

# Downtown Street Types

## 4.1140 Street Type Purpose

The Street Types sections contain non-discretionary standards that applicants must meet as part of the design review process to ensure positive building-to-sidewalk relationships and well-designed streetscapes. The life of Downtown shall be closely tied to the character of its public space, and it is especially important to acknowledge the importance of street as public space. Street design features, and building-to-street relationships will support the development of the Downtown area as a focus of the community and as pedestrian-oriented, transit-supportive Sub-Districts. Special features have been incorporated into several street design classifications included in this document. This section includes several different street types applied to streets throughout Downtown, recognizing that street design and how buildings interface with the street varies based on function, location, land uses and multi-modal capacity.
