ECONOMIC OVERVIEW SOUTH CAROLINA

The Southeastern United States' fast-paced population growth to date, along with the region's manufacturing renaissance, has made it an ideal location for businesses seeking to cut operating costs and reach strategic markets. In the heart of the Southeast, South Carolina offers unparalleled value to companies seeking the ideal business location.

Reliable, affordable energy

South Carolina has one of the lowest industrial power rates in the nation, costing an average of only 5.29 cents per kilowatt hour — that's 30 percent less than the national average. Over the years, South Carolina's strong tradition in manufacturing has shaped an ample and durable energy infrastructure that meets the needs of today's capital-intensive industry.

Low cost to operate and a business-friendly climate

South Carolina is committed to enhancing its business-friendly climate and establishing an environment where businesses can prosper. In fact, South Carolina consistently ranks as one of the most business-friendly states in the nation with a low cost of doing business, a tax base that lends itself to economic growth, and several other incentives:

The Right Connections

Although South Carolina stands out as a unique, powerful entity, it's connected to key markets in the North, South and West:

- Comprehensive multi-modal transportation network that includes 11 interstate highways
- Expansive rail system that includes two Class I railroads and eight independent lines to service 2,300 miles of rail

You won't find a more hospitable or business-friendly climate than South Carolina.
