NEWS

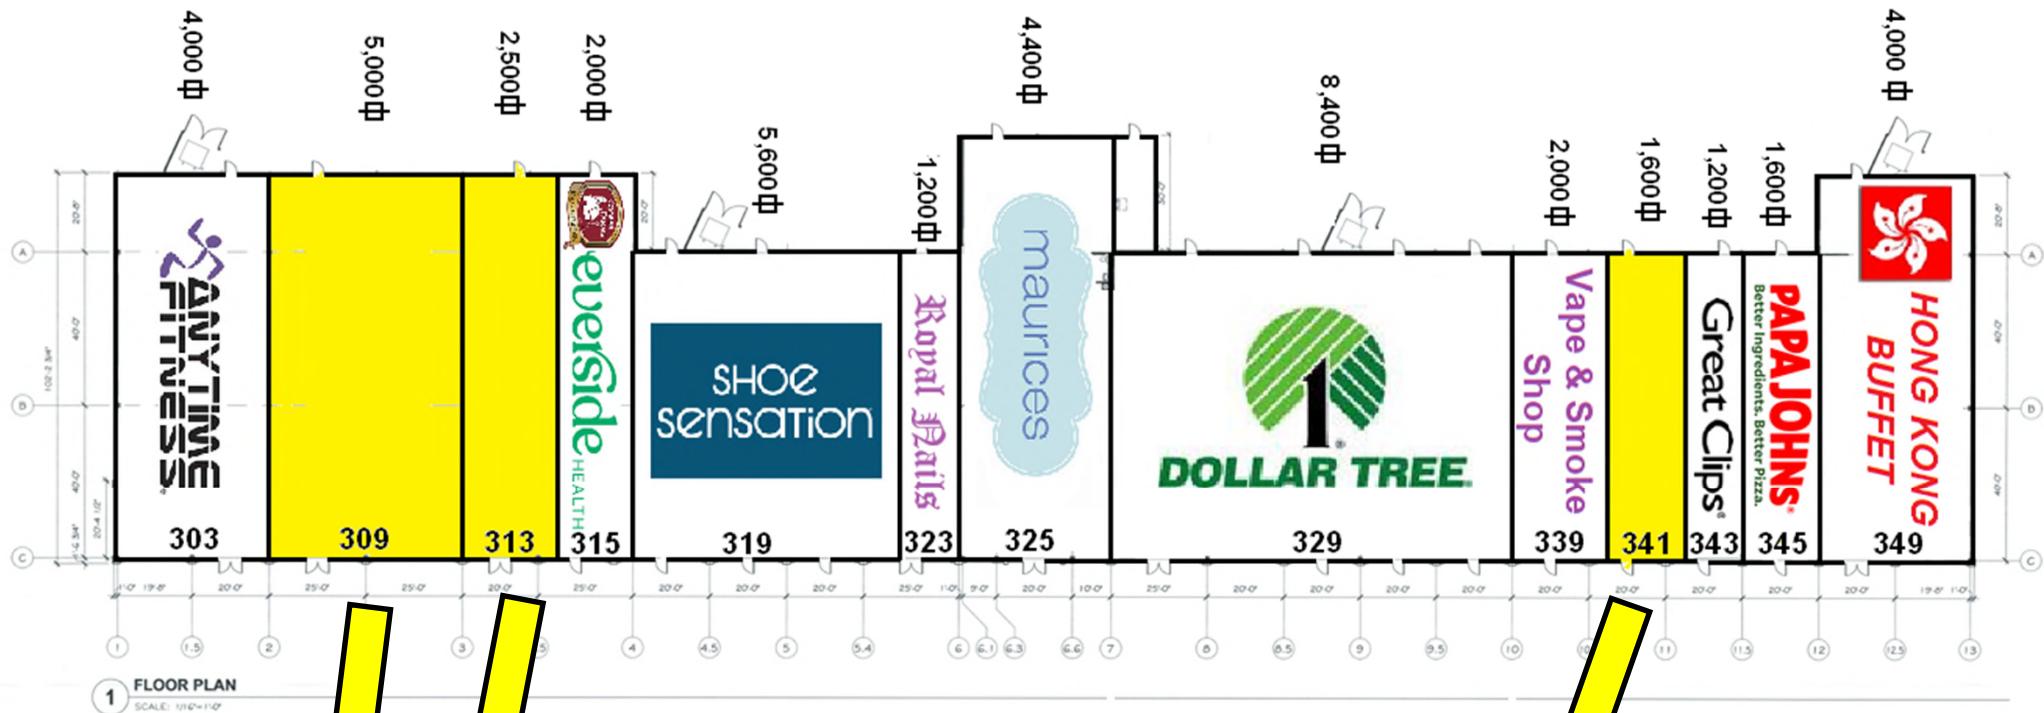

Thor Equities Targets 500MW Ohio Data Center Campus With Land Buy

August 15, 2025

The company this week announced the acquisition of a **221-acre site in Van Wert** County, Ohio, for data center development. The 221 acres is part of a larger "megasite" that is 1,475 acres northeast of the center of Van Wert and **adjacent to The Van Wert Towne Center**. Thor said the campus could deliver up to 500MW of power. The site has "potential to expand significantly" beyond the initial 221 acres, according to the firm. Timelines for development weren't shared. The data center will house and operate computing hardware such as servers, storage devices, and network equipment.

Brent Stevens, executive director of the Van Wert Area Economic Development Corp., confirmed the scope of the project: an estimated **\$2 billion to \$4 billion in investment** and **creation of about 250 jobs**.

AREA INFO

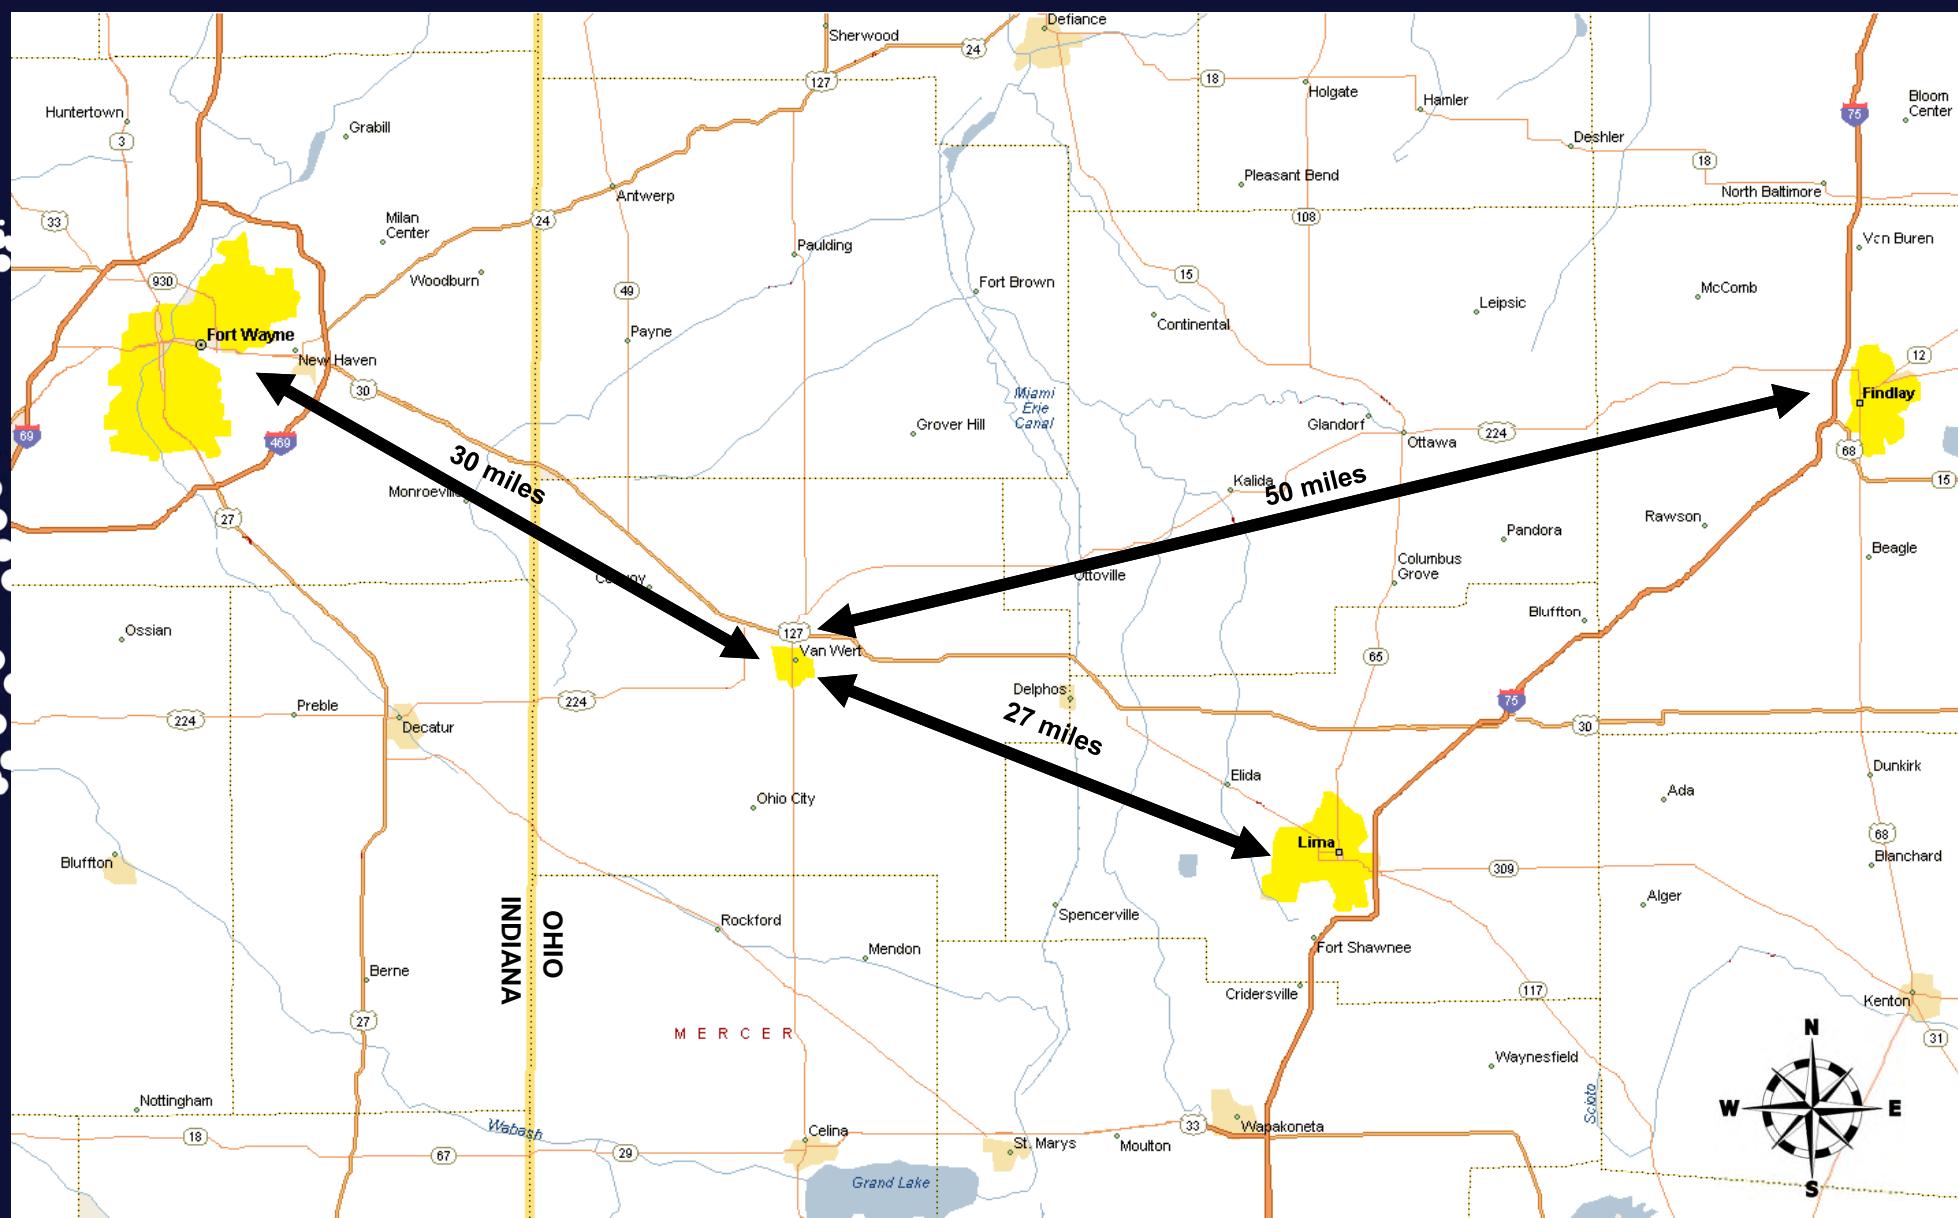

The Van Wert Towne Center is located in the city of Van Wert, Ohio. Van Wert sits approximately 30 miles from Fort Wayne Indiana to the west and 30 miles from Lima Ohio to the east. The Towne Center sits at the intersection of US 30 and SR 127/224 on the north end of Van Wert. US 30 is a major four lane divided highway traffic corridor which serves as a connector to cities such as Fort Wayne Indiana and Chicago Illinois to the west as well as Cleveland and Pittsburgh to the east while US 127/224 connects the NE Ohio Toledo markets to the southern Ohio markets such as Dayton and Cincinnati.

As the county seat, Van Wert serves a broad trade area of over 85,000 people much larger than the population of the immediate city limits. The city of Van Wert pulls from a trade area approximately 25 minutes and over 25 miles from the city limits due to the large rural population that live within the immediate trade area of Van Wert. The Towne Center is very accessible as it sits at the intersection of US 30 and SR 127 / 224 and allows for this broad trade area population to access the center very quickly.

As well as this captured audience within the immediate trade area (between Fort Wayne, Indiana approximately 30 miles to the west and Mansfield Ohio 105 miles to the east) there are extremely limited highway service and restaurant options along the US 30. This makes the Van Wert Towne Center a great opportunity to capture the strong transient traffic that travels along US 30 daily.

REGIONAL MAP

VAN WERT SUPER SITE

The City of Van Wert is one of only two sites in the state of Ohio that have been given both the opportunity and the backing in conjunction with the State of Ohio to create a “**Super Site**” development. These **Super Sites** are to be shovel-ready development sites with infrastructure in place to support massive industrial, distribution, and/or manufacturing opportunities to create jobs in Ohio.

The selection of these sites was heavily influenced by **key criteria** such as:

- ◆ **Proximity** to major highways and transportation routes
- ◆ **Good access** to regional and international airport services
- ◆ **Ample employment** workforce population from a broad area
- ◆ **Strong local support** for economic growth and investment into community (\$50 million expansion of Central Mutual Insurance headquarters and a brand new high school/middle school with a regional state of the art performing arts center)
