**HOME OF THE DISRUPTIVE BIOTECH**

# Where elite scientists build their companies.

At ground zero of San Diego's life sciences ecosystem, mixing the world's most innovative biotech companies and research institutions. Attract key talent and partnerships with industry, healthcare institutions, and life sciences investors.

## The Location

- ◉ BioInnovation Center with ocean views
- ◉ Across from Torrey Pines Lodge & Trails
- ◉ Modern fitness center and cafe
- ◉ Autoclave room and shipping dock

## The Workspace

- ◉ Configurable HomeLab spaces
- ◉ Private and open office options
- ◉ Fully stocked kitchen amenities
- ◉ Fully-integrated Operational Support

## The Unfair Advantages

- ◉ Powered by LabFellows Technology
- ◉ Discounts on lab supplies & equipment
- ◉ Work across the HomeLab Network
- ◉ Investor and corporate partnerships

# Go From Startup To IPO And Beyond

Compete from the Lab Of the Future with all these unfair advantages:

## Plug 'n Play Workspaces

- Flexible Lab & Office Suites
- Shared Community Lab & EQP
- On-Demand GMP Clean Rooms
- Priority Access to UCSD Cores

## High-touch Experience

- Accelerator and Residency Programs
- Fully-managed LabOps, Facilities, EHS, IT, and Source-to-Pay Services
- Secure, Remote-controlled Facilities

## LabFellows Technology

- LabFellows Cloud Apps
- Remote Lab Assistants
- 24/7 Lab Monitoring
- Mobile App (Android/iOS)

## HomeLab Fellows Network

- Capital & Business Dev support
- Group Purchasing Discounts
- VIP Events & Workshops with Top VCs & Startup Mentors

Welcome to Your Workspace

## Where Science Meets Technology To Do Life's Best Work.

Pre-wired for lab automation, monitoring, and remote access control. Standard utilities and backup power included so you can spin up experiments in minutes.

# World-class Amenities

## Community Lab

Access shared equipment and GMP Clean Rooms in the HomeLab Network.

## BioInnovation Center

Listen to luminaries, book meeting rooms, or grab a hot desk.

## Atrium and Wraparound Terrace

Perfect event space for team, customer, and investor gatherings.

## Fitness Benefits

Modern fitness center. Checkout complimentary surfboards for the beach.

## Easy Access to Public Transportation

Near MTS Trolley Station. On-site bike storage and repair tools.

## Cafe & Restaurant

Locally sourced service breakfast, lunch, and happy hour.

## Autoclave & Industrial Dishwashing

High-performance equipment to avoid contamination and ensure safety.

## Centralized Shipping & Receiving

Seamless support for your packages and deliveries.

## Our Team

We aspire to achieve success through diversity and inclusion of people and technology. The best teams win. And the best teams are the most diverse ones. We set the example by our team, the founders we select, our partners, and people across the world that our companies serve.

We develop unfair advantages of digitizing business and lab operational processes that reduce burn and extend runway for our teams to outcompete others too afraid to embrace technology.

**Building a Disruptive Biotech?**

**Request A Tour**

+1 (833) 4LabOps

[sales@homelab.com](mailto:sales@homelab.com)

11011 N. Torrey Pines Rd., La Jolla, CA 92037

A modern building with large glass windows and a flat roof is shown at night. The building is illuminated from within, and its reflection is visible in the water in the foreground. A large, semi-transparent blue speech bubble is overlaid on the image, containing the text "Thank You! Questions?". The speech bubble has a thick blue outline and a lighter blue fill. The text is in a white, sans-serif font. The background is a dark blue sky with some clouds.

**Thank You!**  
**Questions?**

A photograph of a modern building at night, featuring a blue neon outline that traces its architectural lines. A large, semi-transparent circular graphic with concentric rings and a central vertical bar is overlaid on the image. The word "Appendix" is written in white, bold, sans-serif font across the center of the image.

Help

Powering The World's Best Labs!

# HomeLab Fellows Network

Through our HomeLab Fellows Network access flexible workspaces, lab equipment, and services anywhere your team is. Meet potential mentors, partners, and customers to fuel biotech development and business disruption like never before.

# Our Approach

We believe that disruptive biotechs transcend boundaries: they can be built anywhere, by anyone and in any corner of the economy, from curing rare diseases at scale to mass-producing lab-grown meat. We want to find and be a home to these companies.

We partner with founders around the world, across life sciences and digital health applications, and at various stages, primarily before success is obvious.

**Our mission** is simple: Back disruptive biotechs inventing the future, and become founders' most trusted partner by providing all the space and operational support they need to do more science. We measure our success not merely by helping founders build toward exceptional exits, but by the impact we create through our mission-driven bioinnovation.

# Challenges Emerging Biotechs Face

The challenges biotech companies face today should not be finding and running a lab. Often, scientists and lab teams spend valuable science time dealing with operations-related issues or trying to figure out how to integrate new technologies and resources into their workflow. HomeLab helps the best teams win and break free from labs that simply aren't smart enough. Through vertical integration of lab & office space, technology, and service support, we help disruptive biotechs reduce costs and create more efficient operating models so teams can focus on their science while we take care of everything else.

Founded in 2014, we started out by offering monthly memberships (Fellowships) to shared wetlabs and equipment to entrepreneurial academics and small startup teams in our community. Over time, our members began to outgrow this model...  
...and so as our customers evolved, we evolved:

**Our Fellows didn't need to be “graduated”** - they needed more options for dedicated space to grow and scale their teams.

**Our Fellows weren't pining for another “science of beer” event** - they needed more effective and efficient connections to mentors and introductions to capital partners that translated into better development timelines and faster investor checks.

**Our Fellows were not lacking common advice on how to incorporate their companies or file patents** - they needed uncommon tips and tricks to build better biotechs.

# Powered By LabFellows

LabFellows Cloud brings together your business and lab operations all in one place.

## Lab Insights

Leverage scientific and business intelligence to make decisions in seconds with our powerful, built-in data analytics and reporting features.

## FUSION API

Life Sciences APIs and open framework to integrate with systems you already use and trust. FUSION brings them all together.

## Remote Lab Assistance

Dedicated LabFellows Assistants (LFAs) support your team's growth by taking care of your mundane, administrative tasks.

## Mobile App

Manage operations all from your back pocket!

Apple Store 

Google Play
