains			X
Drains and sumps	Floor drains in kitchen and in shed attached to south wing of building	X	
Septic system / Sewer system connection	The subject property is served by a public sewer system.	X	
Loading and unloading areas			X
Burned or buried debris			X
Heating / Cooling of on-site buildings	Natural gas / electric	X	

EnviroSouth conducted a brief drive-by survey of the parcels adjoining the subject property on the same day as the site reconnaissance. A summary of the adjoining parcels is presented in Table 9.

**TABLE 9
ADJOINING PARCEL USE**

DIRECTION FROM SUBJECT PROPERTY	OBSERVED CURRENT LAND USE	OBSERVED INDICATIONS OF PAST LAND USE <i>(if different than current)</i>
North	Woodland and residences	---
East	Woodland and office across Carolina Drive	---
West	Woodland and residences abutting and across Glenwalden Lane	---
South	Woodland and residences across Carolina Drive	---

6 LIMITED PHASE II ENVIRONMENTAL ASSESSMENT

The purpose of this Limited Phase II Environmental Assessment is to evaluate if potential petroleum releases from the current and former on-site petroleum underground storage tank (UST) systems have contaminated the subject property.

6.1 SCOPE OF SERVICES

The services completed by EnviroSouth and its subcontractors include the tasks outlined below:

- Located and/or attempted to locate petroleum USTs, including:
 - A diesel fuel tank located adjacent to the electrical generator (vent pipe and fill port previously identified in a 2012 Phase I ESA);
 - A heating oil tank near the boiler room (vent pipe previously identified along a vegetated bank near the boiler room in a 2012 Phase I ESA, but currently absent); and
 - A heating oil tank that was discovered during this Phase I ESA adjacent to the classroom building (that tank was not identified in the 2012 ESA report because it was likely not visible under thick vegetation that has since been removed).
- Attempted to determine the contents of the three (3) USTs.
- Using a direct-push sampling rig, collected soil samples at and near all three (3) of the above-listed locations on the site. The samples were screened at 5-foot depth intervals for the presence of petroleum vapors using a calibrated photoionization detector (PID). The worst-case sample from each UST area based on highest PID reading (or the deepest sample if no PID detections occurred) were submitted to a North Carolina certified laboratory for analyses of indicator compounds of petroleum fuels. The locations of all UST areas are shown on Figure 2 of this report.

- Attempted to collect groundwater samples at each UST area for laboratory analyses of indicator compounds of petroleum fuels.
- Following sample collection, all borings were properly abandoned by a North Carolina licensed driller by filling with bentonite grout.

6.2 FINDINGS

Based upon completion of the services described above, we offer the findings listed below:

- The diesel fuel UST adjacent to the electrical generator was located immediately adjacent to the fill pipe and vent pipe that was visible at the surface. Based on multiple borings, it is estimated that the UST is 500 gallons in capacity. Because of elbows in the piping connected to the fill pipe and vent pipe, we could not access the UST to determine if any fuel remains.
- The vent pipe associated with the suspected heating oil UST that served the boiler was not present at the location shown in a photo of the 2012 Phase I ESA Report. The soils along the bank appeared to have been relatively recently (within the past 1 to 3 years) disturbed. The asphalt-paved parking area adjacent to the bank showed no signs of recent patches that are indicative of a removed UST. Based on numerous borings in the suspected area of the tank along the bank and in the paved area (as shown on Figure 2), it appears that the heating oil UST that served the boiler was removed. The removal of the UST likely occurred in the similar timeframe as when the boiler was removed from the lower level of the building.
- The heating oil UST located adjacent to the classroom building was accessed with a sampling bailer and found to not contain any liquid or sludge. The depth to the bottom of the tank indicates that the tank is likely 3-feet in diameter and 300-gallons or less in capacity.

- Soil borings showed that the top of competent bedrock appears to exist at depths ranging from 9 to 19 feet below the ground surface. None of the borings encountered groundwater, indicating that the water table is situated within the bedrock. Based on topography, we estimate that the groundwater table is located at a depth of greater than 40 to 50 feet below the ground surface across the property.
- During the field sampling phase of this investigation, no petroleum odors were noted by field personnel, and no organic chemical vapors were detected with the PID.
- Laboratory analyses of the soil samples from each of the three (3) known or suspected UST areas indicate that no detectable concentrations of the analyzed petroleum compounds were present. Based on the field observations, PID data, and laboratory analyses, no evidence was found to suggest the past leakage of fuel from any of the UST areas.

A copy of the laboratory report is included in Appendix F of this report.

7 FINDINGS

No *recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental conditions, or de minimis conditions* were identified in connection with the subject property.

8 OPINION AND CONCLUSIONS

EnviroSouth performed a Phase I and Limited Phase II Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-13 of the subject property located at 330 Carolina Drive, Tryon, North Carolina. Any exceptions to, or deletions from, this practice are described in Section 8 of this report.

It is the opinion of the environmental professional responsible for this Phase I and Limited Phase II ESA that:

- No *recognized environmental conditions* were discovered in connection with the subject property.

Based on this opinion, it is also the same environmental professional's opinion that no subsurface environmental investigations are warranted.

We recommend that the two (2) identified existing USTs be excavated and removed from the subject property or closed in place by filling with an inert solid. The heating oil UST adjacent to the classroom building has been confirmed to contain no liquid or sludge, so it can be removed or filled in place as is. The diesel fuel UST identified under the asphalt in the driveway adjacent to the electrical generator should be excavated to determine its contents. If liquid or sludge is found in that tank, the contents should be removed from the tank and properly containerized before the tank is removed or filled in place. The contents of the tank (if any) should then be disposed in accordance with applicable regulations.

Although not included in the scope of a Phase I ESA, users of this report should be aware of non-scope items of environmental significance during future building renovations and waste disposal. These items primarily include the consideration of worker safety, permitting, inspection, and disposal of asbestos and lead-based paint on and in building materials and debris piles on the subject property.

9 LIMITATIONS

Phase I ESAs are non-comprehensive by nature and are unlikely to identify all environmental problems or eliminate all risk. The attached report is a qualitative assessment. EnviroSouth offers a range of investigative services to suit the needs of our clients, including more quantitative investigations. Although risk can never be eliminated, more detailed and extensive investigations yield more information, which may help you understand and better manage your risks. Since such detailed services involve greater expense, we ask our clients to participate in identifying the level of service that will provide them with an acceptable level of risk. Please contact the signatories of this report if you would like to discuss this issue of risk further.

EnviroSouth performed this environmental assessment in general accordance with the guidelines set forth in the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Designation E1527-13), and subsequently approved by you as our Client. No warranty, either expressed or implied is made. Environmental issues not specifically addressed in the report were beyond the scope of our work and not included in our evaluation. Statements made in this report are based only on the results of the site reconnaissance, review of state and federal regulatory database records, interviews, and review of historical sources to the extent described in the report.

Other standards or documents referenced in any given standard cited in this report, or otherwise relied upon by the authors of this report, are only mentioned in the given standard; they are not incorporated into it or “included by reference”, as that latter term is used relative to contracts or other matters of law.

Land use, site conditions (both on-site and off-site), and other factors will change over time. Since site activities and regulations beyond our control could change at any time after the completion of this report, our observations, findings, and opinions can be considered valid only as of the date of the site reconnaissance. In addition, conclusions and recommendations provided herein are solely based on information and data made available to EnviroSouth during the active period of performing the site assessment.

Any party other than the client and their authorized representatives who would like to use this report shall notify EnviroSouth of such intended use. Based on the intended use of the report, EnviroSouth may require that additional work be performed and that an updated report be issued. Non-compliance with any of these requirements by the client or anyone else will release EnviroSouth from any liability resulting from the use of this report by any unauthorized party.

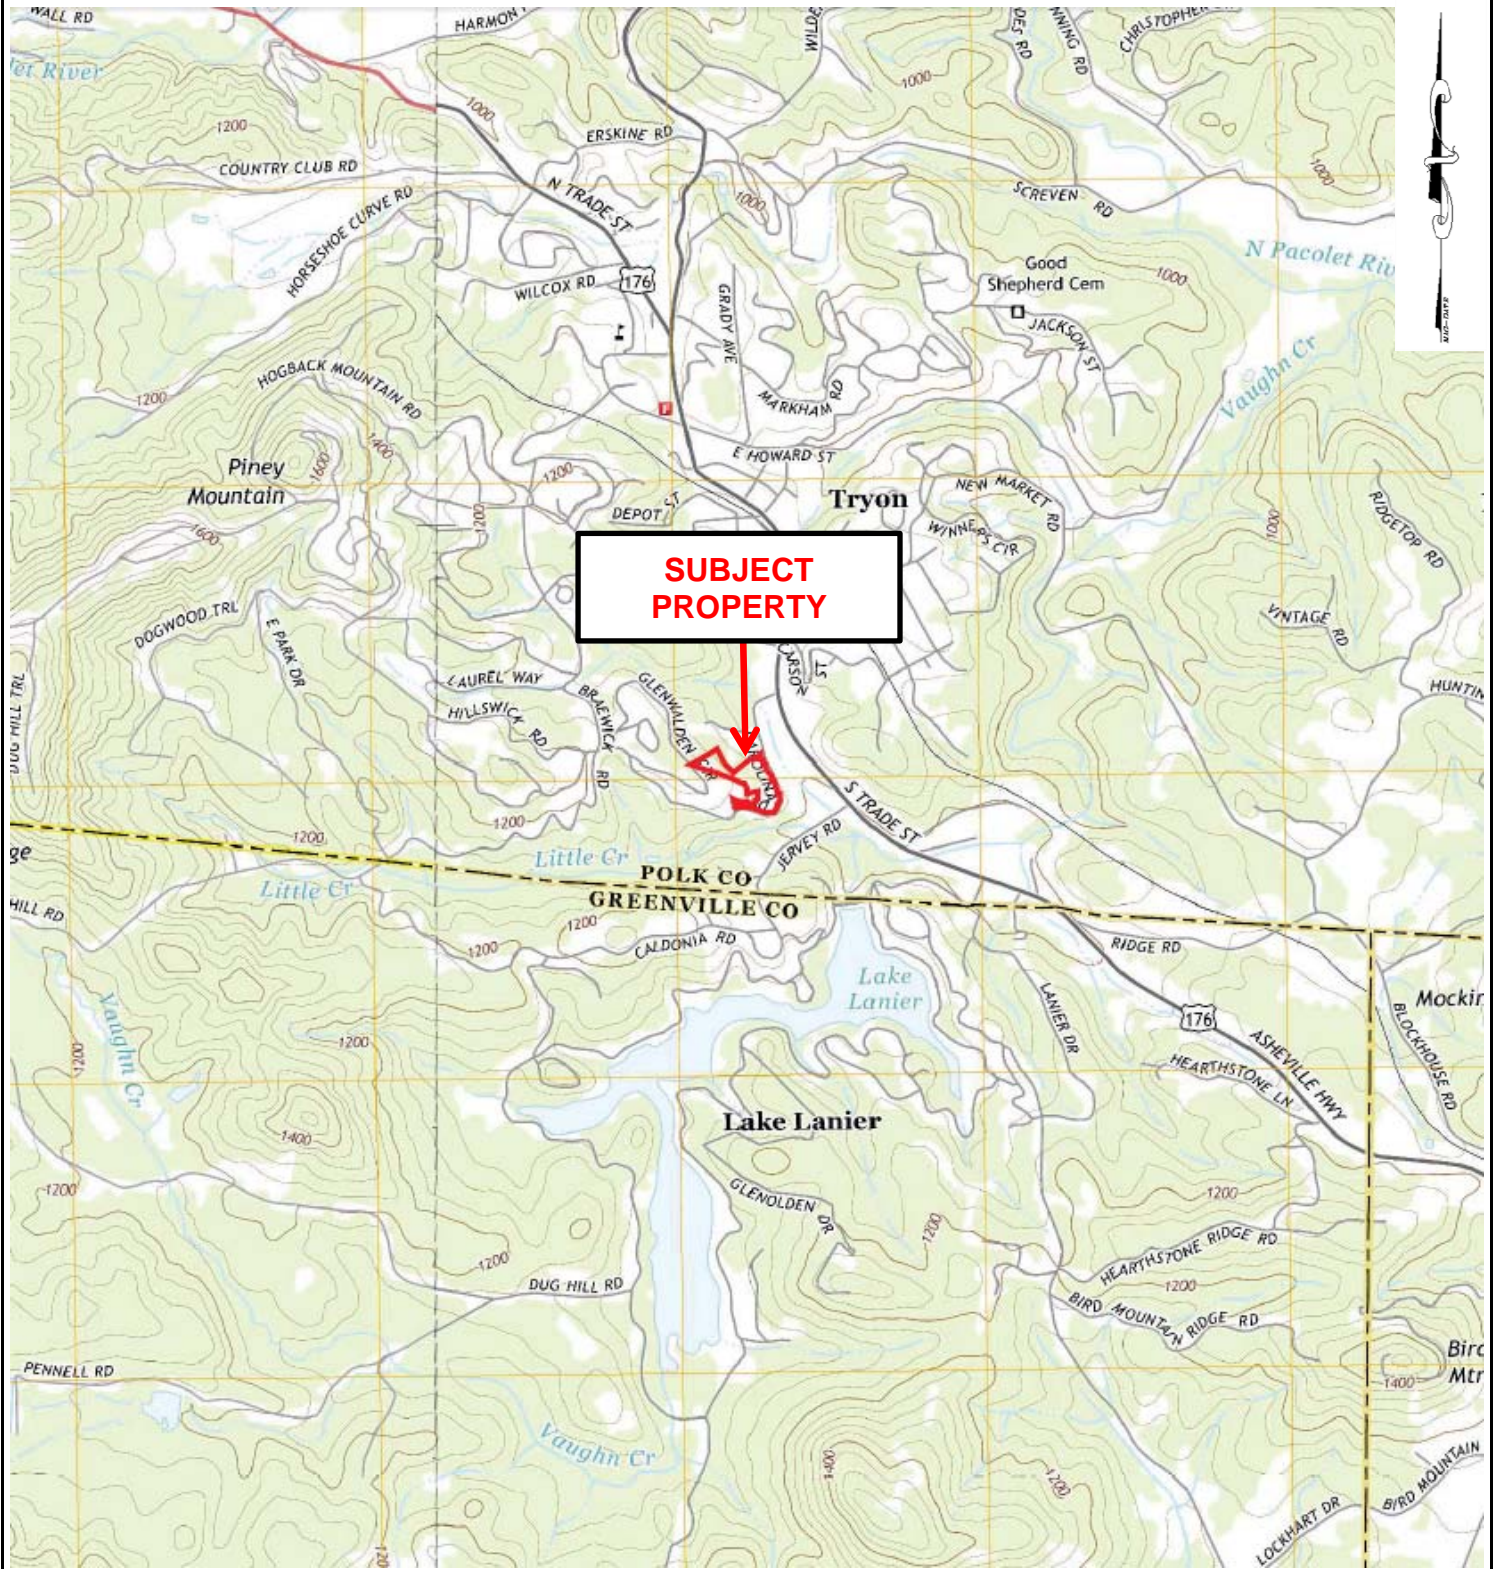

The Environmental Professional(s) responsible for this report meet the qualifications of an environmental professional established in ASTM E1527-13 and affirm by the above signatures that all appropriate inquiries concerning the enclosed report were conducted in general accordance with the requirements of the final rule per ASTM E1527-13.

Limitations and data gaps specific to this Phase I Site Assessment are as follows:

- Title history and environmental lien search information was not provided to EnviroSouth in relationship to the subject property.

APPENDIX B – PHOTOGRAPHS

Photo 1: East exterior of original portion of the on-site hospital.

Photo 2: North wing addition to the hospital.

Photo 3: South wing addition to the hospital (central and left portion of photo).

Photo 4: Typical interior conditions in the upper level of the original portion of the hospital.

Photo 5: Typical interior conditions of the lower level of the hospital showing interior walls intact.

Photo 6: Electrical generator in generator room of lower level of the hospital.

Photo 7: Boiler room (boiler removed) in the lower level of the hospital.

Photo 8: Exterior access to boiler room at north end of west side of the original portion of the hospital.

Photo 9: Area of former petroleum (fuel oil) UST vent pipe as seen in 2012 ESA photo. Based on loose soil conditions along the vegetated bank and results of multiple soil borings, it appears the UST in the area was removed between 2012 and the present time.

Photo 10: Piled debris at north end of west parking area. Debris appears to be associated with prior removal of interior areas. The debris pile may include asbestos-containing building materials.

Photo 11: Small classroom building on the subject property located approximately 100 feet north of the western parking area.

Photo 12: Interior of building shown in Photo 11.

Photo 13: Vent pipe and fill pipe of heating oil UST (foreground) adjacent to the west side of the classroom building shown in Photos 11 and 12. The UST was found to be empty and is estimated to be approximately 300 gallons in capacity.

Photo 14: Typical wooded conditions on the triangular-shaped western end of the subject property.

Photo 15: Typical recently cleared and thinly wooded conditions on the northeast portion of the subject property.

Photo 16: Debris pile adjacent to southeast corner of the original portion of the hospital. Debris appears similar to the pile shown in Photo 10.

Photo 17: Fuel oil UST vent pipe and fill port adjacent to generator room. Photo is in driveway along west side of south wing addition of the hospital.

Photo 18: View of driller collecting soil samples in the estimated vicinity of the former fuel oil UST associated with the former boiler.

Photo 19: Typical soil cores collected during assessment of soils in the UST areas.

Photo 20: Commercial office building on the adjoining property to the east across Carolina Drive.

Photo 21: Stone residence on an adjoining parcel to the west of the south wing portion of the hospital.

Photo 22: Residence on the adjoining parcel to the north of the subject property.

Photo 23: Residence on the adjoining parcel to the west and south of the subject property across Glenwalden Lane.

Photo 24: Wooded and residential land adjoining the subject property to the south across Carolina Drive.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

NC LAST: A listing of leaking aboveground storage tank site locations.

A review of the NC LAST list, as provided by EDR, and dated 08/02/2019 has revealed that there is 1 NC LAST site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>DIXIE YARNS FACILITY</i> Current Status: A Close Out: 02/17/2005 Incident Number: 85805	<i>HIGHWAY 176</i>	<i>ESE 1/4 - 1/2 (0.481 mi.)</i>	<i>8</i>	<i>25</i>

NC LUST: The Leaking Underground Storage Tank Incidents Management Database contains an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environment, & Natural Resources' Incidents by Address.

A review of the NC LUST list, as provided by EDR, and dated 08/02/2019 has revealed that there are 4 NC LUST sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

NC UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environment & Natural Resources' Petroleum Underground Storage Tank Database.

A review of the NC UST list, as provided by EDR, and dated 08/02/2019 has revealed that there are 2 NC UST sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SKEE AUTOMOTIVE, INC. Tank Status: Removed Facility Id: 00-0-0000018651	509 S. TRADE ST.	E 0 - 1/8 (0.100 mi.)	A3	9
PANTRY 520 Tank Status: Removed Facility Id: 00-0-0000019990	415 W. TRADE ST.	NNE 0 - 1/8 (0.115 mi.)	B4	13

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NC IMD: Incident Management Database.

A review of the NC IMD list, as provided by EDR, and dated 07/21/2006 has revealed that there are 3 NC IMD sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SKEE AUTOMOTIVE, INC. Facility Id: 11401	509 S. TRADE ST.	E 0 - 1/8 (0.100 mi.)	A3	9
HOT SPOT Facility Id: 18817 Facility Id: 19302	251 SOUTH TRADE STRE	N 1/4 - 1/2 (0.292 mi.)	6	17
DIXIE YARNS FACILITY Facility Id: 85805	HIGHWAY 176	ESE 1/4 - 1/2 (0.481 mi.)	8	25

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
TLC CHEVROLET INC	HWY 176 S	NNE 1/8 - 1/4 (0.158 mi.)	B5	16

EXECUTIVE SUMMARY

EPA ID:: NCD085080109

SC GWCI: Groundwater Contamination Inventory Cases. Any site that has groundwater contamination over a federal MCL.

A review of the SC GWCI list, as provided by EDR, and dated 07/01/2008 has revealed that there is 1 SC GWCI site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WEST STATE LINE GULF Solid Waste Permit #: 08606	HWY 176	ESE 1/2 - 1 (0.937 mi.)	9	28

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Comments: BENZENE AND PCE DETECTED IN ONE MW; SOIL CONTAMINATION IS ALSO PRESENT NEAR AST AND TRANSFORMERS. PART OF THE SLUDGE IN THE WASTE TREATMENT LAGOON IS CLASSIFIED AS HAZARDOUS WASTE. Further test on the sludge showed that the PH values were within limits. One year GW data showed no 2L violation; and soil samples collected at hot spots were below soil to groundwater standards. Closed on 2/17/2005.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2019	Source: EPA
Date Data Arrived at EDR: 11/07/2019	Telephone: N/A
Date Made Active in Reports: 11/20/2019	Last EDR Contact: 12/09/2019
Number of Days to Update: 13	Next Scheduled EDR Contact: 01/13/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/25/2019	Source: EPA
Date Data Arrived at EDR: 11/07/2019	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (404) 562-8651

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/13/2019	Source: Department of the Navy
Date Data Arrived at EDR: 08/20/2019	Telephone: 843-820-7326
Date Made Active in Reports: 08/26/2019	Last EDR Contact: 11/07/2019
Number of Days to Update: 6	Next Scheduled EDR Contact: 02/24/2020
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/19/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/20/2019	Telephone: 703-603-0695
Date Made Active in Reports: 08/26/2019	Last EDR Contact: 11/22/2019
Number of Days to Update: 6	Next Scheduled EDR Contact: 03/09/2020
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/19/2019	Source: Environmental Protection Agency

SC VCP: Voluntary Cleanup Sites
Sites participating in the Voluntary Cleanup Program. Once staff and a non-responsible party have agreed upon an approved scope of work for a site investigation and/or remediation, the party enters into a voluntary cleanup contract. Staff oversees the cleanup efforts to ensure that activities are performed to our satisfaction. Upon completion of the negotiated work in the voluntary cleanup contract, the non-responsible party receives State Superfund liability protection.

State and tribal Brownfields sites

NC BROWNFIELDS: Brownfields Projects Inventory
A brownfield site is an abandoned, idled, or underused property where the threat of environmental contamination has hindered its redevelopment. All of the sites in the inventory are working toward a brownfield agreement for cleanup and liability control.

Date of Government Version: 09/03/2019	Source: Department of Environment and Natural Resources
Date Data Arrived at EDR: 10/01/2019	Telephone: 919-733-4996

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Version Date:	2014
West Map:	5948512 SALUDA, NC
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
45045C0125D	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
45045C0100D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LANDRUM	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Pacolet

Soil Surface Texture: sandy clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5
2	7 inches	24 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5
3	24 inches	33 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 4.5

1	0 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 0.01	Max: 7.8 Min: 4.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: Masada

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 5.5 Min: 4.5
2	7 inches	55 inches		Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 5.5 Min: 4.5
3	55 inches	61 inches		Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 5.5 Min: 4.5

Soil Map ID: 5

Soil Component Name: Udorthents

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: US Fish & Wildlife Service

Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

North Carolina Public Water Supply Wells

Source: Department of Environmental Health

Telephone: 919-715-3243

OTHER STATE DATABASE INFORMATION

North Carolina Wildlife Resources/Game Lands

Source: Center for Geographic Information and Analysis

Telephone: 919-733-2090

All publicly owned game lands managed by the North Carolina Wildlife Resources Commission and as listed in Hunting and Fishing Maps.

NC Natural Heritage Sites: Natural Heritage Element Occurrence Sites

Source: Natural Heritage Occurrence Sites Center for Geographic Information and Analysis

Telephone: 919-733-2090

A point coverage identifying locations of rare and endangered species, occurrences of exemplary or unique natural ecosystems (terrestrial or aquatic), and special animal habitats (e.g., colonial waterbird nesting sites).

NC Natural Areas: Significant Natural Heritage Areas

Source: Center for Geographic Information and Analysis

Telephone: 919-733-2090

A polygon coverage identifying sites (terrestrial or aquatic) that have particular biodiversity significance.

A site's significance may be due to the presence of rare species, rare or high quality natural communities, or other important ecological features.

RADON

State Database: NC Radon

Source: Department of Environment & Natural Resources

Telephone: 919-733-4984

Radon Statistical and Non Statistical Data

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Envirosouth were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

APPENDIX F – SOIL LABORATORY REPORT

December 30, 2019

Tom Donn
EnviroSouth, Inc.
3440 Augusta Rd.
Greenville, SC 29605

RE: Project: Old St. Luke's Hospital
Pace Project No.: 92458608

Dear Tom Donn:

Enclosed are the analytical results for sample(s) received by the laboratory on December 23, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Nicole Gasiorowski

QUALIFIERS

Project: Old St. Luke's Hospital
Pace Project No.: 92458608

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

Acid preservation may not be appropriate for 2 Chloroethylvinyl ether.

A separate vial preserved to a pH of 4-5 is recommended in SW846 Chapter 4 for the analysis of Acrolein and Acrylonitrile by EPA Method 8260.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-C Pace Analytical Services - Charlotte

***APPENDIX G – QUALIFICATIONS OF RESPONSIBLE
ENVIRONMENTAL PROFESSIONAL***

Thomas F. Donn, P.G.

President,
Principal Hydrogeologist

EDUCATION:

B.S. in Geology, 1983	State University of New York	Buffalo, NY
M.S. in Geology, 1986	Miami University	Oxford, OH

EXPERIENCE:

31 Years (as detailed below)

Since 2001 President, Principal Hydrogeologist

EnviroSouth, Inc., Greenville, SC

As a principal owner and President, responsible for operating all aspects of a full-service environmental consulting firm which primarily serves the Carolinas and Georgia. Areas of practice include all aspects of soil and groundwater assessment and remediation, environmental permitting, Brownfields sites, stormwater compliance services, site development consulting and geologic evaluations.

1998-2001 Branch Manager and Vice President

QORE Property Sciences (former Atlanta Testing & Engineering), Greenville, SC

Responsible for managing day-to-day operations of a 27-person branch office performing environmental consulting, ecological services, geotechnical engineering and construction materials testing. Responsible for overseeing all aspects of the office's P/L costs, preparation of annual budgets, financial projections, accounts receivables control, and review/approval of all contracts. Also responsible for overseeing marketing and general business development programs. In addition to branch manager duties, Mr. Donn also acted as the manager of a 7-person environmental consulting department within the branch, being actively involved in the preparation of proposals, managing high profile projects, report preparation and review of all reports.

1993-1998 Environmental Services Department Manager

Atlanta Testing & Engineering, Columbia, SC

Responsible for managing a 10-person environmental consulting department. Duties included proposal preparation, business development, report preparation and review, managing accounts receivables and quality assurance review of all department operations.

- 1991-1993 Project and Senior Hydrogeologist**
Atlanta Testing & Engineering, Columbia, SC
Responsible for management and oversight of environmental assessment and remediation projects.
- 1990-1991 Section Manager, Hydrologist**
Federal Trust Fund Section, Bureau of UST Management
South Carolina Department of Health and Environmental Control (SCDHEC), Columbia, SC
- 1989-1990 Section Manager, Hydrologist**
Assessment and Development Section, Groundwater Protection Division
South Carolina Department of Health and Environmental Control (SCDHEC), Columbia, SC
- 1987-1989 Hydrologist**
Assessment and Development Section, Groundwater Protection Division
South Carolina Department of Health and Environmental Control (SCDHEC), Columbia, SC
- 1986-1987 Geologist**
Geotech Testing and Engineering, Houston, TX
- 1983-1986 Teaching Assistant**
Miami University, Department of Geology, Oxford, OH

SPECIALITIES

- ◇ Soil and Groundwater Assessment and Remediation
- ◇ Free-Phase Petroleum Recovery via High Vacuum, Surfactant Flush, and Skimming
- ◇ Direct-Push Based Petroleum and VOC Assessment (LIF, MIP, HPT)
- ◇ Regulatory Permitting and Interfacing
- ◇ Brownfield Site Assessment and Remediation
- ◇ Risk-Based Corrective Action Evaluation
- ◇ Phase I Environmental Site Assessments
- ◇ Expert Witness Testimony
- ◇ Landfill Investigations (Soil, Groundwater, Methane)
- ◇ Air Sparging/Vapor Extraction System Testing and Design
- ◇ Bioremediation Design and Implementation
- ◇ Contaminant Transport Processes
- ◇ Monitoring and Remediation Well Design and Installation
- ◇ Groundwater Quality / Impact Assessment
- ◇ Aquifer Characterization

REPRESENTATIVE PROJECTS:

Brownfields Facilities

- **Abney Mills, Anderson, SC** -- Planned and implemented site assessment for former textile mill. Funded through a \$200K U.S. EPA Brownfields Pilot Grant awarded to the City of Anderson. Implementation included meeting with city officials and community stakeholders through public information meetings.
- **Riegel Mills, Ware Shoals, SC** -- Coordinated with Town of Ware Shoals officials to initiate U.S. EPA \$200K Brownfields Pilot Grant for the redevelopment of an abandoned textile mill. Activities included completion of a Phase I assessment of the property, as well as formulation of a comprehensive Work Plan for implementation of subsurface assessment tasks.
- **Former Cotton Mill, Columbia, SC** -- Provided technical review of work plans and associated initial planning documents as part of a U.S. EPA \$200K Brownfields Pilot Grant.
- **Former John Deere Manufacturing Plant, Greer, SC** -- Planned and executed the subsurface assessment and interim remedial measures associated with Voluntary Cleanup Contracts with the SCDHEC's Brownfields Program. Contaminants evaluated included metals, VOCs, and petroleum compounds.
- **Uniform Rental Facility, Greenville, SC** -- Planned and performed soil and groundwater assessment services associated with chlorinated solvent contamination from the facility's past use as an industrial drycleaner. The services involve coordinating activities with the SCDHEC Brownfields Program under a Voluntary Cleanup Contract.
- **Whitney Textile Mill, Spartanburg, SC** -- Completed Phase I Environmental Site Assessment services, along with asbestos, soil, and groundwater sampling at an underutilized former textile mill. Services were planned and coordinated in conformance with the requirements of an SCDHEC Brownfields Program Voluntary Cleanup Contract.
- **Former Dowbrands Manufacturing Plant, Mauldin, SC** -- Planned and executed a comprehensive review of past operations at the facility followed by a multi-stage assessment of soil and groundwater conditions at the former chemical manufacturing facility. All work was completed in conformance with the requirements of the SCDHEC Brownfields Program to satisfy the requirements of a Voluntary Cleanup Contract.

Contaminant Hydrogeology

- Groundwater contamination investigations including design, drilling, sampling and hydrogeologic interpretation at over 500 petroleum, landfill, industrial and commercial facilities in South Carolina, North Carolina and Georgia.
- Remediation system design for numerous commercial and industrial facilities in South Carolina, North Carolina and Georgia.
- Expert witness testimony for several cases of groundwater impact related litigation. Contaminant types addressed include chlorinated solvents and petroleum products.
- Evaluation of industrial and domestic waste ponds and lagoons, including monitoring well construction sampling and hydrogeologic interpretations.
- Groundwater and soil impact evaluations at over 500 underground storage tank facilities.
- Phase I environmental assessments and Phase II soil and groundwater quality assessments for numerous property acquisitions throughout South Carolina.
- Development of statewide technical guidance documents for groundwater assessments in South Carolina while employed as a manager at the SCDHEC.
- Development of statewide technical guidance documents for groundwater remediation and wastewater treatment and disposal in South Carolina.
- Development of technical guidance for reclassification procedures of groundwater in South Carolina.

Groundwater Remediation Design and Implementation

- Design, installation and evaluation of numerous soil and groundwater remediation systems at sites in South Carolina, North Carolina and Georgia. System technologies include vapor extraction, air sparging (wells and trenches), bioremediation and groundwater pump-and-treat.
- Design and implementation of groundwater remediation systems involving recovery of non-aqueous phase liquids and treatment of dissolved constituents at numerous bulk petroleum storage terminals in the North Augusta and Spartanburg, South Carolina petroleum terminal complexes.

- Hydrogeologic and design evaluation of groundwater interceptor trench systems for the remediation of petroleum contamination at bulk storage and retail underground storage tank facilities throughout South Carolina.

Monitoring System Design and Installation

- Design of groundwater monitoring networks for early detection of water quality problems throughout South Carolina.
- Monitoring well design for over 200 industrial and commercial facilities to provide information for environmental assessments and contamination investigations.
- Installation and evaluation of water quality samples for detection monitoring of landfills, industrial ponds and lagoons throughout South Carolina.

Groundwater and Contaminant Chemistry

- Interpretation of groundwater analytical data at numerous sites including those contaminated with petroleum products, industrial solvents and other wastes generated by industrial operations.
- Chemical evaluation of contaminant and waste stream analytical data used in the development of custom designed groundwater monitoring programs for industrial and commercial facilities.
- Development and implementation of a statewide groundwater quality monitoring network, including a study of the groundwater chemistry of all of South Carolina's major aquifer systems.

Aquifer Characterization

- Hydrogeologic testing and evaluation of numerous shallow aquifer systems throughout South Carolina.
- Aquifer testing at numerous contamination sites for remedial design studies.
- Testing and evaluation of the hydrogeologic vulnerability of a large public water supply system in Charleston County, South Carolina.

Regulatory Permitting and Interfacing

- Evaluation and development of a technical guidance document for permitting of injection wells in South Carolina.
- Technical review and evaluation of more than 400 regulatory requests for approval of monitoring well and recovery well construction throughout South Carolina.

Expert Witness Experience

- 2008, Clark v. SCDMV (Knox Haynsworth; Brown, Massey, Evans, McLeod & Haynsworth, Greenville)
- Groundwater and surface water impact caused by leaking petroleum USTs.
 - Provided expert assistance during arbitration hearing.
- 2006, SSS Management v. The Chestnut Group (Gene McCall; Mc Call Environmental, Greenville)
- Groundwater and soil impact from chlorinated solvents used on an industrial site. CERCLA liability case.
 - Provided written opinion and oral deposition testimony.
- 2004, Clark v. Greenville County (Thomas Stern; Covington, Patrick, Hagins, Stern & Lewis, Greenville)
- Groundwater impact on private property from a former Greenville County landfill.
 - Provided courtroom testimony in Greenville Federal Court.
- 2003, Newsmall Clemson, LLC v. Earth Management Systems, Inc. (Charles Hill; Turner Padgett Graham & Laney, Columbia)
- Environmental damage to property from prior landfilling operations. Professional liability case against environmental consultant.
 - Provided deposition testimony.
- 2001, Kite v. [Oil Company] (Leon Harmon; Nexsen Pruet, Greenville)
- Groundwater and surface water impact caused by leaking petroleum USTs.
 - Provided deposition testimony.
- 2000, Rock Quarry Company v. SCDHEC (Greer City Attorney)
- Stream and lake impacted by sedimentation from quarry operations caused the SCDHEC to deny operating permit to quarry. Affected lake serves as drinking water source for City of Greer.
 - Provided testimony during SCDHEC Mining Council Hearing
- 1998, [Private party] v. [Industrial Company] (Thomas Lavender; Nexsen Pruet, Columbia)
- Groundwater impact caused by chlorinated solvents.
 - Provided deposition testimony.
- 1995-6, Smith v. BellSouth Corporation (Mary Lewis, Lewis & Babcock, Columbia)
- Groundwater impact caused by petroleum products.
 - Provided deposition testimony.

PROFESSIONAL REGISTRATIONS

- ◇ Registered Professional Geologist, State of South Carolina, No. 908
(requires 32 hours of CEU's per bi-annual period)
- ◇ Registered Professional Geologist, State of North Carolina, No. 1762

SPECIALIZED TRAINING

- ◇ 40 Hour HAZWOPER
- ◇ 8 Hour Annual HAZWOPER Refresher
- ◇ ASFE Risk Reduction Workshops and Tape Courses
- ◇ NGWA Environmental Forensics Short Course

PROFESSIONAL AND CIVIC ASSOCIATIONS (past and present)

- ◇ National Ground Water Association
- ◇ South Carolina Association of Environmental Professionals
- ◇ Carolina Geological Society
- ◇ Association of Engineering Geologists
- ◇ Foothills YMCA, Board of Directors
- ◇ March of Dimes Real Estate Executive Committee
