Here are your minimum setbacks from the code for R-6 and C-2, as well as building height for both.

Would be interesting to see if you can get an easement from the neighbor to subdivide into R-2, sell off that land to a resi developer, and then have the frontage on 281 separately. Would ease rezoning hassles. Might be worth a call to the city to see what they would like to see at that parcel.

Utilities-

Water/Sewer- SAWS- <https://www.saws.org/> - Looks like there was a capital project specifically for Mission De Lago offsite sewer improvements requiring a 15" line (27" oversized)- Please confirm with them. Can request as-built plans if

necessary on their website.

Electricity- CPS Energy- <https://www.cpsenergy.com/en.html> Unclear if there is a gas line nearby.

TXDOT- TxDOT typically won't issue a final permit against a purely speculative curb cut — but a call to Christen Longoria's office can still get you a preliminary read on whether a location along this frontage is even feasible under their spacing/sight-distance rules, which is useful marketing info even before there's a specific buyer or site plan in hand.

Christen Longoria, P.E. Bexar Metro Area Engineer, TxDOT San Antonio District

Office: Bexar Metro Area Office

Address: 9320 SE Loop 410, San Antonio, TX 78223

Phone: 210-633-1401
