Phase I Environmental Site Assessment

Haverhill and 52 Court North
5208-5234 S. Haverhill Road, 4900 52nd Court N. and Canal 14 Road
Lake Worth, Palm Beach County, Florida 33463
UES Project No. 0640.2000029.0000
UES Report No. 1771316
Report Date: May 14, 2020

This Phase I Environmental Site Assessment (ESA) was conducted in accordance with the guidelines of the ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, and therefore, the federal Environmental Protection Agency's All Appropriate Inquiry Rule. The accuracy, correctness and completeness of the Phase I ESA are provided with the knowledge of ASTM E1527-13. In addition, the accuracy, correctness and completeness of this Phase I ESA are provided with knowledge of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as set forth in 42 United States Code Section 9601 et seq., as amended.

This assessment was completed by Rachel Dobrilovic, staff scientist and Jodie Arcscott, staff geologist, and, James E. Adams, environmental department manager, all employees of Universal Engineering Sciences. Mr. Adams declares that, to the best of his professional knowledge and belief, he meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. Mr. Adams has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. Mr. Adams has developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Qualifications of the personnel participating in this assessment are provided in **Appendix K**.

EXECUTIVE SUMMARY

Universal Engineering Sciences, LLC (UES) has completed a Phase I Environmental Site Assessment (ESA) in compliance with the American Society for Testing and Materials (ASTM) Standard E1527-13 for the parcel of land located at 5208-5234 South Haverhill Road, 4900 52nd Court North, and Canal 14 Road in Lake Worth, Palm Beach County, Florida 33463 (the "subject property"). The purpose of this assessment was to identify recognized environmental conditions in association with the subject property as defined in ASTM E1527-13. UES understands this Phase I ESA is being performed in association with the potential acquisition of the subject property. Please refer to the Site Location Map and the Site Plan/2019 Aerial Photograph presented in [Appendix A](#) for additional information pertaining to the location of the subject property. No recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions or de minimis conditions were identified in connection with the subject or surrounding properties.

TABLE 1
Subject Property Overview

Parcel ID(s)	Acreage	Number of Building(s) & Square Footage	Current Property Use
18-42-44-36-08-007-0030	2	No buildings present	Undeveloped
18-42-44-36-08-007-0050	0.3567	Single-story, 1,616 square foot	Single family residential
18-42-44-36-08-007-0060	0.2288	No buildings present	Dirt road (52nd Court N)
18-42-44-36-08-007-0020	1.53	Single-story, 2,481 square feet	Single family residential
18-42-44-36-08-007-0040	0.8305	No buildings present	Undeveloped

NOTE: Please carefully review this report in its entirety for a full description of our evaluation procedures and findings.

Based on UES' field observations, historical research, public records review and interviews conducted in accordance with ASTM format E1527-13, the findings of this Phase I ESA are as follows:

1. Aerial photographs, city directories, interviews, and property records were reviewed by UES to determine the historical use of the subject property. The subject property previously consisted of undeveloped land from as early as 1940 (earliest aerial photograph). The subject property was improved in the late 1970's and early 1980's with two residential structures (one in the northwestern corner of the property and one in the southeastern corner) and a small plant nursery with supporting structures in the southwestern corner of the property. In the early 2000's the plant nursery was no longer evident. The property remained relatively unchanged until 2016 when the supporting structures in the southwestern corner were razed.
2. UES identified a Business Environmental Risk (BER) to be associated with the subject property. Historical application of pesticides and herbicides on the subject property (plant nursery). Proper storage, handling and application of approved chemicals do not constitute a recognized environmental condition. Improper or long term application of compounds containing arsenic have been shown, at times, to leave this metal in the soil above the recommended exposure levels

established by the Florida Department of Environmental Protection (FDEP). In the event that the subject site is rezoned as commercial or residential property, the concentrations may exceed the recommended exposure levels established by the FDEP for those designated land uses. While the FDEP does not require the cleanup of contamination that is a result of the application of compounds, the presence of these compounds in excess of the exposure concentrations may present future liability on the redeveloped property. While not a recognized environmental condition, it may be prudent to complete soil sampling to determine if these compounds are present in concentrations that exceed the FDEP criteria prior to any future redevelopment

3. No recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions or de minimis conditions were identified in connection with the subject or surrounding properties.

The User of this report is required to ensure that continuing obligations are followed after purchase or acquisition of the subject property. Any land use restrictions in effect at the subject property must be maintained. The User should ensure that all parties at the subject property are following best management practices and taking "reasonable steps" with respect to preventing and limiting exposure to any hazardous substance releases on the subject property. In the event of a future release on the subject property, the property owner or responsible party should report it to the appropriate regulatory agency.

Please note that an environmental liens or activity and use limitations search was not performed for the subject property. In accordance with ASTM E1527-13, it is the responsibility of the User of this report to confirm that there are no environmental liens or activity and use limitations filed for the subject property. In the event that any are identified, please contact UES immediately for further evaluation.

1.0 INTRODUCTION

1.1 Purpose

Universal Engineering Sciences, LLC (UES) has completed a Phase I Environmental Site Assessment (ESA) for the property located at 5208-5234 South Haverhill Road, 4900 52nd Court North, and Canal 14 Road in Lake Worth, Palm Beach County, Florida 33463 (the "subject property"). The primary purpose of this assessment is to conduct an evaluation of the subject property and surrounding properties to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), historical recognized environmental conditions (HRECs), de minimis conditions, vapor encroachment conditions (VECs), and business environmental risks (BERs) associated with the past or present uses of the subject property and surrounding properties. ASTM E1527-13 defines these conditions as follows:

- REC: the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; (3) under conditions that pose a material threat of a future release to the environment.
- CREC: a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority. The hazardous substances or petroleum products are allowed to remain in place and are subject to the implementation of required controls.

- HREC: a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.
- *De minimis* Condition: a condition that generally does not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies.
- VEC: the presence or likely presence of "chemical of concern" vapors in the subsurface of the Target Property caused by the release of vapors from contaminated soil or groundwater or both either on or near the Target Property as identified by the Tier 1 or Tier 2 procedures.
- BER: a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

This environmental assessment was conducted in accordance with the guidelines of the ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. This assessment was also intended to identify potential off-site contaminant sources within the distances set forth in ASTM E1527-13 guidelines.

Methodology followed good commercial and customary practice with a goal to identify RECs that would be subject to an enforcement action if brought to the attention of appropriate government agencies.

1.2 User Reliance

This report is intended for the sole use of Willie and Sofia Snead, III and Dynamic Engineering Consultants. Its contents may not be relied upon by other parties without the explicit written consent of UES. This is not a statement of suitability of the subject property for any use or purpose. In accepting this report, all parties herein mentioned agree to the General Conditions of the Agreement between UES and Willie and Sofia Snead, III, dated April 30, 2020. (UES Proposal No. 0640.0420.00007. The General Conditions are presented in [Appendix B](#).

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The subject property consists of 5 tax parcels (ID No. 18-42-44-36-08-007-0030, 18-42-44-36-08-007-0050, 18-42-44-36-08-007-0060, 18-42-44-36-08-007-0040, 18-42-44-36-08-007-0020), which comprises approximately 4.946 acres of mixed-use land located at 5208-5234 South Haverhill Road, 4900 52nd Court North, and Canal 14 Road in Lake Worth, Palm Beach County, Florida 33463. The subject property is located within Section 36, Township 44 South, and Range 42 East, as referenced in the USGS topographic quadrangle map titled "Lake Worth" provided in [Appendix A](#). Please refer to the Site Plan/2019 Aerial Photograph in [Appendix A](#) and the property appraiser records in [Appendix C](#) for additional details, including the subject available legal description.

At the time of our evaluation, the subject property was developed for mixed-use with one, 1,616 square foot, single family residential structure in the northwestern portion of the property, and one 2,481 square foot, single family residential structure on the southeastern portion of the property that are currently vacant. Both residential structures were constructed in the late 1970's-early 1980's. The subject property vicinity is characterized primarily by residential and commercial development along Haverhill Road. Refer to the Site Location Map in [Appendix A](#) and to the Site Plan/2019 Aerial Photograph in [Appendix A](#) for additional details pertaining to the subject and surrounding properties.

2.2 Current Uses of Adjoining Parcels

Currently, the parcels adjoining the subject property are used as follows:

TABLE 2
Description of Adjoining Parcels

Direction from Subject Property	Description of Current Use
North	Tradewinds Middle School
East	Tradewinds Middle School (athletic area and retention pond)
South	Diamond View Elementary School
West	Haverhill road followed by Nautica Isles (single family residential)

3.0 USER PROVIDED INFORMATION

The ASTM Standard defines a User as “the party seeking to use Practice E 1527 to complete an environmental site assessment. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.” The User has specific obligations for completing a successful application of this practice as outlined in Section 6 of the ASTM Standard Practice E 1527-13.

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfield’s Revitalization Act of 2001 (the “Brownfield’s Amendments”) (if desired), the User must provide certain available information identified in the User Questionnaire to the environmental professional. Failure to provide this information could result in a determination that “all appropriate inquiry” is not complete. A User Questionnaire was supplied to Willie and Sofia Snead, III. The following responses were provided by the User. A copy of the completed User Questionnaire is included in Appendix E.

TABLE 3
User Questionnaire Responses

Question	Response
Name of Preparer and User Entity	Sofia Snead, Co-owner

TABLE 3
User Questionnaire Responses

Question	Response
Is the User aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?	No
Is the User aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?	No
As the User of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	The former owners were in the process of opening a church. We are going to have a private all boys high school as well as a chapel. Neighboring properties are both public schools.
Does the purchase price being paid for this property reasonably reflect the fair market value of the property?	Yes
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	N/A
As the User you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? Specifically,	No
Do you know the past uses of the property?	Yes- previous owner intending to open up as a church.
Do you know of specific chemicals that are present or once were present at the property?	No
Do you know of spills or other chemical releases that have taken place at the property?	No
Do you know of any environmental cleanups that have taken place at the property?	No

TABLE 3
User Questionnaire Responses

Question	Response
As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?	No

3.1 Title Records

The User did not contract UES to acquire a chain-of-title for the subject property, nor was one provided to UES during this assessment. Chain-of-title records typically contain information regarding historical site ownership. Therefore, UES did not review chain-of-title information during this assessment.

3.2 Reason for Performing Phase I ESA

UES was contracted to perform this Phase I ESA in order for the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser defense to CERCLA liability.

4.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify recognized environmental conditions in connection with the subject property. Accuracy and completeness of record information varies among information sources, including governmental sources. Record information is often inaccurate or incomplete. Standard sources that are reasonably ascertainable were reviewed by UES for this Phase I ESA.

4.1 Standard Environmental Record Sources

As a part of this assessment, UES reviewed information sources to obtain existing information pertaining to a release of hazardous substances or petroleum products on or near the subject property. UES obtained an ASTM regulatory database report from EDR, which is provided in [Appendix D](#). UES also reviewed other available standard environmental record sources at the Florida Department of Environmental Protection (FDEP), and Other Agency Departments as needed.

Table 4 below lists the approximate minimum search distances used during this assessment in review of the regulatory database, as set forth in ASTM E1527-13.

TABLE 4
Minimum Search Distances - ASTM E1527-13

Source	Search Distance
Federal NPL Site List (National Priorities List)	1.0 mile

TABLE 4
Minimum Search Distances - ASTM E1527-13

Source	Search Distance
Federal Delisted NPL Site List	0.5 mile
Federal CERCLIS List (Comprehensive Environmental Response, Compensation and Liability Act of 1980) / Superfund Enterprise Management System (SEMS)	0.5 mile
Federal CERCLIS NFRAP Site List / SEMS Archive List	0.5 mile
Federal RCRA CORRACTS Facilities List (Resource Conservation and Recovery Act)	1.0 mile
Federal RCRA non-CORRACTS TSD Facilities List	0.5 mile
Federal RCRA Generators List	subject property & adjoining parcels
Federal Institutional Control/Engineering Control Registries	subject property only
Federal ERNS List (Emergency Response Notification System)	subject property only
States and Tribal Lists of Hazardous Waste Sites identified for investigation or remediation:	
State- and Tribal-equivalent NPL	1.0 mile
State- and Tribal-equivalent CERCLIS	0.5 mile
State and Tribal Landfill and/or Solid Waste Disposal Site Lists	0.5 mile
State and Tribal Leaking Storage Tanks List	0.5 mile
State and Tribal Registered Storage Tank List	subject property & adjoining parcels
State and Tribal Institutional Control/Engineering Control Registries	subject property only
State and Tribal Voluntary Cleanup Sites	0.5 mile
State and Tribal Brownfield Sites	0.5 mile

4.2 Federal, State and County Records Review

UES reviewed available regulatory records pertaining to the subject property, adjoining parcels and surrounding properties, as warranted. According to information provided by EDR and a review of public records maintained by FDEP, the subject property is not listed on any Federal, State or local database. UES' review of the referenced databases also considered the potential or likelihood of contamination from adjoining and nearby sites. To evaluate which of the adjoining and nearby sites identified in the regulatory database report present potential environmental risks to the subject property, UES considered the following criteria:

- The type of database on which the site is identified.
- The direction and distance of the identified site from the subject property.
- The known or inferred groundwater flow direction in the subject property area.
- The status of any respective regulatory agency-required investigation(s) of the identified site.
- Surface and subsurface obstructions and diversions (e.g., buildings, roads, sewer systems, utility service lines, rivers, lakes, and ditches) that may be located between the identified site and the subject property.

Only those sites that are judged to present a potential environmental risk to the subject property and/or warrant additional clarification are further evaluated. Using the referenced criteria, and based upon a review of readily available information contained within the regulatory database report, UES did not identify adjoining (i.e., bordering) or nearby sites listed in the regulatory database report that were judged to present a potential environmental risk to the subject property with the exception of the following facilities discussed in the following table. Please refer to the regulatory database report in [Appendix D](#) for additional details.

TABLE 5
Facilities Identified Within Minimum Search Distance

Facility	Facility ID(s)	Distance/Direction	Database(s)
Palm Beach Plant Factory 5171 Haverhill Rd Lake Worth, FL 33463	Facility ID # 508734608	Former western adjoining	SWF AST
According to available regulatory records, this former plant nursery previously held a permit in 1985 for processing horse manure into potting soil. This facility also maintained two 500-gallon AST's and one 800-gallon AST. Minor violations in February 1992 include failure to perform inspection, record keeping, and no secondary containment for the 800-gallon tank. Inspections completed in August and December 1992 revealed a new owner was present on site with two new 550-gallon AST's (one diesel and one unleaded gasoline). The three previous tank were no longer on site. No other violations or evidence of releases have been reported at this facility. In the early 2000's, the site was redeveloped with into a single family residential community. As such, it is UES' opinion that this facility does not constitute a REC in connection with the subject property at this time.			
Ebersold & CO Inc. 5096 Haverhill Rd Lake Worth, FL 33463	Facility ID# 508839124	Former northern adjoining	AST
According to available regulatory records, this former facility maintained one 500-gallon AST. No violations or evidence of releases have been reported at this facility. In 2004, the site was redeveloped with a middle school. As such, it is UES' opinion that this facility does not constitute a REC in connection with the subject property at this time.			
Cook Lumber & Treating 4965 Lantana Rd Lake Worth, FL 33463	Facility ID#509400562 BF501601001 FLD032444095	2,800' south	SEMS-ARCHIVE CORRACTS
According to available regulatory files, this former facility operated as a pressure treated lumber facility from circa 1980 until early 2000's. Soil and groundwater contamination have been documented on site and site assessment is ongoing. In June 2019, a Brownfield Site Rehabilitation Agreement was revised and signed. Brownfield areas are contiguous areas of one or more Brownfield sites that have been designated as such by a local government by resolution. The subject site does not lie within the boundaries of this area and does not constitute a REC at this time.			

In addition to reviewing the regulatory database report, UES performed reconnaissance of the subject property vicinity to identify any sites not mapped by EDR due to inadequate or inaccurate address information and to look for unregistered facilities. No petroleum storage facilities or facilities suspected to use or generate hazardous materials were observed in the near vicinity of the subject property during field reconnaissance performed by UES.

4.3 Additional Environmental Records

The FDEP Ethylene Dibromide (EDB) Application Zone Delineation Map indicates EDB-impacted groundwater has not been identified in the geographical section in which the subject property is located. EDB was formerly used in citrus grove applications as a fumigant against nematodes and is a known carcinogen.

Please refer to [Appendix E](#) for copies of environmental reports and documents that have been summarized in Sections [4.1.1](#) and [4.2](#) of this report.

4.4 Physical Setting Sources

USGS topographic quadrangle maps, soil survey data and regulatory files available regarding properties of environmental concern in the property vicinity were reviewed as sources for obtaining information regarding the physical setting of the subject property and surrounding vicinity and are summarized in Table 5 below.

TABLE 6
Physical Setting Information for the Subject Property & Surrounding Area

Topography: ¹	
Site Elevation	17 ft
Topographic Gradient	Flat and level with surrounding properties
Closest Surface Water	Small lake (175' West)
General Soil Characteristics	
Soil Type	Immokalee fine sand (Im)
Description	This is a nearly level, poorly drained, deep, sandy soil that has a dark colored layer below a depth of 30 inches that is weakly cemented with organic matter. This soil is in broad flatwood areas in the eastern part of the survey area. It has the pedon described as representative of the series. Under natural conditions, the water table is within 10 inches of the surface for 2 to 4 months during wet periods, within 10 to 40 inches for 8 months or more in most years, but it is below 40 inches in dry periods. Included with this soil in mapping are small areas of Myakka, Basinger, Wabasso, and Oldsmar soils. The natural vegetation is slash pine, saw-palmetto, inkberry, fetterbush, pineland three-awn, and many other grasses. Most areas of this soil are in native vegetation, but there are some areas in improved grass pasture and cultivated crops.
Area Specific Geology/Hydrogeology Characteristics: ²	
Geology	The South Florida area can be divided into three general parts based on physiography and soils. These are the coastal ridge in the eastern part, the sandy flatlands in the central part, and the broad Everglades marsh in the western part (SCS, 1978). The Subject Property lies within the coastal ridge physiographic province. The coastal ridge area parallels the coast and extends inland two to three miles. This is the only part of Palm Beach County that has any noticeable relief or slope. It includes Palm Beach Island and beaches, Lake Worth and the Intracoastal Waterway, and the coastal ridge itself. The elevation on the ridge ranges from about 25 to 50 feet above mean sea level (AMSL) and extends as much as 30 feet above adjacent flatlands. The elevation on Palm Beach Island ranges from zero to about 25 feet AMSL. The soils consist of shelly sands that vary in thickness, slope, and drainage, according to location and position. Lake Worth and the waterway areas are only slightly above sea level and include scattered areas of mangrove swamps, which consist of both organic and mineral soils. Soils on the coastal ridge are deep, excessively drained sands. A major percent of the soils in this part of Palm Beach County have been or are being developed for urban use (SCS, 1978).

TABLE 6
Physical Setting Information for the Subject Property & Surrounding Area

Hydrogeology	Florida is mantled nearly everywhere by unconsolidated sands and carbonaceous soils that overlie a thick sequence of carbonate and clastic rocks. Locally, these sands, carbonaceous soils, and the sedimentary rock sequences form the Biscayne Aquifer, which is underlain by the Florida Aquifer. The former provides significantly large volumes of potable water to South Florida. Nearly all of Florida's groundwater originates from precipitation. Additional factors affecting the discharge of groundwater from the shallow Aquifer include evapo-transpiration, flood gate controls and over-pumping of wells. The direction of the surficial aquifer flow usually follows the topography of the land and flows toward surface bodies of water. Regionally, the groundwater flow trends to the southeast. Actual local groundwater flow direction can be influenced by factors such as surface topography, surface water bodies, underground structures, seasonal fluctuations in rainfall, soil and bedrock geology, and nearby production wells. Site-specific groundwater flow can only be determined by the installation of monitoring wells.

2	Available from ascertainable resources reviewed as part of this Phase I ESA

4.5 Vapor Migration

Vapor migration refers to the movement of *hazardous substances* or *petroleum products* vapor in the subsurface. A vapor encroachment condition (VEC) is defined as the presence of likely presence of chemicals of concern (COC) vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil or groundwater or both either on or near the subject property.

UES conducted a Tier 1 Vapor Encroachment Screening (VES) for the subject property in accordance with ASTM E 2600-15. The Tier 1 screening process utilizes the information collected as part of this Phase I ESA. The Area of Concern for the purpose of this VES is 1/3 mile (1,760 feet) for COC and 1/10 mile (528 feet) for petroleum hydrocarbon COC. The approximate minimum search distances for Federal, Tribal and State-listed facilities surrounding the subject property are presented in the table below.

TABLE 7
Approximate Minimum Search Distance Surrounding the Subject Property (ASTM E2600-15)

Source	COC	Petroleum Hydrocarbon COC
Federal NPL Site List	1/3 mile	1/10 mile
Federal SEMS List	1/3 mile	1/10 mile
Federal RCRA CORRACTS Facilities List	1/3 mile	1/10 mile
Federal RCRA Non-CORRACTS TSD Facilities List	1/3 mile	1/10 mile
Federal RCRA Generators List	Subject property only	Subject property only
Federal Institutional Control/Engineering Control Registries	Subject property only	Subject property only
Federal ERNS List	Subject property only	Subject property only
State and Tribal Equivalent NPL	1/3 mile	1/10 mile

TABLE 7

State and Tribal Equivalent SEMS	1/3 mile	1/10 mile
State and Tribal Landfill and/or Solid Waste Disposal Site List	1/3 mile	1/10 mile
State and Tribal Leaking UST/AST List	1/3 mile	1/10 mile
State and Tribal UST/AST List	Subject property only	Subject property only
State and Tribal Institutional Control/Engineering Control Registries	Subject property only	Subject property only
State and Tribal Voluntary Cleanup Sites	1/3 mile	1/10 mile
State and Tribal Brownfield Sites	1/3 mile	1/10 mile

Based on our regulatory records review detailed in Section 5.0, no facilities with documented contamination are located within the Area of Concern; and therefore, no potential vapor encroachment conditions were identified.

4.6 Historical Information on Subject Property and Surrounding Area

UES reviewed aerial photographs, city directories and property records to determine the historical use of the subject property. The northern adjoining property was used as agricultural use land from as early as the 1950's and then as a residential property in the late 1960's. The property was cleared in the 1990's and in the early 2000's it was improved with a middle school. The western adjoining property was used as agricultural land from as early as the 1950's, redeveloped into a plant nursery in the 1980's, then razed and redeveloped into a single family home neighborhood (Nautica Isles).The southern adjoining property was used as agricultural land from as early as the 1950's, redeveloped into a plant nursery in the 1990's, then razed and redeveloped into an elementary school in the early 2000's. The eastern adjoining property remained relatively vacant until the 1990's when it was improved with a plant nursery. In the early 2000's the property was razed and redeveloped into the athletic area for the middle school on the northern adjoining property.

4.6.1 Aerial Photograph Review

In order to evaluate the previous land uses of the subject property and surrounding area, a series of aerial photographs was reviewed. The aerial photographs provide a progressive overview of the subject property and adjoining properties between 1940 and 2019. The Site Plan/2019 Aerial Photograph is available for review in [Appendix A](#). Descriptions of UES' observations are outlined in the table below. Copies of the aerial photographs reviewed are presented in [Appendix F](#).

TABLE 8
Summary of Aerial Photographs Observations

Photograph Date	Photograph Quality	Remarks
1940	Fair	The subject property and all adjoining properties were depicted as undeveloped land. A large drainage canal was established to the north and a small canal was established to the south.
1953	Good	An unimproved dirt trail was noted traversing through the central portion of the subject property. Some agricultural use land was established in the surrounding area.
1958	Good	The unimproved dirt trail was no longer evident on the subject property. The northern, western, and a portion of the southern adjoining properties were improved with agricultural use land.
1964	Good	An unimproved dirt road was constructed along the western border of the subject property (Haverhill Road). The agricultural use land to the west and north were no longer visible. A residential structure along with supporting structures were constructed on the northwestern portion of the northern adjoining property.
1968	Good	The western adjoining property was improved with agricultural use land. The residential structure with supporting structures on the northern adjoining property were no longer visible and a small structure was constructed along the southern portion of the northern adjoining property. The southern adjoining property was improved with small supporting structures along the northern border.
1973	Good	The structure on the northern adjoining property was razed and a new one was constructed on the central portion of the property with supporting structures. The supporting structures on the southern adjoining property were no longer visible. The western adjoining property no longer appeared to be used as agricultural use land and one supporting structure was visible.
1975	Good	No significant changes to the subject property or adjoining property from the 1973 aerial photograph.
1986	Good	The subject property was improved with two residential structures, one in the northwest portion of the property and one in the southeastern portion. The southwest portion of the subject property was improved with a supporting structure and small plant nursery. The northeast portion of the subject property remained vacant. 52nd Court N was constructed as a dirt road through the central portion of the subject property, running from Haverhill, east, and ending midway through the property. The western adjoining property was improved with a plant nursery and several additional supporting structures were added.
1991	Good	The subject property was improved with a structure in the northeastern portion of the property. The northern adjoining property was completely razed and appeared as a vacant lot. The southern adjoining property was improved with a plant nursery.
1999	Poor	The eastern adjoining property was improved with a plant nursery.
2007	Good	The northeastern portion of the subject property appeared as a storage area for various items including vehicles. The plant nursery was no longer visible on the southwestern portion of the subject property. Haverhill Road was expanded to a four-lane highway and extended north, over the drainage canal, connecting to Melaleuca Lane. The northern and eastern adjoining property was improved with Tradewinds Middle School. The western adjoining property was razed and redeveloped into Nautica Isles (single family residential neighborhood). The southern adjoining property was razed and redeveloped into Diamond View Elementary School.

TABLE 8
Summary of Aerial Photographs Observations

Photograph Date	Photograph Quality	Remarks
2010	Good	No significant changes to the subject property or adjoining properties since the 2007 aerial photograph.
2013	Good	No significant changes to the subject property or adjoining properties since the 2010 aerial photograph.
2017	Good	The supporting structures on the southwestern portion of the subject property were no longer visible.
2019	Good	No significant changes to the subject property or adjoining properties since the 2017 aerial photograph

4.6.2 Property Ownership Records

According to the Palm Beach County Property Appraiser reports, the current owner of the subject property is Palm Beach Christian Preparatory School Inc. The User did not contract UES to acquire a chain-of-title report for the subject property, which typically contains information regarding historical site ownership

4.6.3 Fire Insurance Map Review

Fire insurance maps generated by the Sanborn® Map Company were requested for the subject property and vicinity from EDR. According to EDR, coverage of the subject property was unavailable. A copy of the EDR Certified Fire Insurance Map Report is presented in.

4.6.4 City Directory Review

Historical street directories which list the former businesses and residences at the street addresses of the subject property and the adjoining properties were reviewed by UES. Available coverage from 2017 to 1973. Descriptions of UES observations are outlined in the table below. Copies of the city directory pages reviewed are presented in Appendix H.

TABLE 9
Summary of City Directory Observations

Date	Subject Property	Nearby Properties of Concern
1973	5208 S. Haverhill Rd- no listing 5234 S. Haverhill Rd- no listing 4900 52nd Court- no listing	None

4.6.5 Land Use Records

According to the Palm Beach County Property Appraiser records, subject property is zoned RL-3 for Residential low density. According to Palm Beach County's Wellfield Protection Zone Map, the subject property is not located within a wellfield protection zone.

4.6.6 Other Historical Sources

No other historical sources were reviewed in preparation of this Phase I ESA.

5.0 INFORMATION FROM SITE RECONNAISSANCE

On May 11, 2020, a site reconnaissance of the subject property was completed by Jodie Arcscott of UES. Jodie Arcscott was escorted by Ms. Sofia Snead during the site reconnaissance. The purpose was to evaluate the current conditions of the subject property and to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the subject property.

5.1 Methodology

The reconnaissance included walking the accessible portions of the subject property and the site perimeter. This visual observation of the subject property focused primarily on its surface features. Property use and significant features are indicated on the 2019 Aerial Photograph/Site Plan contained in [Appendix A](#). Representative site photographs are included in [Appendix I](#).

5.2 General Site Setting

The general site setting is characterized primarily by commercial and residential development along Haverhill Road. The subject property was developed with two vacant single family residential structures and supporting structures.

5.3 Site Observations

Site features observed, encountered, or suspected during UES' site visit are summarized in the table below. Affirmative responses are discussed in more detail following the table.

TABLE 10
Site Reconnaissance Summary

Item	Yes	No	Suspect
Limiting Conditions		✓	
Floor Drains	✓		
Building	✓		
Heat/Cooling Source	✓		
Drinking Water Source			✓
Domestic Wastewater Discharge Source			✓
Current Tenant Operations		✓	
Past Tenant Operations		✓	
Polychlorinated Biphenyls			✓
Hazardous Substances and Petroleum Products		✓	
Storage Tanks		✓	
Odors		✓	
Pools of Liquid		✓	
Drums and Containers		✓	
Unidentified Substance Containers		✓	
Stains or Corrosion on Floors, Walls, or Ceilings (not including water)		✓	
Sumps		✓	
Pits, Ponds, or Lagoons for Waste Disposal or Treatment		✓

Site Reconnaissance Summary

Item	Yes	No	Suspect
Stained Soil or Pavement		✓	
Stressed Vegetation (not from insufficient water)		✓	
Wells	✓		
Adjacent and Nearby Properties	✓		
Solid Waste, Construction Debris and/or Imported Soil Stockpile		✓	
Other Notable Site Features		✓	

5.3.1 Floor Drains

Floor drains were encountered in the restrooms of the residential structures.

5.3.2 Building

The subject property was developed with one, 1,616 square foot, single family residential structure and supporting structure/shed in the northwestern portion of the property, and one 2,481 square foot, single family residential structure on the southeastern portion of the property with two supporting structures/sheds. Both residential structures are currently vacant and were constructed in the late 1970's-early 1980's.

5.3.3 Heat/Cooling Source

HVAC systems were observed for both residential structures.

5.3.4 Drinking Water Source

Palm Beach County Water Utilities reportedly supplies drinking water to the surrounding area. A drinking water well and pump were noted on the north side of the residential structure located in the northwestern portion of the subject property.

5.3.5 Domestic Wastewater Discharge Source

Palm Beach County Water Utilities reportedly supplies sewer services to the surrounding area.

5.3.6 Polychlorinated Biphenyls

Two pole-mounted transformers was observed along 52nd Court N in the central portion of the subject property. No leaking of staining was observed near the units.

5.3.7 Wells

A drinking water well was noted on the north side of the residential structure located in the northwestern portion of the subject property.

5.3.8 Adjacent and Nearby Properties

None of the adjacent or nearby properties appear to represent RECs in connection with the subject property at this time.

6.0 INTERVIEWS

As part of this Phase I Environmental Site Assessment, interviews were conducted to obtain information indicating recognized environmental conditions in connection with the subject property. The following persons were contacted for interviews in an effort to obtain information regarding the subject property.

TABLE 11
Interview Summary

Represents	Interviewed	Name & Title	Length of Time Associated With Subject Property	Comments
Current Property Owner(s)	Yes	Sofia Snead, Co-owner		Ms. Snead is also the User of this Phase I ESA. Please refer to the User Questionnaire presented in Appendix J.
Past Property Owner(s)	No			
Key Site Manager	No			
Current Occupant(s)	No			
Former Occupant(s)	No			
Local Government	No			Requests of information pertaining to the subject property were made to Palm Beach County Fire Department and Health Department. At the time of this report, UES had not received a response.

7.0 FINDINGS & OPINIONS

Based on UES' field observations, historical research, public records review and interviews conducted in accordance with ASTM format E1527-13, the findings and opinions of this Phase I ESA are as follows:

1. Aerial photographs, city directories, interviews, and property records were reviewed by UES to determine the historical use of the subject property. The subject property previously consisted of undeveloped land from as early as 1940 (earliest aerial photograph). The subject property was improved in the late 1970's and early 1980's with two residential structures(one in the

northwestern corner of the property and one in the southeastern corner) and a small plant nursery with supporting structures in the southwestern corner of the property. In the early 2000's the plant nursery was no longer visible. The property remained relatively unchanged until 2016 when the supporting structures in the southwestern corner were razed.

2. UES identified a Business Environmental Risk (BER) to be associated with the subject property. Historical application of pesticides and herbicides on the subject property (former plant nursery). Proper storage, handling and application of approved chemicals do not constitute a recognized environmental condition. Improper or long term application of compounds containing arsenic have been shown, at times, to leave this metal in the soil above the recommended exposure levels established by the Florida Department of Environmental Protection (FDEP). In the event that the subject site is rezoned as commercial or residential property, the concentrations may exceed the recommended exposure levels established by the FDEP for those designated land uses. While the FDEP does not require the cleanup of contamination that is a result of the application of compounds, the presence of these compounds in excess of the exposure concentrations may present future liability on the redeveloped property. While not a recognized environmental condition, it may be prudent to complete soil sampling to determine if these compounds are present in concentrations that exceed the FDEP criteria prior to any future redevelopment
3. No recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions or de minimis conditions were identified in connection with the subject or surrounding properties.

8.0 CONCLUSIONS

UES has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of the property located at 5208-5234 South Haverhill Road, 4900 52nd Court North, and Canal 14 Road in Lake Worth, Palm Beach, Florida 33463. Any exceptions to or deletions from this practice are described in Sections [10.2](#), [10.3](#), and [10.4](#) of this report.

The User of this report is required to ensure that continuing obligations are followed after purchase or acquisition of the subject property. Any land use restrictions in effect at the subject property must be maintained. The User should ensure that all parties at the subject property are following best management practices and taking "reasonable steps" with respect to preventing and limiting exposure to any hazardous substance releases on the subject property. In the event of a future release on the subject property, the property owner or responsible party should report it to the appropriate regulatory agency.

This assessment has not revealed evidence of recognized environmental conditions connected with the subject property. Further assessment does not appear warranted at this time. Please note that an environmental liens or activity and use limitations search was not performed for the subject property. In accordance with ASTM E1527-13, it is the responsibility of the User of this report to confirm that there are no environmental liens or activity and use limitations filed for the subject property. In the event that any are identified, please contact UES immediately for further evaluation.

9.0 ADDITIONAL SERVICES

Under the terms of the agreement between UES and Willie and Sofia Snead, III, no other services beyond the Phase I ESA were performed as part of this assessment.

10.0 REPORT INFORMATION

10.1 Detailed Scope of Services

The contracted scope of services consists of the preparation of a Phase I ESA of the subject property in accordance with the guidelines set forth in ASTM E1527-13. The accuracy, correctness and completeness of this Phase I ESA is provided with knowledge of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as set forth in 42 United States Code Section 9601 et seq., as amended.

The scope of services does not include an evaluation of asbestos containing building materials, lead based paint, lead in drinking water, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, indoor air quality, radon, vapor intrusion, site geotechnics (soils, foundations, site retention, etc.), wetlands, endangered species, or construction materials testing, unless specified in the approved contract between UES and the client. UES can provide these additional services if necessary.

10.2 Limitations and Exceptions

The findings of this report represent our professional judgment; UES offers or extends no warranty, express or implied. These findings are relevant to the dates of our property inspection and the information cited herein. This report should not be relied upon to represent property conditions on other dates or at locations other than those specifically cited within the report. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the subject property.

Due to changing environmental regulatory conditions and potential on-site or adjacent activities occurring after this Phase I ESA, the client may not presume the continuing applicability to the subject property of the conclusions in this assessment for more than 180 days after the report's issuance date, per ASTM E1527-13.

10.3 Special Terms and Conditions

This report, and the information contained herein, shall be the sole property of UES until payment of any unpaid balance is made in full. , hereinafter referred to as the "User" of this Phase I ESA report, agrees that until payment is made in full, the User shall not have a proprietary interest in this report or the information contained herein. UES shall have the absolute right to request the return of any and all copies of this report submitted to other parties, public or private, on behalf of the User in the event of nonpayment of outstanding fees by the UES General Conditions that govern this assessment ([Appendix B](#)).

10.4 Data Gaps

ASTM E1527-13 defines a "Data Gap" as a lack of, or inability to, obtain information despite good faith efforts that may affect the findings of the Phase I ESA. The Environmental Professional is to identify "*significant*" Data Gaps found in the Phase I ESA process, while "*insignificant*" Data Gaps do not have to be included in this evaluation. For both the ASTM Standard and the AAI Final Rule, the Environmental Professional must identify what was done to address the Data Gap. The Environmental Professional should provide an opinion regarding appropriate further investigations, if any, necessary to address Data Gaps. A Phase I ESA which includes Data Gaps is still considered as compliant with the Standard and the AAI Final Rule, as long as the Data Gaps are addressed as outlined above.

The following Data Gaps were encountered during completion of this Phase I ESA:

- The historical aerial photograph review was incomplete due to the lack of available photographs in five-year intervals. However, other data resources historical city directories and USGS topographic maps presented data for the time periods not covered by the historical aerial photographs. Based on our review of historical data during this Phase I ESA, this Data Gap does not appear to be significant to the findings of this assessment and do not constitute a data failure.
- At the issuance of this report, a response from the local fire department and local health department were not received. This represents a data gap; however, in UES' opinion this does not constitute a data failure.

10.5 Deviations

UES prepared this Phase I ESA in compliance with ASTM E1527-13.

APPENDIX B

Universal Engineering Sciences, Inc.
GENERAL CONDITIONS

SECTION 1: RESPONSIBILITIES

- 1.1 *Universal Engineering Sciences, Inc.*, ("UES"), has the responsibility for providing the services described under the Scope of Services section. The work is to be performed according to accepted standards of care and is to be completed in a timely manner. The term "UES" as used herein includes all of *Universal Engineering Sciences, Inc.*'s agents, employees, professional staff, and subcontractors.
- 1.2 The Client or a duly authorized representative is responsible for providing UES with a clear understanding of the project nature and scope. The Client shall supply UES with sufficient and adequate information, including, but not limited to, maps, site plans, reports, surveys and designs, to allow UES to properly complete the specified services. The Client shall also communicate changes in the nature and scope of the project as soon as possible during performance of the work so that the changes can be incorporated into the work product.
- 1.3 The Client acknowledges that UES's responsibilities in providing the services described under the Scope of Services section is limited to those services described therein, and the Client hereby assumes any collateral or affiliated duties necessitated by or for those services. Such duties may include, but are not limited to, reporting requirements imposed by any third party such as federal, state, or local entities, the provision of any required notices to any third party, or the securing of necessary permits or permissions from any third parties required for UES's provision of the services so described, unless otherwise agreed upon by both parties.
- 1.4 Universal will not be responsible for scheduling our services and will not be responsible for tests or inspections that are not performed due to a failure to schedule our services on the project or any resulting damages.
- 1.5 **PURSUANT TO FLORIDA STATUTES §558.0035, ANY INDIVIDUAL EMPLOYEE OR AGENT OF UES MAY NOT BE HELD INDIVIDUALLY LIABLE FOR NEGLIGENCE.**

SECTION 2: STANDARD OF CARE

- 2.1 Services performed by UES under this Agreement will be conducted in a manner consistent with the level of care and skill ordinarily exercised by members of UES's profession practicing contemporaneously under similar conditions in the locality of the project. No other warranty, express or implied, is made.
- 2.2 The Client recognizes that subsurface conditions may vary from those observed at locations where borings, surveys, or other explorations are made, and that site conditions may change with time. Data, interpretations, and recommendations by UES will be based solely on information available to UES at the time of service. UES is responsible for those data, interpretations, and recommendations, but will not be responsible for other parties' interpretations or use of the information developed.
- 2.3 Execution of this document by UES is not a representation that UES has visited the site, become generally familiar with local conditions under which the services are to be performed, or correlated personal observations with the requirements of the Scope of Services. It is the Client's responsibility to provide UES with all information necessary for UES to provide the services described under the Scope of Services, and the Client assumes all liability for information not provided to UES that may affect the quality or sufficiency of the services so described.
- 2.4 Should UES be retained to provide threshold inspection services under Florida Statutes §553.79, Client acknowledges that UES's services thereunder do not constitute a guarantee that the construction in question has been properly designed or constructed, and UES's services do not replace any of the obligations or liabilities associated with any architect, contractor, or structural engineer. Therefore it is explicitly agreed that the Client will not hold UES responsible for the proper performance of service by any architect, contractor, structural engineer or any other entity associated with the project.

SECTION 3: SITE ACCESS AND SITE CONDITIONS

- 3.1 Client will grant or obtain free access to the site for all equipment and personnel necessary for UES to perform the work set forth in this Agreement. The Client will notify any and all possessors of the project site that Client has granted UES free access to the site. UES will take reasonable precautions to minimize damage to the site, but it is understood by Client that, in the normal course of work, some damage may occur, and the correction of such damage is not part of this Agreement unless so specified in the Proposal.
- 3.2 The Client is responsible for the accuracy of locations for all subterranean structures and utilities. UES will take reasonable precautions to avoid known subterranean structures, and the Client waives any claim against UES, and agrees to defend, indemnify, and hold UES harmless from any claim or liability for injury or loss, including costs of defense, arising from damage done to subterranean structures and utilities not identified or accurately located. In addition, Client agrees to compensate UES for any time spent or expenses incurred by UES in defense of any such claim with compensation to be based upon UES's prevailing fee schedule and expense reimbursement policy.

SECTION 4: SAMPLE OWNERSHIP AND DISPOSAL

- 4.1 Soil or water samples obtained from the project during performance of the work shall remain the property of the Client.
- 4.2 UES will dispose of or return to Client all remaining soils and rock samples 60 days after submission of report covering those samples. Further storage or transfer of samples can be made at Client's expense upon Client's prior written request.
- 4.3 Samples which are contaminated by petroleum products or other chemical waste will be returned to Client for treatment or disposal, consistent with all appropriate federal, state, or local regulations.

SECTION 5: BILLING AND PAYMENT

- 5.1 UES will submit invoices to Client monthly or upon completion of services. Invoices will show charges for different personnel and expense classifications.
- 5.2 Payment is due 30 days after presentation of invoice and is past due 31 days from invoice date. Client agrees to pay a finance charge of one and one-half percent (1 ½ %) per month, or the maximum rate allowed by law, on past due accounts.
- 5.3 If UES incurs any expenses to collect overdue billings on invoices, the sums paid by UES for reasonable attorneys' fees, court costs, UES's time, UES's expenses, and interest will be due and owing by the Client.

SECTION 6: OWNERSHIP AND USE OF DOCUMENTS

- 6.1 All reports, boring logs, field data, field notes, laboratory test data, calculations, estimates, and other documents prepared by UES, as instruments of service, shall remain the property of UES.
- 6.2 Client agrees that all reports and other work furnished to the Client or his agents, which are not paid for, will be returned upon demand and will not be used by the Client for any purpose.
- 6.3 UES will retain all pertinent records relating to the services performed for a period of five years following submission of the report, during which period the records will be made available to the Client at all reasonable times.
- 6.4 All reports, boring logs, field data, field notes, laboratory test data, calculations, estimates, and other documents prepared by UES, are prepared for the sole and exclusive use of Client, and may not be given to any other party or used or relied upon by any such party without the express written consent of UES.

SECTION 7: DISCOVERY OF UNANTICIPATED HAZARDOUS MATERIALS

- 7.1 Client warrants that a reasonable effort has been made to inform UES of known or suspected hazardous materials on or near the project site.
- 7.2 Under this agreement, the term hazardous materials include hazardous materials (40 CFR 172.01), hazardous wastes (40 CFR 261.2), hazardous substances (40 CFR 300.6), petroleum products, polychlorinated biphenyls, and asbestos.
- 7.3 Hazardous materials may exist at a site where there is no reason to believe they could or should be present. UES and Client agree that the discovery of unanticipated hazardous materials constitutes a changed condition mandating a renegotiation of the scope of work. UES and Client also agree that the discovery of unanticipated hazardous materials may make it necessary for UES to take immediate measures to protect health and safety. Client agrees to compensate UES for any equipment decontamination or other costs incident to the discovery of unanticipated hazardous waste.
- 7.4 UES agrees to notify Client when unanticipated hazardous materials or suspected hazardous materials are encountered. Client agrees to make any disclosures required by law to the appropriate governing agencies. Client also agrees to hold UES harmless for any and all consequences of disclosures made by UES which are required by governing law. In the event the project site is not owned by Client, Client recognizes that it is the Client's responsibility to inform the property owner of the discovery of unanticipated hazardous materials or suspected hazardous materials.
- 7.5 Notwithstanding any other provision of the Agreement, Client waives any claim against UES, and to the maximum extent permitted by law, agrees to defend, indemnify, and save UES harmless from any claim, liability, and/or defense costs for injury or loss arising from UES's discovery of unanticipated hazardous materials or suspected hazardous materials including any costs created by delay of the project and any cost associated with possible reduction of the property's value. Client will be responsible for ultimate disposal of any samples secured by UES which are found to be contaminated.

SECTION 8: RISK ALLOCATION

- 8.1 Client agrees that UES's liability for any damage on account of any breach of contract, error, omission or other professional negligence will be limited to a sum not to exceed \$50,000 or UES's fee, whichever is greater. If Client prefers to have higher limits on contractual or professional liability, UES agrees to increase the limits up to a maximum of \$1,000,000.00 upon Client's written request at the time of accepting our proposal provided that Client agrees to pay an additional consideration of four percent of the total fee, or \$400.00, whichever is greater. The additional charge for the higher liability limits is because of the greater risk assumed and is not strictly a charge for additional professional liability insurance.

SECTION 9: INSURANCE

- 9.1 UES represents and warrants that it and its agents, staff and consultants employed by it, is and are protected by worker's compensation insurance and that UES has such coverage under public liability and property damage insurance policies which UES deems to be adequate. Certificates for all such policies of insurance shall be provided to Client upon request in writing. Within the limits and conditions of such insurance, UES agrees to indemnify and save Client harmless from and against loss, damage, or liability arising from negligent acts by UES, its agents, staff, and consultants employed by it. UES shall not be responsible for any loss, damage or liability beyond the amounts, limits, and conditions of such insurance or the limits described in Section 8, whichever is less. The Client agrees to defend, indemnify and save UES harmless for loss, damage or liability arising from acts by Client, Client's agent, staff, and other UESs employed by Client.

SECTION 10: DISPUTE RESOLUTION

- 10.1 All claims, disputes, and other matters in controversy between UES and Client arising out of or in any way related to this Agreement will be submitted to alternative dispute resolution (ADR) such as mediation or arbitration, before and as a condition precedent to other remedies provided by law, including the commencement of litigation.
- 10.2 If a dispute arises related to the services provided under this Agreement and that dispute requires litigation instead of ADR as provided above, then:
- the claim will be brought and tried in judicial jurisdiction of the court of the county where UES's principal place of business is located and Client waives the right to remove the action to any other county or judicial jurisdiction, and
 - The prevailing party will be entitled to recovery of all reasonable costs incurred, including staff time, court costs, attorneys' fees, and other claim related expenses.

SECTION 11: TERMINATION

- 11.1 This agreement may be terminated by either party upon seven (7) days written notice in the event of substantial failure by the other party to perform in accordance with the terms hereof. Such termination shall not be effective if that substantial failure has been remedied before expiration of the period specified in the written notice. In the event of termination, UES shall be paid for services performed to the termination notice date plus reasonable termination expenses.
- 11.2 In the event of termination, or suspension for more than three (3) months, prior to completion of all reports contemplated by the Agreement, UES may complete such analyses and records as are necessary to complete its files and may also complete a report on the services performed to the date of notice of termination or suspension. The expense of termination or suspension shall include all direct costs of UES in completing such analyses, records and reports.

SECTION 12: ASSIGNS

- 12.1 Neither the Client nor UES may delegate, assign, sublet or transfer their duties or interest in this Agreement without the written consent of the other party.

SECTION 13. GOVERNING LAW AND SURVIVAL

- 13.1 The laws of the State of Florida will govern the validity of these Terms, their interpretation and performance.
- 13.2 If any of the provisions contained in this Agreement are held illegal, invalid, or unenforceable, the enforceability of the remaining provisions will not be impaired. Limitations of liability and indemnities will survive termination of this Agreement for any cause.

SECTION 14. INTEGRATION CLAUSE

- 14.1 This Agreement represents and contains the entire and only agreement and understanding among the parties with respect to the subject matter of this Agreement, and supersedes any and all prior and contemporaneous oral and written agreements, understandings, representations, inducements, promises, warranties, and conditions among the parties. No agreement, understanding, representation, inducement, promise, warranty, or condition of any kind with respect to the subject matter of this Agreement shall be relied upon by the parties unless expressly incorporated herein.
- 14.2 This Agreement may not be amended or modified except by an agreement in writing signed by the party against whom the enforcement of any modification or amendment is sought.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

AST: Shortly after the Sept 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the AST list, as provided by EDR, has revealed that there are 2 AST sites within approximately 0.25 miles of the target property.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

- . Waste code: D001
- . Waste name: IGNITABLE WASTE

- . Waste code: D004
- . Waste name: ARSENIC

- . Waste code: D007
- . Waste name: CHROMIUM

- . Waste code: F035
- . Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

Corrective Action Summary:

- Event date: 2001-09-30 00:00:00.0
- Event: USER DEFINED EVENT

- Event date: 2011-08-29 00:00:00.0
- Event: CA PRIORITIZATION-HIGH CA PRIORITY

- Event date: 2011-09-28 00:00:00.0
- Event: RFA COMPLETED

Facility Has Received Notices of Violations:

- Regulation violated: GPT:262.34(a)(2)/(3)
- Area of violation: Generators - Pre-transport
- Date violation determined: 1999-09-23 00:00:00.0

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

- . Waste code: D001
- . Waste name: IGNITABLE WASTE

- . Waste code: D004
- . Waste name: ARSENIC

- . Waste code: D007
- . Waste name: CHROMIUM

- . Waste code: F035
- . Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

Description: The 3,294.85 acre site is located in Lee County, approximately three miles south of the City of Fort Myers, with approximate coordinates of 263512 North and 815152 West.

History: The site was acquired between February 19, 1942 and January 16, 1945 for an Army fortification which was developed and known as Page Field Military Reservation and Fort Myers Army Airfield. The site was utilized as an air field, flight training, and gunnery range by the Army Air Forces. Major construction occurred during 1943 and 1944. The site improvements consisted of 40 barracks, 28 officers quarters, 10 administration buildings, recreational facilities, warehouses, pyrotechnic magazines, rifle range, pistol range, submachine gun range, hangars, runways, and associated support facilities. The land was all disposed of in 1946, and leased land was returned to the then current owner, and a portion (859.02 acres) was transferred to the City of Fort Myers for use as a public airport. This property contains 5 MRS Pistol Range 1, Firing In Butt, Skeet Range 1, Skeet Range 2, and the Small Arms Range Complex (Including Pistol Range 2, Machine Gun Range and Rifle Range).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

Next Scheduled EDR Contact: 07/13/2020
Data Release Frequency: Semi-Annually

BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

Date of Government Version: 11/07/2019

BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Southwest Map:	5655866 GREENACRES CITY, FL
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
1201920175B	FEMA Q3 Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

1201930005A	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LAKE WORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

3G	1/2 - 1 Mile SSE	SE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Myakka

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6
2	5 inches	20 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6
3	20 inches	35 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6
4	35 inches	79 inches	sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6

Soil Map ID: 2

Soil Component Name: Immokalee

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

1	0 inches	1 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 3.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	1 inches	18 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 3.6
3	18 inches	35 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 3.6
4	35 inches	72 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 3.6

Soil Map ID: 4

Soil Component Name: Myakka

Soil Surface Texture: fine sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6
2	5 inches	20 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6
3	20 inches	35 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6
4	35 inches	79 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6.5 Min: 3.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Certified Sanborn® Map Report

05/05/20

Site Name:

S. Haverhill Road
S. Haverhill Road
Lake Worth, FL 33463
EDR Inquiry # 6056380.3

Client Name:

Universal Engineering Sciences
1818 7th Ave North
Lake Worth, FL 33461
Contact: Rachel Dobrilovic

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Universal Engineering Sciences were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 3524-4F8C-9B1B
PO # 20-300
Project NA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 3524-4F8C-9B1B

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Universal Engineering Sciences (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX J

ASTM E1527-13 USER INTERVIEW RECORD

Project: Palm Beach Christian Preparatory School Inc
Date: 5-11-2020
Completed By: Sofia Sneed
Relationship to Project: Co-owner

Comment: The *User* (client) must provide the following information (if available) to the *Environmental Professional*. Information provided below is intended to assist the *Environmental Professional* in gathering information from the *User* that may be material to identifying *recognized environmental* conditions in connection with the subject property. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Please provide additional details if the answer is "yes" to any of the questions. If answer is "no" to any of the questions, please indicate what information the answer was based on.

1. Did a search of *recorded land title records* (or judicial records where appropriate) identify that environmental liens (ELs) filed or recorded against the *property* under federal, tribal, state, or local law (40 CFR 312.26)? No Yes (if yes, please describe)

2. Did a search of *recorded land title records* (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state, or local law (40 CFR 312.26)? No Yes (if yes, please describe)

3. Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business (40 CFR 312.28)? No Yes (if yes, please describe)

The former owners were in the process of opening a church. We are going to have a private all boys H.S. as well as a chapel. Neighboring properties are both public schools.

4. Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property* (40 CFR 312.29)? No Yes (if yes, please describe)

ASTM E1527-13 USER INTERVIEW RECORD

5. Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *Environmental Professional* to identify conditions indicative of releases or threatened releases (40 CFR 312.30)? No Yes (if yes, please describe)

a.) Do you know any of the past uses of the *property*? No Yes (if yes, please describe)

Purchased from previous owner intending to open up a church.

b.) Do you know of specific chemicals that are present or once were present at the *property*?
No Yes (if yes, please describe)

c.) Do you know of spills or other chemical releases that have taken place at the *property*?
No Yes (if yes, please describe)

d.) Do you know of any environmental cleanups that have taken place at the *property*?
No Yes (if yes, please describe)

e) Can you provide contact information for any of the past owners or occupants of the subject property? No Yes (if yes, please describe)

6. Based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of releases at the *property* (40 CFR 312.31)?
No Yes (if yes, please describe)

7. Are you aware of any other knowledge or experience with the *property* that may be pertinent to the *Environmental Professional*, such as copies of any available prior *environmental site assessment reports*, documents (ex: Material Safety Data Sheets, environmental permits, geotechnical evaluations, safety plans, preparedness and prevention plans, spill prevention, countermeasure, and control plans, Community Right-to-Know Plan, risk assessments, recorded activity use limitations, hazardous waste generator notices/reports, hydrogeologic reports), correspondence, etc., concerning the *property* and its environmental condition. If so, can you provide a copy?
No Yes (if yes, please describe)

ASTM E1527-13 USER INTERVIEW RECORD

8. Please provide all entities that will need reliance on the Phase I ESA.

Dynamic Engineering Consultants Mike Miles P.E. 561-921-8570

ALSO NEEDED:

(a) the reason why the Phase I ESA is required;

Palm Beach County Water Utilities Dept. is requesting it before they can issue their water/sewer permit approval.

(b) the type of property and type of property transaction, for example, sale, purchase, refinance, foreclosure, exchange, etc.;

Residential property converting to commercial & church zone

(c) the site address for the property, site location map, tax parcel identification numbers;

4900 and 4901 52nd Ct N; 5234 and 5208 Haverhill Rd
Grenada, FL 33463

(d) the scope of services desired for the Phase I ESA (including whether any parties to the property transaction may have a required standard scope of services or whether any considerations beyond the requirements of Practice E 1527 are to be considered);

Follow the standard practices of E1527.

(e) identification of the site contact and how the contact can be reached;

Sofia Shead 561-396-0893

(f) any special terms and conditions which must be agreed upon by the Environmental Professional

None

SIGNATURE

It is understood that the information presented in this form is an integral part of the Phase I ESA process and that UES will evaluate and rely on this information in the development of the final Phase I ESA report.

Certifications

- OSHA 40-Hour HAZWOPER

Rachel Dobrilovic

Environmental Specialist

Rachel Dobrilovic specializes in performing Phase I ESA's for due-diligence and Phase II Environmental Site Assessments. Rachel field investigations include groundwater and soil contamination generated by various commercial and industrial sources such as gasoline stations, dry cleaning facilities, vehicle maintenance facilities, golf courses and agricultural lands. Her experience covers supervising of drilling operations, source removal, and underground storage tank removal. Rachel also has a thorough working knowledge of soil and groundwater sampling methodology pursuant to the Florida Department of Environmental Protection Standard Operating Procedures (FDEP SOPs) and American Society for Testing and Materials (ASTM), monitoring well installation location and oversight, chain of custody record keeping, data management and interpretation, and report preparation.

PROJECT EXPERIENCE

Various Residential & Commercial Properties

Various Clients, Florida

Rachel has been involved with the completion of Phase I Environmental Site Assessments throughout South Florida. The Phase I ESA's were performed in general accordance with the American Society of Testing of Materials (ASTM) Standard Practice for the evaluation of environmental risk by determining the potential of recognized environmental concerns (RECs) associated with the subject property and surrounding properties. She has conducted field reconnaissance, reviewed regulatory files and reviewed historical documents. Project sites included shopping centers, automotive repair, commercial office buildings, residential neighborhoods, retail gasoline stations, and undeveloped properties. The size of the properties ranged from less than one acre to over 500 acres of land.

Proposed Wawa Gas Stations

South Florida

Rachel has conducted Phase I & II Environmental Site Assessments, soil/ groundwater sampling, and clean fill assessments at various sites during pre-acquisition assessments. She has collected and logged subsurface samples that were field screened for the presence of volatile

organic compounds, supervised drilling operations of onsite monitoring wells, and have performed the subsequent groundwater sampling.

Active Metals Recycling Center

Pompano Beach, Florida

Rachel conducted groundwater monitoring at an active metals recycling center for semi-annual sampling for natural attenuation monitoring.

All Aboard Florida

South Florida

Rachel has completed a comprehensive turbidity study at various sites ranging from Palm Beach County to Miami-Dade County.

Riverland McDonalds

Fort Lauderdale, Florida

Rachel conducted groundwater monitoring at a former gas station for quarterly natural attenuation monitoring.

Former Railway

West Palm Beach, Florida

Rachel has collected and logged subsurface samples that were along an existing railroad spur, supervised impacted source removal and excavation of railroad ties. Over 400 tons of impacted soil was excavated and disposed by a licensed waste disposal facility.

Former Retail Gasoline Station

Fort Lauderdale, Florida

Rachel conducted Phase II Environmental Site Assessments, source removal, and groundwater monitoring at a former gas station during construction for a commercial development company. A total of five UST's were removed and over 78 tons of impacted soil was excavated and disposed by a licensed waste disposal facility. Rachel has collected and logged subsurface soil samples, supervised drilling operations for the installation and retrofitting of several monitor wells, and has performed the subsequent groundwater monitoring for petroleum impacted area.

Certifications

- OSHA 40-Hour Health and Safety Training for Hazardous Waste Site Investigation
- NIOSH 582E
- LPA-1 XRF Spectrum Analyzer Operator/ Radiation Safety Training
- CPN Radiation Safety Officer Training

James E. Adams, REPA

Project Manager

James has 24 years of experience in project management and field experience for projects involving Site Investigations, Contamination Assessments, Phase I and II Environmental Site Assessments, Asbestos Building Inspections, Asbestos Air Monitoring Projects, and Management and Planning of Asbestos Abatement Projects. His experience covers field activities, report generation, radiation safety, AutoCAD drafting, proposal preparation, cost estimates, billing, supervising drilling operations, health and safety plans and environmental marketing strategy.

PROJECT EXPERIENCE

Miami International Airport, Runway Expansion Project

Miami, Florida

James supervised drilling operations and field activities for soil borings along the proposed runway expansion. The field operations included collection of soil samples and field screening for petroleum hydrocarbons.

Miami-Dade County Aviation Department Tenant Compliance

Miami, Florida

James conducted over fifteen Tenant Compliance Audits for various business located at the Miami International Airport. The work involved detailed site inspections regarding compliance auditing. In addition, James completed over fifteen Due Diligence Audits for various tenants which involved review of regulatory compliance files, detailed site inspections, interviews of key site personnel, and all related report generation.

Lumber Yard Assessment

Coral Gables, Florida

James assisted with field operations for a contamination assessment at a lumber yard in Coral Gables, Florida, during pre-acquisition assessment for an anonymous client. The assessment targeted heavy metal impacts to soil and groundwater, specifically, arsenic. Over 200 discrete-interval soil samples were collected and analyzed over a seven-acre parcel.

The Contamination Assessment Report was reviewed and approved with a "No Further Action" determination, which was amended with specific conditions.

Parks Facilities

Brevard County, Florida

James performed an assessment of various parks throughout Brevard County, Florida, for the potential of arsenic in soil related to the presence of lumber treated with Copper Chromate Arsenic (CCA).

Former McCotter Ford

Titusville, Florida

James conducted source removal/site assessment at a former automotive dealership in Titusville, Florida. The project included the removal and disposal of approximately 3,000 tons of petroleum-impacted soil and approximately 1,000 gallons of petroleum-impacted groundwater.

Former Luis & Son Auto Repair

Miami, Florida

James conducted Phase I & II Environmental Site Assessments, source removal/site assessment and quarterly groundwater monitoring at a former automotive repair facility during pre-acquisition assessment for a residential development company. Over 2,000 tons of impacted soil were excavated and disposed by a licensed waste disposal facility. James has supervised drilling operations for the installation, abandonment and retrofitting of several

monitor wells, and has managed the subsequent quarterly groundwater monitoring for elevated heavy metal contamination, specifically, chromium.

Phase I & II ESAs, Anonymous Client

Coral Gables, Florida

James was responsible for conducting various Phase I and II environmental site assessments for a large, national development firm throughout South Florida. James performed approximately 15 Phase I environmental assessments for this client in Coral Gables alone.

Phase I & II ESAs, Dodgertown

Vero Beach, Florida

James conducted Phase I & II environmental assessments related to the acquisition of a former golf course for the expansion of Dodgertown, a spring training/minor league baseball facility located in Vero Beach, Florida.

Dry Clean USA

Plantation, Florida

James performed field activities related to the groundwater contamination at an existing dry cleaning facility in Plantation, Florida. The activities included surveying top-of-casings for monitor wells to determine groundwater flow, collection of quality groundwater samples for quarterly sampling events, performing soil borings and collection of soil samples, as well as acting as point-of-contact for Dry Clean USA and their neighboring tenants.

Former Cleaning Zone

Fort Lauderdale, Florida

James performed field activities related to the groundwater contamination at a former dry cleaning facility in Fort Lauderdale, Florida. The activities included surveying top-of-casings for monitor wells to determine groundwater flow, installation of micro monitor wells, collection of quality groundwater samples for quarterly sampling events, as well as all report generation. The potential environmental risks concerned both soil and groundwater contamination from past on-site and adjacent property, commercial activities.

Hyatt Resorts, Cerromar Beach and Dorado Beach Resorts and Country Club

Puerto Rico

James was responsible for conducting extensive asbestos building inspections of the Cerromar Beach and Dorado Beach Resorts and Country Club for Hyatt Resorts.

Bonaventure Resort & Spa Hotel

Weston, Florida

James was responsible for performing a pre-acquisition indoor air quality study and asbestos building inspection for a large resort and spa located in Weston, Florida.

North Broward Hospital District

Broward County, Florida

James conducted over 30 asbestos-containing material surveys and asbestos air monitoring projects for various hospitals in Broward County, Florida. James was the point-of-contact for the hospital administration. He performed building inspections, air sampling, abatement planning, contractor bid meetings, and all report generation.

Melbourne C&D Landfill

Melbourne, Florida

James conducted bi-annual groundwater monitoring at the Melbourne C&D Landfill, in accordance with Florida Department of Environmental Protection's Solid Waste Permit requirements.

Kennedy Space Center

Cape Canaveral, Florida

James has performed several asbestos and lead-based paint surveys at multiple buildings for various clients at the Kennedy Space Center. The surveys were conducted in connection to proposed renovations/demolitions.

Proposed Monorail System, Kennedy Space Center

Cape Canaveral, Florida

James performed a preliminary environmental assessment related for pre-development purposes relating to an anonymous client's design plans for the installation of an approximate 10-mile Monorail Transportation System. The assessment included interviews with key site personnel, review of available regulatory records, historical documents, aerial photographs, endangered flora/fauna, habitats and wildlife sanctuaries.

Former Hillman Building

Miami, Florida

James conducted several asbestos inspections for the proposed renovation of the Hillman Building located in downtown Miami, Florida prior to the occupation of Miami-Dade Police Department. In addition to the inspections, James supervised asbestos abatement operations and performed asbestos air monitoring over a three month period.

Immigration Courthouse

Miami, Florida

James supervised an asbestos abatement relating to an exterior remodeling project which involved removing marble wall panels and transite boards on all 13 floors of the Immigration Courthouse building located in Miami, Florida. James performed asbestos air monitoring and served as the point-of-contact between construction and courthouse personnel.

Storage Tank Closure Assessments and Reporting, Various Clients

Florida

James was responsible for performing storage tank closure assessment and reporting, which included the excavation and removal of storage tanks for various clients throughout the state of Florida.

Stormwater Filtration Testing

Cocoa Beach, Florida
