

Best to avoid where possible their scrutiny.

Alternative 1.

POT - PA already has a medical Marijuana program which has already earned a lot of money for the State, therefore they can easily transition in Adult Marijuana. The Medical Legislation was passed by majority republican legislature. However, they no longer have the Governors office, nor the two houses majority they had when Medical was passed. It is currently dominated by outside national firms.

Now the Democrats who are in favor of Adult Recreational Marijuana are in the majority and have proposed several bills that favor of adopting a bill that will correct some current inequities and raise more than \$250,000,000 annually and prevent the nation firms from monopolizing the market.

One provision in the proposed bills is that small hemp farmers automatically receive conditional licenses to grow and distribute the Marijuana. Since I have been a Hemp Farmer on my farm for 5 consecutive years I would automatically receive conditional licenses. Another provision in the legislation has barred municipalities from barring what the legislation has allowed.

This transition from Hemp to Adult use Marijuana would not require a zoning decision by the township.
