Entry Perspective

Medical Office Building

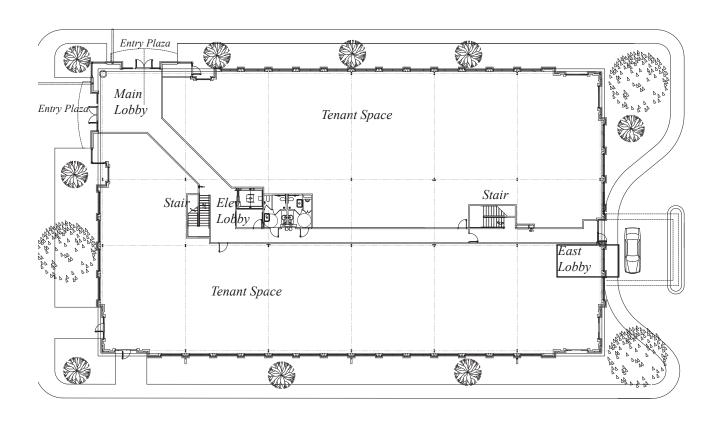

Design architect, Hayden Architecture & Interiors LLC, has developed a three dimensional image to illustrate the building's appearance. The building exteriors will be articulated with quality brick detailing to give the building a high level of distinction. The high quality and appearance of each building will be visually related sharing common elements to create a more cohesive environment. Quality, location and visibility will combine to make this the perfect location for the future success of your business.

The proposed site for this project is located near the intersection of Sam Ridley Parkway and Stonecrest Parkway in Smyrna, Tennessee. The location provides high visibility, easy access and all of conveniences nearby. The driveway is accross the street from the secondary access to Stonecrest Medical Center. Parking is provided at a blended ratio of 4 spaces per 1000 SF of building area for the proposed building and Smyrna Medical Plaza. The spaces are distributed around the building so that patients and staff will have a short walk to any of the building entrances.
