Re: West Point / Blue Mountain Reserve, APN 010-019-035  
Request for Wastewater Service

Dear Mr. Strange:

You recently submitted a Concept Review Application for wastewater service for the above-referenced development and requested service from the District. The proposed development is not within a current service area. The project is in the proximity of the Wilseyville Treatment Plant. The Wilseyville facility is at capacity. However, improvements to the Wilseyville Plant can be made; and service can be provided for your Project. The estimated cost for these improvements is \$200,000.

The Wilseyville Plant consists of a treatment pond and on-site disposal for the existing 29 connections. The future plan for the Wilseyville Plant is to convey the flows to the West Point Plant by constructing a lift station and pipeline to the West Point facility. To serve your project, these improvements would be required. The estimated cost of \$200,000 does not include your off-site facilities needed to bring the wastewater to the Wilseyville Plant.

Please contact me if you have any questions or need additional information.

Sincerely,

CALAVERAS COUNTY WATER DISTRICT

  
\_\_\_\_\_  
Steve Hutchings, P. E.  
District Engineer
