

To whom it may concern,

Based on the development proposal, certain trees need to be removed to allow for the construction to proceed. One of these trees is a Cottonwood tree with a DBH (diameter-at-breast height, or trunk width) of 82cm. This tree is in the development property and half of the branches are shadowing in the neighbours property. As part of the proposed development, the rear yard where this tree is located requires construction excavation activity and a new privacy fence and new trees will be installed. Both of these would cause damage to the tree's root zone. Based on the trees size, species, and condition, the tree may become a hazard, and was recommended for removal by the arborist.

Please review the tree in question, and provide written consent to having the named tree removed.

Thanks,"
