### **EXECUTIVE SUMMARY**

Environmental Performance, Inc. (EPI) has completed the requested Phase I Environmental Site Assessment Report (Phase I ESA) on behalf of Mercer Company in accordance with the terms of the Authorization Letter dated April 5, 2022. The subject property, a retail center (also referred to as "site" or "property" in this document), is located at 404 West Main Street, Azle, Parker County, Texas 76020.

This Phase I ESA was conducted in general accordance with the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Site Assessment Process (ESA, or Phase I), E1527 – 21 and the All Appropriate Inquiry (AAI) Rule 40 CFR Part 312. The objective of this evaluation was to identify potential current and/or historical Recognized Environmental Conditions (REC) that may be present at the subject property. Rick Robertson, PG, of EPI conducted the property inspection on April 11, 2022. EPI professional Ms. Kalee McDevitt has prepared this report under the supervision and guidance of the Environmental Professional.

The subject property and vicinity were residentially developed prior to 1956. The area began commercial development c1963, at which time, the dry cleaner to the northwest is constructed. The dry cleaner building was removed by 1981. The subject property was redeveloped commercially c1990, and the retail center was expanded to the current configuration c2001.

A water well was previously located near the northwest corner of the property, associated with the former residence. The well is no longer on the property.

112 Industrial Avenue (adjacent N), doing business as (dba) Azle Annex Shopping Center, is listed for in the Innocent Owner/Occupant Program (IOP) (ID 151) that was closed c2000, and reentered into the IOP (ID 272) with the property expanded to include the retail center across Industrial Avenue (112-141 Industrial Avenue). The contaminants of concern (COCs) for these properties come from a dry cleaning operation and gasoline. Historical records indicate that a dry cleaner was located at 420 West Main Street (northwest of the subject property, at the intersection of West Main Street and Industrial Avenue) from c1965 to c1975, and is thought to be a part of the cause for the contamination. Because the IOP was granted to the north adjacent property, and the contamination is suspected to be coming from a property that is adjacent to the subject site, this is interpreted as a Recognized Environmental Condition for the subject property.

ASTM and supplemental databases queried indicate several sites within the database search radii, however, *because of the nature of the listing, age of the listing, location, and/or the distance and hydrogeology from the subject property, none is interpreted as a Recognized Environmental Condition for the subject property.* 

### **Conclusions and Recommendations**

We have performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Standard Practice E1527 – 21 of 404 West Main Street, Azle, Parker County, Texas 76020, the subject property. Any exceptions to, or deletions from, this practice are described in Section 9.2 of this report.

### **Controlled Recognized Environmental Conditions**

This assessment has not revealed evidence of Controlled Recognized Environmental Conditions in connection with the property.

### **Historical Recognized Environmental Conditions**

This assessment has not revealed evidence of Historical Recognized Environmental Conditions in connection with the property.

### **Recognized Environmental Conditions**

This assessment has revealed evidence of Recognized Environmental Conditions in connection with the property.

112 Industrial Avenue (adjacent N), doing business as (dba) Azle Annex Shopping Center, is listed for in the Innocent Owner/Occupant Program (IOP) (ID 151) that was closed c2000, and reentered into the IOP (ID 272) with the property expanded to include the retail center across Industrial Avenue (112-141 Industrial Avenue). The contaminants of concern (COCs) for these properties come from a dry cleaning operation and gasoline. Historical records indicate that a dry cleaner was located at 420 West Main Street (northwest of the subject property, at the intersection of West Main Street and Industrial Avenue) from c1965 to c1975, and is thought to be a part of the cause for the contamination. Because the IOP was granted to the north adjacent property, and the contamination is suspected to be coming from a property that is adjacent to the subject site, this is interpreted as a Recognized Environmental Condition for the subject property.

### **Recommendations**

A Phase II investigation is recommended. Soil and groundwater samples should be collected and analyzed for volatile and chlorinated organic compounds (full VOC list) and total petroleum hydrocarbons (TPH). If TPH is detected in the semi-volatile range, additional analyses for semi-volatile organic compounds (SVOC) should be performed.

### 1.0 INTRODUCTION

### 1.1 Site Location and Tax Information

The property is located at 404 West Main Street, Azle, Parker County, Texas 76020. A map depicting the property's location and the adjacent roads observed in the vicinity during the reconnaissance, and a property diagram showing the improvements, are included as an Appendix 1. Copies of photographs taken during the site reconnaissance are also provided as Appendix 2. A copy of the tax records is presented in the Appendix 3. The 50-year chain-of-title search was conducted by the user or their lending institution.

No chain-of-title search concerns were communicated to EPI by the user.

According to the Parker County Appraisal District records, the site has the legal description of Acres: 2.090, Lot: 1, Blk: 2, Subd: EMANUEL J R SUBDIVISION. The subject property is listed under Property ID R000007595 with TROJACEK PROPERTIES LLC listed as the current owner. The tax file indicates the following ownership and transaction records:

Sold By	Volume	Page	Deed Date	Instrument
LIGHTHOUSE CHRISTIAN FELLOWSHIP			2/11/2013	201303606
GREEN LIGHT MINISTRIES INC	2821	797	12/22/2010	757624

KLL INC	1839	262	9/29/1999	
n/a	1502	01476	7/2/1991	

### 1.2 Purpose

Environmental Performance, Inc. (EPI) was retained by Mercer Company to conduct the Phase I ESA for the property to satisfy their due diligence needs. This assessment was designed to provide an objective, independent, professional opinion of the potential environmental risks, associated with the property, if any.

### 1.3 Scope of Services

The assessment was conducted in accordance with the ASTM's Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527 – 21, the All Appropriate Inquiry (AAI) Rule 40 CFR Part 312, and any other scope of work provided by the Client, and generally accepted industry standards. The following are EPI's scope of services based upon the referenced standards.

In defining a standard of good commercial and customary practice for conducting an ESA of a parcel of property, the goal is to identify RECs. The term "Recognized Environmental Conditions" is defined as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." (§3.2.73)

The due diligence satisfies one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on *Comprehensive Environmental Response, Compensation, and Liability Act* (CERCLA) liability, also known as *Innocent Landowners, Standards for Conducting All Appropriate Inquiries* (40 CFR §312). As such, this Phase I ESA is intended to permit a user to satisfy one of the requirements to qualify for the Innocent Landowner Defense; that is, the practices that constitute "...all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice..." (§3.2.6)

It is important to note that the scope of this investigation is limited to an inspection using the physical senses to identify areas of potential concern to the real property and a review of readily accessible governmental databases. The inspection does not include a regulatory compliance audit of the facility. There are detailed regulations concerning the proper use, storage, and disposal of hazardous and regulated material. These regulations include and are not limited to, permitting, record keeping, and manifesting requirements, as well as community and employee right-to-know laws. It is typically the responsibility of the operator of a facility to maintain their entity in compliance with such regulations.

### 1.4 User Reliance

This report was prepared for the sole benefit of Mercer Company and may not be used or relied upon by others without the prior written authorization of EPI. Each subsequent user must satisfy the User's Responsibilities set forth in Section 6 of ASTM Standard Practice E1527 – 21 to qualify for the landowner liability protection under CERCLA.

### 1.5 Special Terms and Conditions

No special terms and conditions were applicable for this report.

### 1.6 Significant Assumptions

EPI assumes that there are no hidden environmental conditions on the property including the subsurface, groundwater, structures or surrounding, which would have an adverse effect on the property. EPI assumes no responsibility for such conditions or for the inspection and engineering that might be required to discover such conditions.

EPI collects data from various sources regarding the subject and surrounding properties in preparing this report. In doing so, EPI assumes that the data provided by the sources is reliable and true. EPI assumes no responsibility for any inaccuracies in such information.

In the preparation of this report, EPI has made assumptions and used ASTM Standard Practice E1527 – 21 definitions. An abridged glossary of these definitions is provided as Section 10.0.

### 1.7 Limitations and Exceptions

This investigation was conducted on behalf of and for the exclusive use of EPI's Client, solely for use in an environmental evaluation of the subject property. This Report and findings contained herein shall not, in whole or in part, be disseminated or conveyed to any other party, nor used by any other party, in whole or in part without prior written consent of EPI. However, EPI acknowledges and agrees that the Report may be conveyed to and relied upon by the Client, the lender, the title insurer, and other parties associated with the property transfer of the subject property by the Client, subject to the limitations of this Report and the Letter of Engagement.

In preparing this Report, EPI has relied on information provided by the Client and has utilized information gathered by our own inspection, in-house interpretation, requirements set forth by various agencies governing environmental interpretation and regulations, information obtained from public record search, State, Federal, and local databases, other secondary sources, and personal interviews. Except as set forth in the Report, EPI has made no independent investigation as to the accuracy and completeness of the information obtained from these secondary sources or personal interviews and has assumed such information to be accurate and complete.

Although industry standard practices were employed, environmental evaluations are inherently limited given that the conclusions and recommendations are developed from limited site evaluation and research. As it is often necessary to rely on information prepared or obtained from others, EPI cannot be responsible for the accuracy of information obtained from these sources. Additionally, changes may result with the passage of time with respect to site characteristics and those of surrounding properties.

EPI and its representatives do not warrant against future changes in operation or conditions, nor warrant conditions present of a type or at a location not addressed in this Report. This report is considered valid for the user for 180 days from initial issuance. The date of the report does not represent the date the individual components were completed and should not be used when evaluating compliance with 180-day or one-year all appropriate inquiries requirements. The Appendices include the date of the respective component.

Soil and groundwater testing was not performed with the Scope of Services. Such efforts were outside the scope of work performed, and data obtained from such an investigation, if performed, might be different from those implied by this Report. This study is not intended to establish whether soil contamination, waste disposal, or groundwater contamination is present at the subject property or on surrounding properties. Such knowledge is obtained from soil and groundwater testing, as obtained by the installation of soil borings and groundwater monitoring wells. Based on the Scope of Services, EPI cannot warrant subsurface conditions.

Reasonable efforts were made within the scope of this assessment to identify the presence of underground and aboveground storage tanks and ancillary equipment on the property. Limitations to this Report exist with regard to storage tanks, in as much as information was gained solely by review of unobstructed areas, database information, and interviews. Such methods (which are considered industry standard) do not preclude the actual presence of subsurface equipment (including underground tanks) or regulated materials, which are hidden from view due to historical activity such as paving, re-grading, construction, debris pile storage, or incorrect recollection of sources interviewed. Similarly, there is a possibility that additional UST facilities not listed in the state's files may exist at the facility or abutting/adjacent properties, due to the owner/operator registration negligence or filing errors with the state.

Conclusions regarding the potential environmental impact of offsite facilities to the subject property is based on available information from environmental databases and assumed groundwater flow direction (based on the regional topographic slope). True groundwater conditions, including the direction of flow, specifically at the subject property, can only be determined through the installation of monitoring wells on site.

No Phase I Environmental Site Assessment can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions in connection with a property. Performance of this practice is intended to reduce, but not completely eliminate, uncertainty regarding the potential for Recognized Environmental Conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.

The information and conclusions contained in this Report are based on physical inspection, search of appropriate public records, and research into the prior use of subject and adjacent properties. EPI is not obligated to identify mistakes or insufficiencies in information provided. However, EPI will make a reasonable effort to compensate for mistakes or insufficiencies in the information reviewed that are obvious in light of other information of which the environmental professional has actual knowledge. The environmental investigation described herein is limited to the issues cited and is not intended to address all concerns and problems not specifically within the scope of services. Not every property will warrant the same level of assessment. Consistent with good commercial and customary practice, the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.

This Phase I ESA was conducted according to principles and practices of those engaged in professional environmental sciences and investigation. It is impossible to guarantee that every factor will be discovered. No warranty, either expressed or implied, is made on the completeness or accuracy of this work.

### 2.0 USER PROVIDED INFORMATION

The User Questionnaire was returned unsigned, a copy of which is attached in Appendix 4. This section documents the response from the user on the User Questionnaire.

### 2.1 Environmental Liens or Activity and Use Limitation

Environmental liens are a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation. Activity and use limitations (AULs) are legal or physical restrictions placed on the property to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property.

Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law?

The user indicated they were not aware of any environmental liens or AULs.

### 2.2 Specialized Knowledge

Specialized knowledge or experience related to the property can include being involved in the same line of business as the current or former occupants, so that the user would know of the chemicals and processes used by this type of business.

Do you have any specialized knowledge or experience related to the property or nearby properties?

The borrower had no specialized knowledge regarding the property or business.

### 2.3 Valuation Reduction for Environmental Issues

This is related to purchase price to the fair market value of the property if it were not contaminated.

Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

The user is under the opinion that the purchase price reflects the fair market value.

### 2.4 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information about the property are those that help identify conditions indicative of releases or threatened releases, such as the past uses of the property, specific chemicals that are present or once were present, knowledge of spills or other chemical releases, or of any environmental cleanups that have taken place at the property.

Are you aware of commonly known or reasonably ascertainable information about the property that would help Environmental Performance, Inc. to identify conditions indicative of releases or threatened releases?

The user indicated that they know the past uses of the property, and that there is a previous asbestos abatement filed with the state and city.

### 2.5 The Presence of Contamination at the Property

This is to identify obvious indicators that point to the presence or likely presence of contamination at the property.

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

The user had no knowledge regarding contamination at the property.

### 2.6 Other User Provided Information

No user provided information was presented to EPI.

### 3.0 PHYSICAL SETTINGS

### 3.1 Topography and Flood Plains

The topography for the subject property was reviewed using an interactive USGS topographic map (topo) that allows the user to measure the elevations at any point. Based on the topo review, the elevation of the site is approximately 718 feet above mean sea level. The vicinity is hilly, with Ash Creek receiving runoff approximately 0.15 miles to the west.

EPI reviewed the FEMA FIRM map to determine the status of the subject property with regard to the flood plain zone. A copy of the FIRMette Map is included as Appendix 5.

The site is located in an area that is above the 0.2% flood elevation. Properties in unshaded Zone X are considered to be at low risk of flooding under the National Flood Insurance Program. Flood insurance is not required for properties in Zone X. Local floodplain zoning ordinances do not apply to Zone X.

### 3.2 Geology

Parker County has Paleozoic rocks exposed in western part of the county, with the typical Texas Cretaceous marine series exposed in the erosional valleys draining into the Brazos and Trinity Rivers. The Pennsylvanian Strawn Group ages are exposed in a series of cuesta scarps exposed in about 10% of the county with the oldest unit found in the Brazos valley in the southwest corner of the county.

- The Mineral Wells Formation is a sequence of shale, sandstone, conglomerate, and limestone, about 275-700 feet thick.
- Brazos River Formation, a series of sandstone, conglomerate, mudstone, between 100-200 feet thick.
- The Mingus Formation is mapped as the Goen Limestone, Dobbs Valley Sandstone, and Santo Limestone, and can be up to 230 feet thick.
- Grindstone Creek Formation, includes the Buck Creek Sandstone and Brannon Bridge Limestones and can be up to 225 feet thick.
- Lazy Bend Formation is the oldest unit of the Strawn Group and is exposed along Brazos River and tributaries near Lazy Bend. This is a shale, in part sandy or silty, with local coal beds, sandstones, and unmapped limestone lentils.

Comanchean-aged Cretaceous rocks underlie the remainder of the county. The outcrop of the Trinity Group extends north-south across the county. A gentle east-southeast direction of dip exposes outcrops of Fredericksburg Group beds east of the Trinity outcrop. The basal Cretaceous beds of the Washita Group of formations are in the eastern part of the county. From west to east, these are the Cretaceous units:

- Twin Mountain Formation sandstones are about 150 feet thick and cover about 14% of the county.
- Glen Rose Limestone is an alternating sequence of limestone, clay and sand with a stairstep topography. In this area the sequence is about 400 feet thick, but can be 1,750 feet thick in other parts of Texas. This unit comprises about 7% of the area.
- Paluxy Sand covers about 38% of the county and is about 225 feet thick. This is a very fine- to fine-grained sand that can be argillaceous, and is variably thinly to massively bedded.
- Goodland Limestone and the Walnut Clay is a calcareous clay, limestone, and shale with massive beds of
   *Texigryphaea* in the lower parts. The thickness is between 125 and 175 feet, and the aerial extent is about 17%
   of the county.
- Kiamichi Formation, the basal unit of the Fredericksburg Group, is alternating clay and limestone covering about 5% of the county, and is less than 50 feet thick.
- Duck Creek Formation is in the Washita Group, covering about 3% of the county. This is a limestone that is between 30 and 100 feet thick.

Quaternary alluvium and terrace deposits are found in stream valley cover about 5% of the county.

### 3.3 Hydrogeology

The Trinity Group is referred to differently in different parts of the state. The group's combined freshwater saturated thickness averages about 600 feet in North Texas. In general, groundwater is fresh but very hard in the outcrop of the aquifer. Total dissolved solids increase from less than 1,000 milligrams per liter in the east and southeast to between 1,000 and 5,000 milligrams per liter, or slightly to moderately saline, as the depth to the aquifer increases. The Trinity Aquifer discharges to a large number of springs, with most discharging less than 10 cubic feet per second. The aquifer is one of the most extensive and highly used groundwater resources in Texas.

### 3.4 Oil and Gas Wells and Petroleum Pipelines

The property was located by address on the Railroad Commission of Texas (RRC) server map to determine the presence of operating or abandoned oil and/or gas wells or the presence of oil and/or gas pipelines transecting the property. A copy of the RRC GIS map is included as Appendix 6.

No oil or gas wells nor pipeline appear on or adjacent to the subject property.

### **RETAIL CENTER**

### 4.0 HISTORICAL PROPERTY USE

### 4.1 Historical Aerial Photographs

Historical aerial photographs were reviewed for the subject property to see the change in the development of the property. These aerial photos are attached in Appendix 7. The following is a summary description of the photographs for each year reviewed:

Year	Onsite Noted Features	Offsite & Adjacent Noted Features		
1956	Residence on W edge	West Main St to W, Roe St to S, residences to S, E,		
		& W		
1963	Similar to previous	Commercial buildings to N		
1970	Similar to previous	Similar to previous		
1981	Similar to previous	Commercial to E		
1990	Residence removed, retail center constructed	Additional commercial to N, residence to S		
		removed		
2001	Retail center expanded	Commercial to S		
2014	Similar to previous	Similar to previous		
2021	Similar to previous	Similar to previous		

### 4.2 Historical Topographic Maps

The US Geological Survey (USGS) prepared topo maps of various scales for the entire country. These maps were periodically updated to depict roads, pipelines, and structures. In 2006 the USGS stopped including structures or urban red coloration due to the rapid expansion of communities; only topographic isopleths and roads appear. Historical topos were reviewed for the subject property to see the change in the development of the property. These historical topos are attached in Appendix 7. Following is a summary description of the topos for each year reviewed:

Year	Onsite Noted Features	Offsite & Adjacent Noted Features
1932	Creek through the center of the property (N-S)	West Main St to W, Roe St to S
1956	No creek, building on W edge	Structures to S, E, & W
1968	Similar to previous	Similar to previous
1974	Similar to previous	Structures to N
1986	Similar to previous	Similar to previous
1991	Similar to previous	Similar to previous
2012	No features presented	No features presented
2019	No features presented	No features presented

### 4.3 Historical City Directories

City directories for the site and surrounding areas were requested from ERS. Listings were returned for the years 1965 through 2008. The Historical City Directory search is attached as Appendix 8. Environmentally significant listings are summarized in the following table:

Year	Onsite Comments	Offsite & Adjacent Comments		
1965	Residential listing	420 W Main St: Azle Auto Sales & Jacobs Cleaners		
1971	Residential listing	420 W Main St: Jacobs Cleaners		
1975	Residential listing	420 W Main St: Jacobs Cleaners		
1980	Residential listing	No environmentally significant listings		
1985-86	Azle True Value Hd, M&R Services, & True Value Hdw	No environmentally significant listings		
1990	No listing	No environmentally significant listings		
1995	Beverly International & National Health & Fitness	No environmentally significant listings		

### 404 West Main Street, Azle, Parker County, Texas 76020

### **RETAIL CENTER**

Year	Onsite Comments	Offsite & Adjacent Comments
2001	National Samples Inc	340 W Main St: Sutton Printing
2005	No listing	340 W Main St: Sutton Printing
2008	Cross Timbers Coffee Co & Lighthouse Christian Fellowship	340 W Main St: Sutton Printing

### 4.4 Sanborn Maps

Between 1867 and 1970 Sanborn produced more than 660,000 maps to chart the growth and development of more than 12,000 American towns and cities. They were created for fire insurance companies to assess the risk associated with insuring a particular property. The maps list street blocks and building numbers in use at the time the map was made as well as previous building numbers to assist the actuaries. EPI requested copies of all available Sanborn fire insurance maps from ERS. The ERS review was returned with the following statement:

The review of collections and indexes has determined that no historical fire insurance maps are available within these collections and indexes for the referenced site; therefore they are not available and are considered not "reasonably ascertainable" according to ASTM standards. Environmental Record Search (ERS) certifies that a thorough search of our holdings, various other collections and indexes has been completed.

A certificate of "No Findings" is included in Appendix 9.

### 4.5 Other Historical Records

According to the ASTM E1527 – 21 Standard, other historical sources include but are not limited to miscellaneous maps, newspaper archives, internet sites, local libraries, historical societies, and other such records.

An internet search of other non-standard sources was conducted. No additional environmentally-significant information was discovered.

### 5.0 REGULATORY DATABASE REVIEW

An Environmental Record Search (ERS) RecCheck® regulatory data search was performed for the property using the ASTM E1527 – 2021 standards for search radii. The ASTM requirements are:

Standard Environmental Record Sources	Approximate Minimum Search Distance (miles)			
Federal NPL site list	1.0			
Federal Delisted NPL site list	0.5			
Federal CERCLIS list	0.5			
Federal CERCLIS NFRAP site list	0.5			
Federal RCRA CORRACTS facilities list	1.0			
Federal RCRA non-CORRACTS TSD facilities list	0.5			
Federal RCRA generators list	Subject property & adjoining properties			
Federal institutional control/engineering control registries	Subject property only			
Federal ERNS list	Subject property only			
State- and tribal-equivalent NPL	1.0			
State- and tribal-equivalent CERCLIS	0.5			
State and tribal landfill and/or solid waste disposal site lists	0.5			
State and tribal leaking storage tank lists	0.5			
State and tribal registered storage tank lists	Subject property and adjoining properties			
State and tribal institutional control/engineering control registries	Subject property only			
State and tribal voluntary cleanup sites	0.5			
State and tribal Brownfield sites	0.5			

The ERS RecCheck® provides many supplemental record sources such as Texas Affected Property Assessment Reports, Coal Ash location, biofuel manufacturers, historical Emergency Response Notifications, historical spill records, and other valuable resources in determining potential environmental concerns at a property. The full RecCheck® report is provided as Appendix 10. There are 53 listings within the search radii for ASTM and supplemental databases. Please note that in EPI's review, duplicate listings are distilled to the primary records whenever possible.

A water well was previously located near the northwest corner of the property, associated with the former residence. The well is no longer on the property.

The following is a review of the listings within approximately 500 feet of the subject property that have the highest potential to impact the subject property.

- 112 Industrial Avenue (adjacent N), doing business as (dba) Azle Annex Shopping Center, is listed for in the Innocent Owner/Occupant Program (IOP) (ID 151) that was closed c2000, and reentered into the IOP (ID 272) with the property expanded to include the retail center across Industrial Avenue (112-141 Industrial Avenue). The contaminants of concern (COCs) for these properties come from a dry cleaning operation and gasoline. Historical records indicate that a dry cleaner was located at 420 West Main Street (northwest of the subject property, at the intersection of West Main Street and Industrial Avenue) from c1965 to c1975, and is thought to be a part of the cause for the contamination. Because the IOP was granted to the north adjacent property, and the contamination is suspected to be coming from a property that is adjacent to the subject site, this is interpreted as a Recognized Environmental Condition for the subject property.
- 340 West Main Street (adjacent S), dba Sutton Printing, is listed as a historical printer c1997. **Based on nature** and age of the listing this facility is not considered to be a Recognized Environmental Condition for the subject property.

ASTM and supplemental databases queried indicate several sites within the database search radii, however, *because of the nature of the listing, age of the listing, location, and/or the distance and hydrogeology from the subject property, none is interpreted as a Recognized Environmental Condition for the subject property.* 

## 6.0 SITE RECONNAISSANCE

### 6.1 Methodology and Limiting Conditions

A site reconnaissance consisting of a visual inspection of the subject property, and of neighboring properties as observable from the subject property, was conducted to identify RECs associated with the subject property, to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles.

Potential concerns include, but are not limited to, areas of staining, stressed vegetation, pits, ponds, lagoons, drains sumps, dry wells, and septic systems. The site visit included inspection of transformers and other devices, which may contain polychlorinated biphenyl (PCB), other chemicals, which have a potential for environmental contamination.

Attempts were made to identify aboveground storage tanks (ASTs) and other vessels containing hazardous or regulated materials and to identify visual indications of underground storage tanks (USTs), such as fill and vent pipes, or volume gauges. In addition to the visual inspection, state database of facilities with registered USTs were reviewed, and the site contact was interviewed regarding the knowledge of ASTs and/or USTs.

### 6.2 General Site Setting

The site is located in central Azle, northwest of Fort Worth, with the Tarrant/Parker county line on the eastern property edge. The property is located southwest of TX-199.

### **6.2.1** Site and Vicinity General Characteristics

The property is a trapezoid shaped tract of land with approximately 255 feet of road frontage to West Main Street to the southwest and approximately 335 feet of road frontage to Roe Street to the south. The building is located on the east side of the property with the parking lot to the west.

The vicinity has commercially-converted residences to the west, a school to the south, and a retail center to the north.

### 6.2.2 Structures, Roads, and Other On-site Improvements

The multi-tenant retail center has an approximate building footprint of 32,650 square feet. The northern portion of the building is of tilt-wall construction, and the portion that was expanded c2001 is a steel warehouse.

### 6.3 Exterior Observations

### 6.3.1 Storage Tanks

No storage tanks were noted during the site reconnaissance.

### 6.3.2 Odors

No foul or pungent odors were noted during the site reconnaissance.

### 6.3.3 Pools of Liquid

There were no pools of liquid observed during the site reconnaissance.

### 6.3.4 Drums and Containers

A partial drum of used kitchen oil was observed outside of the building on the east side. *This drum should be properly labeled for content and generator.* 

### 6.3.5 PCBs

No equipment with leaking oils or fluids likely to contain PCBs was observed at the subject property.

### 6.3.6 Pits, Ponds, or Lagoons

No pits, ponds, or lagoons were observed during the site reconnaissance.

### 6.3.7 Stained Soil or Pavement

No staining of greater than de minimis area was noted during the site reconnaissance.

### 6.3.8 Stressed Vegetation

No stressed vegetation was observed during the site reconnaissance.

### 6.3.9 Solid Waste

No solid waste, as defined by the Resource Conservation and Recovery Act (RCRA), was observed being accumulated on site.

### 6.3.10 Wastewater

No industrial process wastewater is being generated on site.

### 6.3.11 Wells

No wells were observed during the site reconnaissance. A municipal supply provides drinking water to the site.

### 6.3.12 Septic Systems

No septic system was observed during the site reconnaissance. A publicly owned treatment works processes sewage from the facility.

### 6.4 Interior Observations

### 6.4.1 Heating and Cooling

Heating and cooling are of typical gas and electric equipment types.

### 6.4.2 Stains and Corrosion

No stains or corrosion were noted during the site reconnaissance.

### 6.4.3 Drains and Sumps

No drains and/or sumps were noted during the site inspection other than those for storm water management and/or floor drain/air gaps within janitorial closets and restaurant kitchens.

### 6.5 Current and Past Uses of the Site, Adjoining Properties, and Surrounding Area

### 6.5.1 Current Use(s) of the Property

The property is currently developed as a retail center.

### 6.5.2 Current Uses of Adjoining Properties

The current use of adjacent properties as viewed are:

- North Retail center
- East Vacant lot
- South Roe Street, Tater Club Learning Center
- West West Main Street, Callie Domingo & PC-Cell Fixx

PROJECT 2204804 14

### 6.6 Property and Area Development Timeline

One of the objectives of this report is developing the history of the previous uses of the subject property, adjoining properties, and surrounding area to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the subject property. Synthesizing various data sources, this historical timeline can be established:

The subject property and vicinity were residentially developed prior to 1956. The area began commercial development c1963, at which time, the dry cleaner to the northwest is constructed. The dry cleaner building was removed by 1981. The subject property was redeveloped commercially c1990, and the retail center was expanded to the current configuration c2001.

### 6.7 Vapor Encroachment Screening

Vapor encroachment is the potential for migration of vapor contaminants onto (or through the subsurface of) the subject property. Vapor encroachment is a separate and distinct concept from vapor intrusion, which evaluates potential risk exposure within a building.

EPI conducted a Tier 1 Screen for Vapor Encroachment Condition (VEC) at the subject property by visual inspection as well as researching regulatory databases for possible contaminated sites in the area based on the ASTM Standard E2600 – 15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.

The area of concern (AOC) radius is volatile chemical dependent. For petroleum hydrocarbons the radius is approximately  $^{1}/_{10}$ -mile (about 500 feet) and the AOC radius for non-petroleum hydrocarbon chemicals is approximately  $^{1}/_{3}$ -mile (about 1,760 feet). If a known or suspect contaminated site with chemicals of concern is located in the AOC, the environmental professional may then make a judgment as to whether or not this site represents a potential VEC.

Based on the review the data and conditions, the likelihood of a vapor encroachment condition cannot be ruled out, but does not constitute a Recognized Environmental Condition.

### 7.0 INTERVIEWS

Interviews with the owners, operators, and occupants of the property as well as the state and/or local government agency officials were conducted to obtain information regarding RECs on the property. The interview details are provided as Appendix 4.

### 7.1 Past and Present Owners, Occupants, and Others

EPI has developed a *Key Site Manager* questionnaire form to assist in obtaining environmental information associated with the property.

Darlene Trojacek Tucker completed the Key Site Manager form. The manager indicated they were unaware of any environmental concerns with the property and have been familiar with the property for eight years. They indicated that they have limited knowledge of previous businesses, that asbestos has been abated and recorded, that pest control chemicals are stored outside of the building, and that America's best Vacuum services the food production grease trap every six months.

### 7.2 State and Local Government Officials

Please note that information requests were sent to regulatory agencies at the city and/or county level. Any such document shall become a part of this report by reference and are attached in Appendix 4. Some agencies do not respond at all, while others do in due course of time. At the time of preparation of this report, the City of Azle had responded stating that they have no responsive records.

### 8.0 NON-ASTM SCOPE SERVICES

The ASTM E1527 – 21 Standard identified several out of standard scope considerations that a user may consider assessing in connection with commercial real estate transaction. No implication is intended as to the relative importance or inquiry into such non-scope considerations, and this list of non-scope consideration is not intended to be all-inclusive.

- Asbestos-Containing Building Materials
- Biological Agents
- Compliance with Property Use Limitations
- Cultural and Historical Resources
- Ecological Resources
- Endangered Species
- Federal/State/Local Compliance Obligations (e.g., RCRA waste management)
- Indoor Air Quality
- Industrial Hygiene
- Lead-Based Paint
- Lead in Drinking Water

- Mold
- Petroleum Products
- Potential Effects of Noncompliance
- Radon
- Regulatory Compliance (including Health & Safety)
- Substances Not Defined as Hazardous Substances (e.g., PFAS)
- Wetlands
- Vapor Intrusion
- Controlled Substances
- Earthquake and Fault Zones

### **RETAIL CENTER**

### 9.0 EVALUATION

### 9.1 Data Gaps

A data gap exists since historical sources were not available or could not verify usage back to 1940 or the first development, whichever is earliest, in 5-year or less increments.

In the opinion of the environmental professional, there are no significant data gaps that affect the ability to identify recognized environmental conditions.

### 9.2 Deviations

There were no significant deviations from the scope of services provided in the ASTM E1527 – 21 Standard Practice.

There were no user constraints.

### 9.3 Timeline of Development

The subject property and vicinity were residentially developed prior to 1956. The area began commercial development c1963, at which time, the dry cleaner to the northwest is constructed. The dry cleaner building was removed by 1981. The subject property was redeveloped commercially c1990, and the retail center was expanded to the current configuration c2001.

### 9.4 Findings and Opinion

Environmental Performance, Inc. (EPI) has prepared the requested Phase I Environmental Site Assessment Report (Phase I ESA) on behalf of Mercer Company in accordance with the terms of the Authorization Letter dated April 5, 2022. The subject property, a retail center, is located at 404 West Main Street, Azle, Parker County, Texas 76020.

A water well was previously located near the northwest corner of the property, associated with the former residence. The well is no longer on the property.

112 Industrial Avenue (adjacent N), doing business as (dba) Azle Annex Shopping Center, is listed for in the Innocent Owner/Occupant Program (IOP) (ID 151) that was closed c2000, and reentered into the IOP (ID 272) with the property expanded to include the retail center across Industrial Avenue (112-141 Industrial Avenue). The contaminants of concern (COCs) for these properties come from a dry cleaning operation and gasoline. Historical records indicate that a dry cleaner was located at 420 West Main Street (northwest of the subject property, at the intersection of West Main Street and Industrial Avenue) from c1965 to c1975, and is thought to be a part of the cause for the contamination. Because the IOP was granted to the north adjacent property, and the contamination is suspected to be coming from a property that is adjacent to the subject site, this is interpreted as a Recognized Environmental Condition for the subject property.

ASTM and supplemental databases queried indicate several sites within the database search radii, however, *because of the nature of the listing, age of the listing, location, and/or the distance and hydrogeology from the subject property, none is interpreted as a Recognized Environmental Condition for the subject property.* 

### **RETAIL CENTER**

### 9.5 Conclusions and Recommendations

We have performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527 – 21 of 404 West Main Street, Azle, Parker County, Texas 76020, the subject property. Any exceptions to, or deletions from, this practice are described in Section 9.2 of this report. This assessment has revealed the following recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the subject property:

### **Controlled Recognized Environmental Conditions**

This assessment has not revealed evidence of Controlled Recognized Environmental Conditions in connection with the property.

### **Historical Recognized Environmental Conditions**

This assessment has not revealed evidence of Historical Recognized Environmental Conditions in connection with the property.

### **Recognized Environmental Conditions**

This assessment has revealed evidence of Recognized Environmental Conditions in connection with the property.

112 Industrial Avenue (adjacent N), doing business as (dba) Azle Annex Shopping Center, is listed for in the Innocent Owner/Occupant Program (IOP) (ID 151) that was closed c2000, and reentered into the IOP (ID 272) with the property expanded to include the retail center across Industrial Avenue (112-141 Industrial Avenue). The contaminants of concern (COCs) for these properties come from a dry cleaning operation and gasoline. Historical records indicate that a dry cleaner was located at 420 West Main Street (northwest of the subject property, at the intersection of West Main Street and Industrial Avenue) from c1965 to c1975, and is thought to be a part of the cause for the contamination. Because the IOP was granted to the north adjacent property, and the contamination is suspected to be coming from a property that is adjacent to the subject site, this is interpreted as a Recognized Environmental Condition for the subject property.

### **Recommendations**

A Phase II investigation is recommended. Soil and groundwater samples should be collected and analyzed for volatile and chlorinated organic compounds (full VOC list) and total petroleum hydrocarbons (TPH). If TPH is detected in the semi-volatile range, additional analyses for semi-volatile organic compounds (SVOC) should be performed.

### 9.6 Signature of Environmental Professional

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Performance, Inc.

### 10.0 GLOSSARY

<u>Controlled Recognized Environmental Conditions</u> – §3.2.17 defines a Controlled Recognized Environmental Condition (CREC) as a "recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls."

<u>Data Gap</u> – §3.2.19 defines this as "a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.)."

<u>De minimis</u> – §3.2.20 defines *de minimis* as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. A condition determined to be *de minimis* conditions is not a recognized environmental condition nor a controlled recognized environmental condition."

<u>Document and Sources</u> – Photographs taken during the site reconnaissance are included in the appendix. In addition to the visual observations, EPI relied on sources and contacted individuals who are listed in the appendix. If and when applicable, additional forms and checklists are also included in the appendices.

<u>Environmental Database Review</u> – Reasonably ascertainable databases are reviewed to determine whether the subject property or any neighboring properties were suspected of having or known to have environmental concerns likely to adversely impact the subject property. The databases reviewed and the radii chosen are based on the ASTM standard and Client's scope of work.

<u>Historical Recognized Environmental Conditions</u> – §3.2.39 defines a Historical Recognized Environmental Condition (HREC) is a "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls." A historical recognized environmental condition is not a recognized environmental condition.

<u>Physical Setting</u> – All reasonable efforts are made to determine the physical setting of the subject property including the regional topography, property topography, property elevation, geology, hydrogeology, and surface water bodies. "Wetlands" is a general term used to describe a variety of ecosystems, which include prairie potholes, marshes, fens, bogs, wet meadows, and swamps. It is not part of this assessment to conduct a wetland determination.

<u>Polychlorinated Biphenyls (PCBs) Search</u> – An attempt was made to identify electrical or hydraulic equipment known to or likely to contain PCBs, identify the condition of such equipment, and to determine the ownership of the equipment. Consistent with the ASTM standard practice, fluorescent light ballasts likely to contain PCBs are not addressed or directly inspected due to the limited quantity of PCB material contained in it. (§9.4.18)

<u>Prior Use History Review</u> – Attempts are made to identify the obvious prior usage of the property back to the property's first developed use or 1940 whichever is earlier, using many sources that were both reasonably ascertainable and likely to be useful. Standard historical sources may include any or all of the following: historical aerial photographs, historical maps, tax information, topographic maps, local street directories, chain of title, zoning/land use records, prior reports and interview with local agencies or other knowledgeable individuals.

RETAIL CENTER

<u>Property Use Limitation</u> – §3.2.67 defines this as a "limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allows hazardous substances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria. (§3.2.67)

<u>Reasonably Ascertainable</u> – (1) information that is publicly available, (2) information that is obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable. (§3.2.72)

<u>Recognized Environmental Conditions</u> – §3.2.73 defines a REC as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."

<u>Significant Data Gap</u> – §3.2.78 defines this as "a data gap that affects the ability of the environmental professional to identify a recognized environmental condition."

<u>Site Reconnaissance</u> – A visual inspection of the subject property and adjoining properties as observable from the subject property, conducted to identify RECs associated with the subject property, to the extent the inspection was not obstructed by bodies of water, adjacent buildings, or other obstacles. Potential concerns include, but are not limited to, areas of staining, stressed vegetation, pits, ponds, lagoons, drains, sumps, dry wells, and septic systems.

<u>Underground Storage Tank (UST) and Aboveground Storage Tank (AST) Search</u> – Attempts were made to identify any ASTs containing hazardous or regulated materials and to identify visual indications of USTs, such as fill and vent pipes, or volume gauges. In addition to the visual inspection, the state database of facilities with registered USTs was reviewed.

# APPENDIX 4 User Questionnaire, Interview & Additional Documentation

# USER QUESTIONNAIRE (Borrower's Form)

To qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, all *users* must provide the following information (if available) to Environmental Performance, Inc. **Failure** to provide this information could result in a determination that "all appropriate inquiry" is not complete.

(1)	Did a search of recorded land title records identify any environmental liens filed or recorded against the property under
	federal, tribal, state, or local law? Yes No If yes, please explain:
(2)	Activity and land use (AULs) limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26).
	Did a search of recorded land title records identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law? Yes No If yes, please explain:
(3)	Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
	Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes No If yes, please explain:
(4)	Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).  Does the purchase price being paid for this property reasonably reflect the fair market value of the property?  Yes No
	If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Yes No If yes, please explain:
(5)	Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).
	Are you aware of commonly known or reasonably ascertainable information about the property that would help
	Environmental Performance, Inc. to identify conditions indicative of releases or threatened releases? For example,
	(a) Do you know the past uses of the property? Yes No (b) Do you know of specific chemicals that are present or once were present at the property? Yes No
	(c) Do you know of spills or other chemical releases that have taken place at the property? Yes No
	(d) Do you know of any environmental cleanups that have taken place at the property? Yes No
	(e) If yes to any of the above, please explain:
(6)	The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).  Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence
	or likely presence of contamination at the property? Yes No If yes, please explain:
Plea	ase sign, date, and email or fax back at your earliest convenience to 281-966-1840.

Subject: Public Info Request - 404 West Main Street

You don't often get email from kmcdevitt@eperinc.com. Learn why this is important

Good afternoon,

EPI is performing an Environmental Site Assessment of the below referenced property.

As such, we are contacting your department to request any and all environmentally related information (spills, fires, leaks, etc.) on the subject property. If no relevant files exist, a brief statement stating the same would be appreciated.

### Please e-mail the information to kmcdevitt@eperinc.com

The following is the property's address:

404 West Main Street Azle, Texas 76020

Thank you for your assistance

Sincerely, ENVIRONMENTAL PERFORMANCE

Kalee McDevitt Environmental Scientist

REPORT RESULTS

## Report Results for:

Kalee McDevitt Environmental Performance, Inc. 1717 Woodstead Court, Suite 105 The Woodlands, TX 77380 2104764729 FIM April 14, 2022

## Site Information:

404 West Main Street Azle, TX 76020

Subject Site: ERS Order #:

*Client's Project #:* **2204804** 

Address: 404 West Main Street

City, State Zip: Azle, TX 76020

Prepared For: Date:

Name: Kalee McDevitt April 14, 2022

Company: Environmental Performance, Inc. Prepared By:

Address: 1717 Woodstead Court, Suite 105 Name: Dan

Address: 1717 Woodstead Court, Suite 105 Name: Daniel Johnson City, State Zip: The Woodlands, TX 77380 Phone #: (714) 669-8096

Ext. 1002

#### Years Reviewed:

N/A - Coverage was not available for Azle.

#### **Historical Fire Insurance Map Search Result:**

The review of collections and indexes has determined that no historical fire insurance maps are available within these collections and indexes for the referenced site; therefore they are not available and are considered not "reasonably ascertainable" according to ASTM standards. Environmental Record Search (ERS) certifies that a thorough search of our holdings, various other collections and indexes has been completed.

Thank you for selecting ERS.

## **EXECUTIVE SUMMARY**

#### INFORMATION ON THE REQUESTED LOCATION

Site Address:	404 West Main Street Azle, TX 76020
Client Project Name/Number:	2204804
Coordinates:	N 32-53-49, W 97-32-47 (NAD 83) 32.896993, -97.5464731
Date of Report	April 20, 2022
ERS Project Number:	2104764729
Subject Site Listed on the following lists:	Not Listed
Subject Site Listed as Map ID#:	N/A
USGS 7.5 Minute Quad Map:	Azle (Date Unavailable)
Subject Site Located within a Potential Area of Concern:	No
Township, Section and Range:	Electronic TRS is unavailable
Site Elevation: (feet above or below (-) mean sea level)	718
Flood Zone: (Digital Flood Insurance Rate Maps - DFIRMs) Only available digital data is provided	Panel: 48367C0200E, Effective Date: 9/26/2008 Electronic Flood Zone information Is Not available. Check www.FEMA.gov For map.
Fire Insurance Map Coverage:	There may be coverage of your site.
Radon Information:	EPA Radon Zone: 3 (Predicted avg for county: < 2 pCi/L)
Search Radius Expansion Size: (In Miles)	0

Soil Type: (USDA Soil Survey Geographic Database) (SSURGO)	Map Unit Name: Selden loamy fine sand, 1 to 5 percent slopes Map Unit Type: Consociation Drainage Class - Dominant Condition: Moderately well drained General Information: Fine-loamy, siliceous, active, thermic Aquic Paleustalfs Top 3 Map Unit Components are below (if available): Component Name: Duffau, Chaney, Selden Component Percentage: 5%, 5%, 80% Hydric: No, No, No
Zip Codes Searched for "Un-Mappable" Sites:	Not Researched
Occurrence Count:	53

# 1-MILE RADIUS STREET MAP W/OCCURRENCES (MAP1)

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Occurrences are shown in three colors to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in RED are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in YELLOW have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in GREEN are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

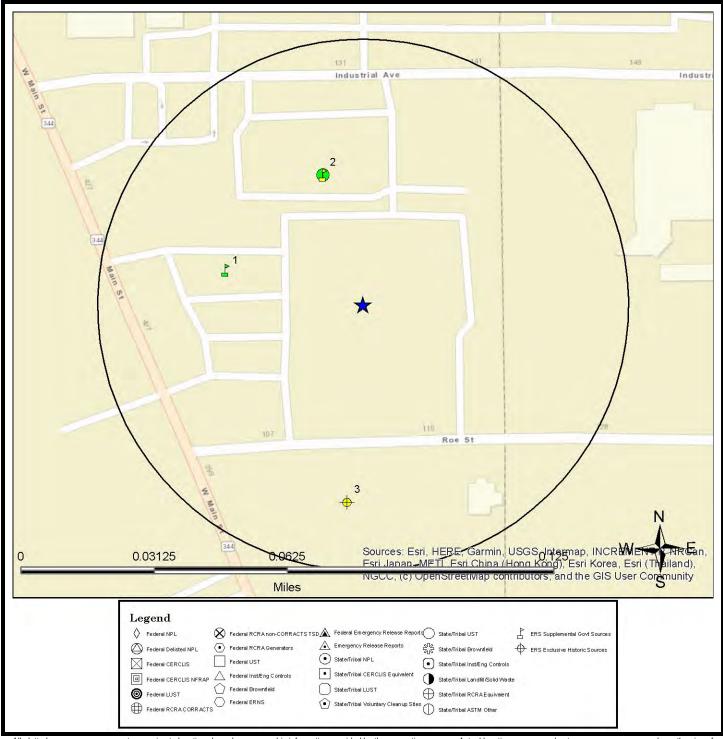

# 0.25-MILE RADIUS STREET MAP W/OCCURRENCES (MAP2)

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Occurrences are shown in three colors to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrences shown in RED are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in YELLOW have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in GREEN are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

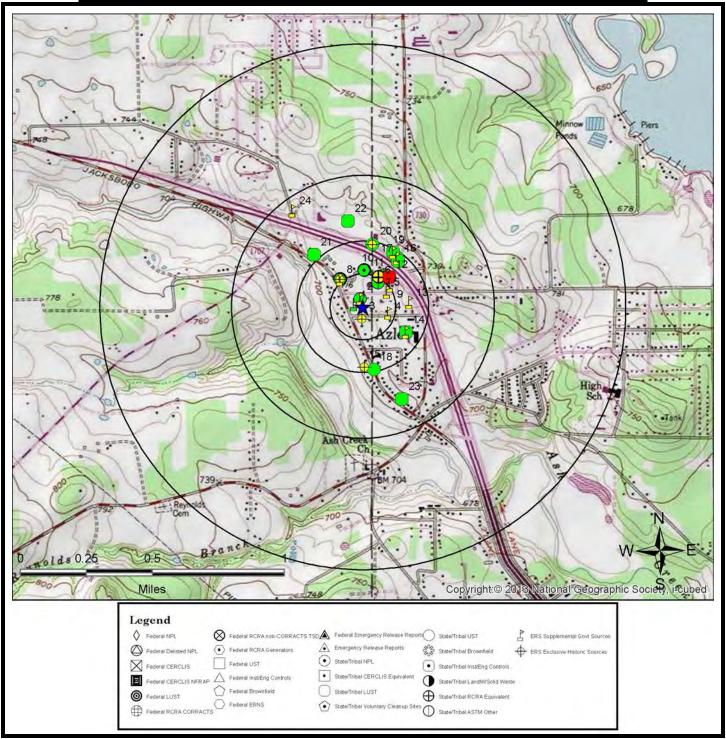

# 0.0625-MILE RADIUS STREET MAP W/ OCCURRENCES (MAP3)

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Occurrences are shown in three colors to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrences shown in RED are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in YELLOW have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in GREEN are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

## 1-MILE TOPOGRAPHIC MAP W/OCCURRENCES (MAP4)

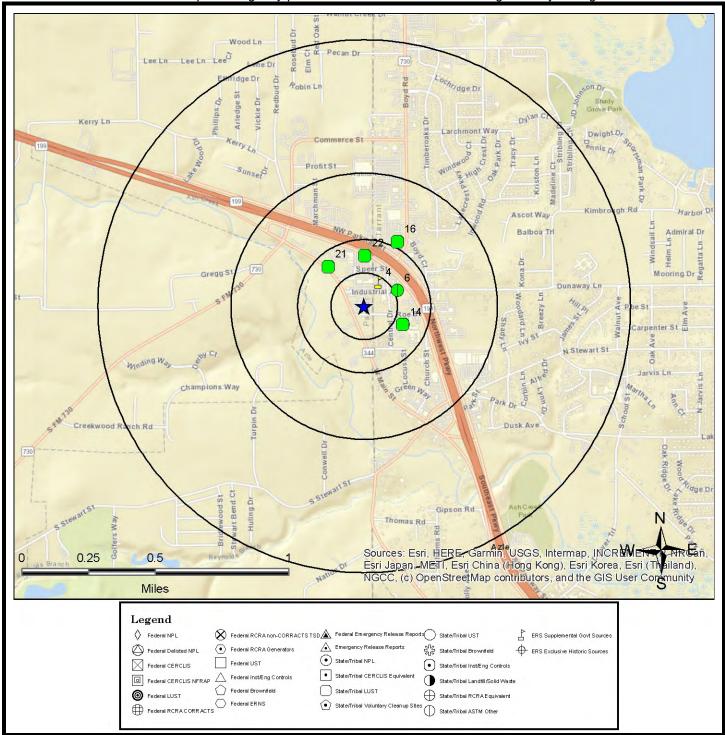

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Occurrences are shown in three colors to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in RED are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in YELLOW have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in GREEN are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

## **AGENCY DIFFERENCES IN MAPPED LOCATIONS (MAP5)**

Note: Occurrences on this map have agency provided coordinates which differ significantly from geocoded locations.

This "AGENCY DIFFERENCES IN MAPPED LOCATIONS (MAP 4)" is fully protected against reproduction in any way, shape or form by ERS Environmental Record Search. ALL applicable laws, copyrights, pending copyrights, trademarks, and any and all applicable Federal and State laws apply at all times. These protections include the concept, procedures, processes, layout, vision, color scheme, mapping layout, legends, data, any and all verbiage, and the entire concept.

## MAPPED AIR PERMITS WITH POTENTIAL DISPERSION (MAP6)

Note: Occurrences on this map are reported in Air Quality databases. Potential air plumes are drawn in the direction of the prevailing wind.

No air quality occurrences were identified in the search radius

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency/source. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Potential air dispersion plumes are depicted to graphically show the direction contaminates may travel based on prevailing wind data and provide a visual screening tool only. Actual direction will vary especially by season. Depending on the actual contaminate, amount released, and other variables, the distance from the source the contaminate may travel can and will vary. Interpretation and review of all the actual relevant data by an environmental professional is recommended before making any decisions, conclusions or otherwise based on the map depictions, air data, and potential air dispersion plumes.

This "MAPPED AIR PERMITS WITH POTENTIAL DISPERSION (MAP 6)" is fully protected against reproduction in any way, shape or form by ERS Environmental Record Search. ALL applicable laws, copyrights, pending copyrights, trademarks, and any and all applicable Federal and State laws apply at all times. These protections include the concept, procedures, processes, layout, vision, color scheme, mapping layout, legends, data, any and all verbiage, and the entire concept.

## **UN-MAPPABLE OCCURRENCES**

The following occurrences were not mapped primarily due to incomplete or inaccurate address information. All of the following occurrences were determined to share the same zip code as the area searched. General status information is given with each occurrence along with any address information entered by the agency responsible for the list.

ID	Facility Name	Address	Database	Status
No "un-mapped" sites requested.				

### DISCLAIMER, LIMITS AND LIABILITIES

All of the data presented in this report was garnered from public information maintained by governmental agencies. *Environmental Record Search (ERS)* cannot ensure that the data, which has been entered and maintained by others, is complete and/or accurate. Any, and all omissions, errors, negligence, accidentally or otherwise within the data received by *ERS* is assumed to be caused by others and *ERS* cannot and does not assume, take, or acknowledge any liability whatsoever for their respective data. The extrapolation of the mapped locations is based solely on the accuracy of the data provided by others. Prior to relying completely on any mapped location within this report, its accuracy should be verified using other means such as further documentation or a field visit. *ERS* makes no representation, warranty or guaranty, express or implied regarding the accuracy of the data entered and maintained by others or the suitability of the data received from others in this report for a certain task or interpretation.

The data presented in this report should only be interpreted by an experienced environmental professional, as per EPA definition, that completely understands the potential inaccuracy of the data derived from others, the possible existence of contaminated occurrences that have not been listed, and the possibility that the governmental database misrepresents the actual status of an occurrence or listing. Prior to relying completely on any of the data within this report, an environmental professional should verify the accuracy of the information presented unless one of ERS's Environmental Professionals has interpreted the data and/or report.

It is important that the reader and/or end user of this information realize that the data gathered has not been verified for its accuracy or completeness in any way by *ERS*. With billions of records, this is an impossible task for any Company. As much as possible, the data is presented unchanged and unaltered to represent the actual data produced by these agencies. This insures the integrity of the data for the end user.

**ERS** does however stand behind its representation of the data, any manually plotted occurrences, any risk determinations and all other items directly under its control. This report does comply (as far as the data is reasonably ascertainable as outlined in both the following standards) with section 8.2.1 of ASTM 1527-13 – Standard Environmental Record Sources and EPA's 40 CFR Part 312, All Appropriate Inquiries. **ERS** does ensure that the data is accurately reproduced from the original source. **ERS** backs the reporting of the data with \$3,000,000 of General and Environmental Professional Liability (errors and omissions) Insurance!

The *ERS* logo, name, report design, presentation, maps, tables, etc., are the exclusive property of *ERS* and its parent company and affiliates. Except as provided below, information or images contained in this report may not be reproduced or distributed in whole or in part by any means without the prior written permission from *ERS*. United States and international copyright laws protect any and all reports produced by *ERS*.

The person or entity that purchased this report may make up to five (5) copies of the entire report or any part of it for archival purposes or to include as part of another report. All copyright information must remain intact and not be modified in any way.

**Environmental Record Search (ERS)** and their respective products/reports (i.e. RecCheck, LenderCheck, Environmental Screen, etc.) as well as their respective business operations, are **NOT** associated in any way with nor related to, First American Commercial Real Estate, Inc. (FACRES) and/or the First American Family of Companies.

# APPENDIX 11 Qualifications of Environmental Personnel

#### **QUALIFICATION OF ENVIRONMENTAL PROFESSIONAL**

EPI has been helping its clients with their environmental due diligence needs during transactions since it was established in 1995. From a simple Phase I/II Report to complex environmental liabilities analysis, we can help you recognize and manage your environmental liabilities associated with a transaction. The following is a synopsis of our environmental transactional service expertise:

- Comprehensive spectrum of environmental due diligence services ranging from site-specific Phase I and II Assessments to complex M&A liability analysis.
- Due diligence services performed at over 2,000 facilities nationwide.
- Services performed in more than 32 states, Puerto Rico and Canada.
- Services provided in transactions ranging from under \$100k to over \$400 million.
- Total cumulative portfolio value of deals for which due diligence advice was provided to our clients since inception over \$20 billion.

William D. Green, PG No. 136
Texas Professional Geologist
Certified Project Manager

Mr. Green has a Bachelor of Science degree in Geology from Sul Ross State University in Alpine, Texas. He has been a Professional Geologist in the State of Tennessee in the past and is now a licensed Professional Geoscientist in the State of Texas. In addition, he is a state-licensed Corrective Action Project Manager and is a Certified Project Manager for large Federal projects.

Mr. Green has 30 years of direct experience in the environmental consulting field. His knowledge base ranges from management and supervision of complex environmental projects to providing environmental due diligence services to governments, banks, corporation, attorneys, and major funds. Some of his major projects include:

- Teaching Environmental Site Assessment as a University-level class.
- Leading an environmental program for about 600 wells with 180 tank batteries over ~ 200 square miles.
- Conducted due diligence investigations for corporate mergers.
- Taking on a 10-year old 2,3,8,11-tetraoxadodecane hazardous release site remediation and facilitated rapid closure within 1-year; leveraged techniques using risk-based calculations, and field verification to streamline operations. (RRC Operator Cleanup Program No. 08-2487)
- Supervising end-to-end environmental compliance operations for 13 fuel terminals, refined product pipelines, crude oil gathering systems, and midstream/downstream storage systems operating in 11 states.
- RCRA Compliance Inspector for U.S. Army Garrison Yuma Proving Ground, preparing base-wide RCRA Spill
  Contingency Plan; developed SDWA monitoring schedule for five water supply systems (all three supply types);
  prepared Integrated Solid Waste Management and Qualified Recycling Program using DoD requirements and
  guidance.
- Leading remediation and upstream/midstream compliance projects and provided expertise in the Texas Risk Reduction Program (TRRP) investigation of chlorinated solvent groundwater release.
- Auditor for National Environmental Laboratory Accreditation Program & EPA Drinking Water Laboratory Quality Systems. Audited Laboratories, revised SOPs for Field Operations and Enforcement Divisions, and developed database containing ~1,000 TCEQ-regulated test methods.

#### **EDUCATION | CERTIFICATION | TRAINING**

**Education**: Bachelor of Science in Geology, Minor in Business | Sul Ross State University (1995) Continuing Education in Mine Safety (78-hours) | University of British Columbia (2010 – 2011)

**Current Certifications**: Texas Licensed Professional Geologist No.136 (2003) | NELAP Accreditation Auditor (2004) | EPA Drinking Water Laboratory Certification Officer (2005) | Certified Project Manager (2014)

**Training**: Harvard University, *Negotiating Environmental Agreements* | OSHA, 40-Hour HAZWOPER and Site Supervisor | DOT, Incident Command Management | Naturally Occurring Radioactive Material (NORM) Surveyor

#### **QUALIFICATION OF ENVIRONMENTAL PROFESSIONAL**

EPI has been helping its clients with their environmental due diligence needs during transactions since it was established in 1995. - Services performed in more than 32 states, Puerto Rico and Canada.
- Services provided in transactions ranging from under \$100k to over \$400 million.
- Total cumulative portfolio value of deals for which due diligence advice was provided to our clients since inception over \$20 billion.

# Charles R. Robertson, CPG, PG, CAPM Professional Geologist Corrective Action Project Manager

Mr. Robertson has over 30 years experience in environmental consulting. He has conducted and managed over 800 UST closure/removal and subsurface investigation projects in 18 states and over 1,000 Phase I and II ESAs, bioremediation evaluations, and risk assessments in 30 states. Mr. Robertson has submitted reimbursement applications for state petroleum storage tank claims for a number of clients who have received an average of greater than 95% reimbursement on their claims, demonstrating technical and financial competence and adherence to regulations.

- Supervises site reconnaissance operations, boring logging and well installation, sample collection, development
  and sampling of groundwater monitoring wells, aquifer and soil characterization tests, and coordination of
  contaminated materials disposal
- Manages the removal of USTs, and the performance of subsurface investigations, soil vapor surveys, and emergency response actions
- Oversees preparation of remedial and corrective action plans, and evaluates the effectiveness of remedial action systems after installation
- Conducts groundwater modeling, conducted aquifer testing, prepared health-based risk assessments, designed groundwater monitoring programs
- Prepares Water Pollution Abatement Plans (WPAPs) for projects located above the Edwards Aquifer recharge zone

#### **EDUCATION | CERTIFICATION**

**Education**: Bachelor of Science in Geology | Louisiana Tech University (1986) *cum laude* M.B.A., Management | Louisiana Tech University (1989)

Current Certifications: Corrective Action Project Manager, Texas (CAPM) No. 268 (1994) | UST Consultant, Oklahoma, No. 566 (1995) | Certified Scientist, New Mexico, No. 124 (1996) | Certified Professional Geologist, AIPG, No. 9858 (1996) | Registered Geologist, Missouri, No. 991 (1998) | Professional Geoscientist, Texas, No. 150 (2003) | Registered Professional Geologist, Arkansas, No. 1985 (2013)
