

# Camarillo

advanced technology  
and manufacturing

## Where Innovation Thrives

Our doors are wide open for new ideas and the companies that come up with them. In fact, many well known tech manufacturers were born and raised in business-friendly Camarillo. We're home to companies involved in research and development and advanced manufacturing across industries: aerospace, robotics, semiconductor, life science, and more.

## Build Your Business in Camarillo

With 11 million square feet of industrial real estate, Camarillo is an ideal location for design and production. Plus, Camarillo offers ready access to a pool of skilled labor. When your final product is ready, distribution is simple: our mid-sized city is connected to the rest of the country by road and rail—and the rest of the world via the Port of Hueneme.

## We're Ready to Help

Camarillo is already home to over 100 successful manufacturing operations. If you're ready to join them, we're ready to help. Along with federal-level incentives, manufacturers coming to Camarillo can take advantage of the local City of Camarillo Business Loan Fund, the state-sponsored California Competes Tax Credit, and countless other resources.

Together, we can make something great.
