RE: Existing Private On-Site Wastewater Treatment System (POWTS)
Town of Sevastopol –Fire # 3899 Old Hwy Road
Tax Parcel # 0220233282624B2

On July 29th, 2025, an inspection was made of the existing private on-site wastewater treatment systems (POWTS) serving the above noted properties.

The existing POWTS serving the above-noted property consists of a 750-gallon, single-compartment concrete septic tank draining to an in-ground soil absorption system installed in 1975. **The system is sized to accommodate 450 gallons per day.**

Soils data is on file with our office showing suitable soil separation between the system elevations and any limiting factor.

Based on the on-site inspection, the existing POWTS do not meet the definition of a failing system.

This report and interpretation do not warrant the existing and/or future working condition of the subject system.

Please contact us if you have any questions regarding this matter.

A handwritten signature in black ink that reads "Zachary Ahlin".
