Re: **Phase I Environmental Site Assessment**
Aju Motors
3530 West Olympic Boulevard
Los Angeles, California 90019
EDI Project No. 222-0610

Dear Ms. Chung:

Pursuant to our agreement dated June 23, 2022, EDI Consultants, Inc. ("EDI") has conducted a Phase I Environmental Site Assessment (ESA) of the above referenced property conforming to the scope and limitations of ASTM Standard E 1527-21. The findings of this assessment are based upon a visual reconnaissance of the Subject Property, interviews with relevant personnel, limited observations of surrounding properties, and a records review including regulatory databases and historical use information. Any exception to, or deletions from, this practice are described in Sections 2.0-2.4 of this report.

The purpose of this Report is to assist Premier America Credit Union in its underwriting of a proposed mortgage loan on the Subject Property described herein.

This report was prepared for and may be relied upon by Premier America Credit Union and its participants, lenders, affiliates, successors, and assigns (collectively, "The Client") with respect to any loan(s) placed on the property described in the report. Any rating agency, issuer or purchaser of any security collateralized or otherwise backed by such loan(s), any servicer (and their collective successors and assigns), any underwriter co-underwriting any such securities, and any institutional provider(s) of any liquidity or credit support for such financings may also rely upon the report. The Client may, at its option, elect to include the report in its entirety in the offering memorandum or other disclosure materials relating to the Securitization (as defined below). We also consent to the inclusion of this report in its entirety in any form, whether in paper or digital format, including any electronic media or the internet, in any Prospectus Supplement or other offering document relating to any "Securitization" (defined as an offering of debt securities that, as applicable, are registered with the Securities Exchange Commission pursuant to the Securities Act of 1933, as amended [the "Act"], or are privately placed pursuant to an exemption from the Act, in which the property reported upon may be part of a pool of properties owned by various non-affiliated owners collateralizing such offering) and the filing, if applicable, and the dissemination thereof, and we consent to the reference to our firm under the caption "Experts" in such Prospectus Supplement or other offering document, at The Client's discretion.

CERTIFICATIONS, LIMITATIONS AND STATEMENT OF INDEPENDENCE

This report has been prepared by the staff of EDI for Premier America Credit Union under the professional supervision of the principal and/or senior staff whose seal(s) and signatures appear hereon. Neither EDI, nor any staff member, has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity that owns, leases, or occupies the subject or surrounding properties or that may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved.

The information contained in this report has received appropriate technical review and approval. The conclusions represent professional judgments and are founded upon the findings of the assessments identified in the report and the interpretation of such data based on our experience and expertise according to the existing standard of care. No other warranty or limitation exists, either expressed or implied.

The report was prepared in accordance with Premier America Credit Union's Phase I Environmental Site Assessment scope of work and the scope and limitations of ASTM Standard E 1527-21 for the use and benefit of Premier America Credit Union, its successors, and assignees. It is based, in part, upon documents, writings, and information owned, possessed, or secured by Premier America Credit Union. Neither this report, nor any information contained herein shall be used or relied upon for any purpose by any other person or entity without the express written permission of Premier America Credit Union.

Report prepared by:

EDI Consultants

A handwritten signature in black ink, appearing to read "D. Domingo", is positioned above the printed name.

1.0 INTRODUCTION

EDI Consultants, Inc. ("EDI") conducted a Phase I Environmental Site Assessment (ESA) for the Aju Motors, located at 3530 West Olympic Boulevard, Los Angeles, California, on July 1, 2022 utilizing currently accepted ESA industry standards in accordance with ASTM E 1527-21, *Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process* and Premier America Credit Union's (PACU) Environmental Due Diligence requirements. ASTM Standard E-1527-21 constitutes "*all appropriate inquiry*" into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B). Exceptions to or deletions from the scope of work are described in [Section 9.4](#).

1.1 OPINIONS AND CONCLUSIONS

1.1.1 RECOGNIZED ENVIRONMENTAL CONDITIONS (RECs)

The following known Recognized Environmental Conditions (RECs) were identified during the course of this assessment:

- **Former On-site Gasoline Service Station**

Based on our review, the Subject Property was formerly improved with a gasoline service station, "Texaco Service Station", from at least 1945 to 1968. EDI submitted a FOIA request to the Los Angeles Fire Department for information regarding storage tanks, chemical spills, and other potential environmental concerns in connection with the Subject Property. As of the date of this *Report* EDI has not received a response to this inquiry. Although the UST(s) were likely removed circa 1970s, EDI notes that the removal of tanks during this era would not have required confirmation sampling including, but not limited to, assessment of soil vapors, as is currently required. Based on changes in environmental regulations since the removal of the UST, and the potential for an onsite vapor encroachment due to residual concentrations of gasoline constituents in soil possibly remaining at the site, the previous UST(s) represents a REC in connection with the Subject Property.

- **Former On-site Dry Cleaner**

The city directory listings indicate that a dry cleaning business, "SLOAN'S DRY CLEANERS & LAUNDRY" occupied the Subject Property between at least 1971 and 1981. No further information regarding this cleaners and laundry facility at the subject property was listed within the regulatory agencies or the regulatory database research. Dry cleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE), during the dry cleaning process. These solvents, even when properly stored and handled, can readily migrate into the subsurface as a result of small releases associated

with onsite operations. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information the presence of the historical dry cleaning business for a minimum of eleven years is considered a REC for the Subject Property.

1.1.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CRECs)

The assessment has revealed no evidence of known Controlled Recognized Environmental Conditions (CRECs) in connection with the Subject Property.

1.1.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HRECs)

The assessment has revealed no evidence of known Historical Recognized Environmental Conditions (HRECs) in connection with the Subject Property.

1.1.4 OTHER ENVIRONMENTAL CONSIDERATIONS (OECs)

No known Other Environmental Considerations (OECs) were identified during the course of this assessment.

1.1.5 De MINIMIS CONDITIONS

No known De Minimis Conditions were identified during the course of this assessment.

1.1.6 DATA GAPS

No significant data gaps were identified during the course of this assessment that would affect EDI's ability to identify RECs.

1.2 RECOMMENDATIONS

It is EDI's professional opinion that a Phase II subsurface investigation be conducted at the Subject Property to confirm or deny the presence of potential contamination as a result of former on-site gasoline service station and dry cleaning operations.

2.0 SITE DESCRIPTION OVERVIEW

A description of the key characteristics of the Subject Property is provided below. This description is derived from information provided by the User and information gathered during the site reconnaissance unless otherwise noted. Photographs of the Subject Property and adjacent properties are included in [Appendix A](#). A Site Location Map is included in [Appendix B](#).

2.1 SUBJECT PROPERTY

PROPERTY INFORMATION	
Property Name	Aju Motors
Address	3530 West Olympic Boulevard, Los Angeles, Los Angeles County, California
Subject Property Acreage	0.236
Current Owner	Kevin Brent Co Tr Et Al, Edwin R Bernstein Trust and Michelle Neyer
Current Occupant(s)	Aju Motors
Number of Parcels	One (1)
Tax ID / Parcel #(s)	5081-018-025
Legal Description	*TR=2000*VAC ST ADJ ON E AND (EX OF ST) LOT 333

Figure 1 - Site Location Map
3530 W Olympic Blvd., Los Angeles, CA 90019
EDI Project No.: 222-0610

2.1.1 CURRENT USE OF THE PROPERTY

A description of the Subject Property and any building on it and a current tenant list with a short description of their operations is provided below:

PROPERTY FEATURES AND IMPROVEMENTS	
Shape of Parcel(s)	Irregular
Usage	Used car dealership
Number of Buildings	One (1)
Stories	Single
Construction Date	1941
Square Footage	1,463
Basement/Slab-on-Grade	Slab-on-Grade
Number of Units	One (1)
Elevators	N/A
Transformers	N/A
Emergency Generators	N/A
Other Improvements	N/A
Property Coverage	Concrete-paved parking areas

North elevation

South elevation

East elevation

West elevation

CURRENT TENANTS/ACTIVITIES	
Tenant Name	Tenant Activity
Aju Motors	Used car dealership

The current use of the Subject Property does not represent a potential environmental concern. Based on the operations conducted at the Subject, no environmental permits are reportedly required.

2.1.2 UTILITIES

SUBJECT PROPERTY UTILITIES	
Electricity	Southern California Edison
Water	Los Angeles Department of Water & Power
Sanitary Sewer	Los Angeles Department of Water & Power
Natural Gas	Southern California Gas Company
Solid Waste	Waste Management

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The following is a tabulation of surrounding property usage:

Direction	Adjoining Properties	Listed in Regulatory Database
North	Olympic Park's Liquor & Chung Kiwa restaurant – 3533 & 3545 West Olympic Boulevard	☐

Direction	Adjoining Properties	Listed in Regulatory Database
South	Dr.Bryan Kim's Dental Office – 1011 Arlington Avenue	☐
East	Kang Shin Yong CPA accountant office – 1017 South Wilton Place	☐
West	JP Aesthetics plastic surgery clinic – 3544 West Olympic Boulevard	✓

No adverse surficial environmental conditions were observed on the adjoining properties. Adjacent properties listed in the regulatory database(s), if any, are discussed in [Section 7.1.2](#).

North adjacent property - commercial - 3533
W Olympic

South adjacent property - commercial - 1011
Arlington Ave

East adjacent property - commercial- 1017 S
Wilton Pl

West adjacent property - commercial - 3544
W Olympic Blvd

3.0 USER PROVIDED INFORMATION

Pursuant to ASTM E 1527-21, EDI requested the following site information from Premier America Credit Union (User of this report).

Type of Information	User Provided	Issue Identified	Comments
Title Records	No		
Environmental Liens or Activity and Use Limitations	No		
Specialized Knowledge	No		
Commonly Known or Reasonably Ascertainable Information	No		
Valuation Reduction for Environmental Issues	No		
Previous Reports	No		
Owner, Property Manager, Occupant Information	Yes	No	Kevin Brent Co Tr Et Al, Edwin R Bernstein Trust and Michelle Neyer reportedly own and manage the Subject Property which is currently occupied by Aju Motors.
Reason for Performing the Phase I	Yes	No	This ESA was performed to permit the <i>User</i> to satisfy one of the requirements to qualify for the <i>innocent landowner, contiguous property owner, or bona fide prospective purchaser</i> limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the " <i>landowner liability protections</i> ," or " <i>LLPs</i> ").
ASTM User Questionnaire	No		
Other	No		

EDI considers the lack of title records, environmental liens, AULs, ASTM user questionnaires and owner questionnaires for this resource to be a data gap; however, based on other available resources for the property, the absence of these user-provided items does not represent a significant data gap for the Subject Property.

4.0 ENVIRONMENTAL SETTING

Information regarding hydrological conditions in the region was obtained from review of the following:

- United States Geological Survey (USGS) 7.5 Minute Topographic Map,
- United States Department of Agriculture (USDA) Soil Conservation reports,
- Physical Settings Report (ERIS)
- Site-specific reports,
- Ground water contour maps, and
- Local regulatory sources.

4.1 TOPOGRAPHY AND REGIONAL SURFACE WATER

TOPOGRAPHY AND REGIONAL SURFACE WATER	
Elevation (feet above mean sea level)	172.83 ft
Inferred Groundwater / Surface Water Gradient	South-southeast
Nearest Water Body	MacArthur Park Lake is located approximately 2.19-mi to the east of the Subject Property.
Source (USGS Topographic Quadrangle)	Hollywood, CA

4.2 GEOLOGY AND HYDROLOGY

GEOLOGY AND HYDROLOGY	
Geologic Formation / Province	Quaternary alluvium and marine deposits
Geologic Description	Alluvium, lake, playa, and terrace deposits; unconsolidated and semiconsolidated. Mostly nonmarine, but includes marine deposits near the coast.
Soil Type	No Digital Data Available
Soil Description	N/A
Groundwater Flow Direction	South-southeast

GEOLOGY AND HYDROLOGY	
Approximate Depth to Groundwater	According to information provided by the RWQCB's GeoTracker database, depth to groundwater for a former LUST case located at 3554 OLYMPIC BLVD W MID CITY, CA was recorded with water levels ranging from approximately 45 to 55 feet below ground surface (bgs).

4.3 OIL & GAS EXPLORATION

The on-site reconnaissance addressed oil and gas exploration at the Subject Property. No evidence of oil or gas wells or the drilling of oil and gas wells was observed on site. In addition, EDI's review of the Physical Setting Report data provided by ERIS did not depict any oil or gas wells on or in the immediate vicinity of the Subject Property.

5.0 HISTORICAL RECORDS REVIEW

EDI attempted to determine the history of the Subject Property and surrounding area to help identify past uses that may have resulted in one or more RECs at the Subject Property. Efforts were made to identify the uses of the Subject Property dating back to 1940 or first developed use.

5.1 HISTORICAL RECORDS SOURCES & AVAILABILITY

The table below summarizes the historical resources that were available for review:

	Aerial Photographs	Fire Insurance Maps	Local Street Directories	Topographic Maps

5.2 HISTORICAL RECORDS FINDINGS

5.2.1 PAST USES OF SUBJECT PROPERTY

Prior to construction of the existing improvements in 1988, the Subject Property was developed as a residential property from as far back as 1921 to 1938, followed by a gasoline service station from 1945 to 1968 and a drycleaner from 1971 to 1981. From 1985 to the present, the development and commercial retail and office use of the Subject Property has remained essentially unchanged.

The previous uses of the Subject Property are described in the table below in intervals where meaningful property changes were noted.

PAST USES OF SUBJECT PROPERTY		
Years	Historical Use	REC Identified

Based on our review, the Subject Property was formerly improved with a gasoline service station, "Texaco Service Station", from at least 1945 to 1968. EDI submitted a FOIA request to the Los Angeles Fire Department for information regarding storage tanks, chemical spills, and other potential environmental concerns in connection with the Subject Property. As of the date of this *Report* EDI has not received a response to this inquiry. Although the UST(s) were likely removed circa 1970s, EDI notes that the removal of tanks during this era would not include confirmation sampling including, but not limited to, assessment of soil vapors, as is currently required. Based on changes in environmental regulations since the removal of the UST, and the potential for an onsite vapor encroachment due to residual concentrations of gasoline constituents in soil possibly remaining at the site, the previous UST(s) represents a REC in connection with the Subject Property.

In addition, the city directory listings indicate that a dry cleaning business, "SLOAN'S DRY CLEANERS & LAUNDRY" occupied the Subject Property between at least 1971 and 1981. No further information regarding this cleaners and laundry facility at the subject property was listed within the regulatory agencies or the regulatory database research. Dry cleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE), during the dry cleaning process. These solvents, even when properly stored and handled, can readily migrate into the subsurface as a result of small releases associated with onsite operations. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information the presence of the historical dry cleaning business for a minimum of eleven years is considered a REC for the Subject Property.

5.2.2 PAST USES OF ADJOINING PROPERTIES

The previous uses of the adjoining properties which warrant mention are described in the table below.

6.0 SUBJECT PROPERTY RECONNAISSANCE

As part of the site reconnaissance, EDI looked for evidence of the presence of hazardous substances used, stored, or discarded at and near the Subject Property. A summary of the site reconnaissance is provided below. Locations of pertinent observations are depicted on the figures provided in the appendices of this report. Photographs of pertinent findings and features observed during the site reconnaissance are provided in [Appendix A](#) of this report.

6.1 METHODOLOGY & LIMITATIONS

The Subject Property site reconnaissance was conducted in a systematic manner focusing initially on the exterior, which was surveyed in a grid pattern. A representative portion of the Subject Property's interior spaces were also surveyed in a systematic manner. Where access to portions of the Subject Property or to structures on the Subject Property was unavailable or limited (i.e. due to weather conditions), EDI renders no opinion as to the presence of petroleum products or hazardous substances in that portion of the Subject Property or structure. In addition, EDI renders no opinion as to the presence of, or indirect evidence relating to, petroleum products or hazardous substances where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

The following spaces were visually and physically observed and when reasonably accessible:

- Subject Property interiors
- exteriors
- mechanical
- electrical rooms
- adjoining and surrounding properties

There were no notable portions of the Subject Property excluded from this survey.

Site Reconnaissance Date	July 1, 2022
Assessor	Sarah Sen
Weather	75° Fahrenheit
Limiting Conditions	None
Key Site Contact(s); Title	Ron Balys; Broker

A Pre-Survey Questionnaire (PSQ) to be filled out and returned to EDI by someone knowledgeable about the site was provided to Ron Balys; however, it has not been returned as of the writing of this report. A copy of the blank PSQ is provided in Appendix H. EDI considers the

lack of the completed PSQ for this resource to be a data gap; however, based on other available resources for the property, the absence of the PSQ does not represent a significant data gap for the Subject Property.

6.2 INTERVIEWS

The following information was provided by individuals contacted by EDI in connection with the Subject Property. Findings from these interviews are discussed in the appropriate sections in this report.

INTERVIEW COMMENTS		
Contact	Relation to Subject Property	Details of Conversations
Ron Balys	Broker	Mr. Balys escorted EDI throughout the property. He was unaware of any significant leaks, spills or releases on the Subject Property. He mentioned that the cars are not serviced on site and that they are washed with basic cleaners and water.

6.3 OBSERVATIONS

The following tables summarize items on which the survey of interior and exterior areas of the Subject Property focused. If noted, the item is discussed in detail in Sections below:

Item	Noted- Interior	Noted - Exterior	REC Identified
Processes that generate petroleum products or hazardous substances	☐	☐	☐
Unusual odors	☐	☐	☐
Pools of liquid	☐	☐	☐
Drums, Containers ≥5 gallons	☐	☐	☐
Corrosion or Pitting	☐	☐	☐
Sumps or Trench drains	☐	☐	☐
Oil-containing equipment	☐	☐	☐
Underground Storage Tanks (USTs)	☐	☐	☐

Item	Noted- Interior	Noted - Exterior	REC Identified
Aboveground Storage Tanks (ASTs)	☐	☐	☐
Areas of asphalt patch or surface depressions	☐	☐	☐
Stained soil or pavement	☐	☐	☐
Stressed vegetation	☐	☐	☐
Fill material of questionable origin/ Piles	☐	☐	☐
Clarifier/Wastewater	☐	☐	☐
Monitoring Wells	☐	☐	☐
Catch basins or dry wells	☐	☐	☐
Septic systems	☐	☐	☐
Wetlands	☐	☐	☐
On-site Water Well	☐	☐	☐
Other	☐	☐	☐

6.4 VAPOR ENCROACHMENT CONDITION

EDI has conducted a Vapor Encroachment Screen (VES) by evaluating historic and regulatory record sources along with soil, topographic, and groundwater data in the vicinity of the Property. The purpose of the VES is to determine the likelihood that Vapor Encroachment Conditions (VECs) exist at the Property. It should be noted that this VES was not conducted in full compliance with ASTM E2600-15; rather, this VES is the equivalent of a Tier 1 screening. Consideration of vapor encroachment consists of reviewing available information and use of professional judgment in determining 1) whether contamination is suspected in the soil and/or groundwater at, or near, the Property, and 2) whether identified contamination is suspected to exist within a 'Critical Distance' from the Property.

"Critical Distances", as defined in ASTM E2600-15 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, refer to the maximum distances at which vapor encroachment may occur. These distances vary depending on topographic and hydrologic gradient, width of the contaminant plume, and type of contaminant known, or suspected, to exist. Generally, Critical Distances are 100 feet for non-petroleum contaminants of concern (COCs) and 30 feet for dissolved petroleum COCs. If a facility is beyond the critical distance, it is highly unlikely that a VEC exists. Consideration of topographic gradient is key to

defining the Areas of Concern (AOCs) within which Critical Distances are applied. When plume data is not available, AOCs are used in lieu of Critical Distance to determine whether a VEC exists or not. According to ASTM E2600, the AOCs for these critical distances are as follows:

- 1,760 feet (1/3 mile) for contamination located up-gradient of the Property, except for dissolved petroleum hydrocarbons, which have a distance of 528 feet (1/10 mile),
- 365 feet for contamination located cross-gradient of the Property,
- 100 feet for contamination located down-gradient of the Property, with the exception of dissolved petroleum hydrocarbons, which have a distance of 30 feet. If non-aqueous phase petroleum hydrocarbons (LNAPL) are present, the 100-foot distance is utilized.

In defining a standard of good commercial and customary practice for determining a VEC on a parcel of property, the goal of the process established by this practice is to identify whether or not a VEC exists or is likely to exist on the property. The term VEC means the presence or likely presence of any COC in the indoor air environment of existing or planned structures on a property caused by the release of vapor from contaminated soil or groundwater either on the property or within close proximity to the property, at a concentration that presents or may present an unacceptable health risk to occupants. The term is not intended to include de minimis conditions that do not normally represent an unacceptable health risk to occupants and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be de minimis does not represent a VEC.

In EDI's professional opinion, none of the adjacent sites listed in the databases reviewed pose a significant threat to the Subject Property based on one or more of the following rationale: 1) there is no indication of a release at the respective sites, 2) a release has occurred but the medium affected was the soil only and the site is beyond the Critical Distance, and 3) the site location and/or plume of contamination is downgradient and in excess of the Critical Distance from the Subject Property. Thus, a VEC can be ruled out because a VEC is not suspected to exist at the Subject Property. In addition, potential exposure to a VEC, should it exist, is further reduced by the presence of structures and pavement at the site. Based on the foregoing, no further action is warranted at this time with respect to a potential VEC from an adjacent property.

Based on our review, the Subject Property was formerly improved with a gasoline service station, "Texaco Service Station", from at least 1945 to 1968. EDI submitted a FOIA request to the Los Angeles Fire Department for information regarding storage tanks, chemical spills, and other potential environmental concerns in connection with the Subject Property. As of the date of this *Report* EDI has not received a response to this inquiry. Although the UST(s) were likely removed circa 1970s, EDI notes that the removal of tanks during this era would not include confirmation sampling including, but not limited to, assessment of soil vapors, as is currently required. Based on changes in environmental regulations since the removal of the UST, and the potential for an onsite vapor encroachment due to residual concentrations of gasoline constituents in soil possibly remaining at the site, the previous UST(s) represents a REC in connection with the Subject Property.

In addition, the city directory listings indicate that a dry cleaning business, "SLOAN'S DRY CLEANERS & LAUNDRY" occupied the Subject Property between at least 1971 and 1981. No further information regarding this cleaners and laundry facility at the subject property was listed within the regulatory agencies or the regulatory database research. Dry cleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE), during the dry cleaning process. These solvents, even when properly stored and handled, can readily migrate into the subsurface as a result of small releases associated with onsite operations. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. Based on this information the presence of the historical dry cleaning business for a minimum of eleven years is considered a REC for the Subject Property.

6.5 NON-ASTM STANDARD OBSERVATIONS

6.5.1 ASBESTOS CONTAINING MATERIAL (ACM)

The use of asbestos in many building products was banned by the U.S. Environmental Protection Agency (EPA) by the late 1970s. In 1989, EPA issued a ruling prohibiting the manufacturing, importation, processing, and distribution of most asbestos containing products. This rule, known as the Ban & Phase-Out Rule, would have effectively banned the use of nearly 95% of all asbestos products used in the United States. However, the U.S. 5th Circuit Court of Appeals vacated and remanded most of the Ban and Phase Out Rule in October 1991. Due to this court decision, many asbestos containing product categories not previously banned (prior to 1989) may still be in use today. Among these common material types found in buildings are floor tile and roofing materials.

Asbestos-containing material (ACM) represents a concern when it is subject to damage that results in the release of fibers. Friable ACM, which can be crumbled by hand pressure and is therefore susceptible to damage, is of particular concern. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition or other activities.

No friable ACMs were identified. However, based on the Subject's age, the Subject's non-friable joint compound, construction mastics and wallboard assemblies may contain asbestos. Since these non-friable materials are in good condition and the potential for fiber release is low, no further action is recommended at this time, other than maintaining the materials in good condition. However, in the event that building maintenance renovation, or demolition require the removal or disturbance of the suspect ACM, EDI recommends that the non-friable organically bound materials be characterized for asbestos by transmission electron microscopy, a reliable method for detecting asbestos in non-friable organically bound materials. Other suspect materials can be analyzed via polarized light microscopy. All activities involving ACM should be conducted in accordance with governmental regulations.

6.5.2 LEAD-BASED PAINT (LBP)

LBP is paint with a lead concentration greater than 5,000 parts per million (ppm) as defined by the EPA. LBP may be an environmental concern in residential properties based on the condition and maintenance of the paint and the presence or absence of LBP hazards. A LBP hazard is defined as damaged paint or paint covering a deteriorated subsurface that may create dust or chips that could potentially be ingested or inhaled.

Screening for LBP is outside of the scope of an ASTM Phase I investigation. In addition, the scope of this assignment did not include a LBP screening because the Subject Property use is commercial and LBP is therefore not an area of concern. Of importance, painted surfaces observed were in good condition and void of significant peeling and flaking.

6.5.3 RADON

Radon gas is a gas created from the radioactive decay of uranium. It exists in soil with a high concentration of uranium rocks or industrial waste. Radon gas may seep into and accumulate in dwellings through cracks in the foundation or walls or any other opening such as a floor drain.

The EPA has categorized radon levels into three (3) regulatory zones measured in pico-Curies per liter (pCi/L). The EPA action level for radon is 4.0 pico-Curies per liter.

- Level 1: Greater than 4 pCi/L
- Level 2: Between 2 and 4 pCi/L
- Level 3: Less than 2 pCi/L

Analysis for radon is not within the scope of an ASTM Phase I investigation. PACU did not request a radon gas screening, therefore EDI did not conduct a screening as part of this Phase I investigation.

The EPA Map of Radon Zones indicates Los Angeles County is in a Zone 2 radon area. Zone 2 is defined as areas that have a moderate potential for radon gas with levels >2.0 picocuries per liter (pCi/L) but < 4.0 pCi/L. The EPA guideline for radon is 4.0 pCi/L. Due to the non-residential use of the Subject Property, and in accordance with the scope of work, radon testing was not performed. Notwithstanding, long term sampling and testing are the only definitive means of radon detection.

6.5.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and plumbing material. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing material.

The Los Angeles Department of Water & Power provides domestic water to the vicinity. Analysis for lead in drinking water is not within the scope of a Phase I ESA investigation. The Client did not request a lead in drinking water screening; therefore, EDI did not conduct a screening. According to Los Angeles Department of Water & Power's 2021 Drinking Water Quality Report, the City of Los Angeles is in compliance with all federal and local regulations concerning water quality. Based upon the foregoing information, EDI's opinion is that lead in drinking water is not a concern at the Subject Property. Notwithstanding, lead in drinking water sampling and testing are the only definitive means of lead detection.

7.0 REGULATORY RECORDS REVIEW

In accordance with ASTM Practice E1527-21, EDI reviewed applicable and reasonably accessible federal, state, and local records as part of this Phase I ESA. The environmental records review was performed in the form of an environmental database search conducted by Environmental Risk information Services, in an attempt to ascertain whether the Subject Property or neighboring properties were suspected of having environmental conditions with the potential to impact (or that have impacted) the soil, soil gas, and/or groundwater at the Subject Property. The database search included regulatory agency lists of known or potential hazardous waste facilities, landfills, hazardous waste generators, and disposal facilities in addition to properties under investigation under investigation due to identified or potential contamination. The information provided in this section was obtained from publicly available sources. The locations of the properties listed in this report are plotted with a geographic information system (GIS) utilizing geocoding of property addresses. Specific records and search distances for these environmental databases were reported by ERIS to be consistent with ASTM Practice E1527-21 and are discussed in the ERIS report (dated June 27, 2022).

7.1 FEDERAL AND STATE REGULATORY REVIEW

A copy of the regulatory database report provided by Environmental Risk information Services (ERIS) appears in [Appendix G](#). EDI reviewed each database report to determine if certain sites identified therein are suspected to represent a material negative environmental impact to the Subject Property. The following table summarizes the number of sites by database within the prescribed search radius appearing in the database report:

Regulatory Report Summary

7.1.1 SUBJECT PROPERTY REGULATORY REVIEW

The Subject Property was identified in the UST LA CITY databases. Details of the databases the Subject Property was identified in discussed below:

Target Property Summary

Database	Site Name	Address	Dist. (mi) / Dir.	Elev. diff. (ft)	Comments
UST LA CITY		3530 W OLYMPIC BLVD LOS ANGELES, , CA,	0.00/WNW	0.0	Refer to discussion below

Based on our review, the Subject Property was formerly improved with a gasoline service station, "Texaco Service Station", from at least 1945 to 1968. EDI submitted a FOIA request to the Los Angeles Fire Department for information regarding storage tanks, chemical spills, and other potential environmental concerns in connection with the Subject Property. As of the date of this *Report* EDI has not received a response to this inquiry. Although the UST(s) were likely removed circa 1970s, EDI notes that the removal of tanks during this era would not have required confirmation sampling including, but not limited to, assessment of soil vapors, as is currently required. Based on changes in environmental regulations since the removal of the UST, and the potential for an onsite vapor encroachment due to residual concentrations of gasoline constituents in soil possibly remaining at the site, the previous UST(s) represents a REC in connection with the Subject Property.

7.1.2 ADJACENT PROPERTIES REGULATORY REVIEW

The properties listed on the database were evaluated utilizing their downgradient to upgradient hydrologic locations in relation to the Subject Property in addition to other factors (see Section 4.1).

In October 1995, the Lawrence Livermore National Laboratory presented "Recommendation to Improve the Cleanup Process for California's Leaking Underground Fuel Tanks." Data compiled by Lawrence Livermore indicated that fuel groundwater contamination plumes seldom extended greater than 400 feet (0.075 mile) from the source in the worst cases. Therefore, EDI uses this data to further evaluate concern presented by off-site properties identified in the database. It should be noted that this data is specific to fuel releases. It should also be noted that the data was in some cases for very permeable soil types.

A summary of the adjacent properties of potential concern are listed in the table below:

Surrounding Properties Summary

Database	Site Name	Address	Dist. (mi) / Dir.	Elev. diff. (ft)	Comments

No adjacent properties were listed in the regulatory database report indicating a potential contamination condition suspected of having impacted the Subject Property.

Off-Site properties were identified during the review of the regulatory database report. These properties are not suspected of adversely impacting the Subject Property based on one or more of the following rationale:

- the sufficient distance from the Subject Property;

- their assumed topographic position relative to the Subject Property (i.e. downgradient);
- inferred groundwater flow direction away from the Subject Property;
- the nature of their release (i.e., soil only);
- the absence of reported leaks, spills or violations; and
- their reported regulatory status (i.e. no further action, case closed).

7.1.3 NON-GEOCODED SITES

The regulatory database report identified four (4) “Non-Geocoded” (orphan) sites. Non-Geocoded Sites are those sites which could not be mapped due to inadequate address information. Refer to the database report contained in [Appendix G](#) for a list of these Non-Geocoded Sites. EDI attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EDI did not identify Orphan Sites within the specified radii.

7.2 LOCAL REGULATORY REVIEW

Information obtained from local agencies was requested via one of the following methods

- written correspondence,
- review of published data,
- telephone conversations, or
- in person.

Local offices consulted during the preparation of this *Report* included the City of Los Angeles Building & Safety, City Planning and Fire Departments as well as the Los Angeles County Assessor. Documentation applicable to the Subject Property in those departments was requested and reviewed when and where reasonably ascertainable, as detailed in ASTM E-1527-21. No documented adverse environmental conditions or complaints were reported at the Subject Property and readily on file at these offices. The local offices did not contain records of spills or releases having occurred at the Subject Property.

Source	Date Contacted	Information Received	Comments
Los Angeles Fire Department (LAFD)	07/05/22	☐	EDI submitted a FOIA request to the LAFD for information regarding storage tanks, chemical spills, and other potential environmental concerns in connection with the Subject Property.

As of the date of this *Report* EDI has not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material affect on the findings of this *Report*, EDI will forward the new information, together with revised findings, as an addendum to this *Report*. If no response is received or no material violations are noted, our Report will not be modified.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

EDI declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR 312” and We have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Certified Hazardous Materials Manager – No. 11546

9.0 PURPOSE AND SCOPE OF WORK

EDI was retained by Premier America Credit Union (“PACU”) to prepare a Phase I Environmental Site Assessment, in compliance with ASTM Standard Practice E1527-21 on the Subject in accordance with our agreement dated June 23, 2022.

9.1 PURPOSE

The purpose of this Phase I Environmental Site Assessment (ESA) is to define good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the “landowner liability protections,” or “LLPs”): that is, the practice that constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35)(B).

EDI understands that the findings of this study will be used by Premier America Credit Union to evaluate a pending financial transaction in connection with the Subject Property with respect to ASTM Standard E 1527-21.

ASTM Standard Practice E1527-13 defines a *Recognized Environmental Condition (REC)* as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Conditions determined to be de minimis generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not Recognized Environmental Conditions or Controlled Recognized Environmental Conditions.

A *Controlled Recognized Environmental Condition (CREC)* is a Recognized Environmental Condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

A Historical Recognized Environmental Condition (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

De minimis conditions are defined by ASTM as environmental conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by ASTM. These include, but are not limited to, de minimis conditions, environmental considerations, business environmental risks and/or Non-ASTM-Scope Issues such as the presence of ACMs, LPB, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

9.2 DETAILED SCOPE OF SERVICES

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E 1527-21. EDI warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions. No other warranties are implied or expressed.

9.3 SIGNIFICANT ASSUMPTIONS

There is a possibility that even with the proper application of these methodologies there may exist on the Subject Property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. EDI believes that the information obtained from the record review and the interviews concerning the site is reliable. However, EDI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all inclusive or comprehensive results, but rather to provide Premier America Credit Union with information relating to the Property.

9.4 LIMITATIONS AND EXCEPTIONS OF ASSESSMENT

The purpose of this report is to assess the Subject Property with respect to the presence of hazardous substances or petroleum products in accordance with the provisions of ASTM Standard E 1527-21.

The conclusions presented in this report are professional opinions, based solely upon visual observations of the Subject Property and vicinity and our interpretation of the available historical information and documents reviewed as described in this report. They are intended exclusively for the purpose outlined herein and for the Subject Property location and project indicated. EDI is a technical not legal firm, as such we offer no opinion as to the legal aspects of environmental compliance (permitting, remediation, etc.) and anyone relying upon this report should have this ESA reviewed by counsel regarding any legal issues. This report is intended for the sole use of Premier America Credit Union. The scope of services performed in execution of this investigation may not be appropriate to satisfy the needs of other users, and any use or reuse of this document or the findings, and conclusions, presented herein is at the sole risk of said user.

It should be recognized that this study was not intended to be a definitive investigation of contamination at the Subject Property. It is possible that currently unrecognized contamination may exist at the Subject Property. Opinions presented herein apply to Subject Property conditions existing at the time of our investigation and those reasonably foreseeable. They cannot necessarily apply to Subject Property changes of which EDI is unaware and has not had the opportunity to evaluate. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EDI so that our conclusions may be revised and modified if necessary, at additional cost. This Report has been prepared in accordance with our Standard Conditions for Engagement, which is an integral part of this Report.

This Phase I Environmental Site Assessment Report was performed in accordance with applicable, generally accepted environmental consulting practices currently practicing in the same locality under similar conditions, and utilizing methods and procedures consistent with established commercial practices and in conformance with industry standards. The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM 1527-21. However, the following adjustments were made in accordance with the ASTM Standard:

- A data failure as defined under Section 8.3.2.3 of ASTM Standard Practice E1527-21 occurred, although we reviewed historic information back to 1928, our review was not conducted back to a time when the site was vacant land.

9.5 SPECIAL TERMS AND CONDITIONS

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the client. No subsurface exploratory drilling or sampling was done under the scope of this work. Unless specifically stated otherwise in the report, no chemical analyses have been performed during the course of this ESA.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

9.6 USER RELIANCE

All reports, both verbal and written, are for the benefit of Premier America Credit Union, its successors and assigns. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of EDI.

10.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

10.1 Definition of an Environmental Professional

An Environmental Professional means: (1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f). (2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience. (3) An environmental professional should remain current in his or her field through participation in continuing education or other activities. (4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b). (5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

10.2 Relevant Experience

Relevant experience, as used in the definition of environmental professional in this section, means: participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the subject property.

Resumes for the Environmental Professionals involved in this project are included in [Appendix I](#).

RE: CITY DIRECTORY RESEARCH
3530 W Olympic Blvd
Los Angeles, CA 90019

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

1000-1025 of Arlington Ave
3500-3555 of W Olympic Blvd

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property: 3530 W Olympic Blvd
3530 W Olympic Blvd Los Angeles CA 90019

Project No: 222-0610

Coordinates:

Site Facility Type:	LUST CLEANUP SITE	Facility Type:	
Cleanup Status:	COMPLETED - CASE CLOSED	Composting Method:	
Project Status:		Address:	3554 OLYMPIC BLVD W
WDR Place Type:		City:	MID CITY
WDR File:		Zip:	90019
WDR Order:		County:	LOS ANGELES
CUF Priority Assig:	B	CUF Claim:	7805
CUF Amount Paid:	\$180,384		
File Location:			
Designated Beneficial Use:	MUN, AGR, IND, PROC		
Project Oversight Agencies:			
Report Link:	https://geotracker.waterboards.ca.gov/profile_report?global_id=T0603700614		
Cleanup Status Detail:	COMPLETED - CASE CLOSED AS OF 2/1/2018		
Cleanup History Link:	https://geotracker.waterboards.ca.gov/profile_report_include?global_id=T0603700614&tabname=regulatoryhistory		
Potential Media of Concern:	AQUIFER USED FOR DRINKING WATER SUPPLY		
User Defined Beneficial Use:			
DWR GW Sub Basin:	Coastal Plain Of Los Angeles - Central (4-011.04)		
Calwater Watershed Name:	Santa Monica Bay - Interior Santa Monica Bay - Wilshire (404.63)		
Post Closure Site Management:			
Future Land Use:			
Cleanup Oversight Agencies:	LOS ANGELES RWQCB (REGION 4) (LEAD) - CASE #: 900190043A CASEWORKER: JAMES RYAN LOS ANGELES RWQCB (REGION 4) - CASE #: 900190043 CASEWORKER: JAMES RYAN LOS ANGELES, CITY OF CASEWORKER: ELOY LUNA		
Gndwater Monitoring Freque:			
Designated Beneficial Use Desc:	Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply		
Site History:

Violations Found:	Yes
Eval General Type:	Compliance Evaluation Inspection
Eval Type:	Routine done by local agency
Eval Division:	Los Angeles City Fire Department
Eval Program:	HMRRP
Eval Source:	CERS
Eval Notes:	

Consent to enter, inspect and take photographs was given by: Eleanor Frazer The Business Activities, Owner/Operator Identification, Hazardous Materials Inventory, Site Map, Emergency Response/Contingency Plan and Employee Training Plan sections were reviewed in CERS and field verified. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation. NOTE: The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA **** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change. As a reminder, you must complete [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Violation Notes:			

Returned to compliance on 06/19/2020.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date:	06/25/2018	Violation Source:	CERS
Violation Program:	UST	Violation Division:	Los Angeles City Fire Department
Citation:	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)		
Violation Notes:			

Returned to compliance on 07/05/2018. OBSERVATION: Diesel Line leak detector failed to meet one or more of the following requirements: Monitor at least hourly; Capable of detecting a release of 3.0 gallons per hour at 10 p.s.i.g.; Restricting or shutting off the flow of product through the piping when a leak is detected. CORRECTIVE ACTION: Repair or replace Diesel line leak detector so that it is capable of monitoring at least hourly, detecting a release of 3.0 gallons per hour at 10 p.s.i.g., and restricting or shutting off the flow of product through the piping when a leak is detected.

Violation Description:

Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 p.s.i.g. and restrict or shut off the flow of product through the piping when a leak is detected.

Violation Program:	UST	Violation Division:	Los Angeles City Fire Department
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)		
Violation Notes:			

Returned to compliance on 06/29/2020. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Failure to test overfill by 10/13/18. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Submit verification.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Eval Notes:	

"Second Notice of Violation Inspection Report Documents uploaded to CERS were reviewed. Indicated previously in this report are violations, originally issued on 3.22/19 that have not been resolved by the original COMPLY BY date. These violations have been re-issued and the violation class upgraded. Review and correct all violations indicated in this report, on or before the new COMPLY BY date associated with each violation. Failure to resolve these violations will result in this facility being subject to formal enforcement. NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA **** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year. Please remember that any change in inventory of greater than 100 [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Source:	CERS
Eval Notes:	

On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by KEVIN HO KIM - OWNER. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to <https://cersbusiness2.calepa.ca.gov> to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

SITE HISTORY:

The site consists of 1.4 acres. Former residences are documented to have been on-site from the early 1900s prior to construction of the 9-story office building and associated parking lot built in 1961. The site is currently an asphalt parking lot for an adjacent vacant nine-story office building.

Status: INACTIVE - WITHDRAWN

SITE HISTORY:

The site has contained residential structures since at least the 1920s. Some of the structures have been replaced by parking lots. One lot is currently vacant. A leaking underground storage tank site reported to be undergoing characterization by the RWQCB located 300 feet. The age of the structures indicates they are or have been a potential source of lead based paint and asbestos containing material.

SITE HISTORY:

The site is composed of two adjacent parcels separated by Serrano Avenue. The site has contained residential structures since at least the 1920s. In past years, the residences have been replaced by a retail plaza and parking lots. Pacific Bell was reported as being a past site occupant and a small quantity generator of hazardous waste.

CADMIUM AND COMPOUNDS
LEAD

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Site History:

The Site was used as a gasoline service station, car washing facility, and for storage of fuel and other chemicals associated with historical operations, from 1924 to 1974. In October and November 2018, an environmental site assessment was implemented to determine the presence of contaminants in soil and soil gas associated with past operations. The environmental site assessment revealed lead and cadmium in soil exceeding residential use criteria and soil excavation will be needed prior to developing the Site for residential use.

Site History:

The Site is approximately 3.34 acres in size and is currently used as a school. The Area B2 is under monitoring following cleanup . The Site used to have commercial and residential structures (e.g., single and multiple family residences, markets, retail stores, appliance repair shop, and multiple auto repair shops). Historically the site included commercial operations and features such as dry cleaners and underground storage tanks. During the investigation process, the site was separated into Areas A and B and into separate operable units for soil and groundwater. The Area B was further divided in to Area B1 and B2. To evaluate the impact from residual chemicals related to the present and historical land use, the site was investigated for total petroleum hydrocarbons, semi-volatile and volatile organic compounds, and heavy metals. A Preliminary Environmental Assessment (PEA) followed by Supplemental Site Investigation (SSI) had been conducted at the Site. Following the soil removal action, a partial Site approval for Area A was granted to allow school construction. The Area B1 and B2 were further investigated.

The Area B2 was impacted by volatile organic compounds in soil and groundwater. A Remedial Action Plan (RAP) for cleaning up the contamination in soil for Area B2 was approved (March 2010). The Area B2, OU1 soil remediation started April 2010 and is completed in September 2010 . The soil remediation involved excavation and off site disposal of contaminated soil in Area B2. A pilot test for groundwater treatment was also performed at Area B2. Based on LAUSD request, DTSC concurred with Area A and B1 school occupancy after reviewing monitoring reports and ensuring that those areas continue to remain safe. On March 10, 2011 based on the Sitewide Summary, DTSC also concurred with Area B2 occupancy request. Currently, the soil vapor and groundwater are being monitored on quarterly basis.

The groundwater at the Site is being monitored along with soil gas. The groundwater investigation and remediation at the Site will be covered under Operable Unit 2. Currently the School is occupied and monitoring is ongoing to document that there is no potential exposure risk from the groundwater contamination. Currently the Groundwater remedy is installed at the site following the approval of Remediation Action Plan in late June 2013. Initial three months of groundwater remediation is complete by end of October 2013. The groundwater and soil gas are monitored regularly at the Site since then.

Currently, soil vapor and groundwater monitoring are conducted at a semi-annual basis and free product removal is preformed monthly.

The First Semi-annual 2020 O&M Report was submitted to DTSC on October 15, 2020. The Report recommends: 1) Continue semi-annual groundwater monitoring program to develop the database that will help in making an appropriate determination on future activities for groundwater. 2) Continue bi-monthly LNAPL removal activities at well C13-GW14A, which includes periodic removal and disposal of the LNAPL and replacement of absorbent sock in future monitoring event. 3) Continue Site inspections and maintenance pursuant to the O&M plan for OU1 Area B. 4) Repair and/or inspect five (5) groundwater wells for either well casing blockages or damaged gaskets. and 5) Abandon 10 low producing groundwater wells that have not produced a water sample for analysis since they were installed in 2012. DTSC concurs with these conclusions and recommendations and hereby approves the Report as submitted.

Past Use that Caused Contam:	UNDERGROUND STORAGE TANKS					
Potential Media Affected:	AQUIFER USED FOR DRINKING WATER SUPPLY AFFECTED, SOIL, SOIL VAPOR					

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Potential Contaminant of Concern:

BERYLLIUM AND COMPOUNDS
 NAPHTHALENE
 OTHER
 PETROLEUM
 VOLATILE ORGANICS (8260B VOCs)

SITE HISTORY:

The Site is approximately 3.34 acres in size and is currently used as a school. The Area B2 is under monitoring following cleanup. The Site used to have commercial and residential structures (e.g., single and multiple family residences, markets, retail stores, appliance repair shop, and multiple auto repair shops). Historically the site included commercial operations and features such as dry cleaners and underground storage tanks. During the investigation process, the site was separated into Areas A and B and into separate operable units for soil and groundwater. The Area B was further divided into Area B1 and B2. To evaluate the impact from residual chemicals related to the present and historical land use, the site was investigated for total petroleum hydrocarbons, semi-volatile and volatile organic compounds, and heavy metals. A Preliminary Environmental Assessment (PEA) followed by Supplemental Site Investigation (SSI) had been conducted at the Site. Following the soil removal action, a partial Site approval for Area A was granted to allow school construction. The Area B1 and B2 were further investigated.

The Area B2 was impacted by volatile organic compounds in soil and groundwater. A Remedial Action Plan (RAP) for cleaning up the contamination in soil for Area B2 was approved (March 2010). The Area B2, OU1 soil remediation started April 2010 and is completed in September 2010. The soil remediation involved excavation and off site disposal of contaminated soil in Area B2. A pilot test for groundwater treatment was also performed at Area B2. Based on LAUSD request, DTSC concurred with Area A and B1 school occupancy after reviewing monitoring reports and ensuring that those areas continue to remain safe. On March 10, 2011 based on the Sitewide Summary, DTSC also concurred with Area B2 occupancy request. Currently, the soil vapor and groundwater are being monitored on quarterly basis.

The groundwater at the Site is being monitored along with soil gas. The groundwater investigation and remediation at the Site will be covered under Operable Unit 2. Currently the School is occupied and monitoring is ongoing to document that there is no potential exposure risk from the groundwater contamination. Currently the Groundwater remedy is installed at the site following the approval of Remediation Action Plan in late June 2013. Initial three months of groundwater remediation is complete by end of October 2013. The groundwater and soil gas are monitored regularly at the Site since then.

Currently, soil vapor and groundwater monitoring are conducted at a semi-annual basis and free product removal is performed monthly.

The First Semi-annual 2020 O&M Report was submitted to DTSC on October 15, 2020. The Report recommends: 1) Continue semi-annual groundwater monitoring program to develop the database that will help in making an appropriate determination on future activities for groundwater. 2) Continue bi-monthly LNAPL removal activities at well C13-GW14A, which includes periodic removal and disposal of the LNAPL and replacement of absorbent sock in future monitoring event. 3) Continue Site inspections and maintenance pursuant to the O&M plan for OU1 Area B. 4) Repair and/or inspect five (5) groundwater wells for either well casing blockages or damaged gaskets. and 5) Abandon 10 low producing groundwater wells that have not produced a water sample for analysis since they were installed in 2012. DTSC concurs with these conclusions and recommendations and hereby approves the Report as submitted.

Status:	CERTIFIED O&M - LAND USE RESTRICTIONS ONLY - LAND USE RESTRICTIONS

The site consists of 10 parcels and is formerly a golf driving range historically the south western portion of the site was a service station. In addition former residential property occupied the area. The PEA investigation revealed elevated levels of lead, arsenic, VOC, PAHs and TPH in several areas of the site. Approximately 5204 tons of petroleum hydrocarbon impacted soil was excavated (along with appropriate disposal of several USTs)and disposed at a

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

thermal treatment and recycling facility as non hazardous waste, 25 tons of metals impacted soil was excavated and disposed as RCRA hazardous waste, and 187 tons of metals impacted soil were excavated and disposed as non-RCRA California-designated hazardous waste. Confirmation samples were collected to ensure cleanup goals were achieved. April 2003, based on the data presented, DTSC certifies the removal action to address elevated petroleum hydrocarbon and metals concentrations in soil has been satisfactorily completed and all comments have been adequately addressed.

Following the removal action, DTSC recommended a groundwater investigation be conducted to address concerns associated with potential groundwater contamination. Groundwater monitoring has generally been conducted on a quarterly basis from February 2003 through November 2004. The Groundwater Report concludes that the groundwater results demonstrate an overall stabilization or decreasing concentrations of volatile organic compounds and total petroleum hydrocarbons in comparison to the 2003 results. The Groundwater Report recommends no further action is necessary for the site. In March 2003, DTSC concurs that No Further Action is necessary and certifies that all necessary response actions have been completed.

Potential Media Affected:		OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL				
SITE HISTORY:						

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

The site consists of 10 parcels and is formerly a golf driving range historically the south western portion of the site was a service station. In addition former residential property occupied the area. The PEA investigation revealed elevated levels of lead, arsenic, VOC, PAHs and TPH in several areas of the site.

Approximately 5204 tons of petroleum hydrocarbon impacted soil was excavated (along with appropriate disposal of several USTs) and disposed at a thermal treatment and recycling facility as non hazardous waste, 25 tons of metals impacted soil was excavated and disposed as RCRA hazardous waste, and 187 tons of metals impacted soil were excavated and disposed as non-RCRA California-designated hazardous waste. Confirmation samples were collected to ensure cleanup goals were achieved. April 2003, based on the data presented, DTSC certifies the removal action to address elevated petroleum hydrocarbon and metals concentrations in soil has been satisfactorily completed and all comments have been adequately addressed.

Following the removal action, DTSC recommended a groundwater investigation be conducted to address concerns associated with potential groundwater contamination. Groundwater monitoring has generally been conducted on a quarterly basis from February 2003 through November 2004. The Groundwater Report concludes that the groundwater results demonstrate an overall stabilization or decreasing concentrations of volatile organic compounds and total petroleum hydrocarbons in comparison to the 2003 results. The Groundwater Report recommends no further action is necessary for the site. In March 2003, DTSC concurs that No Further Action is necessary and certifies that all necessary response actions have been completed.

Potential Contaminant of Concern:

ARSENIC
LEAD
TPH-DIESEL

Status: CERTIFIED
Program Type: SCHOOL CLEANUP
CalEnviroScreen Score: 80-85%

Potential Contamin of Concern:

ARSENIC
 BENZENE
 ETHYLBENZENE
 TOLUENE
 XYLENES

SITE HISTORY:

The site is approximately 1.5 - acres and is occupied by small auto repair shops, commerical property, a preschool, and parking lots. The automotive repair activities along 6th Street have been in operation for at least 60 years. A gasoline station was on the east side of the site from at least 1947. In addition, a dry cleaner may have been present on -site, but no detailed historic information has been provided. In 1999, nine Underground Storage Tanks (UST) (4 oil, 5 gasoline) were removed from the site. At least one UST had a release. The Serrano Avenue parcels were used for residential purposes until the 1960s. In the 1960s and 1970s, the parcels were occupied by residential and commercial properties. In the late 1970s these parcels became exclusively commercial. The site is concurrently under review by the LARWQCB for the Underground Storage Tank program, in which the property owner is responsible.

NONE SPECIFIED

The site has contained residential structures since at least 1907. The site also includes a driving range and church; an auto repair and painting shop was also reported as having been previously located on the property. Other commercial facilities are located in the area. The age of the structures indicates they are or have been a potential source of lead-based paint and asbestos-containing materials.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program:

[DOE FUSRAP](#)

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List:

[NPL](#)

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 30, 2022

National Priority List - Proposed:

[PROPOSED NPL](#)

Sites proposed - by the EPA, the state agency, or concerned citizens - for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 30, 2022

Deleted NPL:

[DELETED NPL](#)

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 30, 2022

SEMS List 8R Active Site Inventory:[SEMS](#)

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Apr 27, 2022

SEMS List 8R Archive Sites:[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Apr 27, 2022

Inventory of Open Dumps, June 1985:[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System -[CERCLIS](#)**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Apr 11, 2022

RCRA non-CORRACTS TSD Facilities:[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Apr 11, 2022

RCRA Generator List:[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Apr 11, 2022

RCRA Small Quantity Generators List:[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Apr 11, 2022

RCRA Very Small Quantity Generators List:[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Apr 11, 2022

RCRA Non-Generators:[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Apr 11, 2022

RCRA Sites with Controls:[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Apr 11, 2022

Federal Engineering Controls-ECs:[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Dec 30, 2021

Federal Institutional Controls- ICs:[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Dec 30, 2021

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites:

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Mar 30, 2022

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Dec 31, 2021

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Aug 20, 2021

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Delisted Facility Response Plans:

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Historical Gas Stations:[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Feb 4, 2022

Petroleum Product and Crude Oil Rail Terminals:[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Feb 4, 2022

LIEN on Property:[SEMS LIEN](#)

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Apr 27, 2022

Superfund Decision Documents:[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: May 3, 2022

State**State Response Sites:**[RESPONSE](#)

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: May 30, 2022

EnviroStor Database:[ENVIROSTOR](#)

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: May 30, 2022

Delisted State Response Sites:[DELISTED ENVS](#)

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: May 30, 2022

Solid Waste Information System (SWIS):[SWF/LF](#)

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Feb 2, 2022

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:[SWRCB SWF](#)

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Waste Management Unit Database:

WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

Government Publication Date: Jan 1, 2000

EnviroStor Hazardous Waste Facilities:

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: May 30, 2022

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers:

C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers:

RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Apr 12, 2022

Listing of Certified Processors:

PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Apr 12, 2022

Listing of Certified Dropoff, Collection, and Community Service Programs:

CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Apr 12, 2022

Land Disposal Sites:

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Feb 15, 2022

Leaking Underground Fuel Tank Reports:

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Feb 15, 2022

Delisted Leaking Storage Tanks:

DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Permitted Underground Storage Tank (UST) in GeoTracker:

UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Apr 25, 2022

Proposed Closure of Underground Storage Tank Cases:

UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: May 5, 2021

Historical Hazardous Substance Storage Information Database:

HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System:

UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks:

AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks:

AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks:

TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Apr 4, 2022

Delisted Storage Tanks:

DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: May 25, 2022

California Environmental Reporting System (CERS) Tanks:

CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Apr 5, 2022

Delisted California Environmental Reporting System (CERS) Tanks:

DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Apr 5, 2022

Historical Hazardous Substance Storage Container Information - Facility Summary:

[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:

[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: May 30, 2022

CALSITES Database:

[CALSITES](#)

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions:

[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Feb 15, 2022

Voluntary Cleanup Program:

[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: May 30, 2022

GeoTracker Cleanup Program Sites:

[CLEANUP SITES](#)

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Feb 15, 2022

Delisted Cleanup Program Sites:

[DELISTED CLEANUP](#)

A list of Cleanup Program sites which were once included - and have since been removed from - the list of Cleanup Program Sites in GeoTracker. GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Government Publication Date: Feb 15, 2022

Delisted County Records:

[DELISTED COUNTY](#)

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: May 26, 2022

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands:

INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2022

Underground Storage Tanks (USTs) on Indian Lands:

INDIAN UST

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2022

Delisted Tribal Leaking Storage Tanks:

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Apr 7, 2022

Delisted Tribal Underground Storage Tanks:

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Apr 7, 2022

County

Los Angeles County - Site Mitigation List:

SML LA

A Site Mitigation List in the County of Los Angeles. The list is made available by Los Angeles County Fire Department. Site mitigation is handled by the Site Mitigation Unit (SMU) which facilitates completion of site clean-up projects of contaminated sites in an expeditious manner in all cities of the Los Angeles County except El Segundo, Glendale, Long Beach, Santa Fe Springs, and Vernon.

Government Publication Date: May 26, 2021

Los Angeles County - Solid Waste Sites:

SWF LA COUNTY

List of permitted solid waste facilities, closed landfills, historical dumpsites and other solid waste sites in Los Angeles County, made available by the Department of Public Works in Los Angeles County.

Government Publication Date: May 13, 2022

Los Angeles County - CUPA Program Records:

CUPA LA COUNTY

A list of inspection and enforcement records for active and inactive CUPA Program facilities, made available by the Health Hazardous Materials Division (HHMD) of the County of Los Angeles Fire Department. Includes Hazardous Materials Business Plan (HMBP), California Accidental Release Prevention Plan (CalARP), Hazardous Waste Generator (HWG), and the Aboveground Petroleum Storage Act Programs (APSA). Inactive programs include facilities that are out of business or no longer regulated by the HHMD.

Government Publication Date: Mar 25, 2020

Los Angeles County - HMS List:

HMS LA

List of sites in the Los Angeles County Department of Public Works Hazardous Materials System (HMS) Database which have or have had permits for Industrial Waste, Underground Storage Tanks, or Stormwater in the county of Los Angeles.

Government Publication Date: Nov 5, 2020

Los Angeles County - Santa Fe Springs Underground Storage Tank:

UST SANTAFESP

A list of registered active Underground Storage Tanks (USTs) in the City of Santa Fe Springs. This list is made available by Santa Fe Springs Department of Fire-Rescue.

Government Publication Date: Feb 11, 2022

Los Angeles County - Long Beach UST List:

UST LONGB

List of registered Underground Storage Tanks (USTs) in the City of Long Beach, Los Angeles County, made available by the Long Beach Certified Unified Program Agency (CUPA). The Long Beach CUPA operates under oversight shared by the Long Beach Fire Department and Health Department.

Government Publication Date: Jul 9, 2018

Los Angeles County - Burbank City CUPA List:

CUPA BURBANK

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Burbank. This list is made available by the City of Burbank Fire Department.

Los Angeles County - El Segundo City Underground Storage Tanks List:

[UST ELSEGUNDO](#)

List of registered Underground Storage Tanks (USTs) in the City of El Segundo of Los Angeles County, made available by El Segundo City Fire Department.

Government Publication Date: Jan 17, 2017

Los Angeles County - Santa Monica City Underground Storage Tank List:

[UST SANTA MONICA](#)

A list of registered active Underground Storage Tanks (USTs) in the City of Santa Monica made available by Santa Monica Fire Prevention Division.

Government Publication Date: Dec 3, 2020

Los Angeles County - Santa Monica City Aboveground Storage Tank List:

[AST SANTAMON](#)

List of registered Aboveground Storage Tanks (ASTs) made available by the Santa Monica Fire Department in the City of Santa Monica of Los Angeles County, California.

Government Publication Date: Jan 14, 2022

Los Angeles County - Santa Monica City CUPA Facilities List:

[CUPA SANTAMON](#)

The Santa Monica Fire Department's office maintains a list of CUPA Facilities located in Santa Monica city.

Government Publication Date: Jan 14, 2022

Los Angeles County - Torrance City Underground Storage Tanks:

[UST TORRANCE](#)

A list of registered Underground Storage Tank (UST) sites in Torrance City of Los Angeles County. This list is made available by Torrance City Office of Clerk.

Government Publication Date: Apr 20, 2022

Los Angeles County - Vernon City UST List:

[UST VERNON](#)

A list of Underground Storage Tanks (UST) in Vernon City provided by the Vernon City Fire Department.

Government Publication Date: May 26, 2022

Los Angeles County - Vernon City CUPA List:

[CUPA VERNON](#)

The Vernon City Fire Department's office maintains a list of CUPA Facilities located in Vernon city.

Government Publication Date: May 26, 2022

Los Angeles County - City of Los Angeles UST List:

[UST LA CITY](#)

A list of active and inactive underground storage tank facilities made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jan 13, 2022

Los Angeles County - City of Los Angeles AST List:

[AST LA CITY](#)

A list of active and inactive above ground petroleum storage tanks made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jun 1, 2019

Los Angeles County - City of Los Angeles Hazardous Materials Facilities:

[HAZMAT LA CITY](#)

A list of active and inactive hazardous materials facilities made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jun 1, 2019

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index:

[FINDS/FRS](#)

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Toxics Release Inventory (TRI) Program:

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Releases:

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

PFOA/PFOS Contaminated Sites:

PFAS NPL

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Apr 15, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality:

PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

SSEHRI PFAS Contamination Sites:

PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations <https://pfasproject.com/pfas-contamination-site-tracker/>

Government Publication Date: Dec 12, 2019

National Response Center PFAS Spills:

ERNS PFAS

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

Hazardous Materials Information Reporting System:

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 22, 2021

Toxic Substances Control Act:

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Mar 30, 2022

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Apr 30, 2022

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 5, 2021

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 5, 2021

Formerly Used Defense Sites:

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: May 26, 2021

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Feb 1, 2022

Surface Mining Control and Reclamation Act Sites:

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Feb 22, 2022

Mineral Resource Data System:

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

Uranium Mill Tailings Radiation Control Act Sites:

URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Alternative Fueling Stations:

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: May 16, 2022

Superfunds Consent Decrees:

[CONSENT DECREES](#)

A list of Superfund consent decrees made available by the Department of Justice, Environment & Natural Resources Division (ENRD).

Government Publication Date: May 18, 2022

Air Facility System:

[AFS](#)

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments:

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

Polychlorinated Biphenyl (PCB) Transformers:

[PCBT](#)

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Jan 20, 2022

State

Dry Cleaning Facilities:

[DRYCLEANERS](#)

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Dec 20, 2021

Delisted Drycleaners:

[DELISTED DRYCLEANERS](#)

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Feb 28, 2020

Non-Toxic Dry Cleaning Incentive Program:

[DRYC GRANT](#)

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2020

Per- and Polyfluoroalkyl Substances (PFAS):

PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Feb 15, 2022

PFOA/PFOS Groundwater:

PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Apr 27, 2022

Hazardous Waste and Substances Site List - Site Cleanup:

HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: May 20, 2021

Toxic Pit Cleanup Act Sites:

TOXIC PITS

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is no longer maintained, and updates are not planned.

Government Publication Date: Jul 1, 1995

List of Hazardous Waste Facilities Subject to Corrective Action:

DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement:

INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Apr 29, 2021

School Property Evaluation Program Sites:

SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: May 30, 2022

California Hazardous Material Incident Report System (CHMIRS):

CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Feb 8, 2022

Historical California Hazardous Material Incident Report System (CHMIRS):

HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Hazardous Waste Manifest Data:

HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical Hazardous Waste Manifest Data:

HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters:

HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Oct 19, 2020

Registered Waste Tire Haulers:

WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Apr 12, 2022

California Medical Waste Management Program Facility List:

MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Dec 31, 2020

Historical Cortese List:

HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders:

CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Dec 6, 2021

California Environmental Reporting System (CERS) Hazardous Waste Sites:

CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Apr 5, 2022

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:

DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker:

GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Feb 15, 2022

Mines Listing:

MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Recorded Environmental Cleanup Liens:

[LIEN](#)

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: May 4, 2022

Waste Discharge Requirements:

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Feb 15, 2022

Toxic Pollutant Emissions Facilities:

[EMISSIONS](#)

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2020

Clandestine Drug Lab Sites:

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

Los Angeles County - Santa Monica City Hazardous Materials Facilities:

[HAZMAT SANTAMON](#)

A list of Hazardous Materials Facilities in the City of Santa Monica, Los Angeles county. This list is made available by Santa Monica Fire Prevention Division which has been designated as the CUPA for the City.

Government Publication Date: Dec 17, 2021

Los Angeles County - Santa Monica City Hazardous Waste Facilities:

[HAZ WST SANTAMON](#)

A list of Hazardous Waste Facilities in Los Angeles County, City of Santa Monica. This list is made available by Santa Monica Fire Prevention Division.

Government Publication Date: Jan 14, 2022

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Appendix H - Supporting Documents

Property Information

Order Number: 22062300704p
Date Completed: June 24, 2022
Project Number: 222-0610
Project Property: 3530 W Olympic Blvd
3530 W Olympic Blvd Los Angeles CA 90019
Coordinates:

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Topographic Information

Current USGS Topo (2015)

Quadrangle(s): Hollywood, CA

Source: USGS 7.5 Minute Topographic Map

Topographic Information

The previous topographic map(s) are created by seamlessly merging and cutting current USGS topographic data. Below are shaded relief map(s), derived from USGS elevation data to show surrounding topography in further detail.

Topographic information at project property:

Elevation: 172.83 ft
Slope Direction: NNW

Hydrologic Information

Wetland

This map shows wetland existence using data from US Fish & Wildlife. Data coverage is shown to the right. Gray indicates no data available in the area.

Zone:	AH
Zone subtype:	

Flood Zone AO-01

Zone:	AO
Zone subtype:	

Flood Zone X-01

Zone:	X
Zone subtype:	0.2 PCT ANNUAL CHANCE FLOOD HAZARD

Flood Zone X-12

Zone:	X
Zone subtype:	AREA OF MINIMAL FLOOD HAZARD

Geologic Information

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *LOS ANGELES* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L

Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L

Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *LOS ANGELES* County

No Measures/Homes:	69
Geometric Mean:	0.4
Arithmetic Mean:	0.7
Median:	0.5
Standard Deviation:	1
Maximum:	5.6
% >4 pCi/L:	1
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Federal Sources

FEMA National Flood Hazard Layer

FEMA FLOOD

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data

INDOOR RADON

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data

PWSV

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level

RADON ZONE

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS)

SDWIS

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database

SSURGO

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data

US WETLAND

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo

US TOPO

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology

US GEOLOGY

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System

FED USGS

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells

OGW

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

MONITOR WELLS

Well Completion Reports

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

WATER WELLS

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. Weed hazard	No

2. Building

Building

Square footage	1,463
Year built	1941
Year last altered	1988
Units	1
Stories	1

Details

Construction type	Non-fireproof - wood or wood/steel frame
Shape	Length is less than twice the width
Quality class	6/14.5
Quality class code	D6A

3. Zoning

Properties can be classified by zoning and building class. Los Angeles County is divided into four basic zoning districts: residential (R), commercial (C), agricultural(A) and manufacturing (M).These basic zoning districts are subdivided by the intensity of use. For more information about zoning districts click [here](#).

* Zoning: **Commercial (C2)**

Major zoning groups:

- Multiple family
- Single family
- Other residential
- Commercial
- Offices
- Industrial/manufacturing
- Public facilities
- Open space
- Agricultural
- Mixed use
- Planned development
- Special zones
- Parking
- Planned development - overlay
- No zoning data available

4. Land Use

On this map, view the current land use for a property. The land use specifies how a property is used or what type of building is present on that property.

* Land use: **Office Building - One Story (1700)**

Single family	Public services/Facilities
Condominium/Coop units	Education
Other residential	Cemeteries and other religious
Apartments/Multi-Family	Hospitals/Care facilities
Office	Other institutional
Retail	Entertainment/Recreation
Hotel/Motel/Other accommodation	Agricultural
Restaurants	Parks
Manufacturing/Storage facilities	Mixed use
Other industrial	Vacant land
	Other
	Unknown

5. Urban Landscape Maps

Building Stories

* Stories: **1**

On this map, view the number of stories per building.

Year Built

* Year built: **1941**

On this map, view the year each property was built.

Risk

1. Building Safety

Zoning Information		Geographical Information	
Alquist-priolo fault zone	No	Environmentally sensitive area	No
Community redevelopment area	No	Earthquake-induced liquefaction area	No
Flood hazard zone	Ao D=2 E=n/A in	Near source zone distance (Km)	1.4
Hillside grading area	No	Parcel area (sqft)	7,219
Hillside ordinance area	No	Parcel map exempt	No
Planning area & community name	Wilshire		
Zoning	Commercial (C2)		

2. FEMA Flood Zones

Use this map to determine if your property is at risk for flooding or storm surge and if it requires flood insurance.

Flood Zone Details

FEMA flood zone	AO
Costal barrier resources system area (COBRA)	Out
FEMA floodway	Out
FEMA special flood hazard area	In
For more information about FEMA flood zones map click here .	

Map Details

Map panel ID	06037C1612G effective from 12/21/2018

3. Fire Hazard Zones

- Fire hazard class
- Very high
 - High
 - Moderate
- Responsibility area
- SRA - State responsibility area
 - FRA - Federal responsibility area
 - LRA - Local responsibility area
- Historical fire areas
- 1980-1990
 - 1990-2000
 - 2000-2010
 - 2010-2014
- State and local fire protection facilities
- Hydrants

4. Faults and Tsunami Inundation Zones

- Earth quake fault zones
- Tsunami inundation zone
- Fault line type
- Accurate located faults
 - Approximately located faults
 - Inferred faults
 - Aerial photo lineament
 - Concealed faults

5. Landslides and Liquefaction

- Landslide hazard zones
- ▨ Liquefaction hazard zones
- ▨ Unevaluated zones

Key Site Manager (Site contact):	
Name:	Phone: Fax:
If not residential Property, please provide list of tenants, including contact names and phone numbers.	
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law. If so, please documents along with completed questionnaire to EDI	☐ Yes ☐ No
Are you aware of any Activity Use Limitations (AULs) such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? If so, please send documents along with completed questionnaire to EDI	☐ Yes ☐ No
Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐ Yes ☐ No
Do you have any specialized knowledge that would be material in identifying recognized environmental conditions in connection with the Property?	☐ Yes ☐ No
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Property?	☐ Yes ☐ No
Are you aware if commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: Do you know the past use of the property? Do you know specific chemicals that are present	☐ Yes ☐ No

Please return completed form and any attachments via fax to:
EDI Consultants, Inc., 21151 S. Western Ave., Suite 100, Torrance, CA 90501
Telephone: 310-832-2300 Fax: 310-362-8843

or once were present at the property? Do you know of spills or other chemical releases that have taken place at the property? Do you know of any environmental cleanups that have taken place at the property?	
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?	☐ Yes ☐ No
Please attach explanation of all affirmative answers.	
8) Please state reason for procuring this Phase 1 ESA: ☐ Qualify for Innocent Landowner defense to CERCLA Liability. ☐ Other: (state below)	

4. PLEASE PROVIDE A GENERAL SITE DESCRIPTION BY COMPLETING THE FOLLOWING TABLE:

Legal description/ boundary survey/ plat available (please send to EDI if "yes")	☐ Yes ☐ No
Total Property Size	
Total number of buildings	
Total square footage of buildings	
Date of construction	
Dates of significant renovation	
Waste water discharge ☐ Municipal Sanitary Sewer ☐ On-site septic system ☐ Other	
Potable water source ☐ Community Water Supplier ☐ On-site well ☐ Other	
Please describe prior use of property, if known:	

5. PREVIOUS INVESTIGATIONS:

Have any previous environmental investigations been performed at the site? ☐ Yes ☐ No	
INVESTIGATION TYPE If yes, please describe conclusions, and attach copy of report(s)	
☐ Phase 1 ESA	
☐ Phase 2 ESA	
☐ Tank Tightness Testing	

Have any previous environmental investigations been performed at the site?	
☐ Yes	☐ No
INVESTIGATION TYPE	
If yes, please describe conclusions, and attach copy of report(s)	
☐	Asbestos Survey/ O&M
☐	Radon
☐	Lead-based Paint
☐	Lead in Water
☐	Operations & Maintenance Plan(s)
☐	Other

6. ON SITE OPERATIONS

Are you aware of any of the following conditions, either past or present, on the site?		
Condition	Response	If yes, please describe
1. Stored Chemicals	☐ Yes ☐ No	
2. Underground Storage Tanks	☐ Yes ☐ No	
3. Aboveground Storage Tanks	☐ Yes ☐ No	
4. Spills or Releases	☐ Yes ☐ No	
5. Dump Areas/ Landfills	☐ Yes ☐ No	
6. Waste Treatment Systems	☐ Yes ☐ No	
7. Clarifiers/ Separators	☐ Yes ☐ No	
8. Air stacks/ Vents/ Odors	☐ Yes ☐ No	
9. Floor Drains/Sumps	☐ Yes ☐ No	
10. Stained Soil/ Impacted Vegetation	☐ Yes ☐ No	
11. On-site OWNED Electrical Transformers	☐ Yes ☐ No	
12. Hydraulic lifts/ Elevators	☐ Yes ☐ No	
13. Dry Cleaning Operations	☐ Yes ☐ No	
14. Wetlands/ Flooding	☐ Yes ☐ No	
15. Oil/ Gas/ Water/ Monitoring Wells	☐ Yes ☐ No	
16. Environmental Cleanups	☐ Yes ☐ No	
17. Environmental Permits	☐ Yes ☐ No	If yes , please describe and ATTACH ALL COPIES of permits. Please attach last three waste manifests.
a) Industrial Discharge	☐ Yes ☐ No	
b) POTW (NPDES)	☐ Yes ☐ No	
c) Hazardous Waste Generator	☐ Yes ☐ No	
d) Air Quality	☐ Yes ☐ No	
e) Flammable Materials	☐ Yes ☐ No	
f) AST/UST	☐ Yes ☐ No	

Are you aware of any of the following conditions, either past or present, on the site?		
Condition	Response	If yes, please describe
g) Waste Manifest(s)	☐ Yes ☐ No	
h) Other	☐ Yes ☐ No	

7. OFF SITE ENVIRONMENTAL CONCERNS

Are you aware of any of the following conditions, either past or present, Adjacent to the site?		
Condition	Response	If yes, please describe
Gasoline Stations	☐ Yes ☐ No	
Dry Cleaners	☐ Yes ☐ No	
Industrial Uses	☐ Yes ☐ No	
Other	☐ Yes ☐ No	

Appendix I - Personnel Profile

SUMMARY OF EXPERIENCE

Darrin Domingo is the Principal and founder of EDI Consultants, Inc. (EDI) in Torrance, California. Mr. Domingo has more than 23 years of experience in projects involving due diligence environmental site assessments, property condition assessments, data management and database design, Geographic Information Systems (GIS), cost engineering, subsurface investigations of soil and groundwater contamination, and environmental and geotechnical engineering projects including civil and remediation design.

RELEVANT PROJECT EXPERIENCE

Various Clients, Phase I, Phase II, and Phase III Environmental Site Assessments, Nationwide. Project manager for more than 4,000 combined Phase I and Phase II environmental site assessments for industrial and commercial real estate as well as multifamily dwellings for major U.S. banks and lending institutions throughout the nation. Conducted subsurface investigations of soil, groundwater and soil vapor contamination to assess and determine the need for further investigation and/or remediation as well as underground storage tank removals, cleanup and coordination with local and State governmental agencies for closure of same.

Various Clients, Property Condition Assessments, Nationwide. Project manager for more than 100 property condition assessments (PCAs) for a wide range of clients throughout the western United States. PCAs provide reliable and detailed information on the building's operating systems, overall design and architectural features, and any signs of material physical deterioration or functional obsolescence that could detract from the building's potential to generate income. In addition, he has examined the impact of local zoning regulations, building codes, and any special hazards that may affect the income stability of the property.

SWDiv CLEAN, Environmental Baseline Survey (EBS), El Toro MCAS, California

GIS and database administrator for the Environmental Baseline Survey of over 1000 structures at El Toro MCAS. Prepared comprehensive maps of the MCAS El Toro in a Geographic Information System (GIS), by combining information gathered during the site evaluation with existing and planned information. The GIS was developed in ArcView for GIS analysis and the preparation of maps; and Microsoft Access for the storage and analysis of attribute data. Attribute data was collected in the field via a customized Palm Pilot interface. Responsible for application development of the Palm Pilot EBS Form for data acquisition in the field and seamless downloading of information into the database. Attribute data encompassed site information including pertinent environmental, land use, and watershed data. Also, field sketches and digital photo notes were entered into the Palm Pilot and converted to bitmap images within the database for retrieval of same. Responsible for uploading and management of all data for queries, analyses, and either output for use in the GIS maps; or Report Tables within the EBS.

SWDiv CLEAN, Naval Environmental Data Transfer Standard (NEDTS), El Toro MCAS, California. GIS and database administrator for groundwater, soil and vapor analytical data. Developed the Navy Environmental Data Transfer Standard (NEDTS) database and Data Management Plan (DMP) for the Southwest Division Comprehensive Long-Term Environmental Action Navy, El Toro Marine Corps Air Station. The NEDTS provides an open, platform independent standard that permits the Navy to describe information to be captured and delivered electronically without imposing any hardware or software requirements on the contracting community. This application automates day-to-day activities of integrating electronic data deliverables (EDD) from analytical laboratories and presenting the information in customized forms and reports. The application is developed utilizing MS Access as the data repository. ESRI's ArcView GIS and Autodesk's Volo View technology are integrated with the database to provide dynamic maps of on-site monitoring wells. A customized switchboard interface allows for automated retrieval of as-built drawings, charts, reports, and GIS views.

Lockheed Martin Corporation, Metadata Reference System, Redlands, California. Lead technical and database administrator for the Metadata Reference System for the Redlands site. Developed records management plan for administration of office-wide project data and records management system for efficient gathering, storage, and retrieval of all related electronic and hardcopy data.

SWDiv RAC, Naval Environmental Data Transfer Standard (NEDTS), Yermo and Nebo Marine Corp Logistics Bases, Barstow, California. Database design and management of the Navy's Southwest Division Remedial Action Contract (SWDiv RAC) databases for both Yermo and Nebo MCLBs. Developed and implemented NEDTS in a client/server architecture (Access 2000/SQL Server) for integration of data into ArcView GIS for mapping and spatial analysis of various subsurface contaminants. Used ESRI's Spatial Analyst and ModelBuilder extensions to map and analyze areas of contaminant influence, delineate plume extents, and generate contours.

New Cure, Inc., OII Landfill MIS/GIS System, Monterey Park, California. GIS Analyst and Database Administrator working in a design-build capacity to facilitate implementation of a remedial cap design for an EPA Superfund site. Provided AutoCAD and LDD civil/remediation design, hazardous waste management via programming and development of the management information system (MIS) using MS Access and the GIS for associated landfill hazardous materials and gases integrating ESRI's ArcView. Conducted environmental modeling and statistical and trend analysis of methane migration via ESRI's ArcView Spatial Analyst and 3D Analyst extensions. In coordination with the landfill gas consultant, designed and implemented the Well Adjustment Decision Tree programmed in Access for automated well adjustments in the field. Created automated data transfer procedure from GEM 2000 units into Access for analyzing gas composition and calculating flow. Trained staff technicians on effective use of the MIS/GIS System, Well Adjustment Decision Tree, as well as data collection and importing procedures.

Owner, Kyoto Plaza, Gardena, California. Operated and maintained soil vapor extraction system at Kyoto Plaza. Collected air (vapor) samples and conducted evaluation of vacuum, influent/effluent data. Developed MS Access data repository, which included but were not limited to integration of historical vapor extraction data into a standardized relational database design. Responsible for data management and modeling.

Southern California Gas Company, PAH Removal and Geotechnical Investigation, Hanford, California. Supervised and managed the removal of PAH-impacted soil, including subsurface investigation, sampling, and recompaction of fill soil. Ensured and designed proper grading of site utilizing Autodesk's Survey.

Home Savings of America, UST Removal and Upgrade, Irwindale, California. Supervised the removal and replacement of underground storage tanks, clarifiers, and hydraulic lifts at the corporate headquarters of Home Savings of America in Irwindale, CA. Also, performed subsurface investigation and confirmation sampling to achieve closure within the required Los Angeles County and state regulations.

Metropolitan Transportation Authority, Geotechnical Oversight for Red Line Segment 2 and 3, Los Angeles/Hollywood, California. Geotechnical engineer responsible for subsurface investigation and construction monitoring of geological conditions via geological/geotechnical mapping at the tunnel face. Performed geotechnical engineering analysis of settlement data in cooperation with land survey teams and staff geologists/geotechs at the tunnel face during tunnel excavation along Hollywood and Vermont Boulevards. Performed laboratory testing and interpretation of soils, field observation, fill testing, geotechnical engineering analysis including slope stability analysis, utilization of AutoCAD for grading and drainage plans, hydrologic analysis, and geotechnical report preparation.

California Department of Transportation (Caltrans), Advanced Public Transportation Systems Group, Los Angeles, California. Provided computer mapping and analysis of traffic data via MapInfo GIS. Created maps using MapInfo in support of various transportation tasks and updated traffic data in the APTS data repository built in MS Access. Assisted in the project management of the Smart Traveler Kiosk Project and the I-110 Vanpool Support Program.

EDUCATION

MBA, Business Administration (emphasis in GIS), University of Redlands, California, 2001
BS, Geography - Ecosystems & Environmental Engineering, University of California, Los Angeles, 1993

PROFESSIONAL REGISTRATIONS/MEMBERSHIPS

Certified Hazardous Materials Manager (CHMM), Master Level, National, No. 11546
Registered Environmental Professional, No. 280438
Registered Environmental Property Assessor, No. 642775
Asbestos Inspector, California, IBFA-370-98
Alliance of Hazardous Materials Professionals (AHMP)

SPECIAL TRAINING

OSHA 40-hour Hazardous Waste Operations Training
OSHA 8-hour Hazardous Waste Operations Annual Refresher Training
OSHA 8-hour Hazardous Waste Operations Site Supervisor Training
GIS Management Certificate of Completion, ESRI International User Conference
Environmental Modeling Using Spatial Analyst, Certificate of Completion, ESRI International User Conference
Advanced ArcView Certificate of Completion, ESRI
Database Development and Conversion, URISA Annual Conference and Exposition
RACER (Remedial Action Cost Engineering & Requirements System)

SUMMARY OF EXPERIENCE

Brian Tang is a Senior Project Manager at EDI Consultants, Inc. (EDI) in Torrance, California. Mr. Tang has more than 6 year of experience in projects involving due diligence environmental site assessments, property condition assessments, data management, Geographic Information Systems (GIS), subsurface investigations of soil and groundwater contamination, environmental and geotechnical engineering projects for high profile clients throughout the nation.

At EDI, Mr. Tang manages a team performing Phase I and II Environmental Site Assessments, Property Condition Assessments, and other environmental risk assessments for major U.S. banks and lending institutions throughout the nation. In addition, he prepares and reviews technical documents for Phase I and II Environmental Site Assessments.

Mr. Tang is an Environmental Professional who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors. As an Environmental Professional, Mr. Tang must hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience.

RELEVANT PROJECT EXPERIENCE**Phase I & Phase II Environmental Site Assessments, Nationwide**

Project Manager of Phase I and Phase II environmental site assessments for industrial and commercial real estate as well as multifamily dwellings for major U.S. banks and lending institutions throughout the nation. Conducted subsurface investigations of soil, groundwater and soil vapor contamination to assess and determine the need for further investigation and/or remediation as well as underground storage tank removals, cleanup and coordination with local and State governmental agencies for closure of same.

Property Condition Assessments, Nationwide

Project manager for more than 100 property condition assessments (PCAs) for a wide range of clients throughout the western United States. PCAs provide reliable and detailed information on the building's operating systems, overall design and architectural features, and any signs of material physical deterioration or functional obsolescence that could detract from the building's potential to generate income. In addition, he has examined the impact of local zoning regulations, building codes, and any special hazards that may affect the income stability of the property.

EDUCATION

B.S. Environmental Engineering, University of California, Irvine, 2013

Undergraduate Experience**Well Water Treatment**

The purpose of this project is to design two shallow ground water wells for the City of Corona to reduce the demand on the Colorado River by 3,600 acre-ft per year. The project includes the design of an 11,500 ft pipeline to transport the raw well water as well as a treatment facility to treat for turbidity, nitrates, and perchlorates.

Site Planning Report

The goal of this project is to complete a Site Planning Report in compliance of the City of Irvine General Plan for the development of a 1,200 acre planning area centered on a transportation theme of alternative fuels. The planning area is composed of 3,200 dwelling units, a shopping center, a high school, recreational parks and open space to support a population of about 13,000 residents.

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Environmental Professional

Board for Professional Engineers, Land Surveyors, and Geologist – Certified Engineer-in-Training (EIT)

SUMMARY OF EXPERIENCE

Jovani Correa is a recent alumnus from the University of California, Berkeley, where he received his B.A. in Architecture. He has 6 months of experience in projects involving due diligence environmental site assessments, environmental oversight, subsurface investigations of soil for high profile clients throughout the nation. At EDI, Mr. Correa currently manages Phase I and II Environmental Site Assessment projects and other environmental risk assessments for major U.S. banks and lending institutions throughout the nation.

He also has extensive experience with using 3-D dimensional and vector graphic architectural software, including Rhino and associated Adobe Creative Suite tools. He has assisted in large-scale projects, adhering to community-driven design practices, that have culminated in the construction of physical structures.

RELEVANT PROJECT EXPERIENCE**Architectural Intern, urbz (NGO)****Bogotá, Colombia & Mumbai, India**

- Drafted CAD drawings of construction details with field experts to be read by contractors
- Engaged with clients and community members using oral and visual materials, such as renders, communicating project activities so that they can be integrated into the project
- Collaborated with a variety of organizations brainstorming designs, counting materials for budget processes, and administering workshops for locals
- Worked hands-on with bamboo, practicing immunization techniques for maintenance and connections with bent and threaded rebar
