## 22-1 Purpose

---

The purpose of the RORD is to allow for the limited use of land and existing buildings for offices, retail stores, multiple-family dwellings and combinations thereof. These provisions are designed to create zone classifications, which would afford a reasonable and desirable combination of compatible uses along the Post Road, Riverside Avenue and Saugatuck Avenue adjacent to and in scale with established residential areas. Frame residential structures on small lots with topographic limitations in the proximity of commercial areas tend to become economically depressed as the demand for fire resistant buildings on larger and more accessible sites increases. Such areas were originally more residential in architectural design, building scale and physical features of the land. These provisions are intended to retain the residential scale and massing of the existing buildings and are not intended to lead to the wholesale redevelopment of those areas to new commercial uses. Consequently, a mixed-use type of zone is required to conserve the value of such property and to recognize the intensity of uses while preserving such areas from the standpoint of compatible land uses, architectural design, building scale and physical appearance. (813, 03/27/2023)
