EXECUTIVE SUMMARY

KBC Advisors is pleased to present JFK Park—available for lease for the first time — 69,088-square feet (1.59 acres), of heavy-powered paved land conveniently located one block north of JFK Airport between Rockaway Boulevard and Nassau Expressway in Queens, NY (the “Property”). The Property sits directly adjacent to New York City’s largest public EV charging facility (currently under development and will feature 65 public charging stations upon completion in late 2026).

The Property features direct access to major transportation corridors and unparalleled proximity to one of the nation’s busiest airport hubs. Supported by up to 6 megawatts of power capacity, the Property is well equipped for EV, battery storage, and countless other logistics and airport centric uses.

JFK Park represents a one-of-a-kind opportunity to occupy premier industrial real estate in one of New York City’s most strategic transportation and logistics submarkets.
