

**GENERAL NOTES:**  
1. The manufacturer is not responsible for the design of the building structure or the design of the building components. The manufacturer is responsible for the design of the building components and for the design of the building structure to the extent that the manufacturer is required to design the building structure or the design of the building components. The manufacturer is not responsible for the design of the building structure or the design of the building components to the extent that the manufacturer is not required to design the building structure or the design of the building components. The manufacturer is not responsible for the design of the building structure or the design of the building components to the extent that the manufacturer is not required to design the building structure or the design of the building components.

**WARRANTY:**  
The manufacturer warrants that the building components will be free from defects in material and workmanship for a period of 24 months from the date of installation. This warranty is limited to the building components and does not cover the building structure or the design of the building components. The manufacturer is not responsible for the design of the building structure or the design of the building components to the extent that the manufacturer is not required to design the building structure or the design of the building components.

**INSTALLATION:**  
The building components shall be installed in accordance with the manufacturer's instructions. The manufacturer is not responsible for the design of the building structure or the design of the building components to the extent that the manufacturer is not required to design the building structure or the design of the building components.

**MAINTENANCE:**  
The building components shall be maintained in accordance with the manufacturer's instructions. The manufacturer is not responsible for the design of the building structure or the design of the building components to the extent that the manufacturer is not required to design the building structure or the design of the building components.

**DISCLAIMER:**  
The manufacturer disclaims any liability for the design of the building structure or the design of the building components to the extent that the manufacturer is not required to design the building structure or the design of the building components.

2a	E	1	7.2	15.1	2	-8.2	-24.6	4	0.750	6.000	11.50

NOTES FOR REACTIONS

- 1. Reactions shown are based on dead, live, wind, and seismic loads.
- 2. Reactions are shown in Kips (K).
- 3. Reactions are shown for each column.
- 4. Reactions are shown for each frame line.
- 5. Reactions are shown for each column height.
- 6. Reactions are shown for each column width.
- 7. Reactions are shown for each column depth.
- 8. Reactions are shown for each column length.
- 9. Reactions are shown for each column area.
- 10. Reactions are shown for each column volume.
- 11. Reactions are shown for each column weight.
- 12. Reactions are shown for each column mass.
- 13. Reactions are shown for each column moment.
- 14. Reactions are shown for each column force.
- 15. Reactions are shown for each column torque.
- 16. Reactions are shown for each column energy.
- 17. Reactions are shown for each column power.
- 18. Reactions are shown for each column heat.
- 19. Reactions are shown for each column work.
- 20. Reactions are shown for each column cost.
