Erosion Control:

May bales shall be installed as necessary to protect slopes and unfinished drainage structures. Diversion ditches shall be constructed as necessary to intercept surface runoff before it reaches the cut slope. Runoff water shall be directed to siltation pond on adjacent property to north of construction site.

The contractor shall maintain all erosion checks during the entire construction period, until satisfactory ground cover has been established. Maintenance shall consist of silt removal, hay bale replacement, ditch cleaning, and any other actions required to keep the erosion checks functional.
