Pinnacle Tower is extremely unique in that the building's power supply is **redundantly backed up by separate feeds from separate substations**, making the likelihood of an outage virtually zero.

Key Features of Connectivity

7 fiber providers can provide dedicated, business grade internet access with guaranteed upload and download speeds.

Multiple Points of Entry on different sides of the building and diverse riser pathways allow tenants to have maximum redundancy to mitigate the risk of an outage.

Management has documented agreements in place with carriers to support seamless and timely provision of services to tenants.

Telecom equipment is kept in a protected space, separate from other utilities reducing the potential for service disruption.

Public Wi-Fi is provided for free by building management in common areas.

Additional riser capacity is available to support future needs of tenants and ISP's throughout the entire building.

Back-up generator for emergency fire/life-safety use only.

Coaxial cabling can provide bundled phone, cable TV, and basic internet.
