

## Youthologie Aesthetic/Medical Equipment

### Cutera Xeo Plus Laser

Multiplatform Nd:YAG (neodymium-doped yttrium aluminum garnet) 1064 nm laser for hair removal, vascular treatments, collagen stimulation/skin rejuvenation (signature laser genesis treatment) IPL attachments for pigment treatment (LP560), hair removal (ProWave 770 or PW770), and skin tightening (Titan V)

Includes Pearl Fractional laser (ablative fractional YSGG or yttrium scandium gallium garnet, 2790 nm laser)

Upgradeable to accommodate newer IPL handpieces (LimeLight, AcuTip)

Titan V no longer manufactured; Pearl Fractional no longer manufactured

LP560 and PW770 handpieces need replacing (approximately \$8,000 apiece with trade-in of used handpieces)

Recommend pre-sale check (approximately \$2000) or post-sale check (approximately \$15,000)

System purchase price \$400,000, now similar used lasers sell for approximately \$30,000

Surgical smoke evacuator for use with ablative laser

Original purchase price \$1,600

Ultherapy Ulthera device (now represented by Merz)

Ultrasound device for skin tightening, lift (face, neck, chest)

Original purchase price \$95,000 (demo model)

Needs new battery (approximately \$2,000)

Needs new handpieces (\$1,600 each; 2-3 different depths required for each treatment; 6 different handpieces available for different depths and area sizes)

Venus Freeze (from Venus Concept)

Radiofrequency plus pulsed electromagnetic field device for skin tightening, lift (face, neck, body) and body contouring (mild fat reduction, cellulite reduction)

2 handpieces or applicators, Diamondpolar and Octipolar

Original purchase price \$77,000 (demo model), now similar used lasers sell for approximately \$25,000

Omnilux with LED red light head (revive2)

Used for red light treatments to reduce inflammation and increase collagen production and for PDT activation (PDT = photodynamic therapy)

Used for both GlycoAla treatments (cosmetic treatment for skin tightening, lifting, resurfacing) and for treatment of skin cancer with Levulan (aminolevulinic acid)

FDA approved for PDT treatment of squamous cell skin cancer; also effective for small basal cell skin cancers

Can be used for acne treatments (usually alternated with blue light), wound healing, and adjunct treatments (combined with other non-invasive treatments for faster healing, and enhanced effects)

Original purchase price \$45,000 with upgrade in 2019 to new machine and head for \$7,000 (demo model); now similar used devices sell for approximately \$10,000

TriaWave from Environ

Sonophoresis, iontophoresis and galvanic current applications for skin firming and lift

Original purchase price \$6,000 (demo model), new it would cost \$8,000

Vibradermabrasion x 2

Used for microdermabrasion—requires treatment paddle for each patient

Original unit purchase price \$35,000 for both (now new they are approximately \$7,000 apiece)

HK Surgical liposuction equipment

Klein Infiltration pump for tumescent anesthesia x 2

HK surgical aspirator pump for liposuction x 2

Aspirator cannulas, handle, connector (one complete set of facial and body cannulas, one partial set)

Original purchase prices approximately \$35,000 for 2 systems (now, new system would be approximately \$10,000)

HK lipo valet (cart designed to accommodate HK Surgical equipment)

Original purchase price \$2,000

Constant temperature water bath \$1,000

Patient monitor \$5,000  
Positioning pillows, wedges \$1,000  
Waterproof covers, disposable plastic covers included

Ultrasonic cleaning machine  
Original purchase price \$2,000

Autoclave (old, but still works)  
Original purchase price \$2,000

Electrodiagnostic Sensory Nerve Conduction Threshold device by Neurotron (first such device on the market with FDA approval in 1986)  
Screening device for early detection peripheral neuropathy  
Used in occupational medicine (workers at risk for repetitive motion injuries like carpal tunnel syndrome) and in screening for diabetic neuropathy, uremic neuropathy, leprosy  
Original purchase price \$15,000; now similar used device sells for approximately \$300

Dazor medical floor magnifier lights with rolling base x 3  
Original purchase price approximately \$3,000

Stainless steel wheeled kick buckets x 2  
Original purchase price approximately \$600 for both

Rolling exam stool with backrest x 3, no arms  
Original purchase price approximately \$600 for all

Midmark barrier free power procedure chair, height adjustable with head and foot adjustable capabilities, and adjustable headrests x 3  
Original purchase price approximately \$8,000 per chair; new similar design would be \$13,000 to \$18,000 per chair  
One attachable arm rest/articulating armboard with adjustable positioning  
Original purchase price approximately \$1,500; new similar design would be \$2,000

Erchonia Zerona cold laser (red range)  
Used for fat reduction, inch reduction; also used pre-liposuction for easier procedure (liquifies fat) and enhanced results  
Original purchase price \$35,000; now similar used devices sell for approximately \$15,000

Medical infrared headlight for subcutaneous vein detection  
Original purchase price \$2,000

Surgical operating room lights mounted to steel beam (placed specifically to support lights) with adjustable positioning, no cameras x 2  
Original purchase price \$8,000 for both
