Residential Mixed Use

Residential Mixed Use Development

Zones

RS, RP, BN, BC, IP, IL, HC, & U

Description

This land use designation has a density of 2.51 to 8 dwelling units per acre (gross). Its character is medium density residential neighborhoods with some commercial and/or low impact light industrial area along collector and arterial streets.

Highlights

- Primarily residential with 5% - 50% of gross parcel area in commercial or low-impact light industrial.
- Land use character: neighborhood-oriented, such as nursery, convenience store, restaurant, local retail, doctor's/ dentist's office, bank/credit union, barber/hair salon, gas station, small flexible industrial building
- Single-family detached; townhouses; duplexes; single-family live/work units; residential/retail/commercial
- Small residential lots encouraged.

Goals for Mixed-Use Development

- To build neighborhoods with reasonable access to services.
- To encourage innovative design, creative placement, and sustainable function of structures
- To conserve open space and agricultural land
- To encourage uses that are compatible with each other and surrounding land uses
- To provide opportunities for quality affordable housing and transit-friendly development
- To beautify the community in a cohesive design
- To promote efficient use of resources
- To encourage smart-growth development

Mixed-Use Types

Mixed-Use development is divided into two types:

Residential Mixed Use has a lower density residential focus with existing neighborhood commercial services available within one quarter(1/4)-mile walking distance. Designs should be arranged in neighborhood settings with commercial along collectors and arterials.

Community Mixed Use has a regional commercial and light industrial/industrial park focus with higher density residential. Designs should be arranged with commercial or light industrial/industrial parks on collectors and arterials with integrated high-density residential.

Nampa's Mixed-Use Elements

Mixed-use development should contain a variety of elements that make them an attractive asset to the community. A few of many possible features are listed below:

- A variety of housing types and pricing levels
- Professional residential uses such as a live/work, retail with residential above, offices that blend within residential settings
- Easy access to services and job centers
- A neighborhood marketplace with a mix of commercial/services
- Central gathering areas
- Transit-oriented design
- Access to recreational elements, parks, pathways, and open space for residents
- Safe transportation/street system
- Aesthetically pleasing architecture, streetscapes, and landscaping
- Attractive signage and community artwork
- High-quality design
- Business campus with amenities for workers
- Connectivity
