PERMIT TO USE AN EXISTING WELL

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT

CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not ensure that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
- 3) Approved pursuant to CRS 37-90-137 (2), for a change/expansion of use of an existing well (ground water pond) with permit no. 67059-F, exposing and diverting ground water tributary to Cave Spring Canyon, tributary to Yellow Jacket Canyon, tributary to McElmo Creek, at a point where water is available for appropriation. This well (pond) is known as Cave Spring Pond #1.
- 4) The issuance of this permit hereby cancels permit no. 67059-F.
- 5) The approval of this permit does not grant a water right. This well (pond) is subject to administration by the Division Engineer in accordance with applicable decrees, statutes, rules and regulations.
- 6) The use of ground water, in addition to evaporation, is limited to the irrigation of 40.0 acres (occurring approximately within 10 acres north of the pond and within 40 acres south of the pond as shown on the Exhibit A), fire protection and incidental stock watering. No other use of water is allowed unless a permit therefor is approved.
- 7) The pumping rate of this well shall not exceed 0.5 cfs, or 224.4 gpm.
- 8) The average annual amount of ground water to be appropriated shall not exceed 15.0 acre-feet for evaporation off of a 2.26 acre pond and 90.0 acre-feet/year for the pumped uses.
- 9) The owner shall mark the well (pond) in a conspicuous place with well permit number(s) and court case number(s) as appropriate. The owner shall take necessary means and precautions to preserve these markings.
- 10) A totalizing flow meter must be installed so as to measure any pumping from this pond and maintained in good working order. Permanent records of all diversions from the pond shall be maintained by the well owner (recorded at least annually) and submitted to the Division Engineer upon request.
- 11) This well (pond) must be located not more than 200 feet from the location specified on this permit. The boundaries of the pond shall be more than 600 feet from any existing well, completed in the same aquifer, that is not owned by the applicant.
- 12) Pursuant to Policy 2014-1 of the State Board of Examiners of Water Well Construction and Pump Installation Contractors (Board), the minimum construction standards in Rule 10 of the Water Well Construction Rules shall be waived for ground water ponds, except, compliance with Rule 10.1 and its subsections 10.1.2, 10.1.4, 10.1.6 and Rule 10.2 and its subsection 10.2.1 is required. The owner of the ground water pond shall take necessary means and precautions to prevent contaminants from entering the ground water pond.

NOTE: This well (pond) is known as Cave Spring Pond #1 in Division 7 Water Court case no. 08CW12 (consolidated case nos. 08CW12 and 08CW13) and case no. 16CW3045 (pending).
