SDSU WEST - MISSION VALLEY EXTENSION CAMPUS

The development of SDSU Mission Valley plans to serve higher education, the public, and the community. This mixed-use development, with its emphasis on transit-oriented design and various amenities, will be a valuable addition to the San Diego State University (SDSU) campus and the surrounding area.

The inclusion of Snapdragon Stadium is particularly noteworthy, as it will provide a home for the university's sports programs and serve as a venue for various community events. The Innovation District is also an exciting aspect, as it can foster collaboration between the university and local businesses, promoting research, entrepreneurship, and technology transfer.

Housing, a hotel, and retail spaces are essential for creating a vibrant community around the university, potentially attracting students, faculty, and residents alike. The emphasis on community parks and open spaces, including the River Park, is a positive aspect as well, as it contributes to the overall quality of life in the area.

Projects like SDSU Mission Valley can have a significant impact on the local economy and provide numerous opportunities for education, recreation, and economic development. [Fact Sheet](#)

FENTON PARKWAY BRIDGE - CONNECTING MISSION VALLEY

The project involves construction and operation of a multimodal (i.e., vehicular, bicycle, and pedestrian) bridge that spans the San Diego River from north to south. It will connect the southern terminus of Fenton Parkway to the northern terminus of Camino Del Rio North/Mission City Parkway. Construction and operation of the bridge would include combined bicycle and pedestrian pathways raised above the travel lanes on either side of the bridge and new lighting consistent with the City's street/bridge design standards.
