RE: ECHOVIEW FIBER MILL FINAL SITE INSPECTION AND PROJECT CLOSEOUT
WEAVERVILLE, NORTH CAROLINA

Dear Julie,

Congratulations again on achieving LEED Gold for Echoview Fiber Mill. This is a significant achievement and demonstrates your commitment to long-term sustainability.

Attached is a memo from Joshua Robinson, our civil engineer, who has completed his final inspection and prepared the necessary documents to closeout the site portion of the project. You will note that Joshua has provided clear instructions for you to complete, sign, and notarize the attached Operation and Maintenance Agreement and then record it with the Buncombe County Register of Deeds. Once this has been accomplished, you are to send a copy of the recorded agreement to the Buncombe County Stormwater Administrator in the attached envelope. If you have any questions with this mission, please do not hesitate to contact me or Joshua Robinson and we will offer you whatever assistance is necessary.

We have kept copies of these documents for our long-term records. I would appreciate it if you would send to me a photocopy of the executed and recorded document for our files as well.

I am working with Marc Heath for the 1-year warranty inspection so we can finally closeout, once and for all, John S. Clark's responsibilities on this project.

Sincerely,

CLEARSCAPES, P.A.

Steven D. Schuster, FAIA
Principal
