BONUS DEPRECIATION - NOW RETURNED TO 100%

Bonus depreciation is a powerful tax-saving strategy that offers businesses and investors significant financial benefits. It was introduced as part of the Tax Cuts and Jobs Act (TCJA) in 2017, aiming to stimulate economic growth and incentivize investments in qualifying assets. It has now been renewed for 2025 now that the BBB is signed into law.

What is Bonus Depreciation?

Depreciation is an accounting method used to allocate the cost of tangible assets over their useful lives. Bonus depreciation allows taxpayers to deduct a substantial portion of the asset's cost in the year of acquisition, providing an immediate tax benefit rather than spreading it over several years.

Key Features of Bonus Depreciation:

a. Restoration of 100% Bonus Depreciation: The new Big Beautiful Bill that was signed into law reinstates 100% bonus depreciation for qualified property acquired and placed in service between January 20, 2025, and December 31, 2029. This would allow businesses to fully expense eligible assets in the year they are placed in service, enhancing cash flow and investment incentives.

b. Increased Deduction: Under the TCJA, bonus depreciation was initially set at 100% for qualified assets acquired between September 27, 2017, and January 1, 2023. This allowed businesses to deduct the full cost of qualifying assets in the first year.

c. Qualified Assets: Bonus depreciation applies to tangible assets with a recovery period of 20 years or less, such as machinery, equipment, furniture, and certain improvements to buildings.

d. Used and New Assets: Unlike Section 179 expensing, bonus depreciation is available for both new and used assets, making it a valuable tool for businesses acquiring pre-owned equipment.
