RE: **Phase I Environmental Site Assessment**
2.43-Acre Vacant Commercial Parcel
406 E. Bearss Avenue
Tampa, Hillsborough County, Florida
UES Project No. 0840.2300062

Universal Engineering Sciences (UES) has completed a Phase I Environmental Site Assessment (ESA) in compliance with the American Society for Testing and Materials (ASTM) Standard E1527-21 for the above-referenced site (the "subject property"). The purpose of this assessment was to identify Recognized Environmental Conditions (RECs) in association with the subject property as defined in ASTM E1527-21.

Based on the conclusions of the Phase I ESA, this assessment has revealed no evidence of Recognized Environmental Conditions in connection with the subject property. However, as a result of the subject property's historical use as a citrus grove, UES recommends consideration of additional assessment, beyond that required by ASTM 1527-21, to determine if surficial soils are impacted by pesticides or other agricultural chemicals. Further details regarding the Phase I ESA conducted by UES are presented in the attached report and the complete report should be read to fully understand the assessment.

We appreciate the opportunity to be of assistance. Please contact the undersigned if you have any questions, or require additional information or consulting services.

ENVIRONMENTAL PROFESSIONAL CERTIFICATION

Phase I Environmental Site Assessment

2.43-Acre Vacant Commercial Parcel
406 E. Bearss Avenue
Tampa, Hillsborough County, Florida
UES Project No. 0840.2300062
Report Issuance Date: June 9, 2023

This Phase I Environmental Site Assessment (ESA) was conducted in accordance with the guidelines of the ASTM E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, and therefore, the federal Environmental Protection Agency's All-Appropriate Inquiry Rule. The accuracy, correctness, and completeness of the Phase I ESA are provided with the knowledge of ASTM E1527-21. In addition, the accuracy, correctness, and completeness of this Phase I ESA are provided with knowledge of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as set forth in 42 United States Code Section 9601 et seq., as amended. Qualifications of the personnel participating in this assessment are provided in **Appendix L**.

Declaration of Environmental Professionals & Signature

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professionals as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

This report presents the findings of a Phase I Environmental Site Assessment (ESA) performed on the approximately 2.43-acre vacant commercial property addressed at 406 E. Bearss Avenue in Tampa, Hillsborough County, Florida (the “subject property”). UES conducted this investigation for the purpose of identifying recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), and/or controlled recognized environmental conditions (CRECs) on the subject property in accordance with the 2021 ASTM International standard practice for the performance of Phase I Environmental Site Assessments (ASTM E1527-21). The U.S. Environmental Protection Agency (EPA) has endorsed this practice as satisfying the requirements of All-Appropriate Inquiry (AAI). Any exceptions to, or deletions from, this practice are described in Section 1, 10 and 11 of this report. Please refer to the Topographic Map presented in **Appendix A** and the Site Plan presented in **Appendix B** for additional information pertaining to the location of the subject property.

SUBJECT PROPERTY OVERVIEW

PARCEL ID	ACREAGE	CURRENT USE
U-36-27-18-ZZZ-000000-75720.0	2.43	Vacant commercial

Based on UES’ field observations, historical research, public records review, and interviews conducted in accordance with ASTM format E1527-21, the findings of this Phase I ESA are as follows:

1. Aerial photographs, city directories, topographic maps, interviews, and property records were reviewed by UES to determine the historical use of the subject property, if reasonably ascertainable, and a site reconnaissance was conducted to determine the current use of the subject property. The subject property was used as a citrus grove from as early as 1938 to the early 1970s. The citrus grove became diminished in the 1970s and the subject property has remained vacant land from the 1970s to present. A billboard was placed on the subject property in the early 1970s and an access drive was built in 1999.
2. UES obtained an ASTM site search report through EDR.
 - The subject property is not listed on any of the searched regulatory databases.
 - Additional off-site facilities are located within the ASTM search distances. Based on the findings of the regulatory records review, they are considered unlikely to have adversely impacted the subject property based on completed cleanup status, separation distance, localized extent of contamination, and/or topographic gradient in relation to the subject property.

3. UES conducted a Tier 1 and Tier 2 VES for the subject property in accordance with ASTM E2600-22. Based on our regulatory records review, no vapor encroachment conditions were identified.
4. UES was not contracted to obtain an Environmental Lien Search Report for the subject property. It is the User's obligation to confirm whether any environmental liens or activity and use limitations are recorded for the subject property.

UES has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the subject property located at 406 E. Bearss Avenue in Tampa, Hillsborough County, Florida. Any exceptions to, or deletions from this practice are described in Section 1, 10 and 11 of this report.

Upon conclusion of our Phase I ESA, and based on the information reviewed, this assessment has revealed the following:

SUMMARY OF FINDINGS

ENVIRONMENTAL CONCERN	FINDING
Recognized Environmental Conditions (REC)	None Identified
Historical Recognized Environmental Conditions (HREC)	None Identified
Controlled Recognized Environmental Conditions (CREC)	None Identified
Business Environmental Risk (BER) Considerations	Historic citrus groves on subject property
Vapor Encroachment Condition (VEC)	None Identified

The former citrus grove on the subject property is considered to be a Business Environmental Risk.

Citrus grove operations include the use of agricultural compounds and long-term application of agricultural compounds may persist in the soil above the recommended exposure levels established by the Florida Department of Environmental Protection (FDEP). Therefore, although not a recognized environmental condition, it may be prudent to complete soil sampling to determine if agricultural compounds are present in concentrations that exceed the State of Florida cleanup criteria prior to any future redevelopment.

1.0 INTRODUCTION

1.1 Purpose

This report presents the findings of a Phase I Environmental Site Assessment (ESA) performed on the subject property. UES conducted this investigation for the purpose of identifying RECs, HRECs, and/or CRECs on the subject property in accordance with the 2021 ASTM International standard practice for the performance of Phase I Environmental Site Assessments (ASTM E1527-21). The U.S. Environmental Protection Agency (EPA) has endorsed this practice as satisfying the requirements of All-Appropriate Inquiry (AAI). ASTM E1527-21 defines these conditions as follows:

REC: (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The term REC is not intended to include de minimis conditions which are conditions related to a release that generally do not present a threat to human health or the environment and which generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

HREC: A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). An HREC is not considered a REC.

CREC: A REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (i.e. activity and use limitations or other property use limitations).

De Minimis Condition: A condition that generally does not present a material risk of harm to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies.

BER: A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

VEC: The presence or likely presence of "chemical of concern" vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil and/or groundwater on or near the property as identified by the Tier 1 or Tier 2 procedures (ASTM E2600-22).

1.2 Scope of Work

The contracted scope of services consists of the preparation of a Phase I ESA of the subject property in accordance with the guidelines set forth in ASTM E1527-21. The accuracy, correctness, and completeness of this Phase I ESA is provided with knowledge of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as set forth in 42 United States Code Section 9601 et seq., as amended.

The Phase I ESA conducted by UES included, but was not limited to, the following services:

- Subject property reconnaissance and observation of adjoining and proximal properties conducted by an environmental professional
- Environmental and physical setting review to assess geologic, hydrogeologic, hydrologic, and topographic characteristics of the subject property, and to determine potential pathways for the migration of contaminants (including solids and liquids at the surface or subsurface and vapor in the subsurface)
- Review of historical land use through city directory listings, historical aerial photographs, historical topographic maps, fire insurance maps (if ascertainable), local jurisdiction records, and interviews/questionnaires
- Review of regulatory agency records to identify and assess any listings of regulatory permits, registrations, or enforcement actions at the subject property, adjoining properties, or proximal sites (if necessary), through both a commercial database search and agency inquiries
- Interview with the User to obtain information about the subject property as required under the ASTM standard and AAI rule
- Interviews with the owner and various agencies to ascertain past and current uses of the subject property, adjoining properties, or the vicinity which may provide information about subject property history and assist in identifying RECs, HRECs and CRECs
- Preparation of this report which describes all work performed and presents a discussion of findings and conclusions

The scope of services does not include soil or groundwater sampling, an evaluation of asbestos-containing building materials, lead-based paint, lead in drinking water, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, indoor air quality, radon, site geotechnics (soils, foundations, site retention, etc.), wetlands, endangered species, or construction materials testing, unless specified in the approved contract between UES and the client. UES can provide additional services upon request.

1.3 Conditions of Contract

UES has conducted this assessment pursuant to our contract executed by the User. Refer to **Appendix C** for a copy of UES' terms and conditions.

1.4 Significant Assumptions

This assessment was conducted in accordance with the assumptions and limitations contained within ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM E1527-21.

As stated in ASTM E1527-21 Section 4.5.1, no environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with the subject property. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs and recognizes reasonable limitations of time and cost.

Additionally, portions of this Phase I ESA are based on unverified information supplied to UES by third-party sources. In accordance with ASTM E1527-21 Section 7.5.2.1, an EP is not required to verify the information provided by third-party sources, unless the EP has actual knowledge that the information is incorrect, or unless it is obvious that certain information is incorrect based on other information obtained in the Phase I ESA.

1.5 Special Terms and Conditions

The findings of this Phase I ESA are based on the completeness and accuracy of the data and observed conditions of the subject property as of the indicated reconnaissance date, and when publicly available information was obtained as described in this report.

1.6 User Responsibilities

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the User must complete an AAI-compliant User Questionnaire and provide it to the environmental professional. Failure to complete this questionnaire could result in a determination that “all-appropriate inquiry” is not complete. The questionnaire determines a baseline of User knowledge of the subject property regarding the following items:

- Environmental cleanup liens that are filed or recorded against the subject property (40 CFR 312.25)
- Activity and land use limitations that are in place on the site or have been filed or recorded in a registry (40 CFR 312.26)
- Specialized knowledge or experience of the person seeking to qualify for the LLP related to the subject property or nearby properties (40 CFR 312.28)
- Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29)
- Commonly known or reasonably ascertainable information about the subject property (40 CFR 312.30)

- The degree of obviousness of the presence or likely presence of contamination in, on, or at the subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

In order to obtain this information, an AAI-compliant User Questionnaire was provided to the User of this Phase I ESA. Additional information regarding questionnaire responses is included in Section 3.1. The completed User Questionnaire is provided in **Appendix D**.

1.7 User Reliance

This report is an instrument of service prepared by UES for the exclusive use of Baldwin-Howell Properties LLC (the User). No other party is permitted by UES to rely on this report. With the permission of the User, UES will meet with a third party to help identify additional services required, if any, to permit such third party to rely on the information contained in this report, subject to the same limitations to which the User has agreed.

1.8 Critical Dates – Continued Viability of ESA

Due to changing environmental regulatory conditions and potential on-site or adjacent activities occurring after this Phase I ESA, the client may not presume the continuing applicability to the subject property of the conclusions in this assessment for more than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction is presumed to be valid. If within this period the assessment will be used by a user different from the user for whom the assessment was originally prepared, the subsequent user must also satisfy the User’s Responsibilities. An environmental site assessment meeting or exceeding this practice and for which the information was collected or updated within one year prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction may be used provided that the following components of the inquiries were conducted or updated within 180 days of the date of purchase or the date of the intended transaction.

CRITICAL DATES

PHASE I ESA COMPONENT	DATE
Date of Declaration by Environmental Professional for Assessment or Update	6/9/23
Earliest Date of Interviews with Owners, Operators, and Occupants	N/A
Date of Search for Recorded Environmental Liens	N/A
Date of Federal, Tribal, State, and Local Records Review	6/1/23
Date of Site Reconnaissance of Subject Property and Adjoining Properties	6/2/23
Report Viability Date	11/28/23

2.0 ENVIRONMENTAL/PHYSICAL SETTING

2.1 Subject Property Location

The subject property consists of an approximately 2.43-acre vacant commercial property addressed at 406 E. Bearss Avenue in Tampa, Hillsborough County, Florida (HCPA Parcel ID U-36-27-18-ZZZ-000000-75720.0). The subject property is located within Section 36, Township 27 South, and Range 18 East, as referenced in the USGS topographic quadrangle map titled “Sulphur Springs, Florida” provided in **Appendix A**. Please refer to the Site Plan in **Appendix B** and the Property Appraiser Records in **Appendix E** for additional details, including the legal description of the property.

2.2 Physical Setting Sources and Discussion

USGS topographic quadrangle maps, soil survey data, available regulatory files, and other reasonably ascertainable records regarding properties of environmental concern in the property vicinity were reviewed as sources for obtaining information regarding the physical setting of the subject property and surrounding vicinity and are summarized in the table below. A copy of the most recent available USGS topographic map is provided as **Figure 1**.

SUMMARY OF PHYSICAL SETTING SOURCES

PHYSICAL SETTING INFORMATION FOR THE SUBJECT PROPERTY & VICINITY	
Topography	
Site Elevation	60 feet above sea level
Topographic Gradient	Relatively flat
Closest Surface Water	Pond on north adjoining property
General Soil Characteristics	
Soil Type	Zolfo Fine Sand
Description	Zolfo Fine Sand consists of somewhat poorly drained, sandy marine deposits on flatwoods and rises on marine terraces. The depth to water is more than 80 inches below the land surface (in bls). A typical profile contains fine sand from 0 to 80 in bls. Slopes range from 0 to 2 percent.
Area Specific Geology/Hydrogeology Characteristics	
Geology	<p>According to the <i>Geologic Map of the State of Florida (2001)</i>, the surficial deposits underlying the site in the general vicinity are classified as Quaternary undifferentiated sediments (Qu) of Pleistocene and Holocene geologic age. In general these siliciclastics are light gray, tan, brown to black, unconsolidated to poorly consolidated, clean to clayey, silty, unfossiliferous, variably organic-bearing sands to blue green to olive green, poorly to moderately consolidated, sandy, silty clays. These surficial deposits vary in depth but generally extend to depths of approximately 10 to 40 feet below the surface.</p> <p>The surficial siliciclastic deposits are typically underlain by the Miocene Hawthorn Group, Arcadia Formation, Tampa Member deposits (That) in the area. The Tampa Member sediments are typically limestone with subordinate dolostone, sand and clay. The limestone in the Tampa Member is a white to yellowish gray, fossiliferous and variably sandy and clayey mudstone, wackestone and packstone with minor to no phosphate grains.</p>

SUMMARY OF PHYSICAL SETTING SOURCES

PHYSICAL SETTING INFORMATION FOR THE SUBJECT PROPERTY & VICINITY	
	The Oligocene Suwannee Limestone (Ts) generally lies below the Hawthorn Group sediments in the region. The Suwannee Limestone generally consists of a white to cream, poorly to well indurated, fossiliferous limestone. In Hillsborough County the Suwannee Limestone is generally found at depths greater than 150 feet below the land surface.
Hydrogeology	The Floridan aquifer is unconfined to semi-confined in Hillsborough County. The Floridan aquifer system consists of the Upper and Lower Floridan aquifers separated by the middle confining unit. The middle confining unit and the Lower Floridan aquifer in west-central Florida generally contain highly mineralized water. The water-bearing units containing fresh water are herein referred to as the Upper Floridan aquifer. The Upper Floridan aquifer is the principal source of water in the Southwest Florida Water Management District (SWFWMD) and is used for major public supply, domestic use, irrigation, and brackish water desalination in coastal communities (SWFWMD 2000).
Groundwater Direction	<p>It should be noted that groundwater flow direction can be influenced by factors, such as surface topography, underground structures, tidal influences, seasonal fluctuations, soil and bedrock geology, and production wells, which were not considered in this interpretation. Therefore, actual groundwater flow direction can only be determined conclusively by using groundwater wells or piezometers and collection of depth-to-water and surface elevation measurements.</p> <p>Based on a review of groundwater well information from the regulatory review and site reconnaissance, groundwater wells do not appear to be located on the subject property. Groundwater flow direction at the subject property may vary but is estimated to be generally towards the south based on topography. The depth to groundwater is estimated to be approximately 5 to 10 feet below ground surface (bgs).</p>
Site-Specific Geology Characteristics	
Site-Specific Geology	Site-specific geology was not obtained as part of this Phase I ESA.

3.0 USER-PROVIDED INFORMATION

3.1 General

The ASTM Standard defines a User as “the party seeking to use Practice E1527 to complete an environmental site assessment. A User may include, without limitation: a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.” The User has specific obligations for completing a successful application of this practice as outlined in Section 6 of the ASTM Standard Practice E1527-21.

A User Questionnaire was provided to Baldwin-Howell Properties LLC by UES. The following responses were provided by Jordan Farrales with Baldwin-Howell Properties LLC. A copy of the completed User Questionnaire is included in **Appendix D**.

SUMMARY OF USER QUESTIONNAIRE RESPONSES

QUESTION	RESPONSE
As the User, are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?	No
As the User, are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?	No
As the User, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
Does the purchase price for this property reasonably reflect the fair market value of the property?	Yes
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	N/A
As the User of this ESA, are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?	No
Do you know the past uses of the property?	No
Do you know of specific chemicals that are present or once were present at the property?	No
Do you know of spills or other chemical releases that have taken place at the property?	No
Do you know of any environmental cleanups that have taken place at the property?	No
As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	No

3.2 Reason for Performing Phase I ESA

UES was contracted to perform this Phase I ESA in order for the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser defense to CERCLA liability and due diligence.

3.3 Title Records

UES did not acquire a chain-of-title for the subject property, nor was one provided to UES during this assessment. Chain-of-title records typically contain information regarding historical site ownership. UES

reviewed property deeds available on the HillsboroughCounty property appraiser website, which are included in **Appendix E**. UES did not identify any RECs in connection with the available title records for the subject property.

3.4 Environmental Liens or Activity Lane Use Limitations

Information was not provided to UES pertaining to potential environmental liens or activity and use limitations associated within the subject property. Information pertaining to potential environmental liens or activity and use limitations on the subject property that are filed or recorded under federal, tribal, state, or local laws was not supplied by the User. Please note that an environmental lien search was not performed for the subject property. In accordance with ASTM E1527-21, it is the responsibility of the User of this report to confirm that there are no environmental liens or activity and use limitations filed for the subject property. In the event that environmental liens or activity and use limitations are identified, please contact UES for further evaluation.

4.0 SUBJECT PROPERTY HISTORY & HISTORICAL LAND USE

A historical assessment of the subject property and surrounding area was performed through search and review of available historical resources including aerial photographs, topographic maps, Sanborn® fire insurance maps, city directory records, and county records. The purpose of the historical assessment was to identify previous land uses of the subject property and surrounding area that may have impacted the property in the past. A summary of our historical assessment is presented in following sections of this report.

Historical Summary – Subject Property

The subject property was used as a citrus grove from as early as 1938 to the early 1970s. The citrus grove became diminished in the 1970s and the subject property has remained vacant land from the 1970s to present. A billboard was placed on the subject property in the early 1970s and an access drive was built in 1999.

Based on the historical review, no evidence of structures, storage areas, or mixing areas on the subject property were identified during its use as a citrus grove. Although citrus grove use is recognized as a possible source of contamination, UES assumes that pesticides and other agricultural chemicals were properly applied in accordance with state and federal regulations. No evidence was identified to indicate misuse of chemicals or any spills.

Historical Summary – Adjoining Properties

The historical uses of the adjoining parcels consisted of the following.

HISTORY OF ADJOINING PARCELS

DIRECTION	ADDRESS	HISTORICAL USES
North	No Address	This property was vacant land from 1938 to the late 1950s. This property was used as a borrow pit in the 1960s and became a pond by the 1970s. This property is currently a pond with vacant land.
East	15302 Nebraska Ave.	This property was pasture from 1938 to the 1940s. Citrus groves and dwellings existed on this property in the 1950s. Interstate 275 replaced the former citrus grove and dwelling in the 1960s and the current Walmart superstore was built in 2014.
West	400 E. Bearss Ave.	This property was used as a citrus grove from 1938 to the late 1960s. The current motel was built in 1974 and replaced the citrus groves.
Southeast	408 E. Bearss Ave. (former 402 E. Bearss Ave.)	This property was used as a citrus grove from 1938 to the late 1950s. A gas station existed on this property from 1967 to 1990. This property was vacant from 1991 to 1998 and the current IHOP restaurant was built in 1999.
South	301 E. Bearss Ave.	This property was vacant land or pasture from 1938 to the early 1960s. The current gas station was built in 1967.
South	401 E. Bearss Ave.	This property was vacant land or pasture from 1938 to the late 1950s. A gas station existed on this property from the late 1960s to the 1980s. The current retail store was built in 1988 and was occupied by a Wendy's fast food restaurant from 1988 to around 2000, a restaurant in 2004, and Calypso Dive from around 2010 to present.

4.1 Historical Aerial Photographs

In order to evaluate the previous land uses of the subject property and vicinity, a series of historical aerial photographs was reviewed to provide a progressive historical overview. UES reviewed aerial photographs from University of Florida Digital Collections, Florida Department of Transportation Aerial Photo Look-Up System, and Google Earth. Descriptions of UES' observations are outlined in the table below. Copies of the aerial photographs reviewed are provided in **Appendix F**.

HISTORICAL AERIAL PHOTOGRAPHS SUMMARY

YEAR	SUBJECT PROPERTY	VICINITY
1938	The subject property is developed with a citrus grove.	The vicinity of the subject property consists of citrus groves, dwellings, and pasture or vacant land. A road (E. Bearss Ave.) borders the south side of the subject property.
1947	The subject property has not changed significantly since the previous aerial photograph.	A dwelling has been built to the southeast of the subject property.
1957	The subject property has not changed significantly since the previous aerial photograph.	A citrus grove has been developed on the east adjoining property.
1968	The subject property has not changed significantly since the previous aerial photograph.	The I-275 Bearss Avenue off-ramp has been constructed east of the subject property and

HISTORICAL AERIAL PHOTOGRAPHS SUMMARY

YEAR	SUBJECT PROPERTY	VICINITY
		replaced the former dwelling and citrus grove. A borrow pit is present on the north adjoining property. Gas stations exist on the southeast and south adjoining properties.
1975	The citrus grove on the subject property is slightly diminished. A billboard is present on the southeastern corner.	The citrus grove on the west adjoining property is has been replaced by the current motel.
1980	The former citrus has diminished and the subject property is vacant land.	The adjoining properties have not changed significantly since the previous aerial photograph.
1987	The subject property is vacant land.	The adjoining properties have not changed significantly since the previous aerial photograph.
1995	The subject property has not changed significantly since the previous aerial photograph.	The former gas station on the southeast adjoining property has been removed and the property is vacant land.
2002	An access drive connected to the southeast adjoining property exists on the south side of the subject property.	A current restaurant (IHOP) and cell tower have been constructed on the southeast adjoining property.
2008	The subject property has not changed significantly since the previous aerial photograph.	The adjoining properties have not changed significantly since the previous aerial photograph.
2013	The subject property has not changed significantly since the previous aerial photograph.	The adjoining properties have not changed significantly since the previous aerial photograph.
2018	The subject property has not changed significantly since the previous aerial photograph.	The current Walmart superstore has been built to the east of the subject property.
2023	The northern half of the subject property is completely wooded and the subject property is vacant land.	The vicinity of the subject property has not changed significantly since the previous aerial photograph.

4.2 Topographic Map Review

UES obtained historical topographic maps from EDR in order to evaluate the previous land uses of the subject property and surrounding area to provide a progressive historical overview. Descriptions of UES' observations are outlined in the table below. Copies of the historical topographic maps reviewed are provided in **Appendix G**.

HISTORICAL TOPOGRAPHIC MAPS SUMMARY

YEAR	DESCRIPTION
1944	A citrus grove is depicted on the subject property. The vicinity of the subject property consists of citrus groves, vacant land or pasture, lakes, ponds, and dwellings.
1945	The subject property and vicinity have not changed significantly from the previous topographic map.

YEAR	DESCRIPTION
1949	The subject property and vicinity have not changed significantly from the previous topographic map.
1956	The subject property and vicinity have not changed significantly from the previous topographic map.
1969	A citrus grove is depicted on the subject property. A borrow pit is shown on the north adjoining property, a citrus grove is shown on the west adjoining property, a gas station is shown on the southeast adjoining property, and commercial structures are shown on the south adjoining properties. Interstate 275 borders the east side of the subject property.
1981	The subject property has not changed significantly from the previous topographic map. A motel is shown on the west adjoining property.
1987	The subject property is depicted as vacant land. The adjoining properties have not changed significantly since the previous topographic map.
1995	The subject property has not changed significantly from the previous topographic map. The southeast adjoining property is shown as vacant land, a motel is shown on the west adjoining property a pond is shown on the north adjoining property, and the south adjoining properties are depicted as built-up land.
2012	No landmark features are shown on the subject property. Ponds are shown on the north and east adjoining properties.
2015	No landmark features are shown on the subject property. A pond is shown on the north adjoining property.
2018	No landmark features are shown on the subject property. A pond is shown on the north adjoining property.

4.3 Fire Insurance Map Review

Fire insurance maps generated by the Sanborn® Map Company were requested for the subject property and vicinity. According to EDR, no coverage of the subject property was available. A Certified Sanborn® Map Report is provided in **Appendix H**.

4.4 Street Directory Listings

EDR was contracted by UES to provide available historical street directory information for the subject property and vicinity. Results of our review are summarized in the table below. Additional information is provided in the Street Directory Report in **Appendix I**.

STREET DIRECTORY SUMMARY

YEAR	SUBJECT PROPERTY	VICINITY
2020	No listings	301 E Bearss Ave: ATM 401 E Bearss Ave: CALYPSO DIVERS INC 400 E Bearss Ave: TAMPA REFORMED BAPTIST CHURCH 408 E Bearss Ave: IHOP RESTAURANT

4.5 County Property Appraiser’s Office

According to the Hillsborough County Property Appraiser’s Office, the subject property is identified as Parcel ID U-36-27-18-ZZZ-000000-75720.0. The subject property’s land use code is 1000 Vacant Commercial.

The current property owner is Naryan Associates, which has owned the property since 1991, and the previous owner was GSF Properties, Inc. Ownership records prior to 1991 were not provided in the information available for review.

4.6 Previous ESA Activities

Previous reports prepared for the subject property were not provided by the User and were not identified in the public records reviewed within the scope of this report.

5.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs in connection with the subject property. Accuracy and completeness of record information varies among information sources. Record information is often inaccurate or incomplete. Standard sources that are reasonably ascertainable were reviewed by UES for this Phase I ESA. EDR was contracted to provide records from federal, state, and local environmental databases for regulatory sites located within the Approximate Minimum Search Distances as specified in ASTM E1527-21.

The Radius Map Report is provided in **Appendix J**. Included within the report are summaries of the regulatory databases reviewed, a listing of sites identified within the search radius, detailed data on identified sites, and maps showing the locations of facilities reported to have had regulatory action.

UES also reviewed the "unmappable" (commonly referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings

that could not be plotted with confidence but are potentially in the general area of the property, based on the partial street address, city, or zip code. Any unmappable site that was identified by UES as being within the approximate minimum search distance from the subject property, based on site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section.

Detailed information for selected sites is provided in the following section, along with opinions about the significance of the listing to the analysis of RECs in connection with the subject property.

Minimum Search Distances - ASTM E1527-21

Source	Search Distance
Federal NPL Site List (National Priorities List)	1.0 mile
Federal Delisted NPL Site List	0.5 mile
Federal CERCLIS List (Comprehensive Environmental Response Compensation and Liability Act of 1980) / Superfund Enterprise Management System (SEMS)	0.5 mile
Federal CERCLIS NFRAP Site List /SEMS Archive List	0.5 mile
Federal RCRA CORRACTS Facilities List (Resource Conservation and Recovery Act)	1.0 mile
Federal RCRA non-CORRACTS TSD Facilities List	0.5 mile
Federal RCRA Generators List	subject property & adjoining parcels
Federal Institutional Control/Engineering Control Registries	subject property only
Federal ERNS List (Emergency Response Notification System)	subject property only
States and Tribal Lists of Hazardous Waste Sites identified for investigation or remediation:	
State- and Tribal-equivalent NPL	1.0 mile
State- and Tribal-equivalent SEMS	0.5 mile
State and Tribal Landfill and/or Solid Waste Disposal Site Lists	0.5 mile
State and Tribal Leaking Storage Tanks Lists	0.5 mile
State and Tribal Registered Storage Tank Lists	subject property & adjoining parcels
State and Tribal Institutional Control/Engineering Control Registries	subject property only
State and Tribal Voluntary Cleanup Sites	0.5 mile
State and Tribal Brownfield Sites	0.5 mile

Subject Property Regulatory Findings

The subject property was not identified as a record in the databases searched by EDR.

Surrounding Property Regulatory Findings

The sites identified in the EDR Radius Map Report were reviewed. The sites were reviewed for criteria including location at a distance and/or direction that should not impact the subject property; locations that are considered likely to be hydrologically down-gradient from, or cross gradient to, the subject property; have had no reported releases; have had no reported violations of hazardous waste regulations; have received regulatory closure; and/or were not identified as a standard environmental record per ASTM. Unless noted below, the sites were not researched further as they are considered unlikely to have caused environmental impacts to the subject property and are not a REC.

The following facilities located within the minimum search distance referenced in the table above were identified as environmentally significant based on the review criteria and required further evaluation and discussion.

NAME/FACILITY ID	Bearss Plaza Cleaners (McNatts Cleaners) / ERIC_4695
ADDRESS	14946 N Florida Avenue
DISTANCE/DIRECTION	0.26 mi SW
HYDROLOGIC POSITION	Down-gradient
DATABASES LISTED	Priority Cleaners
DISCUSSION	According to a 1996 Site Screening Report, PCE was detected in soil at 4 feet below surface at a concentration of 0.84 mg/kg. No additional assessment or remediation has been reported. This site is eligible for cleanup under the Florida Drycleaning Solvent Cleanup Program with a score of 63. Based on distance and direction from the subject property, this site is not considered a REC.

NAME/FACILITY ID	Premier Cleaners / ERIC_4771
ADDRESS	14837 N Florida Avenue
DISTANCE/DIRECTION	0.36 mi SW
HYDROLOGIC POSITION	Down-gradient
DATABASES LISTED	Priority Cleaners
DISCUSSION	According to a 1998 Site Screening Report, PCE was detected in soil at groundwater at a concentration of 3.0 ug/L. No additional assessment or remediation has been reported. This site is eligible for cleanup under the Florida Drycleaning Solvent Cleanup Program with a score of 73. Based on distance and direction from the subject property, this site is not considered a REC.

The regulatory database search was also reviewed for sites that could not be mapped due to insufficient address information. UES reviewed these sites and determined that the sites are at a distance and/or direction that should not impact the subject property; are at locations that are considered likely to be hydrologically down-gradient from, or cross gradient to, the subject property; have had no reported releases; have had no reported violations of hazardous waste regulations; and/or have received regulatory closure. As applicable, no unmapped sites are a REC to the subject property.

5.1 Division of Environmental Protection

UES reviewed documents via online public records on the Florida Department of Environmental Protection (FDEP) Consolidated OCULUS Electronic Document Management System for nearby facilities that could potentially impact the subject property. The reviewed documents did not indicate RECs in connection with the subject property.

5.2 Other Environmental Records

No additional environmental records were reviewed during completion of this assessment.

5.3 Vapor Encroachment Screening

UES conducted a Vapor Encroachment Screen (VES) in accordance with the 2022 ASTM Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E2600-22). The VES investigation used available information and professional judgment to derive our conclusions. The goal of the VES investigation was to identify the potential for vapors from hazardous substances and petroleum releases to reach the subject property. ASTM E2600-22 defines the term Vapor Encroachment Condition (VEC) as the presence or likely presence of chemical of concern (COC) vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater on or near the subject property as identified by Tier 1 or Tier 2 procedures. The AOC for the purpose of this VES is 1/3 mile (1,760 feet) for COC and 1/10 mile (528 feet) for petroleum hydrocarbon COC. The approximate minimum search distances for Federal, Tribal and State-listed facilities surrounding the subject property are presented in the table below.

Default Approximate MSDs Surrounding the Subject Property (ASTM E2600-22)

SOURCE	COC	PETROLEUM HYDROCARBON COC
Federal NPL Site List	1/3 mile	1/10 mile
Federal SEMS List	1/3 mile	1/10 mile
Federal RCRA CORRACTS Facilities List	1/3 mile	1/10 mile
Federal RCRA Non-CORRACTS TSD Facilities List	1/3 mile	1/10 mile
Federal RCRA Generators List	Subject property only	Subject property only
Federal Institutional Control/Engineering Control Registries	Subject property only	Subject property only
Federal ERNS List	Subject property only	Subject property only
State and Tribal Equivalent NPL	1/3 mile	1/10 mile
State and Tribal Equivalent SEMS	1/3 mile	1/10 mile
State and Tribal Landfill and/or Solid Waste Disposal Site Lists	1/3 mile	1/10 mile
State and Tribal Leaking UST/AST Lists	1/3 mile	1/10 mile
State and Tribal UST/AST Lists	Subject property only	Subject property only
State and Tribal Institutional Control/Engineering Control Registries	Subject property only	Subject property only
State and Tribal Voluntary Cleanup Sites	1/3 mile	1/10 mile
State and Tribal Brownfield Sites	1/3 mile	1/10 mile

5.3.1 Tier 1 Screening

The purpose of Tier 1 is to conduct a screen for vapor encroachment using information collected in the Phase I ESA or similar type of investigation to determine if a VEC exists at the subject property. The default AOCs may be expanded or reduced by the environmental professional using experience and professional judgment with considerations including groundwater flow direction, subsurface characteristics, surficial features and man-made features.

The following sites were identified by EDR within the MSD surrounding the subject property. UES reviewed the sites to evaluate their potential to create a VEC based on criteria including the presence of contaminants of concern (COC), distance, estimated hydrologic gradient, and/or type of COC for vapor migration to the subject property.

SITE NAME	DATABASE / DISTANCE	DEFAULT AOC	TIER 1 VEC DETERMINATION
McNatts Cleaners	Priority Cleaners / 0.23 mi	0.33 mi	Yes
Premier Cleaners	Priority Cleaners / 0.36 mi	0.33 mi	No

McNatts Cleaners was determined to be within the default AOC based on the Tier 1 VES. Therefore, UES conducted a non-invasive Tier 2 VES.

5.3.2 Non-Invasive Tier 2 Screening

Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to provide greater certainty to whether or not a VEC exists. The objective of the non-invasive component of the Tier 2 screen is to identify from existing available information in regulatory agency files and/or from other available information the status of remediation, the size of the contaminated plume and its behavior, the specific COC and their respective concentrations to perform a plume test for comparison to the critical distance. If information related to the boundaries of the contaminated plume from known contaminated properties is available, the critical distance test can be conducted. The critical distance is the lineal distance in any direction between the nearest edge of the contaminated plume and the nearest subject property boundary, and is equal to 100 feet for COC or 30 feet for dissolved petroleum hydrocarbon COC. The critical distance for petroleum hydrocarbon COC as LNAPL is the same as for nonpetroleum hydrocarbon COC (100 feet).

SITE NAME	PLUME DISTANCE	CRITICAL DISTANCE	VEC
McNatts Cleaners	0.23 mi	100 feet	No

6.0 SITE RECONNAISSANCE

6.1 Subject Property Description & Current Use

At the time of UES's assessment, the subject property consisted of vacant commercial land with woods on the northern portion, an access drive on the southern portion, and a billboard on the southeastern corner. The subject property's vicinity consists of a motel, a municipal pond (former borrow pit), a

restaurant, gas stations, retail stores, and residential houses. Refer to the Site Location Map in **Appendix A** and the Site Plan in **Appendix B** for additional details pertaining to the subject and surrounding properties.

There are currently no buildings on the subject property. A billboard was observed on the southeast corner of the subject property.

PROPERTY CHARACTERISTICS	
Landscaped Areas	No
Roads / Parking Lots	No
Surface Water/Stormwater Retention	No
Other Improvements	No

UTILITIES	
Potable Water	None observed
Wastewater Service	None observed
Stormwater	None observed
Electricity	None observed
Natural Gas/Propane	None observed

6.2 Methodology

Reconnaissance included walking accessible portions of the subject property and site perimeter. This visual observation of the subject property focused primarily on its surface features. Adjoining properties were observed from curbside. The purpose was to evaluate the current conditions of the subject property and to obtain information indicating the likelihood of identifying RECs in connection with the subject property. Property use and significant features are indicated on the Site Plan presented as **Appendix B**. Representative site photographs of the subject property and adjoining parcels are included in **Appendix K**.

SITE RECONNAISSANCE INFORMATION

Inspector	Zane Pierson
Reconnaissance Date	June 2, 2023
Site Contact	Unescorted
Limitations Encountered	None

6.3 Observations During Reconnaissance

Accessible portions of the subject property were walked and observed for the presence of RECs. Findings during reconnaissance are provided in the below table.

SITE RECONNAISSANCE SUMMARY

ITEM	OBSERVED?	COMMENTS
Limiting Conditions	No	
Potable Water Supply/Source	No	
Sewage Disposal System	No	
Current Tenant Operations	No	
Past Tenant Operations	No	
Hazardous Substances and Petroleum Products in Connection with Identified Uses	No	
Storage Tanks <i>(Includes aboveground storage tanks, or underground storage tanks, vent pipes, fill pipes, or access ways indicating underground storage tanks at the subject property)</i>	No	
Strong, Pungent, or Noxious Odors	No	
Drums, Totes, and Intermediate Bulk Containers	No	
Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances of Petroleum Products	No	
Hazardous Substances and Petroleum Products Containers Not in Connection with Identified Uses	No	
Unidentified Substance Containers	No	
PCB-Containing Items <i>(Electrical or hydraulic equipment known to contain PCBs or likely to contain PCBs. Fluorescent light ballasts, caulk, paint, or other materials that may contain PCBs, and are located inside and are part of the building or structure, are outside the scope of this assessment.)</i>	No	
Heating/Cooling Systems <i>(The means of heating and cooling the building(s) on the subject property, including the fuel source)</i>	No	
Stains or Corrosion on Floors, Walls, or Ceilings <i>(except for staining from water)</i>	No	
Drains and Sumps	No	
Pits, Ponds, or Lagoons <i>(Manmade or natural depressions in a ground surface that are likely to hold liquids or sludge containing hazardous substances or petroleum products)</i>	No	
Stained Soil or Pavement	No	
Stressed Vegetation	No	

SITE RECONNAISSANCE SUMMARY

ITEM	OBSERVED?	COMMENTS
<i>(From something other than insufficient water)</i>		
Solid Waste <i>(Areas that are apparently graded by non-natural causes or filled with fill of unknown origin suggesting trash, construction debris, demolition debris, or other solid waste disposal; and mounds or depressions suggesting trash or other solid waste disposal)</i>	Yes	UES observed at least ten waste tires and a vagrant camp with miscellaneous trash on the subject property. UES recommends proper disposal of the waste tires and miscellaneous trash.
Waste/Wastewater <i>(Wastewater or other liquid, including stormwater, discharged from or to the subject property)</i>	No	
Wells <i>(Including dry wells, irrigation wells, injection wells, monitoring wells, abandoned wells, or other wells)</i>	Yes	A private water well was observed within a fenced compound adjacent to the northwest corner of the subject property. According to records provided in EDR, this is an irrigation well. The well was installed during construction of the adjacent motel.
Septic Systems or Cesspools	No	
Other Notable Features	No	

6.4 Adjoining Properties

During site reconnaissance, properties adjoining the subject property were observed from the subject property boundaries or from curbside for possible sources of impacts or environmental impairment which could potentially migrate to the subject property via surface water runoff, groundwater transport, or other pathways. The subject property is bordered by the following:

CURRENT USE OF ADJOINING PARCELS

DIRECTION	ADDRESS	DESCRIPTION
North	No address	Vacant municipal land with pond
West	400 E Bearss Avenue	The Parc Micro Suites (motel)
South	408 E Bearss Avenue	IHOP (restaurant)
South	301 E Bearss Avenue	Exxon (Convenience store/gas station)
South	401 E Bearss Avenue	Calypso (SCUBA dive store)
East	15302 Nebraska Avenue	Superstore (Walmart)

Reconnaissance of the publicly accessible portions of the properties located immediately adjoining to the subject property did not reveal visible evidence of environmental concerns which could potentially impact the subject property.

7.0 INTERVIEWS

7.1 Owner Interview

A questionnaire was provided to Jordan Farrales with Baldwin Howell Properties by UES. The questionnaire was completed by Suresh Saraswat with Narayan Associates, who is identified as Owner of the subject property. The questionnaire was intended to gather information from the current owner regarding past usage of the subject property and its vicinity. Responses provided indicate that the representative was not aware of potential environmental concerns associated with the subject property or adjoining properties. The completed questionnaire is provided in **Appendix D**.

Also, the following statement was provided via email by Terry Hatfield, broker with CMAX Realty and HotelMax Realty:

“As the report indicates, Narayan Associates have been the owners of the subject property since 1991. Narayan Associates have no knowledge of the condition or use of the subject property prior to their date of purchase and since the date of their ownership, have no knowledge of any related environmental issues, including clean-ups, chemical spills, insecticides applications, etc. The property has been a "vacant lot" since their purchase date and was not used by Narayan Associates for any other purpose during their ownership period and as such, Narayan Associates assume no responsibility for the condition or use of the property moving forward.”

7.2 State and Local Agency Interviews

As part of this Phase I Environmental Site Assessment, interviews were conducted to obtain information indicating recognized environmental conditions in connection with the subject property. The following persons or agencies were contacted for interviews in an effort to obtain information regarding the subject property. The interview documentation is provided in **Appendix D**. As per ASTM E1527-21 Section 11.5.1, a reasonable attempt shall be made to interview at least one staff member of any one of the following types of state and/or local government agencies:

Represents	Interviewed		Name & Title	Comments
	Yes	No		
Federal Government Agency	<input checked="" type="checkbox"/>	<input type="checkbox"/>	USEPA	According to public records search, there are no records for the subject property.
State and/or local agency or local/ regional office of state agency having jurisdiction over <i>hazardous waste</i> disposal or other environmental matters	<input checked="" type="checkbox"/>	<input type="checkbox"/>	FDEP	Based on review of FDEP’s online OCULUS website, additional regulatory records pertaining to the subject property were not identified.
State and/or local health agency or local/regional office of state health agency	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Florida Department of Health	A request for records pertaining to the subject property was made by UES. At the time of this report, we have not received a response.

Represents	Interviewed		Name & Title	Comments
	Yes	No		
Local fire department	<input checked="" type="checkbox"/>	<input type="checkbox"/>	City of Tampa	A request for records pertaining to the subject property was made by UES. At the time of this report, we have not received a response.
Local agencies responsible for the issuance of building permits or groundwater use permits that document the presence of AULs	<input type="checkbox"/>	<input checked="" type="checkbox"/>		

7.3 Other Interviews (Key Site Manager, Occupants, Past Owners, etc.)

UES did not conduct any additional interviews during completion of this assessment.

8.0 FINDINGS & OPINIONS

8.1 General Findings

- The subject property is comprised of approximately 2.43 acres of vacant commercial land. The northern portion of the subject property is wooded. A road is present on the southern portion and a billboard is present on the southeastern corner.
- The subject property was used as a citrus grove from as early as 1938 to the early 1970s. The citrus grove became diminished in the 1970s and the subject property has remained vacant land from the 1970s to present. A billboard was placed on the subject property in the early 1970s and an access drive was built in 1999.
- The subject property was not identified in the regulatory databases searched by EDR.
- Cleanup has been satisfactorily completed for prior petroleum releases at former gas stations on the one southeast and two south adjoining properties.

8.2 Recognized Environmental Conditions

No recognized environmental conditions were identified in connection with the subject property.

8.3 Controlled Recognized Environmental Conditions

No controlled recognized environmental conditions were identified in connection with the subject property.

8.4 Vapor Encroachment Conditions

No vapor encroachment conditions were identified in connection with the subject property.

8.5 Historical Recognized Environmental Conditions

No historical recognized environmental conditions were identified in connection with the subject property.

8.6 Business Environmental Risk

The former citrus grove on the subject property is considered to be a Business Environmental Risk.

Citrus grove operations include the use of agricultural compounds and long-term application of agricultural compounds may persist in the soil above the recommended exposure levels established by the Florida Department of Environmental Protection (FDEP). Therefore, although not a recognized environmental condition, it may be prudent to complete soil sampling to determine if agricultural compounds are present in concentrations that exceed the State of Florida cleanup criteria prior to any future redevelopment.

8.7 Data Gaps

ASTM E1527-21 defines a "Data Gap" as a lack of, or inability to obtain, information despite good faith efforts to gather such information which may affect findings of the Phase I ESA. The Environmental Professional is to identify "significant" Data Gaps in the Phase I ESA process, while "insignificant" Data Gaps are not required to be included in this evaluation. For both the ASTM Standard and the AAI Final Rule, the Environmental Professional must identify what was done to address the Data Gap. The Environmental Professional should provide an opinion regarding appropriate further investigations, if any, necessary to address Data Gaps. A Phase I ESA which includes Data Gaps is still considered as compliant with the Standard and the AAI Final Rule, so long as Data Gaps are addressed as outlined above. The following data gaps were encountered during the course of this Phase I ESA:

The environmental liens and activity and use limitations records were not provided to UES for review during this Phase I ESA. However, the User should obtain these records to be compliant with the ASTM Standard Practice E 1527-13 and be afforded CERCLA protection for this assessment. If the USER does not obtain these records, this data gap could be considered significant to the findings of this assessment.

9.0 CONCLUSIONS

UES has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the 2.43-acre vacant commercial property addressed at 406 E. Bearss Avenue in Tampa, Hillsborough County, Florida. Any exceptions to, or deletions from, this practice are described in Sections 1, 10.0 and 11.0 of this report.

This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

The former citrus grove on the subject property is considered to be a Business Environmental Risk.

The conclusions presented above are based upon the agreed scope of work outlined in the above report. UES makes no warranties or guarantees as to the accuracy or completeness of information obtained from others. It is possible that information exists beyond the scope of this investigation. Additional information,

which is not available to UES at the time of writing the report, may result in a modification of the conclusions and recommendations presented. The services performed by UES have been conducted in a manner consistent with the level of care ordinarily exercised by members of our profession currently practicing under similar conditions. This report is not a legal opinion, but may under certain circumstances be prepared at the direction of counsel, may be in anticipation of litigation, and may be classified as an attorney-client communication or as an attorney work product.

This report has been prepared for the sole use of the addressee of this report, and cannot be released without consent from UES. If a third party relies on the information provided in this report, UES accepts no responsibility for damages suffered by the third party as a result of reliance of information contained in this report, and that nothing contained in this report shall create a contractual relationship or cause the third party to bring suit against UES.

10.0 DEVIATIONS

UES has performed a Phase I Environmental Site Assessment for the subject property in conformance with the scope and limitations of ASTM Practice. To the best of our knowledge, there have been no deviations from the ASTM E1527-21 standard.

11.0 OUT-OF-SCOPE SERVICES

No additional services were requested by the User or conducted by UES in connection with the subject property. Additional services can be provided upon request.

12.0 ADDITIONAL INVESTIGATION

As required in ASTM E1527-21, the environmental professional should provide an opinion regarding additional appropriate investigation, if any, to detect the presence of hazardous substances or petroleum products. This opinion is not intended to constitute a requirement that the environmental professional include any recommendations for Phase II or other assessment activities. Accordingly, any opinions expressed herein do not necessarily constitute a recommendation for further investigation. UES can discuss recommendations for any additional investigation or evaluations outside of the context of this report, upon request.

13.0 QUALIFICATIONS

Resumes of the environmental professionals associated with this Phase I ESA are included in **Appendix L**.

14.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our knowledge and belief, this Phase I ESA has been prepared and reviewed under the guidance of professionals meeting the definition of Environmental Professional (EP) as defined in 312.10 of 40 CFR 312. UES' EPs possess the specific qualifications based on education, training, and

experience to assess the nature, history, and setting of the subject property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDIX C

UES

GENERAL CONDITIONS

SECTION 1: RESPONSIBILITIES **1.1** *Universal Engineering Sciences, LLC* and its subsidiaries and affiliated companies ("UES"), is responsible for providing the services described under the Scope of Services. The term "UES" as used herein includes all of UES's agents, employees, professional staff, and subcontractors. **1.2** The Client or a duly authorized representative is responsible for providing UES with a clear understanding of the project nature and scope. The Client shall supply UES with sufficient and adequate information, including, but not limited to, maps, site plans, reports, surveys, plans and specifications, and designs, to allow UES to properly complete the specified services. The Client shall also communicate changes in the nature and scope of the project as soon as possible during performance of the work so that the changes can be incorporated into the work product. **1.3** The Client acknowledges that UES's responsibilities in providing the services described under the Scope of Services section is limited to those services described therein, and the Client hereby assumes any collateral or affiliated duties necessitated by or for those services. Such duties may include, but are not limited to, reporting requirements imposed by any third party such as federal, state, or local entities, the provision of any required notices to any third party, or the securing of necessary permits or permissions from any third parties required for UES's provision of the services so described, unless otherwise agreed upon by both parties in writing.

SECTION 2: STANDARD OF CARE **2.1** Services performed by UES under this Agreement will be conducted in a manner consistent with the level of care and skill ordinarily exercised by members of UES's profession practicing contemporaneously under similar conditions in the locality of the project. No other warranty, express or implied, is made. **2.2** Execution of this document by UES is not a representation that UES has visited the site, become generally familiar with local conditions under which the work is to be performed, or correlated personal observations with the requirements of the Scope of Services. It is the Client's responsibility to provide UES with all information necessary for UES to provide the services described under the Scope of Services, and the Client assumes all liability for information not provided to UES that may affect the quality or sufficiency of the services so described.

SECTION 3: SITE ACCESS AND SITE CONDITIONS **3.1** Client will grant or obtain free access to the site for all equipment and personnel necessary for UES to perform the work set forth in this Agreement. The Client will notify any possessors of the project site that Client has granted UES free access to the site. UES will take reasonable precautions to minimize damage to the site, but it is understood by Client that, in the normal course of work, some damage may occur, and the correction of such damage is not part of this Agreement unless so specified in the Scope of Services. **3.2** The Client is responsible for the accuracy of locations for all subterranean structures and utilities. UES will take reasonable precautions to avoid known subterranean structures, and the Client waives any claim against UES, and agrees to defend, indemnify, and hold UES harmless from any claim or liability for injury or loss, including costs of defense, arising from damage done to subterranean structures and utilities not identified or accurately located. In addition, Client agrees to compensate UES for any time spent or expenses incurred by UES in defense of any such claim with compensation to be based upon UES's prevailing fee schedule and expense reimbursement policy.

SECTION 4: BILLING AND PAYMENT **4.1** UES will submit invoices to Client monthly or upon completion of services. Invoices will show charges for different personnel and expense classifications. **4.2** Payment is due 30 days after presentation of invoice and is past due 31 days from invoice date. Client agrees to pay a finance charge of one and one-half percent (1 ½ %) per month, or the maximum rate allowed by law, on past due accounts. **4.3** If UES incurs any expenses to collect overdue billings on invoices, the sums paid by UES for reasonable attorneys' fees, court costs, UES's time, UES's expenses, and interest will be due and owing by the Client.

SECTION 5: OWNERSHIP AND USE OF DOCUMENTS **5.1** All reports, boring logs, field data, field notes, laboratory test data, calculations, estimates, and other documents prepared by UES, as instruments of service, shall remain the property of UES. Neither Client nor any other entity shall change or modify UES's instruments of service. **5.2** Client agrees that all reports and other work furnished to the Client or his agents, which are not paid for, will be returned upon demand and will not be used by the Client for any purpose. **5.3** UES will retain all pertinent records relating to the services performed for a period of five years following submission of the report or completion of the Scope of Services, during which period the records will be made available to the Client in a reasonable time and manner. **5.4** All reports, boring logs, field data, field notes, laboratory test data, calculations, estimates, and other documents prepared by UES, are prepared for the sole and exclusive use of Client, and may not be given to any other entity, or used or relied upon by any other entity, without the express written consent of UES. Client is the only entity to which UES owes any duty or duties, in contract or tort, pursuant to or under this Agreement.

SECTION 6: DISCOVERY OF UNANTICIPATED HAZARDOUS MATERIALS **6.1** Client represents that a reasonable effort has been made to inform UES of known or suspected hazardous materials on or near the project site. **6.2** Under this agreement, the term hazardous materials include hazardous materials, hazardous wastes, hazardous substances (40 CFR 261.31, 261.32, 261.33), petroleum products, polychlorinated biphenyls, asbestos, and any other material defined by the U.S. EPA as a hazardous material. **6.3** Hazardous materials may exist at a site where there is no reason to believe they are present. The discovery of unanticipated hazardous materials constitutes a changed condition mandating a renegotiation of the scope of work. The discovery of unanticipated hazardous materials may make it necessary for UES to take immediate measures to protect health and safety. Client agrees to compensate UES for any equipment decontamination or other costs incident to the discovery of unanticipated hazardous materials. **6.4** UES will notify Client when unanticipated hazardous materials or suspected hazardous materials are encountered. Client will make any disclosures required by law to the appropriate governing agencies. Client will hold UES harmless for all consequences of disclosures made by UES which are required by governing law. In the event the project site is not owned by Client, Client it is the Client's responsibility to inform the property owner of the discovery of unanticipated hazardous materials or suspected hazardous materials. **6.5** Notwithstanding any other provision of the Agreement, Client waives any claim against UES, and to the maximum extent permitted by law, agrees to defend, indemnify, and save UES harmless from any claim, liability, and/or defense costs for injury or loss arising from UES's discovery of unanticipated hazardous materials or suspected hazardous materials including any costs created by delay of the project and any cost associated with possible reduction of the property's value. Client will be responsible for ultimate disposal of any samples secured by UES which are found to be contaminated.

SECTION 7: RISK ALLOCATION **7.1** Client agrees that UES's liability for any damage on account of any breach of contract, error, omission, or professional negligence will be limited to a sum not to exceed \$50,000 or UES's fee, whichever is greater. If Client prefers to have higher limits on contractual or professional liability, UES agrees to increase the limits up to a maximum of \$1,000,000.00 upon Client's written request at the time of accepting UES's proposal provided that Client agrees to pay an additional consideration of four percent of the total fee, or \$400.00, whichever is greater. If Client prefers a \$2,000,000.00 limit on contractual or professional liability, UES agrees to increase the limits up to a maximum of \$2,000,000.00 upon Client's written request at the time of accepting UES's proposal provided that Client agrees to pay an additional consideration of four percent of the total fee, or \$800.00, whichever is greater. The additional charge for the higher liability limits is because of the greater risk assumed and is not strictly a charge for additional professional liability insurance. **7.2** Client shall not be liable to UES and UES shall not be liable to Client for any incidental, special, or consequential damages (including lost profits, loss of use, and lost savings) incurred by either party due to the fault of the other, regardless of the nature of the fault, or whether it was committed by Client or UES, their employees, agents, or subcontractors; or whether such liability arises in breach of contract or warranty, tort (including negligence), statutory, or any other cause of action. **7.3** As used in this Agreement, the terms "claim" or "claims" mean any claim in contract, tort, or statute alleging negligence, errors, omissions, strict liability, statutory liability, breach of contract, breach of warranty, negligent misrepresentation, or any other act giving rise to liability.

SECTION 8: INSURANCE **8.1** UES represents it and its agents, staff and consultants employed by UES, is and are protected by worker's compensation insurance and that UES has such coverage under public liability and property damage insurance policies which UES deems to be adequate. Certificates for all such policies of insurance shall be provided to Client upon request in writing. Within the limits and conditions of such insurance, UES agrees to indemnify and save Client harmless from and against loss, damage, or liability arising from negligent acts by UES, its agents, staff, and consultants employed by it. UES shall not be responsible for any loss, damage or liability beyond the amounts, limits, and conditions of such insurance or the limits described in Section 7, whichever is less. The Client agrees to defend, indemnify, and save UES harmless

for loss, damage or liability arising from acts by Client, Client's agents, staff, and others employed by Client. **8.2** Under no circumstances will UES indemnify Client from or for Client's own actions, negligence, or breaches of contract. **8.3** To the extent damages are covered by property insurance, Client and UES waive all rights against each other and against the contractors, consultants, agents, and employees of the other for damages, except such rights as they may have to the proceeds of such insurance.

SECTION 9: DISPUTE RESOLUTION **9.1** All claims, disputes, and other matters in controversy between UES and Client arising out of or in any way related to this Agreement will be submitted to mediation or non-binding arbitration, before and as a condition precedent to other remedies provided by law. **9.2** If a dispute arises and that dispute is not resolved by mediation or non-binding arbitration, then: (a) the claim will be brought in the state or federal courts having jurisdiction where the UES office which provided the service is located; and (b) the prevailing party will be entitled to recovery of all reasonable costs incurred, including staff time, court costs, attorneys' fees, expert witness fees, and other claim related expenses.

SECTION 10: TERMINATION **10.1** This agreement may be terminated by either party upon seven (7) days written notice in the event of substantial failure by the other party to perform in accordance with the terms hereof, or in the case of a force majeure event such as terrorism, act of war, public health or other emergency. Such termination shall not be effective if such substantial failure or force majeure has been remedied before expiration of the period specified in the written notice. In the event of termination, UES shall be paid for services performed to the termination notice date plus reasonable termination expenses. **10.2** In the event of termination, or suspension for more than three (3) months, prior to completion of all reports contemplated by the Agreement, UES may complete such analyses and records as are necessary to complete its files and may also complete a report on the services performed to the date of notice of termination or suspension. The expense of termination or suspension shall include all direct costs of UES in completing such analyses, records, and reports.

SECTION 11: REVIEWS, INSPECTIONS, TESTING, AND OBSERVATIONS **11.1** Plan review, private provider inspections, and building inspections are performed for the purpose of observing compliance with applicable building codes. Threshold inspections are performed for the purpose of observing compliance with an approved threshold inspection plan. Construction materials testing ("CMT") is performed to document compliance of certain materials or components with applicable testing standards. UES's performance of plan reviews, private provider inspections, building inspections, threshold inspections, or CMT, or UES's presence on the site of Client's project while performing any of the foregoing activities, is not a representation or warranty by UES that Client's project is free of errors in either design or construction. **11.2** If UES is retained to provide construction monitoring or observation, UES will report to Client any observed work which, in UES's opinion, does not conform to the plans and specifications provided to UES. UES shall have no authority to reject or terminate the work of any agent or contractor of Client. No action, statements, or communications of UES, or UES's site representative, can be construed as modifying any agreement between Client and others. UES's performance of construction monitoring or observation is not a representation or warranty by UES that Client's project is free of errors in either design or construction. **11.3** Neither the activities of UES pursuant to this Agreement, nor the presence of UES or its employees, representatives, or subcontractors on the project site, shall be construed to impose upon UES any responsibility for means or methods of work performance, superintendence, sequencing of construction, or safety conditions at the project site. Client acknowledges that Client or its contractor is solely responsible for project jobsite safety. **11.4** Client is responsible for scheduling all inspections and CMT activities of UES. All testing and inspection services will be performed on a will-call basis. UES will not be responsible for tests and inspections that are not performed due to Client's failure to schedule UES's services on the project, or for any claims or damages arising from tests and inspections that are not scheduled or performed.

SECTION 12: ENVIRONMENTAL ASSESSMENTS Client acknowledges that an Environmental Site Assessment ("ESA") is conducted solely to permit UES to render a professional opinion about the likelihood or extent of regulated contaminants being present on, in, or beneath the site in question at the time services were conducted. No matter how thorough an ESA study may be, findings derived from the study are limited and UES cannot know or state for a fact that a site is unaffected by reportable quantities of regulated contaminants as a result of conducting the ESA study. Even if UES states that reportable quantities of regulated contaminants are not present, Client still bears the risk that such contaminants may be present or may migrate to the site after the ESA study is complete.

SECTION 13: SUBSURFACE EXPLORATIONS **13.1** Client acknowledges that subsurface conditions may vary from those observed at locations where borings, surveys, samples, or other explorations are made, and that site conditions may change with time. Data, interpretations, and recommendations by UES will be based solely on information available to UES at the time of service. UES is responsible for those data, interpretations, and recommendations, but will not be responsible for other parties' interpretations or use of the information developed or provided by UES. **13.2** Subsurface explorations may result in unavoidable cross-contamination of certain subsurface areas, as when a probe or boring device moves through a contaminated zone and links it to an aquifer, underground stream, or other hydrous body not previously contaminated. UES is unable to eliminate totally cross-contamination risk despite use of due care. Since subsurface explorations may be an essential element of UES's services indicated herein, Client shall, to the fullest extent permitted by law, waive any claim against UES, and indemnify, defend, and hold UES harmless from any claim or liability for injury or loss arising from cross-contamination allegedly caused by UES's subsurface explorations. In addition, Client agrees to compensate UES for any time spent or expenses incurred by UES in defense of any such claim with compensation to be based upon UES's prevailing fee schedule and expense reimbursement policy.

SECTION 14: SOLICITATION OF EMPLOYEES Client agrees not to hire UES's employees except through UES. In the event Client hires a UES employee within one year following any project through which Client had contact with said employee, Client shall pay UES an amount equal to one-half of the employee's annualized salary, as liquidated damages, without UES waiving other remedies it may have.

SECTION 15: ASSIGNS Neither Client nor UES may delegate, assign, sublet, or transfer its duties or interest in this Agreement without the written consent of the other party.

SECTION 16: GOVERNING LAW AND SURVIVAL **16.1** This Agreement shall be governed by and construed in accordance with the laws of the jurisdiction in which the UES office performing the services hereunder is located. **16.2** In any of the provisions of this Agreement are held illegal, invalid, or unenforceable, the enforceability of the remaining provisions will not be impaired and will survive. Limitations of liability and indemnities will survive termination of this agreement for any cause.

SECTION 17: INTEGRATION CLAUSE **17.1** This Agreement represents and contains the entire and only agreement and understanding among the parties with respect to the subject matter of this Agreement and supersedes any and all prior and contemporaneous oral and written agreements, understandings, representations, inducements, promises, warranties, and conditions among the parties. No agreement, understanding, representation, inducement, promise, warranty, or condition of any kind with respect to the subject matter of this Agreement shall be relied upon by the parties unless expressly incorporated herein. **17.2** This Agreement may not be amended or modified except by an agreement in writing signed by the party against whom the enforcement of any modification or amendment is sought.

SECTION 18: WAIVER OF JURY TRIAL Both Client and UES waive trial by jury in any action arising out of or related to this Agreement.

SECTION 19: INDIVIDUAL LIABILITY PURSUANT TO FLORIDA STAT. 558.0035, AN INDIVIDUAL EMPLOYEE OR AGENT OF UES MAY NOT BE HELD INDIVIDUALLY LIABLE FOR NEGLIGENCE.

UES DOCS No. 1823094 Revised 12/04/2020

APPENDIX D

ASTM E1527-21 USER INTERVIEW RECORD

Project Bearss Storage
Date 6/6/23
Completed By Jordan Farrales
Relationship to Project Purchaser

Comment: The *User* (client) must provide the following information (if available) to the *Environmental Professional*. Information provided below is intended to assist the *Environmental Professional* in gathering information from the *User* that may be material to identifying *recognized environmental* conditions in connection with the subject property. Failure to provide this information could result in a determination that “*all appropriate inquiry*” is not complete.

Please provide additional details if the answer is “yes” to any of the questions. If answer is “no” to any of the questions, please indicate what information the answer was based on.

As the *User*, are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

NO

As the *User*, are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

NO

As the *User*, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

NO

Does the purchase price for this property reasonably reflect the fair market value of the property?

YES

ASTM E1527-21 USER INTERVIEW RECORD

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

As the User of this ESA, are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

NO

Do you know the past uses of the property?

NO

Do you know of specific chemicals that are present or once were present at the property?

NO

Do you know of spills or other chemical releases that have taken place at the property?

NO

Do you know of any environmental cleanups that have taken place at the property?

NO

As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

NO

ALSO NEEDED:

- (a) The reason why the Phase I ESA is required:

Buyer property (due diligence)

- (b) The type of *property* and type of *property* transaction, for example, sale, purchase, refinance, foreclosure, exchange, etc.:

Buyer property (due diligence)

- (c) The site address for the *property*, site location map, tax parcel identification numbers:

406 E Bearss Ave Tampa, FL

ASTM E1527-21 USER INTERVIEW RECORD

- (d) The scope of services desired for the Phase I ESA (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered):

Standard scope

- (e) Identification of the site contact and how the contact can be reached:
Jordan Farrales 401-527-4552
-
-

- (f) Any special terms and conditions which must be agreed upon by the Environmental Professional:

Provide 24 hours advances notice prior to entering the property

ASTM E1527-21 USER INTERVIEW RECORD

Project 406 E Bearss Ave, Tampa Fl 33613
Date 6-2-23
Completed By Suresh Saraswat - Narayan Associates
Relationship to Project Seller (owner)

Comment: The User (client) must provide the following information (if available) to the Environmental Professional. Information provided below is intended to assist the Environmental Professional in gathering information from the User that may be material to identifying recognized environmental conditions in connection with the subject property. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Please provide additional details if the answer is "yes" to any of the questions. If answer is "no" to any of the questions, please indicate what information the answer was based on.

As the User, are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

No! To my knowledge since we owned the property, no such liens, VACANT Land.

As the User, are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

No! none known other than those of public record.

As the User, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

We owned the hotel adjacent to the subject property since 1991 and the subject property has been a vacant lot during that period of time. No knowledge of any chemicals.

Does the purchase price for this property reasonably reflect the fair market value of the property?

Yes!

ASTM E1527-21 USER INTERVIEW RECORD

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

n/a

As the User of this ESA, are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

No!

Do you know the past uses of the property?

Yes! Vacant lot

Do you know of specific chemicals that are present or once were present at the property?

No knowledge of any chemicals now or in the past during our ownership.

Do you know of spills or other chemical releases that have taken place at the property?

No!

Do you know of any environmental cleanups that have taken place at the property?

No!

As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

No!

Value Summary

Taxing District	Market Value	Assessed Value	Exemptions	Taxable Value
County	\$750,088	\$631,946	\$0	\$631,946
Public Schools	\$750,088	\$750,088	\$0	\$750,088
Municipal	\$750,088	\$631,946	\$0	\$631,946
Other Districts	\$750,088	\$631,946	\$0	\$631,946

Note: This section shows Market Value, Assessed Value, Exemptions, and Taxable Value for taxing districts. Because of changes in Florida Law, it is possible to have different assessed and taxable values on the same property. For example, the additional \$25,000 Homestead Exemption and the non-homestead CAP do not apply to public schools, and the Low Income Senior Exemption only applies to countywide and certain municipal millages.

Quitclaim Deed

This deed made this 10th day of May, 1991, between GSF Properties, Inc., party of the first part, and Narayan Associates, a Florida general partnership, party of the second part, *WHOSE MAILING ADDRESS IS: c/o RAMADA INN, 400 EAST BEARDS AVE., TAMPA FL 33613*
WITNESSETH:

That said Party of the First Part, for and in consideration of the sum of One and 00/100 DOLLAR, and other valuable considerations, receipt whereof is hereby acknowledged, does hereby grant, bargain, convey, release and forever quit claim unto the Party of the Second Part, its successors and assigns, the property described on Exhibit "A", attached hereto and incorporated hereby by reference.

The property described herein and the improvements thereon are conveyed by party of the first part and accepted by party of the second part in an "as is" condition "with all faults" and specifically and expressly without any warranties, representations or guarantees, either expressed or implied, of any kind, nature or type whatsoever from or on behalf of the party of the first part.

TO HAVE AND TO HOLD said property together with all and singular the rights, members, hereditaments, improvements, easements and appurtenances thereunto belonging or in any wise appertaining unto second party, its successors and assigns so that neither first party, nor its successors and assigns, nor any person or persons claiming under it shall have, claim or demand any right to the above described property or its appurtenances.

IN WITNESS WHEREOF, Party of the First Part has caused these presents to be executed by its duly authorized President and Attorney in Fact the day and year first above written.

Signed, sealed and delivered
the presence of:

STATE OF FLORIDA
 COUNTY OF HILLSBOROUGH

O.R.
 BOOK 6264 PAGE 1649

LEGAL DESCRIPTION

A tract of land lying in the South 1/2 of the NW 1/4 of the SE 1/4 and the SW 1/4 of the NE 1/4 of the SE 1/4 of Section 36, Township 27 South, Range 18 East, Hillsborough County, Florida, more particularly described as follows:

Begin at the Southeast corner of the NW 1/4 of the SE 1/4 of Section 36; thence N. 00 degrees 51 minutes 26 seconds W. along the East 1/4 1/4 line of Section 36, a distance of 107.24 feet; thence N. 09 degrees 27 minutes 42 seconds W., a distance of 249.10 feet to Point-of-Beginning of tract being described; thence continue N. 09 degrees 27 minutes 42 seconds W. along the North right-of-way boundary of Bearss Avenue a distance of 400.0 feet; thence N. 00 degrees 51 minutes 26 seconds West parallel with the aforementioned East 1/4 1/4 line of Section 36 a distance of 535.51 feet to the North boundary of the South one-half of the NW 1/4 of the SE 1/4 and the SW 1/4 of the NE 1/4 of the SE 1/4 of Section 36; thence S. 09 degrees 18 minutes 30 seconds E. along stated boundary a distance of 658.71 feet to a point of intersection with the limited access right-of-way line of Interstate 75; thence S. 00 degrees 56 minutes 27 seconds E. along stated line a distance of 333.75 feet; thence N. 09 degrees 27 minutes 42 seconds W. parallel to the North right-of-way boundary of Bearss Avenue a distance of 256.92 feet; thence S. 00 degrees 51 minutes 26 seconds E. parallel to the East 1/4 1/4 line of Section 36 a distance of 200.0 feet to the point-of-beginning.

The above described property being the same property described in that certain Boundary and Location Survey for Executive Hosts II, Ltd., prepared by Housel & Associates, Inc., bearing the certificate of Darrell L. Cole, RLS No. 2072, dated December 6, 1982, last revised January 20, 1983, as follows:

A tract of land lying in the South 1/2 of the Northwest 1/4 of the Southeast 1/4 and in the Southwest 1/4 of the Northeast 1/4 of the Southeast 1/4 of Section 36, Township 27 South, Range 18 East, Hillsborough County, Florida, being more particularly described as follows:

For a point of reference, commence at the Southeast corner of the Northwest 1/4 of the Southeast 1/4 of said Section 36; Run thence N. 0 degrees 51 minutes 26 seconds W., along the East boundary of the Northwest 1/4 of the Southeast 1/4 of said Section 36, a distance of 107.24 feet; thence N. 09 degrees 27 minutes 42 seconds W., a distance of 249.10 feet for the Point of Beginning; Continue thence N. 09 degrees 27 minutes 42 seconds W., along the Northerly right-of-way line of Bearss Avenue, a distance of 400.31 feet; thence N. 0 degrees 51 minutes 26 seconds W., along a line parallel to the East boundary of the Northwest 1/4 of the Southeast 1/4 of said Section 36, a distance of 535.71 feet to a point on the North boundary of the South 1/2 of the Northwest 1/4 of the Southeast 1/4 of said Section 36; thence S. 09 degrees 18 minutes 30 seconds E., along said North boundary of the South 1/2 of the Northwest 1/4 of the Southeast 1/4 and along the North boundary of the Southwest 1/4 of the Northeast 1/4 of the Southeast 1/4 of said Section 36, a distance of 659.04 feet to a point on the limited access right-of-way line of Interstate 75; thence S. 0 degrees 33 minutes 33 seconds E., along said limited access right-of-way line of Interstate 75, a distance of 333.99 feet; thence N. 09 degrees 27 minutes 42 seconds W., along a line parallel to the Northerly right-of-way line of Bearss Avenue, a distance of 256.95 feet; thence S. 0 degrees 51 minutes 26 seconds E., along a line parallel to the East boundary of the Northwest 1/4 of the Southeast 1/4 of said Section 36, a distance of 199.92 feet to the Point of Beginning. (Mortgagor does not warrant the second legal description set forth in paragraphs 3-5 above.)

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

EXECUTIVE SUMMARY

SELECTED ADDRESSES

The following addresses were selected by the client, for EDR to research. An "X" indicates where information was identified.

<u>Address</u>	<u>Type</u>	<u>Findings</u>
400 E. Bearss Ave.	Client Entered	
408 E. Bearss Ave.	Client Entered	
401 E. Bearss Ave.	Client Entered	
301 E. Bearss Ave.	Client Entered

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL..... National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY..... Federal Facility Site Information listing
SEMS..... Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

Lists of Federal RCRA TSD facilities

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG..... RCRA - Large Quantity Generators

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System
US ENG CONTROLS..... Engineering Controls Sites List
US INST CONTROLS..... Institutional Controls Sites List

Federal ERNS list

ERNS..... Emergency Response Notification System

Lists of state- and tribal hazardous waste facilities

SHWS..... Florida's State-Funded Action Sites

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1

EXECUTIVE SUMMARY

CORRACTS site within approximately 1 of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ROVERLAND PARTS EPA ID:: FLR000054353	14525 N FLORIDA AVE	S 1/2 - 1 (0.611 mi.)	34	361

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-SQG site within approximately 1 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WAL-MART SUPERCENTER EPA ID:: FLR000209288	15302 N NEBRASKA AVE	ENE 1/8 - 1/4 (0.242 mi.)	F24	305

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 4 RCRA-VSQG sites within approximately 1 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 1 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's PCTO1--Petroleum Contamination Detail Report.

A review of the LUST list, as provided by EDR, and dated 01/23/2023 has revealed that there are 12 LUST sites within approximately 1 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, has revealed that there are 11 UST sites within approximately 1 miles of the target property.

Environmental Interest/Information System:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

FINDS:

Registry ID: 110005603515

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (404) 562-8651

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans.

It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

DADE CO LW: Liquid Waste Transporter List

The Liquid Waste Transporter permit regulates the transportation of various types of liquid and solid waste, including hazardous waste, waste oil and oily waste waters, septic and grease trap waste, biomedical waste, spent radiator fluid, photo chemical waste, dry sewage sludge, and other types of non-hazardous industrial waste. The Liquid Waste Transporter permits needed to protect the environment and the public from improperly handled and transported waste.

Date of Government Version: 02/21/2023

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 11/16/2022	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Elevation:	57 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	11509820 SULPHUR SPRINGS, FL
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
12057C0204H	FEMA FIRM Flood data

12057C0205H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
SULPHUR SPRINGS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

7G	1/2 - 1 Mile SSE	SSW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Zolfo

Soil Surface Texture: fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sand	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 3.6
2	7 inches	62 inches	fine sand	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 3.6
3	62 inches	79 inches	fine sand	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 3.6

Soil Map ID: 2

Soil Component Name: Malabar

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 5.1
2	14 inches	35 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 5.1
3	35 inches	50 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 5.1
4	50 inches	66 inches	fine sandy loam	Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 5.1
5	66 inches	79 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 5.1

Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Basinger

Soil Surface Texture: fine sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 3.6
2	3 inches	27 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 3.6
3	27 inches	42 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 3.6
4	42 inches	79 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 3.6

Soil Map ID: 5

Soil Component Name: St. Johns

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 5.5 Min: 3.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	14 inches	29 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 5.5 Min: 3.6
3	29 inches	46 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 5.5 Min: 3.6
4	46 inches	72 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 5.5 Min: 3.6

Soil Map ID: 6

Soil Component Name: Tavares

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 145 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
2	7 inches	79 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6

Soil Map ID: 7

Soil Component Name: Myakka

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6
2	5 inches	20 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6
3	20 inches	29 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6
4	29 inches	79 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

APPENDIX L

KURT HARDY, P.E.

Environmental Division Manager

Kurt Hardy has over 30 years of experience in geo/environmental engineering and civil engineering. Mr. Hardy has conducted and supervised a diverse variety of environmental projects. These have included: identification of the degree and extent of environmental contamination, design and construction of remedial systems, environmental emergency response, preparation of civil and environmental permit applications, preparation of Phase I and Phase II environmental site assessments, property condition assessments, facility compliance audits, underground storage tank removals, tank closure reports, site assessment reports, and other significant environmental assessment, remediation, and construction projects.

Kurt's Project Experience Includes:

Florida Department of Environmental Protection (FL)

Engineer of Record for State Petroleum Cleanup Program site for LSSI assessment of petroleum contamination at former gas station that had been redeveloped into a bank branch facility. Activities included the installation of permanent monitoring wells, groundwater flow assessment, soil sampling, and groundwater sampling. Work conducted at the site was completed at times convenient for this operating bank.

CSCQ Inc. (Tampa, FL)

Engineer of Record for assessment, preparation and implementation of Director's Authorization Permit in accordance with Hillsborough County EPC requirements. Prepared methane monitoring program for the structure which is located on former landfill location. Implemented landfill gas monitoring program and permit modification for installation of continuous methane detectors and sub-slab venting.

National Oil Well Varco (Tampa, FL)

Engineer of Record responsible for implementation and supervision of source removal activities at former industrial property. Prepared technical reports for refining the characterization of extent of contamination and remedial action measures. The goal of the source removal was to excavate for proper off-site disposal any soil contamination which was above the commercial/ industrial cleanup target level to achieve site conditions acceptable for conditional site closure. Following excavation activities and submittal of the Site Assessment and Source Removal Report to the regulatory agency, the site received a No Further Action with conditions.

Hernando County Governemnt, Courthouse Building (Brooksville, FL)

Senior Engineer responsible for completing monitoring activities for the Hernando County Courthouse which had been in a NAM program for several years with monitoring completed by another firm. Universal completed the NAM for the groundwater, and then

Education

BS, Civil Engineering, West Virginia University (1990)

Expertise

- Environmental & Civil Engineering
- Site Planning/Engineering
- Site Remediation
- Environmental Site Assessment/Due Diligence
- Underground Storage Tanks

Licenses

Professional Engineer (FL)

Certifications

- OSHA Hazardous Waste Operations & Emergency Response (HAZWOPER) Site Worker
- OSHA HAZWOPER Site Supervisor

Years of Experience

Since 1990

also provided a limited assessment for a residual soil issue which allowed for a NFA with Conditions for the site. Kurt assisted Hernando County with the Conditional NFA process and documents.

Pasco Hernando State College, Firing Range Assessment & Cleanup (Pasco County, FL)

Senior Engineer responsible for supervision of drilling/monitoring well installation, soil/groundwater sample collection, and contaminant distribution resulting from former firing range. Sampling media involved soil, groundwater, pond sediment and surface water. He prepared technical reports for characterization of extent of contamination and remedial action involving soil stabilization to reduce hazardous concentrations for disposal resulting in submittal of a No Further Action report to the FDEP.

Environmental Due Diligence Assessments, Lender Foreclosure (Throughout FL)

Mr. Hardy serves as a Senior Engineer responsible for directing and conducting numerous environmental due diligence assessments at locations throughout Florida for financial institution Special Assets Groups. The properties involve commercial facilities requiring special access coordination and preparation of well documented reports for evaluation by the financial institution and future purchasers.

Directing Due Diligence Contamination Assessment Activities, Delta Tank Farm (Tampa, FL)

Senior Engineer responsible for directing due diligence contamination assessment activities for the Delta tank farm at a major southeast airport. The completed objective involved developing a baseline contamination level and cost of cleanup for a potential ownership transfer. The portion of the tank farm of interest included four 1,000,000-gallon Jet "A" ASTs (above ground storage tanks) which had documented releases of thousands of gallons of product over several years.

Due Diligence Environmental Testing, Pest Control Facility (Tampa, FL)

Senior Engineer responsible for conducting due diligence environmental testing at Pest Control facility that had been in operation for greater than 50 years. Designed and implemented soil/groundwater testing plan which allowed both the buying and selling parties to evaluate their risks from a quick turnaround, economically feasible investigation that outlined the extent of chlorinated pesticide contamination in the soil and groundwater. Mr. Hardy presented findings to both parties along with estimated soil remedial costs based on test results and conclusions.

Dewatering Monitoring & Treatment Plan (Miami Beach, FL)

Mr. Hardy was the Senior Engineer for preparation of a monitoring plan and backup remedial action for dewatering associated with a parking garage adjacent to a contaminated site. The monitoring plan was submitted for approval by DERM and involved sentry well locations and dewatering effluent testing. The plan provided specifications for addition of remedial treatment if contamination was detected.

Emergency Response Activities, Construction Storage Trailer (Miami, FL)

Mr. Hardy was the Senior Engineer responsible for directing emergency response activities within a construction storage trailer, following client's personnel being overcome by noxious fumes. Responsibilities included directing and specifying pre-entrance testing, personnel protective equipment (PPE) selection and material handling procedures. Mr. Hardy provided in-field direction to material removal team involved in entering storage area, material segregation, and suspect material containerization.

ZANE PIERSON, P.G.

Zane's Project Experience Includes:

Senior Project Manager, UES Environmental Dept. (Tampa, FL)

- Environmental due diligence: Over 500 Phase I and Phase II environmental site assessments
- Contamination assessment and site remediation projects including source removal
- FDEP Petroleum Cleanup Program projects including Petroleum Restoration Program (PRP) and Low-Scored Site Initiative assessments
- Soil and groundwater sampling
- Underground storage tank removal and closure
- Emergency response interim source removal with short-term groundwater recovery
- Property condition assessments
- Landfill gas monitoring
- TO-15 gas sampling
- Radium-226 sampling
- All-terrain vehicle (ATV) driving on site visits and for GPR
- Report preparation, review, and submittal
- Project managements, budgeting, proposals, and profitability review
- Working knowledge of ASTM Standard E1527-13
- Working knowledge of FDEP Standard Operating Procedures (SOPs), soil and groundwater sampling protocols, field forms, rules, and regulations
- Applicable use of FDEP Chapter 62-777 F.A.C. Contaminant Cleanup Target Levels and FDEP format data tables
- Familiarity with Protected Species, Wetland, Archaeological/Cultural Resource, Radon, and Asbestos surveys

Project Geologist, UES Forensics Dept. (Tampa, FL)

- Forensic geotechnical explorations for sinkhole insurance claims per Florida statute Chapter 627.706
- Sinkhole investigations
- Report writing
- Grout recommendations
- Soil classification
- Computerized boring logs
- Hand cone penetrometer readings
- Hand auger borings
- Floor slab relative elevation surveys
- Structural damage observation and identification

Ground Penetrating Radar (GPR) Specialist, UES (Tampa, FL)

- Sinkhole/subsidence investigations
- Underground storage tank locating
- Void detection

Education

BS, Geology, University of Tennessee (2006)

Licenses

Professional Geologist (FL)

Certifications

-OSHA Hazardous Waste Operations & Emergency Response (HAZWOPER)
-NSPS/ACSM Certified Survey Technician Level 2

Years of Experience

Since 2006

- Additional geophysical experience includes magnetometer, electrical resistivity, and gravimeter surveys
- Presented lectures and demonstrations to explain GPR theory, applications, and operation

Scientist, Shaw Environmental (Tampa, FL)

- General field work for 7-Eleven's Petroleum Cleanup Program projects (Pre-Approval & Direct Billing)
- Underground storage tank removal and installation
- Source removal
- Soil and groundwater sampling
- Soil boring via standard penetration test, direct push, and hand auger
- Monitoring well installation
- Installation of remediation wells for pilot tests (soil vapor extraction and air sparge wells)
- Slug tests
- Well abandonment
- Top of casing survey for monitoring wells
- Site assessment reports
- Tank closure reports
- Monitoring well abandonment reports
- Overspill and vapor bucket closure reports

Land Surveyor, SurvTech Solutions (Tampa, FL)

- Boundary surveys
- Design surveys such as ALTA/ACSM land title surveys
- Construction surveys ranging from residential subdivision and commercial layout to industrial construction layout
- As-built surveys
- Vertical and horizontal control surveys
- Mine surveys
