**Re: Site History Summary**

Willis Point South Exxon 47605, PO Box 584, Yemassee, SC  
Hampton County  
UST Permit #04845  
Request for Site History Summary received August 30, 2021

Dear Mr. Everidge:

In response to your request for information about the environmental conditions associated with the referenced facility, the following is provided.

On January 25, 1991, a petroleum release was reported at the facility assigned the underground storage tank (UST) permit number referenced above. The UST Management Division (Division) issued a Conditional No Further Action of this release on May 31, 2001 indicating that chemicals of concern were below site-specific target levels, and no further work is anticipated under this release at this time.

According to Division records, four (4) USTs were registered with the South Carolina Department of Health and Environmental Control (DHEC). USTs 1 through 4 are registered to Exxon Mobil and removed August 24, 1994.

The SUPERB Act does not preclude or restrict the use or redevelopment of property on which a petroleum release has occurred. However, DHEC advises against installing a water supply well for drinking, cooking, or bathing purposes until rehabilitation activities are completed to achieve no further action status or as otherwise approved by DHEC.

To obtain a better understanding of the statutory and regulatory framework regarding releases and/or UST systems, please use the following links:
