**Our strategy is propelled by scale, sector momentum, and social impact.**

Oxford and OMERS entered the Life Sciences sector through a substantial credit investment in 2017. Since the start of 2021, we've globally invested \$3 billion and identified a significant pipeline of further development opportunities.

Committed to establishing a notable presence in the life sciences sector— one of the world's most transformative markets—we recognize the convergence of biotechnology, artificial intelligence, big data analytics, and deep learning in driving faster and more sophisticated outcomes. Simultaneously, shifting demographics, global trends, and evolving customer needs fuel industry demand and in response, we continue to scale our global presence by pursuing additional equity commitments, lending opportunities and platform investments.

## Global reach

Oxford Life Sciences spans strategic markets in North America, the UK, and Europe. We focus on existing and emerging markets underpinned by the fundamentals for life sciences: universities and academic ecosystems; public and private funding and access to talent.
