EXECUTIVE SUMMARY

8415 State St.
South Gate, CA., 90280

IDEAL INVESTMENT OPPORTUNITY

Fully remodeled in 2023 with new plumbing and electrical systems, this property was upgraded with permits and city approvals, minimizing future capital expenditures. The modern commercial loft layout features high ceilings and a flexible open floor plan, making it ideal for retail, creative office, studio, wellness, or showroom use.

Located in a high-demand rental corridor with strong residential density and improving infrastructure, the property benefits from steady traffic and long-term appreciation potential.

The flexible configuration allows for multiple use possibilities, including potential conversion to medical or professional office (subject to parking requirements and buyer verification). The recent renovation reduces deferred maintenance risk while offering repositioning and value-add upside.

A turn-key asset with strong location fundamentals and long-term growth potential.

The property features a spacious 6,208 sq. ft. lot with two buildings—a 3,200 sq. ft. front unit and a 1,296 sq. ft. back unit located on Post St. With 6 gated parking spaces, this site offers both security and ample room for your business or investment needs.

This versatile property is perfect for businesses looking for a central location with plenty of space and easy access to major freeways and commercial hubs. Don't miss out on this excellent opportunity in South Gate!

City of South Gate

City of South Gate

The City of South Gate Capital Improvement Program (CIP) is a robust initiative with over \$100 million in funding allocated for a variety of critical infrastructure projects. These projects are currently in different stages of planning, design, and construction, each aimed at addressing key community needs. The CIP focuses on several goals, including infrastructure rehabilitation and repair, enhancing public safety, alleviating traffic congestion, expanding recreational opportunities, and improving water quality.

The City of South Gate is dedicated to maintaining, operating, and upgrading its infrastructure to meet the growing demands of its residents and businesses. The CIP not only addresses immediate infrastructure concerns but also focuses on long-term improvements that will benefit the community for years to come.

The Fiscal Year 2023/24 CIP, along with the 5-Year CIP plan, provides detailed information on each project, including funding sources and timelines. These documents, included in the city's budget, offer a comprehensive look at how the city is investing in its future by ensuring safe, functional, and modern public infrastructure for all who live, work, and visit South Gate.

MARKET OVERVIEW

CURRENT / PROPOSED DEVELOPMENT PROJECTS

URBAN ORCHARD PROJECT

The Urban Orchard Project is a 30-acre passive park proposal along the Los Angeles River, designed to be completed in three phases. The first phase, part of South Gate's Capital Improvement Program, is a \$25 million effort focused on two main goals: diverting and treating stormwater runoff from the river and providing recreational opportunities for South Gate residents. Located between the Los Angeles River, Firestone Boulevard, the Thunderbird Villa Mobile Home Park, and the I-710 Freeway, the park will feature a community orchard, constructed wetlands, an educational garden, walking paths, native landscaping, and an extension of the Los Angeles River Trail.

Currently in the construction phase, the project has made significant progress, including rough grading, stormwater diversion structures, a wetland overlook, and raised planters. Additional improvements include the installation of walking and bicycle paths, exercise equipment, picnic areas, lighting, and a prefabricated education center with restrooms. Upon receiving approval from the Los Angeles County Solid Waste Division, construction will resume to complete the remaining elements.

CURRENT / PROPOSED DEVELOPMENT PROJECTS

LONG BEACH BLVD. IMPROVEMENTS

The Long Beach Boulevard Improvements project aims to enhance safety, traffic circulation, address maintenance issues, and beautify the corridor. In response to residents' concerns about the inaccessibility of pedestrian push buttons due to cobblestones near curb ramps, the City has resolved this issue by relocating the push buttons. The cobblestones, which are not meant to be walked on and are not ADA-accessible, were installed in areas designated as “non-walkable” surfaces, following industry standards used by Caltrans and the City of Los Angeles.

With a total budget of \$10.6 million, construction began on September 11, 2023, and is expected to be substantially completed by July 2024. The work involves heavy equipment, traffic control, lane closures, and temporary impacts on parking and noise levels. Construction signage will be posted in advance to provide adequate notice regarding parking conditions.

Recent milestones include installing a safety island at Santa Ana Street, pedestrian push buttons, and cobblestones in the new medians. Ongoing work includes the installation of flashing beacons, conduit crossing for irrigation systems, and street grinding in preparation for final paving.

CURRENT / PROPOSED DEVELOPMENT PROJECTS

CIRCLE PARK PROJECT

The Circle Park renovation project aims to transform this four-acre neighborhood park located on Garfield Avenue, nestled between the Rio Hondo River and homes along Karmont Avenue. The project will enhance the park with several new features, including a freshly paved parking lot, upgraded park lighting, and modern hardscaping elements like large boulders and synthetic turf. Additionally, the park will receive a new irrigation system, landscaping, and improved amenities such as trash receptacles, benches, and picnic tables. These updates are designed to create a more inviting and functional space for the local community to enjoy.

The renovation will also introduce a new playground, basketball court, pickleball court, futsal court, and shade structures, further expanding recreational opportunities for park visitors. The design for the park is already 100% complete, and Southern California Edison (SCE) is expected to finalize its plan review by July 2024. Following this review, construction is anticipated to begin in September 2024, bringing these exciting new improvements to life for residents in the area.
