Southeast Valley Economic Drivers

SkyBridge Arizona

SkyBridge is a game-changing, 435-acre multi-use gateway development home to an expedited, joint U.S.-Mexico Customs inspections facility. Strategically located in the rapidly growing, greater Phoenix area, SkyBridge promises businesses more efficiency and more connections with fewer steps.

Meta Platforms Data Center

Online social media giant Meta Platforms, parent of Facebook, announced an expansion of its Mesa Data Center, with plans to add three new buildings that will increase the campus to five buildings with more than 2.5 million square feet of space. This expansion will raise Meta's investment in Arizona to more than \$1 billion and eventually will be home to more than 200 jobs, along with 2,000 construction workers, an increase from 500 construction jobs announced previously. The complex is scheduled for completion in 2026.

LG Battery Plant

LG Energy Solution said it will quadruple its initial budget for a battery manufacturing plant in Queen Creek and now plans to spend \$5.5 billion for the project, which will create thousands of jobs and could become the largest stand-alone battery complex in North America.

The complex will consist of two manufacturing facilities, one for cylindrical batteries for electric vehicles and another for lithium iron phosphate batteries for energy storage systems. Production is expected to start in 2025.

Apple Data Center

Apple Inc. will establish a command center for its global data networks in Mesa, promising to invest \$2 billion over 10 years. The east Mesa center is expected to create 150 full-time Apple jobs and could generate up to 500 construction and trade jobs. As part of the deal, Apple is expected to build and finance solar projects that provide enough energy to power more than 14,000 Arizona homes.

Amazon's New Storage and Distribution Center

Amazon's new 1.2 million-square-foot facility in Mesa, Arizona is its largest distribution center in the nation. The "storage and distribution center," the first of its kind in the state, promises to make remote shopping a little easier for people throughout metro Phoenix. The company has more than 33,000 full and part-time employees, 17 "fulfillment and sorting centers", and 13 "delivery stations" in Arizona.

Google Data Center

The facility is planned on 187 acres of farmland on the northwest corner of Elliot and Sossaman roads. It will join five other planned or existing data centers in the Elliot Road Technology Corridor.

Construction is expected to begin within the next five years, with the first 250,000 square feet in place by July 2025. Google is expected to spend \$1 billion to build 750,000 square feet by July 2029.

Regional Overview

“Arizona is a growing innovation hub, geographically situated between our existing operations in Southern California and New Mexico. This will allow us to accelerate progress from conceptual design to production to final assembly at scale as we capitalize on the many advantages Mesa and the Greater Phoenix area offer”

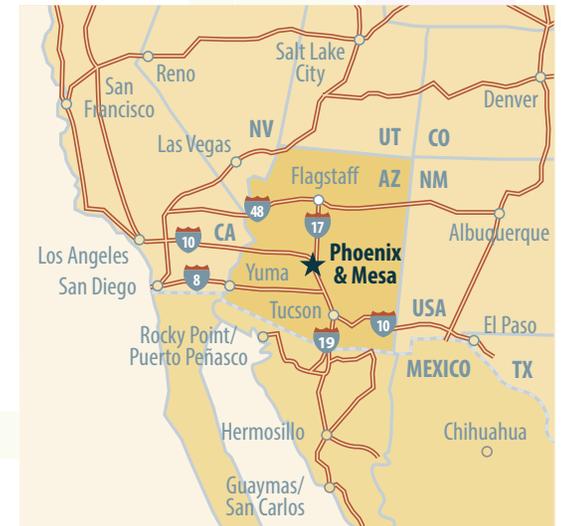

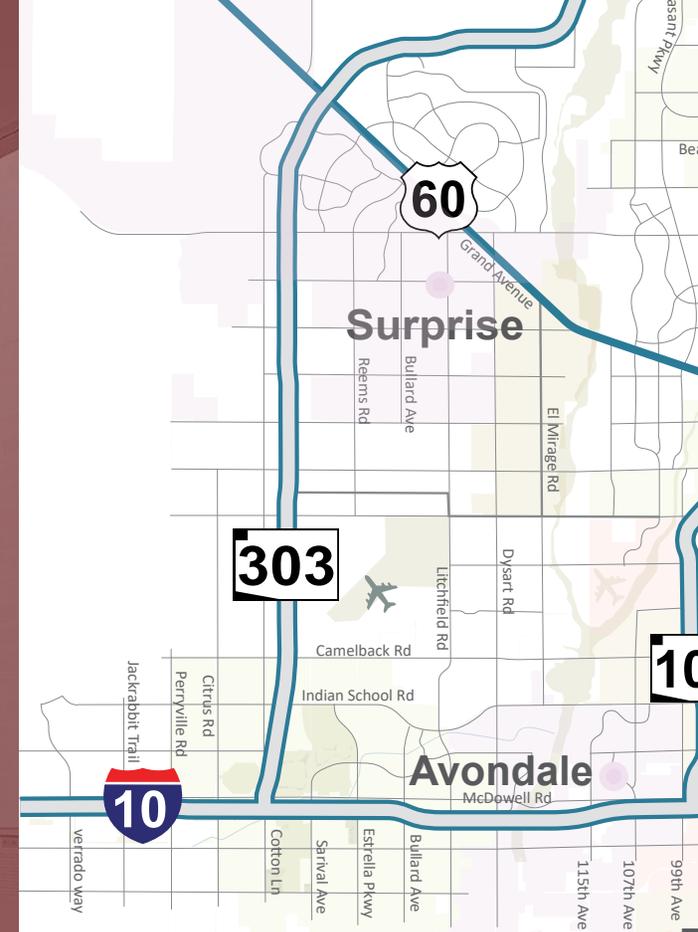

-Michael Colgazier, CEO of Virgin Galactic on New Manufacturing Facility in Mesa, Arizona

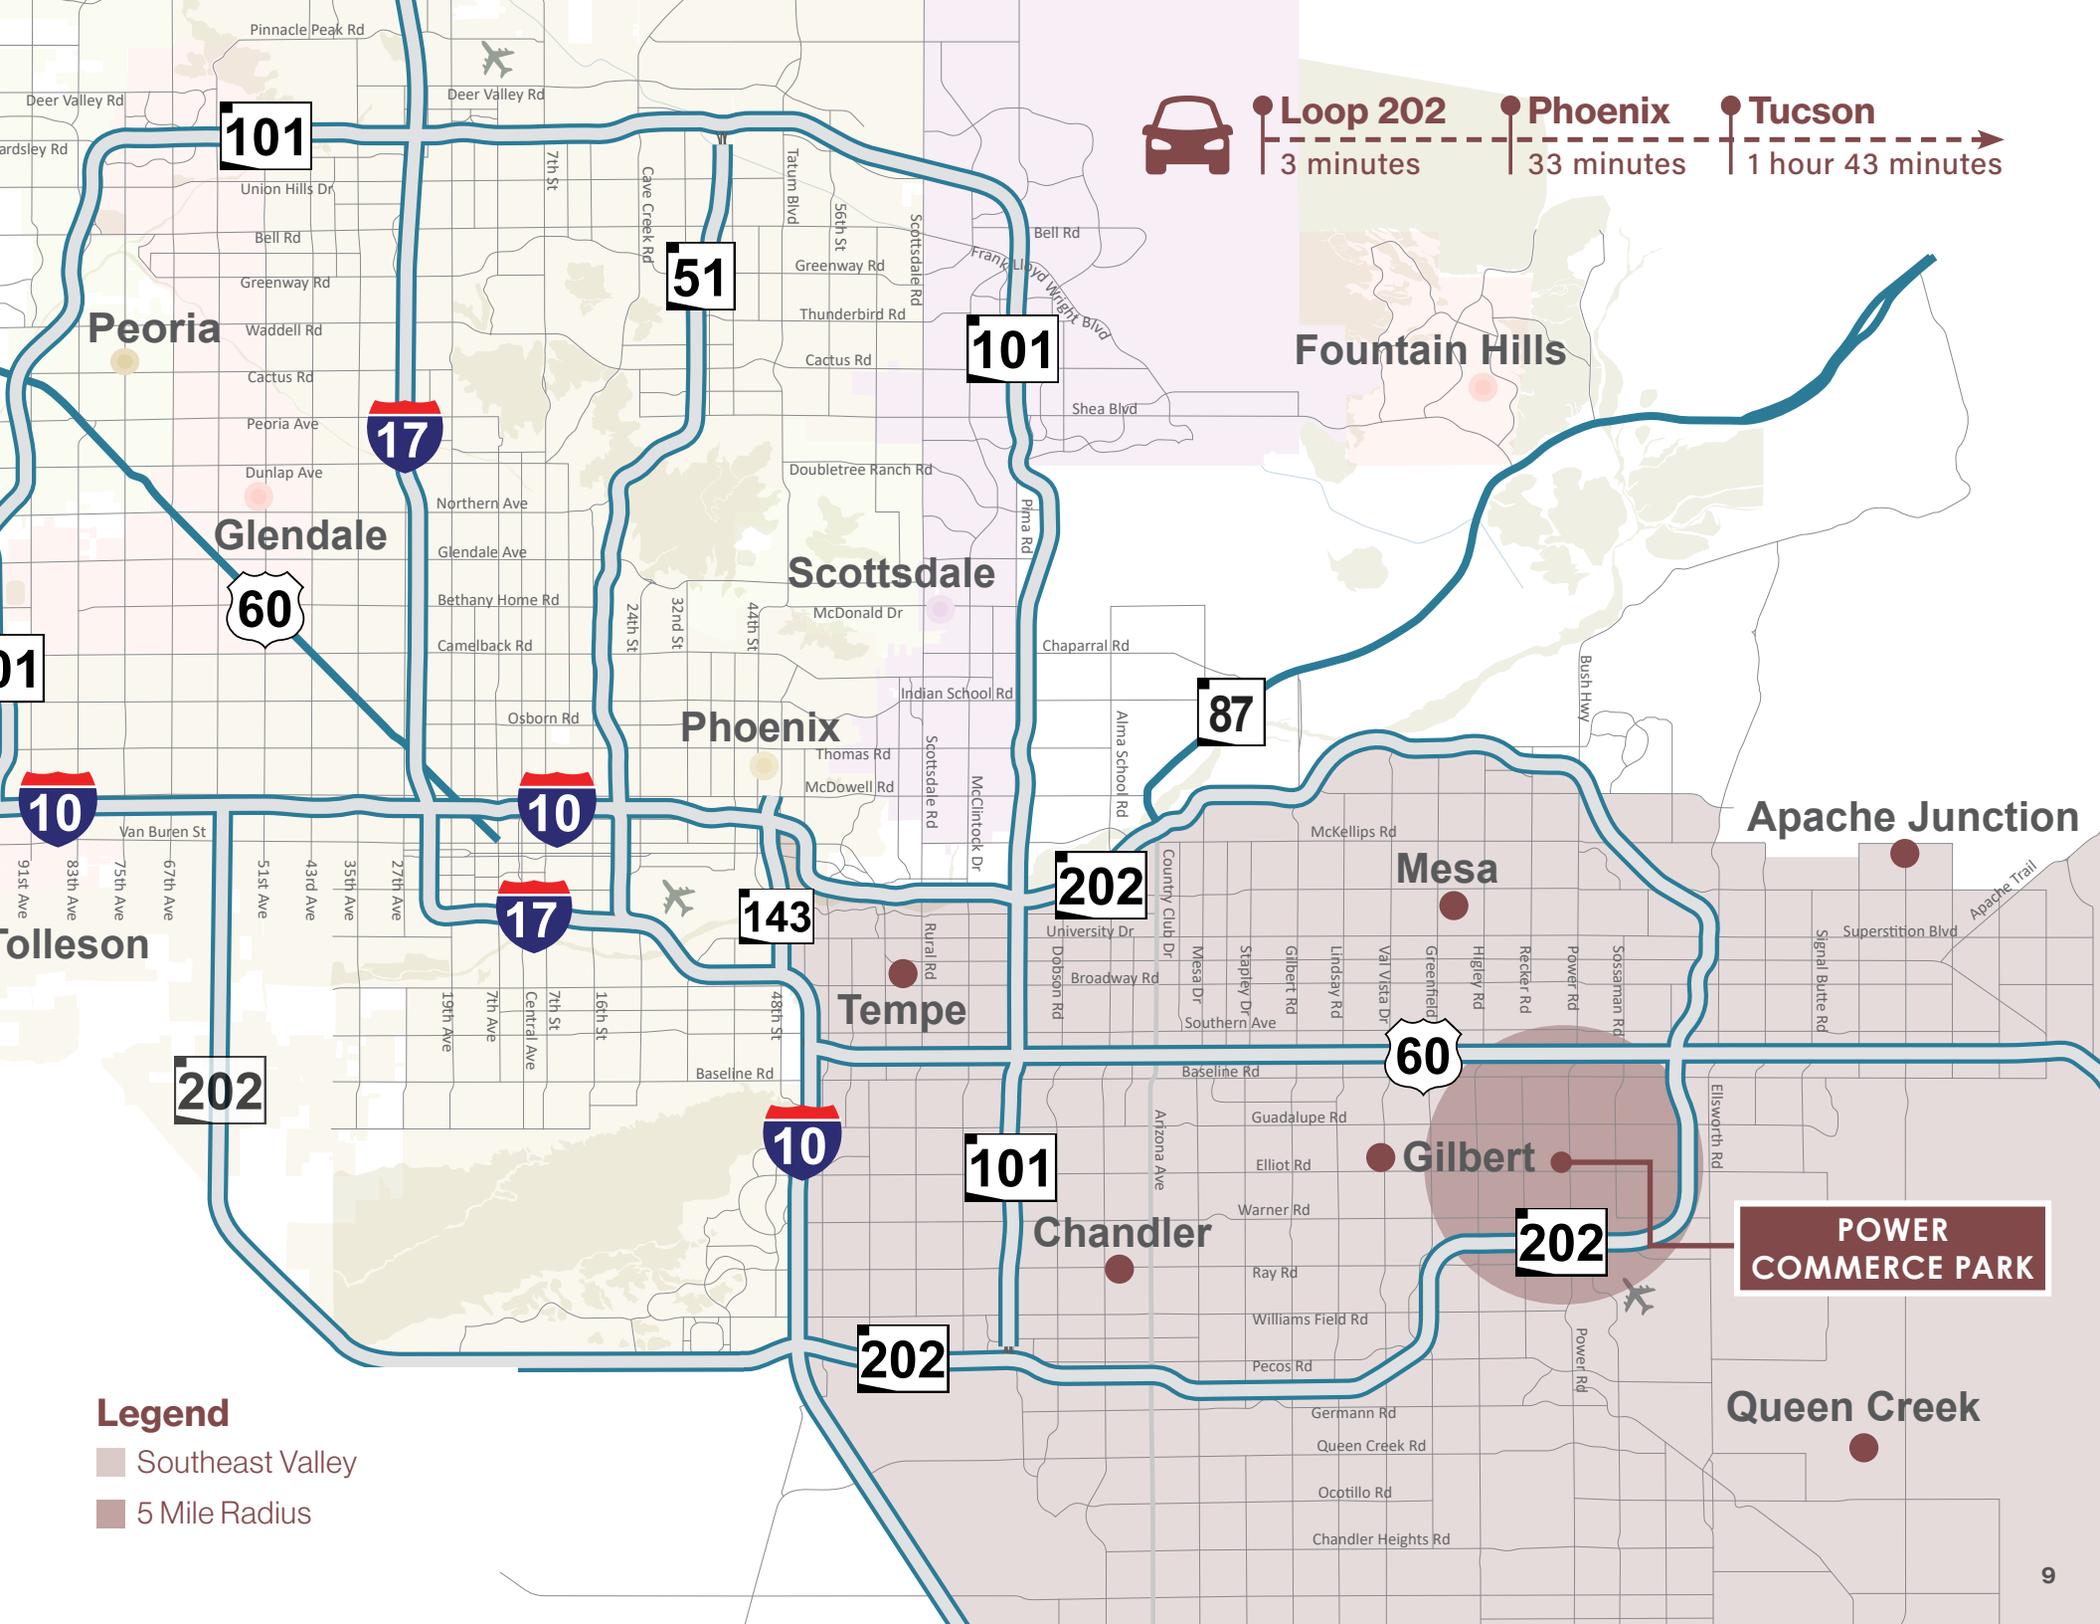

Located in the fastest-growing county in the nation, the Southeast Valley is a major business and employment center, with well-known global brands, plus homegrown firms and some of the most creative startup ventures imaginable.
